Board of Overseers:

Elisha Hall Gregory, Chairman
Charles Nagel Isaac Henry Lionberger
Edward Mallinckrodt Robert Luedeking
Gustav Baumgarten, Secretary
Adolphus Busch
Herman Tuholske
Horatio N. Spencer

Faculty of Medicine

Paul Gervais Robinson, A. B., M. D., LL. D., Professor Emeritus of the Principles and Practice of Medicine.
Jerome Keating Bauduy, M. D., LL. D., Professor Emeritus of Psychological Medicine and Diseases of the Nervous System.
Elisha Hall Gregory, M. D., LL. D., Professor Emeritus of the Principles of Surgery.
Gustav Baumgarten, M. D., Professor of the Practice of Medicine.
Herman Tuholske, M. D., Professor of the Practice of Surgery and Clinical Surgery.
Theodore F. Prewitt, M. D., Professor of the Principles of Surgery.
Washington Emil Fischel, M. D., Professor of Clinical Medicine.
Robert Luedeking, M. D., Dean, Professor of the Diseases of Children.
Justin Steer, Ph. B., M. D., Professor of Clinical Medicine.
W. A. Hardaway, A. M., M. D., LL. D., Professor of Diseases of the Skin and Syphilis.
Horatio N. Spencer, A. M., M. D., LL. D., Professor of Otology.
William Carr Glasgow, A. B., M. D., Professor of Clinical Medicine and Laryngology.
Henry Schwarz, M. D., Professor of Obstetrics.
Paul Yoer Tupper, M. D., Professor of Applied Anatomy and Operative Surgery.
Edward Watts Saunders, M. D., Professor of the Diseases of Children and Clinical Midwifery.
Norman Bruce Carson, M. D., Professor of Clinical Surgery.
John Blaisdel Shapleigh, A. B., M. D., Professor of Otology.
SYDNEY PAYNE BUDGETT, M. D., REGISTRAR, Professor of Physiology.
WILLIAM HOMER WARREN, A. M., Ph. D., SECRETARY, Professor of Chemistry.

ROBERT JAMES TERRY, M. D.,
JOHN GREEN, M. D.,
FRANCIS RHODES FRY, A. M., M. D., Professor of Diseases of the Nervous System.
FRANK ADAMS GLASGOW, A. B., M. D., Professor of Clinical Gynecology.
HARVEY GILMER MUDD, M. D., Professor of Fractures and Dislocations, and Clinical Surgery.
EDGAR MOORE SENSENEY, M. D., Professor of Disease of Throat, Nose and Chest.
AARON J. STEELE, M. D.,
JOSEPH GRINDON, Ph. B., M. D., Professor of Clinical Dermatology and Syphilis.
ERNST FREDERICK TIEDEMANN, M. D., Professor of Pathology and Bacteriology.
CHARLES NAGEL, LL. B.,
HENRY MILTON WHELPLY, Ph. G., M. D., F. M. R. S., Professor of Materia Medica and Pharmacy.
GEORGE MARVINE TUTTLE, M. D.,

CLINICAL PROFESSORS

ELSWORTH SMITH, JR., M. D., Clinical Professor of Medicine.
DAVID C. GAMBLE, M. D., Clinical Professor of Diseases of the Ear.
HENRY STURGEON CROSSEN, M. D., Clinical Professor of Gynecology.
HENRY LINCOLN WOLFNER, M. D., Clinical Professor of Diseases of the Eye.

ARTHUR EUGENE EWING, A. B., M. D., Clinical Professor of Diseases of the Eye.
EDWIN CLARK BURNETT, M. D., Clinical Professor of Genito Urinary Diseases.
HARRY McJOHNSON, M. D., Clinical Professor of Genito Urinary Diseases.

