Step Into Queeny Tower

A New Concept
In Health Care

We've watched it rise to 17 stories, changing the skyline along Kingshighway. And now, Barnes' Queeny Tower is nearing completion. Almost all areas are "open for business" and employees are finding they must answer questions about it every day as interested St. Louisans satisfy their curiosity about this unusual new facility.

Queeny Tower is unique in its approach to patient care. The Tower building combines under one roof, rooms for ambulatory patients and their families; rooms for regular medical and surgical patients; doctors' offices; a deluxe restaurant and many other conveniences.

The concept of a hospital offering self-care accommodations to ambulatory patients is relatively new. There are seven floors with rooms of various sizes available to these patients and their families.

Private doctors' offices occupy five floors, with three floors of hospital type accommodations for the medical or surgical patient. Parking for 182 cars is available on the lower levels. Covered areas enable the patient to enter the building from his car or taxi without exposure to weather.

Total cost of the project will be about $9,000,000. Mr. and Mrs. Edgar M. Queeny's gift of $4,500,000 made the building possible. The balance of the amount was obtained by a self-liquidating loan.

We’ve Had Our Face Lifted!

You are reading the first issue of the Barnes Hospital Bulletin published monthly by the public relations department. This new enlarged newspaper replaces the Hospital Record. It is suggested that every department appoint one “reporter” who will keep the public relations department informed of the news in his department. This person should suggest possible photos and stories about employees. In future issues birth, death and wedding announcements will be included.

Volunteers Honored at Party Nov. 4

Joseph Dieckmann
Given Recognition

In appreciation of their contribution, Barnes Hospital honored its volunteers at a late afternoon party November 4 at Olin Residence Hall. A party is held annually to thank the volunteers who work in conjunction with the Barnes Hospital Auxiliary, the Wishing Well gift shop and the Red Cross.

Special tribute went to Joseph Dieckmann who has given 2,256 hours to Barnes in just 2½ years. The hospital and the Auxiliary presented him an engraved desk set for his outstanding service.

It is known as a man who goes out of his way to “take care of the little things that mean so much to the patient.” He serves as the night and week-end chairman of the volunteer department.

Is Night Chairman

Mrs. Dorothy Kelly, Barnes director of volunteers calls him “indispensable . . . a loyal, fine volunteer. He makes it a special point to visit out-of-town patients who have fewer visits from friends and relatives,” she said. “If he learns that a patient would like something special that cannot be bought at the hospital gift shop, he will shop downtown for him. He recently purchased an inexpensive clock after shopping around for one that the patient could afford.”

Mr. Dieckmann has worked in every phase of volunteer work. He interviews and tours new volunteer applicants, and has helped with the book cart, the courtesy cart, hospitality and baby photos.

A bachelor, Mr. Dieckmann is manager of the settlement options department of General American Life Insurance Company where he has been employed for more than 40 years.

When congratulated on his achievement at the appreciation party, Mr. Dieckmann said, “I enjoy it so much . . . I only wish I had started earlier.”

Barnes Employes Pledge $23,831
To United Fund

Barnes employees not only met their $22,000 goal for the United Fund, but exceeded it by almost $2,000. Pledges during the October campaign totaled $23,831, the highest in Barnes history.

The seven divisions with their final pledges are: Assistant treasurer’s (R. E. Frank), $2,412; controller’s (J. Warmbrodt), $1,644; engineering (J. Claywell), $1,270; miscellaneous (H. E. Panhorst), $936; patient services (D. J. Horsh and J. Greco), $9,360; professional services (C. O. Vermillion), $5,284; public services (N. Craig), $2,875.

At the St. Louis U.F. victory luncheon on October 27, Barnes was congratulated for its one-third increase in pledges over last year.

Board Names Edwin Clark
As Trustee

Edwin M. Clark

Edwin M. Clark, former president of Southwestern Bell Telephone Co., has been appointed to the Barnes Hospital Board of Trustees filling the vacancy created by the death of Benjamin M. Leeb.

