While the Class of '68 probably will remember this year's commencement week as the time they finally received the "sheepskin" that permitted them to affix M.D. behind their signatures, members of the classes of '13, '18, and the others with years ending in 3 and 8, will, through their reunion activities, have a variety of other things to recall.

Basically, the highlights of the period ending June 2 were: Thursday, arrival of alumni for individual reunion class celebrations that night; Friday, breakfast for alumni, followed by the business meeting and scientific program; lunch with faculty and senior students; more scientific program, and the annual banquet that evening; Saturday, Senior Awards Night; and Sunday, Commencement.

Although everyone who participated will retain memories, it is fitting that those who were honored receive mention:

Thirteen members of the Washington University School of Medicine Class of 1918 were cited by the Medical Alumni Association at the annual banquet May 31 in the Chase-Park Plaza Hotel.

Fifty-year membership certificates were awarded to C. A. Andersen, Sun City, Calif.; B. C. Ball, Fort Worth, Texas; Jacob W. Bergstrom, Arcadia, Calif.; Glover H. Copher, St. Louis; G. F. Cresswell, Potosi, Mo.; P. C. Hodges, Gainesville, Fla.; Hugh W. Maxey, Jefferson City, Mo.; Hugo Muench, Jr., Cambridge, Mass.; Johannes F. Pessel, Yardley, Pa.; George M. Polk, Kansas City, Mo.; Horace Shackelford, St. Louis; Olof Sundwall, Murray, Utah, and James A. Tesson, Leawood, Kan.

Honorary memberships were presented to Frank R. Bradley, '28, professor emeritus of hospital administration; James B. Brown, '23, clinical professor emeritus of surgery;
C. Read Boles, '43 (December), medical alumni president, welcomed more than 600 to Friday night's annual banquet.

Members of the 50-year reunion class marvel at the view from the top of Queeny Tower.

At Friday morning breakfast, snapshots of classmates were scanned.

Wives of alumni scan easels containing photos taken at Thursday nights' individual class reunion parties.

En route to lunch in Olin Hall's penthouse, visitors glance at construction progress on McDonnell Medical Science Building.
Walter P. Covell, M.D., professor emeritus of anatomy and otolaryngology; and William B. Parker, registrar and secretary to the executive faculty emeritus and consultant to the dean.

Twenty-three senior medical students and one faculty member were honored at Senior Awards Night, June 1, in the St. Louis Medical Society auditorium.

David Lee Stabenow was presented the Alpha Omega Alpha Book Prize and the Missouri State Medical Association Award of a scroll and a $100 U.S. Savings Bond for his high scholastic average.

The Richard S. Brookings Medical School Prize and the American Society of Clinical Pathologists Award went to David Gordon Kaufman, and Mark Howard Zweig received the Borden Undergraduate Research Award of $500.

The Dr. Jacques J. Bronfenbrenner Memorial Award was given to Ralph Edward Coleman. Seymour Packman received the Dr. Robert Carter Medical School Prize.

David Sinclair Schade accepted the American Society of Clinical Pathologists Award, and H. Bradley Binnington and Kenneth Melvin Buerk were presented the Lange Medical Publications Book Awards.

The Mosby Scholarship Book Awards were presented to Jere Davies Cravens, Neil Turk Feldman, Donald Ray Kirks, Sandra Sue Kynett Kramer and Gary Dean Shackelford.

Prizes of the Medical Fund Society were given to Jeremy Altman and James Parker McCulley.

Lynn Max Taussig was awarded the St. Louis Pediatric Society Prize. Marc Alan Schuckit got the Sidney I. Schwab Book Prize, and the Upjohn Achievement Award went to William Edward Pearson.
Candidates for the degree of Doctor of Medicine stand to be presented to the Chancellor.

Amid the multi-directional mortarboards the face of Maribeth Prewitt Sayre shows her concentration on the commencement speech.

Seniors elected to membership in Alpha Omega Alpha were Kenneth J. Arnold, Binnington, Buerk, Charles O. Elson, Feldman, Stephen Lee Kash, Kirks, Kramer, McCulley, Shackelford, Penelope G. Shackelford and Taussig.