LECTURES

CHARLES HENRY DIXON, M. D., Clinical Lecturer on Surgery.
GREENFIELD SLUDER, M. D., Clinical Lecturer on Diseases of the Nose and Throat.
VILRAY PAPIN BLAIR, M. D., Lecturer on Descriptive Anatomy.
LOUIS HENRY BEHRENS, M. D., Clinical Lecturer on Diseases of the Chest.
ALBERT ERNST TAUSSIG, M. D., Clinical Lecturer on Medicine.
HENRY C. HARTMANN, M. D., Clinical Lecturer on Surgery.
GIVEN CAMPBELL, JR., M. D., Clinical Lecturer on Diseases of the Nervous System.
WILLIS HALL, M. D., Clinical Lecturer on Venereal Diseases of Women.
JOHN ZAHORSKY, M. D., Clinical Lecturer on Diseases of Children.
PHILIP HOFFMAN, M. D., Clinical Lecturer on Orthopedic Surgery.
HENRY S. BROOKES, M. D., Clinical Lecturer on Medicine.
HENRY ARTHUR GEITZ, M. D., Instructor in Minor Surgery and Bandaging.
JESSE S. MYER, M. D., Instructor in Clinical Chemistry and Microscopy.
WILLARD BARTLETT, M. D., Demonstrator of Surgical Pathology.
SAMUEL ROTHSCHILD, M. D., Assistant in the Chemical Laboratory.
WILLIAM THOMAS COUGHLIN, M. D., Instructor in Anatomy.
J. W. CHARLES, A. B., M. D., Instructor in Pathological Histology of the Eye.
WILLIAM ALFRED SHOEMAKER, M. D., Instructor in Ophthalmoscopy.
SELDEN SPENCER, A. B., M. D., Instructor in Otology.
WALTER CHARLES GEORGE KIRCHNER, A. B., M. D., Instructor in Bacteriology.
WILLIAM HARVEY, B. Sc., A. M., M. D., Instructor in Clinical Chemistry and Microscopy.
WALTER BAUMGARTEN, A. B., M. D., Instructor in Clinical Chemistry and Microscopy.
R. WALLER MILLS, M. D., Instructor in Pathology.
Dr. John Bates Johnson

Dr. JOHN BATES JOHNSON was the son of John Johnson, (a native of Norway), and of Harriet Bates. His mother's father was a soldier in the war of the Revolution.

He was born April 26, 1817, at Fairhaven, Massachusetts. He received his early education in the Fairhaven Academy, where Albert Pike was one of his teachers. Having determined upon a medical career, he attended the Berkshire Medical School, and in due course received his degree. Later he went to the Harvard Medical College in Boston, where he took an ad conditum degree. Among his teachers at that time in Harvard were Drs. Parkman, O. W. Holmes and the elder Bigelow. After the completion of his medical course he was appointed one of the house physicians to the Massachusetts General Hospital. His classmate, Dr. Henry Bigelow, received a similar appointment. After spending the allotted term in the Hospital, where he witnessed the first surgical operations ever performed under an anesthetic, he returned to his birthplace and engaged for a season in the practice of medicine, forming a partnership with Dr. Bartlett. Dr. Johnson came to St. Louis in the spring of 1841, and for the next 62 years he made the home of his adoption the better for his presence among us. Following is a brief synopsis of his professional and public career during his long residence in this city.

In 1846 Dr. Johnson, in connection with others, established the first public medical dispensary west of the Mississippi River. In 1846 he was made adjunct Professor of Clinical Medicine and Pathological Anatomy in the medical department of Kemper College (Missouri Medical College), in which position he continued until 1855, when he was elected to the same chair in the St. Louis Medical College. Long afterwards, upon the consolidation of the two schools to form the Medical Department of the Washington University he was too advanced in years to fill actively the duties of his chair, but he was appointed Professor Emeritus, thus representing in a most gratifying way the two schools in which he had successively taught.

Early in 1850 Dr. Johnson helped organize the Missouri State Medical Society, of which body he was made President; in the same year he was elected first Vice-President of the American Medical Association. Dr. Johnson was one of the original members of the Western Sanitary Commission, and he had the melancholy privilege of being the last surviving member of that body. Although the duties of the Sanitary Commission had ceased with the conclusion of the Civil War, considerable funds were left over, and from time to time these were diverted to various charitable ends. Among the beneficent directions in which this money was employed was the endowment of the Memorial Home on South Grand Avenue, an institution intended for aged people, and especially for old soldiers.