Mr. Clark, who is on the Board of Directors of Southwestern Bell, is well known for his civic interest in St. Louis. In 1962 he was president of the St. Louis United Fund and was named “Man of the Year” by the St. Louis Globe-Democrat. He received the St. Louis “Man of the Year” award in 1953.

Mr. Clark was president of Southwestern Bell from July, 1951, until June 30, 1965. In 1954, he was a key figure in the successful campaign for a charter amendment authorizing the city to establish a 1½ of one per cent earnings tax. He was awarded the “Golden Knight of Management” by the St. Louis area council of the National Management Assn. in 1958 for outstanding contributions to business and civic progress.

A native of Danville, Va., Mr. Clark joined Bell Telephone Company in 1924.

REV. FRANK MOORE ANNOUNCES SCHEDULE FOR CHRISTMAS DAY

The Rev. Frank Moore, Barnes Hospital’s Catholic chaplain, announced Holy Mass will be celebrated on Christmas Day in Schwartz Auditorium. The times will be the same as the regular Sunday schedule with masses at 10 a.m. and 12 noon.

A Christmas Thought From Father Moore

Well over 100 years ago, a hospital was built in England for the mentally ill. It was named Bethlehem. Psychiatric patient care at that time centered mostly around physical restraints. Needless to say, noise and confusion emanated from every window and door. Because of these circumstances and the English accent, the hospital’s name evolved from Bethlehem to Bedlam. And so it was called in succeeding years.

Christmas centers about our belief that the Word of God became man, born of Mary at Bethlehem. Christmas cards, shopping for gifts (especially at the last minute), parties, etc., can carry us away till once again we have bedlam. Are you going to celebrate Bethlehem or Bedlam?

Barnes Discusses Automation Uses At State Meeting

Barnes personnel discussed “Computers and Automation for Both Small and Large Hospitals” at the Missouri Hospital Assn. meeting October 26 in Jefferson City.

Those participating were Harry Panhorst, director; John Warmbrodt, controller; Dr. C. O. Vermillion, associate director of patient services; Robert McAuliffe, budget director; Everett Menendez, manager of data processing, and Robert Britton, chief programmer.

The versatility of the computer was stressed. At present Barnes No. 1460 computer is used extensively to speed the work of the accounting department, and also is used in laboratory testing and for re-ordering supplies.

Barnes has had its No. 1460 computer since last February. A No. 360 computer is on order and should arrive in November 1966. The No. 360 will print 1400 lines a minute while the No. 1460 prints 600 lines a minute. With this additional faster computer, more of the hospital’s departments will benefit from the service of both machines.

Queeny Tower Emphasis Is On Total Patient Care
(Continued from page 1)

There are many special features about the building. The lobby’s spacious appearance is created with a two-story ceiling, including a mezzanine on the higher floor from which the ground level can be viewed. The glass windows on two sides of the lobby extend the entire two floors, and are considered by glass manufacturers to be one of the largest settings of window glass in the world. A specially designed Acrilan carpeting, in a blue and blue-green water lily design, is matched in the full-length draperies of the same pattern which hang at the lobby windows. The furniture, of a contemporary design, carries out the color scheme in shades of blue.

Ground Floor
Also located on the ground level is registration for the ambulatory care rooms and the hospital pharmacy, which handles all prescription orders for Barnes Hospital. The pharmacy also will sell other types of sundries.

Laboratories are located on the mezzanine. A diagnostic x-ray unit is on the second floor.

On floors two through five are doctors’ offices of varying size and type. Between 46 and 50 doctors can be housed on these floors. The doctors leasing these facilities planned the utilization of their own space. One unusual feature is that each of these floors is equipped with a closed-circuit television conduit from x-ray so that if desired, the doctors can view x-ray film from their own offices.

