## Training Instructions:

- This document is to be used to train individuals in the position(s) indicated. If any items remain in this document that are no longer applicable, the Trainer should mark them as “Not Applicable (NA)” and ask that this document be updated. Supplemental materials may need to be developed. The quiz will be provided to the Trainer for administration.
- The trainer should have knowledge of all areas covered in this document and be able to obtain additional resources if necessary. The trainer should have a Master’s Degree or above, be a Certified IRB Professional (CIP) with IRB review, human subjects research, and administrative experience, having a minimum of 4 years cumulative experience in human subjects research and/or IRB review.
- Materials can be covered concurrently. And, to help with understanding, it would be best if information is not covered in isolation. For example, it might be helpful to learn about the regulations as one reviews already approved protocols and learns what the workflow is within the office.
- The material in the Level 1 should be covered before advancing to Level 2. If this is being used for re-training purposes, based on the individual’s knowledge, experience and comfort level material may not be covered or not covered as thoroughly (as long as both the employee and trainer are comfortable with the employee’s grasp of the topic/information).
- For each item listed, both the employee and trainer must sign off. This ensures that there must be a dialogue between the employee and trainer. The same is true for assessments. If there is a disagreement, or the trainer feels that the employee needs improvement, a plan for improvement must be agreed to by both the employee and trainer and carried out within the specified timeframe.
- The trainer is ultimately responsible for having all material covered and completes the Assessment portions of this document with the employee. The trainer may ask others to assist in the process by covering material in this document with the employee, if /when that occurs the person who meets with the employee initials in the area marked “met with” and the trainer verifies with the employee that he/she has not only covered the material but he/she understands the material and needs no further instruction.
- If training is delegated, it should be done by the Trainer to those selected should be established in their position and either be trained on how to present the information to the new employee or already be performing job functions in accordance with current IRB internal procedures. Trainers are powerful, select them wisely.
- Trainees should be told that material in this document will need to be read many times over the course of their career in human subjects research and protections.

## Level 1 – CRITERIA FOR REVIEW: RISKS, MONITORING

In some areas there is reference information that must first be read by the trainee before a study can be screened or reviewed to see how this criterion is applied. This can be done as a class or in a group setting with standard mock studies. This can also be done in an intensive 3 week training program. When screening or reviewing a study, the trainee should check off the areas covered. The number of studies that need to be screened and reviewed depends on the issues in each study and the comfort level of the trainee. Once each area has been screen/reviewed the respective criterion will be complete.	Read materials that address a given area	List studies Screened that address each given area	Date Re-read material

  - Step 1-The trainee will be assigned studies for screening in conjunction with the trainer. Volume will be determined by the trainer. The trainer and the trainee will screen the study separately then review together before sending out contingencies. Responses will be reviewed with the trainer to determine if any additional information is requested. Once complete the study will be routed for scheduling.
  - Step 2-The trainee will be placed in the rotation for new studies. Prior to sending questions to the researcher the trainee and trainer will discuss the study and review questions to make sure all issues have been identified. Responses will be reviewed with the trainer as needed based on complexity.
- **Modifications**
  - Step 1-The trainer and trainee will screen a modification together reviewing the key points to consider when screening modifications.
  - Step 2-The trainee will screen the modification and then meet with the trainer to review questions prior to sending to research team. If there are not questions, the trainee will meet with trainee to review the modification to prior to sending for scheduling.
- **Continuing Reviews and Modification/CRs**
  - Step 1-The trainer and trainee will screen a continuing review together looking at the key points to consider during the screening process.
  - Step 2 -The trainee will screen the continuing review and then meet with the trainer to review questions prior to sending to the research team. If there are no questions, the trainee will meet with the trainee to review the continuing review to prior to sending for scheduling.
- **Reportable Events**
  - Step 1-The trainer and trainee will screen a reportable event together looking at the key points to consider during the screening process.
  - Step 2-The trainee will screen the reportable event and then meet with the trainer to review questions prior to sending to research team. If there are no questions, the trainee will meet with trainee to review the reportable event prior to sending for scheduling.