Dr. Johnson was the first President of the University Club, and the second President of the Missouri Historical Society. He was also an original member of the Board of Trustees of Shaw's Garden.
It may now be allowed to pass in review, as concisely as possible, some few of the salient points in his life as a physician, citizen and man.

He came to the practice of his profession, not only thoroughly equipped in its technical requirements, together with the advantages of a sound general education, but he brought to it a well balanced and judicial mind. It is the misfortune of many medical men that even in middle life they get out of the current of events, and easily sink into the role of Horace's "laudator temporis acti." Dr. Johnson, on the contrary, unlike many of his contemporaries, kept even step with the times, accepting heartily the new, when it was proved to be better than the old; while courageous enough to adhere to the old if he thought it better than the new. At the bedside Dr. Johnson was the ideal physician. He was a most admirable diagnostician, and as a therapeutist was resourceful in treating the bodily ailments of his patients, and tactful and humane in dealing with the sometimes more agonizing troubles of the mind. He was an accomplished conversationalist, having great fluency of speech and felicity of expression, and all the happy art of the raconteur; and it may be inferred that he carried these qualities to the rostrum. Dr. Johnson took no part in public life, that is, in a political way, but in so far as medicine was related to public welfare, he was always ready with wise counsel and personal service. Many honors, professional and social, came to him—he never sought them—and it may be said that they were almost reluctantly accepted. It is difficult to write without seeming exaggeration of Dr. Johnson's personal character. He was one of the most amiable and kind-hearted men that ever lived—helpful to all men, gentle to women and loving to children. No one ever appealed to him in vain, and young physicians especially were the constant recipients of his wise counsel and often material aid. If we cannot say with Dr. Samuel Johnson that "he was a good hater," Dr. J. B. Johnson was not without his prejudices. He was too strong a man to be weakly good natured; what he allowed himself to dislike were bad measures and bad men—the shams and frauds of the world—and these he despised from the bottom of his soul.

Dr. Johnson was a man of superb bodily presence, and possessed the most gracious and charming manners. We may search far and wide before we find again one who so sums up in his own person, the qualities that made Dr. Johnson the good physician and noble gentleman that he was.

He died October 6, 1903, with his faculties unimpaired to the last, surrounded by his devoted family, honored by his profession, and sincerely mourned by the people among whom he had spent the best years of an eminently useful and upright life.

Senior Class History

HE year 1900 marks the advent of a new body of disciples of Hippocrates into the annals of medicine in Washington University. With almost cadaveric solemnity, the Freshman begins, with awful tread, his maiden march to the dissecting-room, there soon to be initiated into the mysteries and intricacies of the body physical.

But recently separated from the apron-strings of a doting mother, his occiput has not yet felt the tap, tap of the knocker's hammer; to him the life to be, looms up like a belated transcription of the sublime and the beautiful. His past life given to etherealism, medicine appeals to him as one grand ensemble of ideals and dreams. Alas! How soon he is to be disillusioned!

The bulletins announce the first review and the Freshman is given an opportunity to demonstrate the vacuum existing within his pate. Storms of cerebral activity and mental anxiety arise, and his heart is doing acrobatic stunts in a wild endeavor to forestall threatened breaks in compensation and deficient cerebration. Grave symptoms of severe renal disturbance become an added complication and his entire nervous system is on the rampage, trying to ward off spasmodic attacks of sophomoritis.

The lapse of a year finds him enveloped in the mantel of sophomoric sophistry. Thoroughly saturated with exaggerated ideas of the vastness of his store of learning, the stream of knowledge no longer courses through his frontal convolutions with the same energy; stagnation follows in the seats of learning, his cognitive faculties grow oedematous with acquired knowledge, and there is present the added danger of hydrocephalus. It is with difficulty now that he adjusts his headgear, and he secretly longs for the creation of a genius who will invent a model of the adjustable variety, adapted for all occasions and to all conditions.
From an acute condition of cranial enlargement, gradually lapsing into the chronic, he makes his entree into the ranks of the Juniors. The threatened hydrocephalus now bulges out as a most prominent objective symptom. His condition is indeed critical. So solicitous are the Fathers of the University for his welfare that a most rigid diet is prescribed, and the Faculty ordains that he shall be fed on modified milk throughout the fifth semester, with an occasional sup of "degermilated" H₂O as a diversion and tonic. His books no longer form a necessary adjunct for acquiring his diploma, and the business of the second-hand bookman and the burlesque show-house thrives. He is fully cognizant of his importance in being scarce a year removed from the exalted distinction of Senior, and believes that he is justly entitled to some relaxation from the mental and physical strains which, at times, rendered life a burden for him as a Freshman and Sophomore.