The most modern innovations in patient care have been incorporated into the three floors with rooms for persons who require nursing care. Using information obtained from the space age programs now being developed at McDonnell Aircraft Corp., the planners of Queeny Tower developed a central monitoring system for patients.

Monitoring System
It will be possible to take and record the patient’s pulse, blood pressure, and other indications of his condition on a continuous basis when the doctors desire this service. This information can be relayed from each bed to the nurse’s station, where it can be permanently recorded. At the present time, the monitoring techniques used on the astronauts are not sophisticated enough for the critically ill patient. But when physicians feel the procedures are ready for use, Queeny Tower’s system is “go.”

As in all other areas of Queeny Tower, the three patient care floors have taken the patient’s comfort seriously. Carpeting, hospital furniture specially designed for the Tower which is practical yet looks home-like, and many decorative touches provide an atmosphere which is aimed at bolstering the patient’s morale.

Unusual Lighting
An example of this approach is the lighting in the built-in lavatories in the bathrooms. Around each mirror, in a dressing-room effect, are incandescent bulbs arranged vertically. Frequently overhead lighting is used in bathrooms, creating shadows and causing the person’s face to look more gaunt than it actually is,” explained James Claywell, Barnes administrative engineer in charge of the Queeny Tower project. “The side lighting eliminates this. Also, incandescent lighting resolves yellows, gives the patient a truer picture of his coloring.”

Each room has a wall-mounted TV set and individual air conditioning controls. On each of the three floors there are nine private rooms, six semi-private, two bedrooms, and two suites, making a total of 23 beds per floor.

Self Care Floors
For the patient who does not need nursing care, the ambulatory care floors, ten to sixteen, are available. On these floors are 15 corner suites with bedroom and living room, 62 double rooms and 54 king-sized bedrooms. Tastefully decorated with gaily patterned wall treatments, draperies and bedding, the rooms have unusual furniture which was imported from the Orient.

These accommodations have marble appointed dressing rooms, refrigerators, and all the touches of the deluxe class hotel, including room service. At the same time, the patient is close to his doctor or to complete hospital facilities, if he needs them. Or, his family can stay near him, with the comfort that mean even more at such a time.

Swiss Restaurant
Stepping off the elevator on the 17th floor brings the feeling of a gay Swiss chalet, with multi-colored woods, rough-hewn in the delightful European style. The eating facilities in this area, all open to the public, include a restaurant, coffee shop, lounge, and private dining room, with German food a specialty.

Most outstanding feature of the restaurant is the view—which extends for miles over St. Louis—and is seen from almost every table in the eating areas.

Unique Window Glass
Because of the spectacular view which spreads before almost every window in the Tower, windows are of special importance. They are of gold reflective laminated glass throughout. This glass gives one way appearance, reflecting 40 per cent of the light on the brighter side, thus putting the light inside at night, and keeping glare out in the daytime.
A Chat With Mrs. Hackett

The department of nursing wishes to extend to all of you best wishes for a Happy Holiday Season.

Nursing has had a busy year; however, due to the sincere efforts of everyone which included the extra time, working where you were needed even though the areas were unfamiliar, and the different hours made it a profitable one. These contributions do not go unnoticed and are much appreciated by the administration of Barnes Hospital and the administrative staff of the nursing department.

Because of your efforts, we have been able to recruit and retain many nurses on staff. The spirit of "togetherness" which they have found existing here has been the primary reason given by many for their decision to work here at Barnes.

Because of this spirit, and a healthy curiosity on your part, we have been able to implement some innovations for improvement of patient care—and we thank you for your interest and co-operation.

It is only through many people working together for a common goal, that goals are accomplished. Our goal for 1966 will continue to be "Excellence in Patient Care." Let's make it the best year we've ever had at Barnes Hospital!

Josephine Hackett
Director of Nursing

16 L.P.N.'s Join Nursing Staff

Sixteen recent graduates of the practical nurse program sponsored by the St. Louis Board of Education have joined Barnes staff. They were among the 41 graduated at October 21 exercises at the Flaming Pit restaurant in Crestwood.