Alan M. Robson, M.D., assistant professor of pediatrics and instructor in internal medicine was selected as "Teacher of the Year" and received a plaque from the senior class.

Barry Commoner, Ph.D., professor of plant physiology and director of the Center for the Biology of Natural Systems, delivered the annual address to the seniors. His topic was "The Relevance of Biology to Life."

On Sunday the Brookings Quadrangle was filled, and anxious families of the 83 Doctor of Medicine, 15 Master of Hospital Administration, 12 Bachelor of Science in Occupational Therapy and 11 Bachelor of Science in Physical Therapy candidates shared the joy of the conferring of the degrees. In many cases, perhaps, they also breathed sighs of relief at the completion of this portion of the professional education process.
Much has been said and a great deal written about women in medicine. The attitudes of medical school deans, fathers, mothers, pre-medical advisors, the family doctor, potential husbands, and the young ladies themselves, have all been explored. Attempts have been made to determine the influence of these attitudes upon the number of young women entering the study of medicine in the United States.

I would like to present some of the facts, followed by a prediction. For most of my information I am indebted to the recent publication by the Josiah Macy, Jr. Foundation on Women in Medicine by Carol Lopate (1968).

In the United States last year there were nearly three applicants for every position in the entering classes of schools of medicine. Although there is said to have been some erosion in recent years, physicians continue to occupy a position of great prestige in this country. Competition for entry into medical school remains keen. Because of this, it becomes important to examine the frequent allegation that women contribute to the shortage of physicians by entering the medical schools but then drop out for one reason or another.

If we ask how many women have been entering medical schools in the United States in the last 60 years, we find that they represented 4 per cent of all medical students from 1905 to 1915, and that this percentage increased very slowly over the next five decades to 8 per cent in 1965.

What are the facts about dropouts according to sex? The attrition rate by sex for medical school entrants from 1949 to 1958 for "nonacademic" reasons was 8.18 per cent for females, and 3.30 per cent for males. For "academic" reasons it was 7.33 per cent for females, and 4.98 per cent for males. This study involved a total of 75,453 medical students.

Do committees on admissions discriminate against women in the selection process? Apparently not. During the year 1964-65, of all males who applied for admission to medical schools in the United States, 47.1 per cent were accepted; of all females 47.6 per cent were accepted. Discrimination would still exist if the caliber of female applicants was significantly higher, but this was not the case as measured by the Medical College Admissions Test scores. The MCAT is the only measurement common to all applicants.

Is the situation significantly different in the United States as compared to other developed countries? This question can be answered with an emphatic "yes." Most of us have heard the oft-quoted figure that 75 per cent of physicians in Russia are women. But medicine in Russia does not hold the same high status as in other countries. The best male students enter the fields of science, technology and industrial commerce.

What about Western Europe? Germany has more than three times as many women in medicine (30 per cent of the country’s physicians) as the U.S. In the Netherlands 20 per cent of graduates are women; in Great Britain 25 per cent.

What fields attract those women in the U.S. who do become physicians? As measured by attainment of certification by specialty boards, pediatrics leads the list by far. Psychiatry is a distant second, followed closely by internal medicine as number three. Anesthesiology, pathology, obstetrics and radiology are closely bunched for the fourth through the seventh places, but the number in pediatrics exceeds all four of these fields combined. It has been generally agreed that, for a variety of reasons, women make excellent pediatricians.

If the competitive situation for entrance into medical schools in the U.S. were to remain constant, I would predict a slight-to-moderate upward trend in the percentage of young women entering the study of medicine. If, however, the present efforts to increase the physician manpower in this country are successful — and new schools are opened and existing schools enlarged — women will become an even more important source of high caliber applicants for medical schools.

M. Kenton King, M.D., Dean
How's It Coming?

Construction on McDonnell Medical Science Building Progressing

How many cubic yards of concrete will be required to complete the McDonnell Medical Science Building?

And before the last truckload's contents have been poured, how many tons of steel will be erected for reinforcing?

Realizing that a nine-story building's contents naturally must be figured in large quantities, how many miles of electrical wiring will be installed?

And miles of plumbing — or air-conditioning ductwork?

The contractors and sub-contractors, hiring a large number of men from a variety of crafts, have made good progress, but no one at this point is ready to more than pause for a momentary rest.

