WATCHES

When a woman wants a watch, she wants one that will keep correct time as well as look pretty. Our Ladies’ Watches are fitted with movements that are guaranteed accurate.

When a man wants a watch, he wants one of our modern thin watches that do not bulge the pocket, yet sacrifice none of the strength and time-keeping qualities of their clumsy predecessors. We carefully test every watch before it is offered for sale.

A full line of gold jewelry, clocks, silverware, and cut glass. Latest and correct styles in stationery, cards, etc.

The NEW PROCESS GAS RANGE

Is made of the very finest material, evidences the most excellent workmanship and is particularly economical in the use of gas.

- 16-inch Oven: $16.00
- 18-inch Oven: $18.00

THE STAMFORD ODORLESS HEAT-RETAINING GAS HEATERS

Are used in all of the World’s Fair Buildings, also many of the State and Foreign Buildings. They are very quick—retain the heat near the floor where it is needed and the small amount of gas used is surprising.

THE VULCAN GAS WATER HEATER

Cannot be equaled for quickness of action—economy in operation—excellence of material and simplicity in construction. It is so easy to clean.

We will present anyone making a cash purchase of three dollars (the cash payment on time stoves or water heaters, and the $2.50 Stamford is included) at any of our five Backus stores with a Budding Geranium, potted and in a specially designed iron holder.

ECONOMICS
Is a Good Thing

To KNOW that a tailoring firm which buys in
larger quantities than another—other things be-
ing equal—ought to be able to undersell its
competitor. That's our position exactly. That's one
of the reasons why we can save you money. We
guarantee satisfaction. We can give you quality,
fashion, and finish, and save you money at the same
time. Suits and Overcoats to your order, $20 to $50

should be a work of art, but it does not follow that the printer's product is of artistic merit merely because it is a book. From start to finish there must be harmony in style and tone. Type will not arrange itself, nor will ink give forth its richest effect without brains as one of the ingredients.

These fine distinctions are drawn by

the Harford Company

artists    compilers    printers

who herewith present "the hatchet" produced at their modern shop in Saint Louis under the careful supervision of LeRoy Brooks, and brought to completion by George Ebert, pressman on Harford products. The Harford Company is prepared to offer advertisers, and those seeking the highest grade of printed work, a service of superior merit. A department for the writing, compiling and illustrating of catalogs, booklets and brochures means intelligent preparation and arrangement for the mechanical processes, and insures absolute perfection on all high grade half tone and color work.