The new practical nurses and their divisions are: Ethel Adams, 3 McMillan; Elaine Allison, 11200; Jeanette Bayless, 5200; Claudine Bolben, 9200; Barbara Clark, 3 Renard; Sarah Clay, 5200; Eliza Coleman, 5200; Betty Davis, 5200; Catherine Exell, 5200; Pauletta Franklin, 10200; Virginia Holmgarten, 7 Maternity; Lillie Newby, 1200; Rachael Tate, 12200; Rosetta Woods, 3 McMillan; Ruby Woods, 9200; Barbara Young, 5200.

Capping Highlights Students' 1st Year

A class of 80 freshman nursing students was enrolled in the Barnes Hospital School of Nursing September 6, 1965.

The freshman students received their caps in an impressive candlelight ceremony at the Medical School auditorium, Friday evening, September 24. Mrs. Josephine Hackett, Director of Nursing, gave a brief address on the history of the nursing cap. Greetings were presented by Mr. Donald Horsch, associate director of patient services and Miss Helen McMurty, associate director of nursing education. Each student was capped by a faculty member and Miss Diane Busen, president of the Student Association, welcomed the class. The student choir sang several selections.

The color of the band on the freshman nurses' caps indicates the first, second, and third year in school. Freshmen wear pink, Juniors, light blue, and Seniors, royal blue which is also worn after they become graduate nurses.

Barnes Nurses Begin Recruiting in Canada

Recruitment of nurses from Canada was started in August. Two nurses, Miss D. Koziatek and Miss J. Wright spent August 2 to 15 in the Canadian Provinces of New Brunswick and Nova Scotia—better known as part of the Maritime Provinces on the East Coast. Another trip—this time to Quebec, Ottawa, and Montreal—took place from November 1 to 15. Miss S. Hackman and Miss J. Wright made this trip.

Administrative Team Named for Evenings

Barnes Staff is pleased to announce the appointment of five nurses to new positions in evening administration.

Mrs. Jane Edwards, formerly supervisor, Maternity Hospital, has been appointed assistant director, nursing service. Mrs. Edwards is a native of Burlington, Kan. She attended St. Louis University and received her B.S. degree. She also attended some classes at Indiana University. Mrs. Edwards started in the staff development department as an instructor in 1963, then became supervisor of Maternity Hospital. Mrs. Edwards is married and the mother of five children.

Mrs. LaFrances Cockrell, formerly head nurse, 3 McMillan, has been appointed supervisor. Mrs. Cockrell was born in Birmingham, Ala. and was graduated from St. Mary's Infirmary School of Nursing, St. Louis. Mrs. Cockrell is married and the mother of two teen-age daughters.

Miss Sarah McDonald, formerly head nurse on 12200, has also been appointed supervisor. Miss McDonald was born and reared in Evansville, Ind. She attended Indiana University and was graduated with a B.S. in nursing. Miss McDonald joined the Barnes staff in the fall of 1963.

Miss Kathryn McThompson, formerly head nurse on 2418, has been appointed supervisor. Miss McThompson was born in Gidy, Wyo., and then received her elementary and high school education in North Kansas City. She is a graduate of Barnes Hospital School of Nursing and joined the staff of Barnes Hospital in 1960. She is enrolled on a part-time basis as a student at Washington University. Miss McThompson is president of the Barnes Hospital School of Nursing Alumnae Assn.

Miss Patricia Raining, formerly head nurse, 3 Barnard, has also been appointed supervisor. Miss Raining, a native of St. Louisian, is a graduate of Washington University School of Nursing. After graduation she was employed at Barnes and then worked in Chicago for several years. She returned to Barnes in 1962. Miss Raining also is enrolled as a part-time student at Washington University.

Wanted: Reporters!

Many people contribute to the success of any endeavor and this page needs you to help. Your report may constitute a new approach to work, an announcement of achievement of an employee, an idea used, or whatever you consider news-worthy.