And with four floors barely erected, administrators haven't begun finalizing the dedication program — but they, and the students and faculty who will utilize the new preclinical facilities, are anxious to start planning for the move.
Fellow countryman John E. Brooks, M.D., instructor in neurology, catches up on happenings at home from Dr. Cadman.

Strolling past Olin Hall, Dr. Cadman commented on how fortunate today’s students are to have such luxurious living facilities.
Traditionally, it is the busmen, who, on their days off take rides on the busses. Perhaps, physicians are akin to the bus drivers.

At least this may be the case of British Internist Ewan F. B. Cadman who was a Washington University School of Medicine student in 1941-43.

Although the classes of 1943 (March and December) held reunions this year, Dr. Cadman, due to a rather strict itinerary, was unable to be here at the time of the festivities.

But, during his three weeks in the United States in May, he did manage to schedule three days in St. Louis, and most of this was spent at the medical center.

Having the same problems as other alumni who have been away for so long, he requested guide service to help locate familiar people and landmarks.

He also attended several rounds and visited many services. He did this both to compare them to how he remembered the areas, and with the hospitals he is familiar with in England.

Admitting that the medical center expansion had been considerably greater than he anticipated, Dr. Cadman marveled at it all. He commented that he would like to stay longer, but he was scheduled all the way to California before turning home to Southport in Lancashire.

Conversing with a schoolmate on the telephone, Dr. Cadman apologized for not being able to visit with everyone he wanted to see because of a close itinerary.

Model of the medical center in Barnes Hospital lobby (and walking through the center itself) amazed Dr. Cadman.

Willard M. Allen, M.D., professor and head of the department of obstetrics and gynecology, and Dr. Cadman recall the baseball game they attended the day the English medical student arrived in St. Louis.
By this time the 83 medical graduates of the Class of ’68 probably have acquired the ability to acknowledge when being addressed as “Doctor,” and have had the opportunity to begin practicing what they have been attempting to learn for the past four years.

For some, life as an intern may be the miserable existence each had been promised by his predecessors. For others, perhaps the National Intern Matching Program selection was “much more than I had ever hoped for.”

At any rate, the results made known this spring to the senior class are now history, and, undoubtedly, each intern has begun preparations for his residency applications.

Following the internship appointments are those of the hospital administration, occupational and physical therapy graduates whose positions were reported.

The building of a 12-story $18,600,000 condominium, to be financed by Barnes Hospital and Washington University School of Medicine, has been announced. It will be constructed in front of the east wing of the present Barnes administration building.

The boards of the hospital and the school of medicine have agreed upon this condominium concept as the most practical and efficient means of utilizing new and released space in order that both institutions may better serve the health care needs of the St. Louis community.

The building will house such specialties as neurology, neurosurgery, gynecology, obstetrics, eye, ear, nose and throat surgery. It will provide needed additional delivery rooms, surgical facilities and seven intensive care units. Floors already have been allocated so that specific requirements can be considered in advance planning for most effective utilization of space.

Commenting on the condominium, a hospital executive said, "Barnes cannot possibly keep pace with increased demands for new concepts in health care without an aggressive program of expansion, continuing the long-range growth plan which already has brought about such spectacular progress. We must continue to build, not only for the immediate future but for the generations to follow."

William H. Danforth, M.D., vice chancellor for medical affairs, made the following statement, "Nowhere is the changing character of medical science so apparent as in the academic climate of a school of medicine. "

"For it is here that doctors must bring the advances from the laboratory to the bedside. Here young physicians must be taught to practice in a world we can only dimly envision. Yet, their education for the immediate future must be based on realistic goals and well defined concepts and procedures."

"Thus, at the threshold of the '70s, Washington University School of Medicine faces the dual responsibility of training for the present and for the future. This means we must continue to attract to our staff men of the highest caliber and vision. We can do this only by providing sufficient classroom and laboratory space, maintaining an efficient physical plant and a vigorous, free and responsible academic climate."

"With the generous gift of the McDonnell Medical Science Building, we will be able to accommodate 23 additional entering students."

