An Authoritative Dentist Said

"If graduating dentists would only think about the matter a little bit, they would easily understand why the very best equipment is none too good to start a practice, for they are generally young, and to the average patient, inexperienced, so when the patient sees an incomplete or apparently second-hand outfit, the opinion is formed that the dentist lacks ability and doesn't mean to stay, where, on the other hand, a complete, up-to-date equipment of modern appliances will remove any doubts on this point and create the first good impression, which is the basis for future business."

A Columbia Chair
in your office will create the best impression, give the patient and operator the comfort and convenience not to be obtained in any other chairs, and better still, will not cost as much in the long run.

A Columbia Engine
will be a great aid in the upbuilding of your practice, reduce the pain occasioned by operating, remove the strain caused by division of faculties, and pay for itself in a short time by increasing the skill of the operator and in the great amount of time it will save.

A complete equipment of chair, electric engine, cabinet, fountain cuspidor, work bench, etc., can be furnished by us thru your regular dealer on the most liberal terms, and as these appliances are conceded to be the highest types of their kind, it will pay you better to secure the best at the outset of your career and not take any chances with any other but the best, for you only expect to buy one outfit, and therefore should invest wisely.

Write for terms and catalogs.

made and bottled exclusively in the
Brewery of Lemp

St. Louis, U.S.A.
Co-ed (plaintively): I whistled until I was hoarse!

Miss Birch: A child, or any domesticated animal.

Prof. Swift (arguing about the mind of a starfish): “I don't care to take a stand on that particular animal.” (We don't imagine the animal would care for it, either.)

Would a popular young lady in a deaf mute institute be a dumb bell?

Co-ed (in candy store): Good evening, Mr. "Gumdrop," are those "Millers" soft on the inside?"

Co-ed: O! I mean—er—give me a nickle's worth of gumboils!

A PERSIAN SAYING (adapted):

He that knows not and knows not that he knows not, is a Freshman—shun him.

He that knows not and knows that he knows not, is a Sophomore—teach him.

He that knows and knows not that he knows is a Junior—wake him.

He that knows and knows that he knows is a Senior—hit him with a brick.

Have you investigated thoroughly the merits of the “HARVARD”? 

Do you know why the Harvard is superior to any other Dental Chair on the market? To claim Superiority is one thing: To prove it another. Give us the opportunity and we do both. You do the judging.

A Model Dental Chair should be Artistic in Design, Comfortable to the Patient, and Convenient to the Operator.

The Harvard has all these features combined with many other valuable points too numerous to mention.

A Harvard once Used always Used and Praised.

Harvard Cabinets are beyond criticism as to Beauty, Convenience and Workmanship.

We can sell best value at lowest prices because we manufacture to best advantage goods that appeal to your good judgment, rather than pay large commission and high priced salesmen to cajole you into buying.

Compare with others on the market point for point and judge for yourself.

If your dealer can’t show you what you want, have him or you write us.