Anyone interested in becoming a reporter, please contact Miss Joanne Wright, assistant director of nursing, Barnes Hospital Nursing Office.
NURSES 'ON THE GO' WITH MEETINGS

Barnes Nurses have attended many meetings these past few months. In future issues of this paper, reports of these meetings will be printed. However, if you are especially interested in the topics or subjects listed below, please feel free to contact one of the nurses who attended.

Mrs. G. Powell attended an Institute on Emergency Department Nursing Service held in Chicago, June 7-10, 1965.

Barnes Hospital exhibited their recruitment booth at the Catholic Hospital Association, Annual Meeting, held in St. Louis, June 8-11, 1965. Those who worked in the recruitment booth were: Miss C. Morrison, Miss D. Kozitek, Miss N. Knoten, Miss M. Aubele, Mrs. R. Ziern, Mrs. M. Rhodes, Mrs. A. Darden, Miss M. Schwaegelel, Miss A. Kloepper, Mrs. L. Cockrell, Mrs. M. Jones, Miss J. Wright, and Mrs. E. Mochak.

An interesting Forum on Nursing Service Administration was attended by Mrs. J. Hackett and Miss A. Vose, September 22-24 here in St. Louis.

New York City was the site of a Work Conference on The Nurse Clinician from September 27-October 1. Miss H. McMurtry, Miss J. Wright and Miss A. Vose attended this conference.

The annual meeting of the Missouri State Nurses' Association held in Kansas City, Missouri, September 30-October 2, was attended by Mrs. G. Gunness, Miss C. Morrison, and Mrs. B. McIntosh.

Three nurses, Miss M. O'Connell, Miss S. Hackman and Miss M. Schneider attended a Cardiac Nursing Conference, American College of Obstetricians and Gynecologists, District VII, held on October 4-6 in Gatlinburg, Tenn.

More Responsibilitites Accepted By Nurses Recently Promoted

Mrs. C. Bomberry, formerly assistant supervisor of Maternity Hospital Nursery, has been appointed superviser for all of Maternity Hospital.

Mrs. Bomberry, a graduate of Washington University School of Nursing, has had a wide range of experience. She was a head nurse four years in Maternity Hospital, then joined the Army Nurse Corps. After her marriage, she worked at Army Hospital in Fort Sill, Okla. She returned to Barnes in July, 1964. Mrs. Bomberry is the mother of four daughters. Four nurses were appointed head nurses: Mrs. P. Baker, a 1962 graduate of Barnes Hospital School of Nursing and formerly assistant head nurse on 1200, has been appointed head nurse on 3 Barnard; Miss S. McDowell, also a 1962 graduate of Barnes Hospital School of Nursing, and formerly assistant head nurse on 5200, has been appointed head nurse on 5200 and in Queeny Tower, has been appointed head nurse on 1418; and Miss C. Foelsch, a 1961 graduate of Jewish Hospital School of Nursing, has had past experience in other St. Louis hospitals and with the American Red Cross, has been appointed head nurse on 2200.

Appointed acting head nurse on 2200 was Miss S. Guyer, a

Left to right: HENRY POTTS, supervisor of the optical shop; BOB FRANK, deputy director with his wife CATCHY, and EDIE CLAYWELL, wife of Jim Claywell, administrative engineer.

Left to right: PAT GERINGER with his wife MADGE GERINGER, supervisor in accounts payable; and DON McGHEEAN, manager of the print shop with his wife, LORRAINE.

Left to right: MRS. MARTHA RAMSEY, co-ordinator of forms control, with her husband, CLETIS.

Left to right: ELMER MUeller; DILLON TRULOVE, executive housekeeper; MRS. FLORENCE MUeller, chief pharmacist; and Mr. Truelove's wife, BERNICE.
60 AREA STUDENTS ATTEND TB PRESS PROJECT AT BARNES

Barnes Hospital was host to 60 area high school students for the 29th annual school press project of the National Tuberculosis Assn. and the Columbia Scholastic Press Assn. Oct. 26.