"With completion of the condominium, we will be able to ease our critically-crowded patient care facilities and provide room for the broadened program of education which we envision as part of our own personal and professional responsibility to those promising young doctors of the future."

"This is a time of change and of challenge, of a never-ending search for answers to alleviate the ills of man. Washington University School of Medicine will continue to have an important role in this search."

The structure is designed so that seven more floors can be added to the initial construction. Future plans call for another 20-story building which will continue from the Rand-Johnson building and adjoin the condominium.
HE left the hallowed halls and ivy to enter the less aesthetically appealing atmosphere of an anatomy dissecting room or a biochemistry laboratory. HIS continuing search for knowledge has found a special objective — the care of patients whose needs hereafter will require HIS disciplined mind and trained hands.

HE comes from a variety of climes including Salem, Ore.; Staten Island, N.Y.; Antwerp, Belgium; and Popular Bluff, Mo., to begin HIS medical career at Washington University school of Medicine. A cumulative grade point average of 2.45 on a 3 point scale has had an obvious bearing upon HIS selection as one of 94 freshman chosen from 2,369 applicants to enter the School. HE probably earned a bachelor's degree, but HE may be one of the three with a M.S., Ph.D., or D.D.S. HE may, however, be one of the eight who is entering after only three years of college preparation.

Boston Marathon participants may find HIM among their number by the time the gun sounds for next year's race, because THE STUDENT—1968 could be one of three varsity track stars entering the School. HE, however, is likely to feel equally at home on the bowling alley, tennis court, football field, or golf course. HE may have proven his ability in soccer as the scoring record holder at the University of Dayton, or, in a quick change of gender, SHE could be the girl selected the Ideal Nebraska Coed. Sometimes, however, THE STUDENT chooses the more sedentary life of the disc jockey, the more demonstrative life of the tour guide, or HE just stands there and takes aim as a varsity rifle team member.

Whatever HIS physical interests, THE STUDENT is certainly a scholar and
probably an activist who was involved in HIS student government. These seem to be the outstanding factors that unify HIM with HIS peers.

If HE thinks the last 20 to 30 years have molded HIM, HE will be extremely surprised at what the next four years will do to prepare HIM for the next big decisions — where to apply for internship, and in what field!

HOSPITAL ADMINISTRATION

The incoming Graduate Student in Hospital Administration is between the ages of 20 and 32 and is called Daddy by 17 children. HE has earned a bachelor’s degree in a variety of fields, and one of the 26 already signs M.D. behind HIS name. HE comes from 12 states and was educated at 25 colleges and universities.

The Prospective Hospital Administrator enjoys diverse activities. HE has been a wrestling champion, a teacher of folk guitar, and has participated in many of the enjoyable exercises that lie in between. HE is presently disguised as one of the following:

— Lutheran Church business administrator
— nun — teacher
— cytotechnologist
— computer operator
— hospital commanding officer
— intelligence officer
— scoutmaster
— real estate student
— Air Force officer
— security officer
— camp counselor
— hospital planning commissioner
— hospital administrative assistant
— Latin and German teacher

HE is an outstanding student who continues his quest for knowledge.

OCCUPATIONAL THERAPY

OCCUPATIONAL THERAPY STUDENT

1968 is one of 13 who will begin HER training here this fall. SHE comes from seven states, with Missouri claiming most registrants among five who are from St. Louis. HER initial college background was acquired at 11 schools, where three of HER classmates completed requirements for bachelor’s degrees. HER interests are wide ranging — SHE may be a nun, or, perhaps SHE is that one who conducted tandem bicycle tours through Forest Park this summer.

PHYSICAL THERAPY

The Physical Therapy Student entering the School this fall is one of 15 who are natives of seven states (six from the St. Louis area). HER preliminary training at 13 colleges or universities was at least two years, but two of HER classmates have already earned a B.S. degree, another has become a mother of two, one was a Vista Volunteer, and one studied at the Sorbonne in France. Although the P.T. field has been predominantly female, one of this class will be known as the big brother.
Alumni Activities

By Audrey Wingfield
Alumni Executive Secretary

Marshall B. Conrad, '45, St. Louis orthopedic surgeon, was named president-elect of the Alumni Association of Washington University School of Medicine at its annual general meeting. Melvin L. Goldman, '43 (March), St. Louis internist, will serve as president of the 4,000-member organization for the coming year.