At last the Crown of Seniority is nestled upon his sweated brow. He is convalescent. He begins to realize that though he has successfully met and mastered in combat the various syndromes, "ologies," etc., which beset the curriculum of medicine, that this is but the beginning, that the real battle is yet to come, and he silently asks himself the question, "Where next?" And the echo answers, "Where?"

EAN SHAPLEIGH had issued his call for Volunteers, and in they came, not one hundred thousand strong, but in goodly numbers. From Virginia and from Idaho, from North Dakota and from Louisiana the chosen gathered together to bear the banner of Esculapius to heights before unscaled. What a bunch! Some were wise, some otherwise; some were old and turning gray; some had just left the preparation, which, after a short two years, would regale them again at the hands of Dr. Luedeking; some were from the Sabbath School, more were not; and a few were destined only to struggle through one year, and then, with a few gasps, return to the farm.

During the year one, Goodman distinguished himself as a parliamentarian. Cook almost killed himself with cyanide of potash, Hirsch with loquacity and bright remarks, and Nuss with childish play. Year two was marked by the fixing of several choice nicknames, by Clarence being thrown through a window, by the organization of the Amalgamated Order of Night Owls, and by the fatal lists of Drs. Warren and Budgett. Year three will forever be immortal because of the attentions of Brewster, Konewitz and Rose to the fair ladies of St. Louis; the three-round-go of Lane and Hawkins; and the election of Senseney as Advisor-in-Chief to the world-at-large, and the Faculty in particular.

The Class has had its ups and downs, mostly ups. It has had its tight squeezes, with Nix and Wilson as leaders, and with Gregg, from Joplin, and Guggenheim as agitators. The Class is remarkable for the number of married men it contains, only one of whom, so far, is bald headed.

The Peiper Heidsick Club is a new organization, with the motto, "Never buy when you can borrow." Owen Hoose and
Hamilton are the prime workers in this noble cause. Other men have engaged in worthy and unworthy lines of activity, and have even acquired considerable reputation in their particular spheres. As an example, we have two men, who one day sought to explore the mysteries of St. Charles with Lindenwood College as their objective point. But, finding that they were being shadowed by the Constabulary of the town, they decided to return as quickly as possible to the neighborhood of Jefferson and Olive, where they are better known and would be unmolested.

Now, we are over seventy strong, and under the care of Papa Luedeking we are thriving beautifully upon the large amount of modified milk that is without stint, if with price, forced upon us. Not extensive, but intensive expansion for one more year, and then——patience——maybe, patients.

“What joys we leave for those we know not of.”

Sophomore Class History

The malific hand of leisure had wrought havoc among the once energetic Sophs; and when dreams of work loomed up, lustily did they cry for a new leader. The conclave thereupon selected various unfortunates whose popularity was to undergo the crucial test. The helmet, ordinarily an ornament to Radcliffe's turgescent cranium, was filled even to overflowing with ballots. But lo! many enthusiasts, in order to make assurance double sure, voted repeatedly. After winnowing the wheat from the chaff, it was discovered that Weir was to marshal the forces for the impending year.

Freshman impertinence grew with the days. But the Sophs, breathing destruction, fell upon the offenders, capturing one of scissors-like physique. Mighty was the resulting tumult. And when the smoke of conflict had cleared, many of the disciples of Terry were sore as to their nether parts. A cantata, celebrating the victory, was rendered by the choir—Sutter, the nightingale, leading.