The students attended three seminars in Schwarz Auditorium which provided them with information for their school newspapers. They will write on some aspect of tuberculosis, other respiratory diseases or health careers in competition with students from across the nation.

Clarissa Start, Post-Dispatch feature writer and columnist, gave some helpful tips on news gathering. Bill Tripplett of the St. Louis football Cardinals told of his personal fight against tuberculosis. After a coke break, John Boyer, personnel director at Barnes, enumerated the many health career opportunities available here.

Lunch was in the Crown Room, and the group was given a tour of the hospital. They made stops in the Irene Johnson Unit of Rehabilitation, the diagnostic laboratories, the department of inhalation therapy and the School of Nursing. The students were given opportunities to ask questions at each stop.

In addition to the first-hand information they received at Barnes, the students were given a packet of brochures to help them write their articles.

Barnes Planning Christmas Eve Lobby Service

Bishop Eugene M. Frank, president of the Methodist Church of the state of Missouri, will speak at the Christmas Eve lobby service again this year.

The traditional service will be at 3 p.m. December 24 in the main lobby of Barnes Hospital. This is Bishop Frank's tenth year as speaker.

A special Christmas program with music is planned for the patients, and for their families and friends who wish to attend. Volunteers will assist the department of dispatch in transporting patients to the lobby.

This is one of the two worship services open each year to employees on duty. Interested employees must obtain permission from their supervisors to leave their posts. Patient care needs may make this impossible in some cases.

Did You Know...

That Clara Barton, one of the founders and the first President of the American Red Cross was born on Christmas day, December 25, 1821? That she always found time in the midst of her busy work, to give some special consideration to an individual or a group on Christmas Day? That she wrote a "Christmas Carol" for a group of Sea Island natives? The first stanza of the "Christmas Carol" reads . . . .

"Lo, the Christmas morn is breaking,
Bringing the angels bright array,
For the Christian world is waking,
And the Lord is born today.
Shout them, brothers, shout and pray,
For the blessed Christ is born today."

Artificial Trees To Be Decorated In Barnes Lobbies

Barnes has ordered eight artificial Christmas trees to adorn the lobbies this year. The 6-foot high trees will be decorated by the housekeeping department.

The trees will go up the week before Christmas and can be left up until after New Year's Day. In the past, live trees were put up, but these could be kept only four days because of fire precautions.

The artificial trees will extend the Christmas season at Barnes for the enjoyment of patients, employees and visitors.

Psychiatrist Explains Alcoholism Research

Dr. Jack H. Mendelson who was awarded the Hofheimer Prize for 1965—the top award of the American Psychiatric Assn.—addressed the Eastern Missouri Psychiatric Assn. November 15 in Clotop Auditorium. Dr. Mendelson spoke on his own experiments with alcoholism in man and animals.

The department of psychiatry of Barnes Hospital and the Washington University School of Medicine sponsored the talk. A dinner at the Grecian Terrace preceded the lecture.

JOHN M. BOYER, personnel director, points out the many career opportunities available in the health field to teen-agers attending the press project of the Tuberculosis and Health Society of St. Louis. Students from schools throughout the St. Louis area will write about some phase of tuberculosis or health careers for their school papers in competition for national prizes.

The conference was held in Schwarz Auditorium.
SAFETY & SECURITY OFFICE

EDWARD THURMAN, left, instructs security guard Howard Wood and his other guards simultaneously over his walkie-talkie radio. Norma Gerhardt types his instructions.

All Systems Are 'Go'

24 Hours a Day . . .

IN SAFETY AND SECURITY

All day and all night Barnes safety and security department works to protect its up to 1,015 patients, innumerable visitors and its 2,500 employees. Under the direction of Edward Thurman, safety and security co-ordinator, the department is placing special emphasis on the prevention of fires.