Frank R. Bradley, '28, emeritus professor of hospital administration, was elected vice president, and Richard W. Hudgens, '56, assistant professor of psychiatry, was re-elected secretary-treasurer.

New St. Louis members of the Alumni Council are Edmund B. Alvis, '34; William F. McGinnis, '41; Bill J. Phillips, '63; Miles C. Whitener, '55, and Herbert C. Wiegand, '43 (December).

Named representative to the University's Federation of Alumni Groups was James F. Nickel, '48.

PRE '20s

Hugh W. Maxey, '18, Jefferson City, told in a News-Tribune feature story of his unusual experiences during his 15 years as resident physician at the Missouri State Penitentiary Hospital. Dr. Maxey has practiced medicine in the Capital City for 33 of his 50 years as a physician.

THE '20s

Alfred Goldman, '20, St. Louis, attended the semi-annual meeting of the American College of Chest Physicians in Houston, Texas, serving as a member of the Board of Regents.

Dr. Goldman, with the cooperation of the Public Health Service and the Missouri Board of Health, organized a chest clinic in Hillsboro, Mo., which will service five neighboring counties.

James Barrett Brown, '23, St. Louis, was one of the 10 recipients of Modern Medicine's 1965 Awards for Distinguished Achievement. During 42 years as practitioner, teacher and writer, Dr. Brown has authored or written for a dozen textbooks on reconstructive methods. His students are among the world's foremost plastic surgeons.

B. Y. Glassberg, '25, recently spoke on "The Meaning of Adolescent Sexuality" at Vianney Catholic High School in Kirkwood. He also spoke on "Missouri Abortion Law Proposals" to the young adult congregation at Shaare Emeth Temple.

Hugh M. Wilson, '27, emeritus professor of radiology, was honored May 20 at a scientific program held in his honor by the Edward Mallinckrodt Institute of Radiology and the Greater St. Louis Society of Radiologists.

Axel N. Arneson, '28, St. Louis, conducted a colloquium on "Radiation in Gynecologic Malignancy" at the 16th Annual Clinical Meeting of the American College of Obstetricians and Gynecologists.

Samuel D. Soule, '28, St. Louis, was co-author of a paper, "Cyclic Endometrial Response to Monthly Injections of an Estrogen-Progestogen Contraceptive Drug," presented at the joint meeting of the International Academy of Pathology and the Latin American Congress of Pathology in San Juan, Puerto Rico.

A. Lloyd Stockwell, '28, Kansas City, was honored by the University of Missouri Medical Alumni Association, and was named an honorary associate member for his contributions to the state school of medicine.

C. H. Appleberry, '29, has been elected chairman of executive committee and credentials committee at Bonne Terre, Mo., Hospital.

Carl J. Heifetz, '29, St. Louis, presented a paper on "Acute Cholecystitis" in a panel discussion on "Developments in Biliary Tract Surgery" at the Ninth Annual Clinical Congress of the American Society of Abdominal Surgeons in Chicago. He also authored a paper, "The Principles Governing End-To-End Intestinal Anastomosis," for Surgery Digest.

Avery P. Rowlette, '29, Moberly, authored an article, "Clouds On The Horizon" for the Missouri State Medical Association Magazine. The article reports on a tour, sponsored by the University of Southern California, of several medical centers in Europe, and compares their government reimbursement for medical services with the Medicare system in the United States.
An illustrated scroll of ancient Japanese medicine was presented to the Medical Library by Koji Nagao, Tohoku University Medical School librarian, who translated the inscriptions for Librarian Estelle Brodman, Ph.D., and Dean M. Kenton King, M.D. Mr. Nagao spent four months here as a China Medical Board Fellow, studying medical library methods.

A. Ford Wolf, '29, president of Scott and White Memorial Hospital, Temple, Texas, has been awarded the Distinguished Alumnus Citation, highest honor of the University of Arkansas.

Edward W. Cannady, '31, East St. Louis, is president-elect of the Illinois State Medical Society, and will assume the presidency in May, 1969.