Work Pharmacopoeial, dubbed Opus, now demanded attention. Beset with obstacles was the course of sweet-faced Whelpley, whose greatest efforts were put forth in compounding and dispensing jokes, minus active ingredients. Corn Juice was described by Tuttle as a liquid containing "rough house" in solution, which shrivels up the gastric economy and warps the soul. The Class has profited much by the tutelage of Dr. Tiedemann, who, while recognizing the fact that Missourians have to be shown, does not believe in showing too much. Ph. D. Warren has successfully held down the chair of Chemistry and Sarcasm. Through the kind influence of Dr. Terry, many of the Class were the happy recipients of bids to Dr. Luedeking's Four O'Clock Tea, on Saturday, the Thirteenth Day of February.
Bright are the Stars of the Sophomore heaven. First in magnitude is Gussie Gundlach, who is all right in his weigh. Mr. Gundlach's theory on "Blushing" is attracting much attention in physiological circles. Khourie displays hydrophobic tendencies at times. Kirby is identified with those who are "Sui amontes sine rivale!" Our dear Robert has been leapyeared into the ranks of the Benedicts. The latest prophetic effusion of the Class poetaster concerning Wahl, Knott and Boren, runs in this strain:

"I would not call any one of them all
For only ' the weakest go to the wall;'
The second, like death, that scythe-armed mower,
Will speedily take you a knot or two lower;
While the third with the fees he so silently earns
Is the bourn whence no traveler ever returns."

(To be continued in our next.)
OFFICERS:
President—G. Bruce Lemmon
Vice-President—E. G. Merwin
Secretary and Treasurer—Percy Newman
Sergeant—Michael Shade

COLORS:
Purple and White

Yell:
Hip hoo hi, hip hoo golly—
Washington Medics, hot tamale!
Rah rah Purple, rah rah White—
Nineteen Seven’s all, all right!

Freshman Class History

WAT matters it? Who cares what our year’s history has been? We’re only Freshmen, and it’s a well known fact that nobody gives a hang for a Freshman. Still we are no ordinary class of Freshies. We feel sure of this because Peter the Janitor has often told us so. Peter is a man of long experience and close observation, and in his speech to us just before we bought his Christmas present, he assured us that we were a most exceptional body of young men.

Most of our year has been spent in plain old grinding, for a knowledge of anatomy doesn’t come to one by intuition. The vision of that anatomy quiz on next Saturday has kept many a Freshman in of nights who would otherwise have been out viewing the city by moonlight. However, we have had a little excitement now and then. We had a class scrap with the Sophs in November, when they tried to kidnap one of us; it was our maiden battle, but we acquitted ourselves—well, ask the Sophs (especially those two we spanked) how we showed up. Have the Sophs so much as made faces at us since then? We think not, at least not so that you’d notice it.

The first little festivity of the year occurred on the Friday night before Christmas, when twenty Freshmen saw “The Burgomaster” at the Century. We sat well up, up among the angels, but we got our share of fun out of the opera. After the show we had a little supper, and after the supper it is not known for sure just what occurred, but it is said that a small band of the faithful had to hurry home for breakfast.

One or two incidents at school have lent spice to the daily round. The great mystery of the twentieth century is, Who stole those arms from the dissecting room? For two weeks some thief was guilty of handling concealed arms, but at the end of that time
he relented and brought them back. It was well he did, for, when Gabriel's trumpet blows, those poor subjects of ours will have hard enough times getting themselves together. They are cut into more than thirteen thousand pieces.

We Freshmen believe ourselves fortunate in our instructors. The whole Class honor and respect our three Professors, Dr. Terry, Dr. Warren and Dr. Budgett. Undoubtedly they are well qualified to start medical students upon their four year's journey.

And our first year has gone. Some of us have sailed it through with "Youth at the Prow, and Pleasure at the Helm," some have worked a little at times, and some have worked themselves blue in the face. The year would seem like the ordinary Freshman year of an ordinary Freshman Class if Peter had not been so sure of our being a bunch of Stars. Who knows? Peter may be right. Keep your eye on us. The Class of '07 will set the world on fire in years to come; we are at least aiming to start a big conflagration some day.