As part of their orientation, all new employees, students from the junior college, Barnes School of Nursing, and hospital administration students receive fire extinguisher training. Last month Barnes department heads met for a special session on fire prevention. They received instructions on how to conduct brush-up meetings for older employees. Administration also had a briefing on the use of the fire extinguishers.

So that all personnel can be ready for such an emergency, each week fire drills are held in a different section of the hospital complex. Mr. Thurman is present at each drill so he can watch the moves of everyone involved. When something is neglected or done incorrectly, he instructs the person who made the mistake.

The traffic mirrors are another recent precaution taken by the safety and security office. They have been installed at the busy intersections on the first floor and the basement to help prevent collisions. The numerous persons, carts and wheel chairs that frequent these areas are less likely to meet with accidents since the mirrors were installed. It is hoped that they will be installed on all floors at a later date.

Whenever a fire alarm is set off, an extensive automatic alarm system alerts the safety and security office in Barnes basement. A gong or a buzzer rings in the office. The man on duty immediately goes to the wall where every building and floor of the Barnes Hospital Group are represented by their own individual numbers. The system automatically tells him where the fire is located. He then alerts all of the guards throughout the hospital by walkie-talkie, and signals personnel in other buildings and floors near the fire.

"The first five minutes of a fire are the most critical," says Mr. Thurman. "It must be kept under control or extinguished during that time." He emphasized that the hospital has spent a lot of money on extinguishers. It costs $600 a year just to keep them re-serviced. "Every employee must know how to use the right type of extinguisher for a specific kind of fire, quickly and effectively," he said.

HARRY PANHORST, DIRECTOR, puts out a paper fire with a soda-acid extinguisher during a practice session in the courtyard.

WHEN SECURITY CHIEF DONALD DONALDSON receives a fire alarm, he immediately signals other areas near the fire.

NURSE SUSAN HACKMAN, supervisor of Floors 7, 8 and 9 in Queeny Tower and Rand-Johnson, uses a traffic mirror as she approaches a corner with her cart of breakable equipment.

MR. THURMAN points out several types of fire extinguishers and their uses to Barnes administrators after a recent meeting.
Burn Unit Benefit Check Is Presented

J. A. Baer II, president of Stix, Baer and Fuller, presented a $14,100 check for the Burn Unit of Barnes Hospital to Robert W. Otto, vice-chairman of Barnes Board of Trustees on November 11.

The check amounted to the proceeds from "Extravaganza '65," a fashion show and champagne supper held October 8 at the downtown store.

The money will be used to buy new equipment and to expand the operation of the Burn Unit which is now located on the fifth floor of Barnes.

43 Nursing Students Are Enrolled At Forest Park Community College

The Junior College District has established a new nursing program on the campus of Forest Park Community College. However, due to the shortage of space on the present campus, the program is now housed in the Medical Complex Area. Eleven full-time and three part-time faculty occupy office space in this area, in the Barnes and Jewish Hospital Schools of Nursing buildings.

Forty-three nursing students are enrolled in the JCD program. The prescribed course of studies is planned for a two-year period and leads to an Associate in Arts degree in nursing. Upon the completion of the program, the graduate nurse is eligible to apply for admission to the State Board of Nursing Examinations, for licensure as a Registered Nurse.

The students have the privilege of sharing classroom teaching in all of the required academic courses with the nursing students from Barnes and Jewish. These classes are being taught in the Barnes and Jewish Hospital Schools of Nursing and at the College of Pharmacy.

SHON LOCKHART, LAB TECHNICIAN, RETIRES

AT A SURPRISE FAREWELL party for Miss Shon Lockhart, Dr. Lauren V. Ackerman, head of the division of surgical pathology at Barnes, expresses the hospital's thanks for her 17 years of service. After enjoying cake and coffee, her fellow workers presented her a parting gift. Miss Lockhart is chief technician of the histology lab. Her retirement plans include some travel.