H. Relton McCaroll, '31, St. Louis, gave the 10th Packard Memorial Lecture at the University of Colorado School of Medicine. His subject was “Congenital Dysplasia and Dislocation of the Hip in Infancy and Childhood.”

Brian Blades, '32, chairman of the department of surgery, George Washington University School of Medicine, was honored at the unveiling of his portrait hung in the hospital's Blades Conference Room.

Paul F. Max, '32, St. Louis, was re-elected speaker of the Missouri State Medical Association House of Delegates at the annual banquet held in Kansas City.

Carl V. Moore, '32, St. Louis, conducted a discussion on hematology at the 49th annual session of the American College of Physicians in Boston.

Wendell G. Scott, '32, St. Louis, addressed the final report luncheon of the Kaim Moses Group for Cancer Research, the advance gifts division of the American Cancer Society.

Arthur Steer, '32, is the chief of pathology research, Atomic Bomb Casualty Commission, Hiroshima, Japan.

Helman Wasserman, '32, St. Louis, was elected secretary of the GYN Society.

J. Lester Harwell, '33, has returned to Poplar Bluff to serve as chief-of-staff at the Veterans Administration Hospital.

OREON K. TIMM, '33, Washington, D.C., retired July 15 after a 30-year career in federal service as Assistant Chief Medical Director for Professional Services, Veterans Administration. Dr. Timm is now clinical psychiatrist in the student health center at Florida State University, Tallahassee.

M. Norman Orgel, '34, St. Louis, participated in a discussion on "Gerontology" at the Gerontology Society meeting in St. Petersburg, Fla. He also participated in a panel on "Drug Addiction and Abuse" at the meeting of the American Social Health Association.

James G. Telffer, '34, Wilmette, Ill., wrote on sanitary inspection of imported produce in the May Journal of the American Medical Association. His statement about malaria prophylaxis for Far East travel was in the July issue.

David Rothman, '35, St. Louis, conducted a conference on "The Psychosomatics of Infertility" at the 16th Annual Clinical Meeting of the American College of Obstetricians and Gynecologists.
Ben H. Senturia, '35, St. Louis, co-authored a paper, "Correlations of Voice Problems and Laryngeal Findings," presented at the meetings of the Middle Section of the American Laryngological, Rhinological and Otolological Society, Inc., held in Detroit.

Robert W. Kelley, '36, St. Louis, is a new member of the board of trustees of the St. Louis Blue Shield.

Alfred Geihrhorn, '37, New York, moderated a discussion on "Indications and Limitations of Clinical Cancer Chemotherapy," and served as chairman on cancer session of the 49th annual session of the American College of Physicians.

Joseph Fisher, '38, St. Joseph, was elected chairman of the Missouri State Medical Association Council.

Leon Fox, '39, has been named chairman of the St. Louis County Medical Society membership committee.

Robert M. Hardaway, '39, is the new commander of the Army's 97th General Hospital in Frankfurt, Germany.

Public Health Service in Chicago, Ill., on "Home Care and the Private Physician." He also recently attended a meeting in San Francisco of the American Heart Association as a Missouri delegate.

Alvin F. Goldfarb, '43 (December), Philadelphia, conducted a conference on "Galactorrhea-Amenorrhea: The So-Called Chiari Frommel Syndrome" at the 16th Annual Clinical Meeting of the American College of Obstetricians and Gynecologists.

Edward Kowert, '43 (December), St. Louis, conducted a forum on non-technical professional information on obesity for the St. Louis Medical Society.

J. L. Foster, '44, has been elected staff vice-president of Bonne Terre, Mo. Hospital.

G. Comer Bates, '45, Kansas City; Hugh R. Waters, '45, Stanley M. Wald, '45; and William D. Perry, '47, St. Louis, have been elected fellows in the American College of Physicians.

THE '40s

William McGinnis, '41, St. Louis, was elected president of the GYN Society.

Glenn O. Turner, '42, Springfield, was named president-elect of the Missouri Heart Association at the annual meeting in Jefferson City.

George L. Watkins, '42, Farmington, Mo., has received a certificate of appreciation from the Department of Defense, through the St. Francois County Selective Service Board, for his service as medical advisor to that board for more than 25 years.

Richard W. Yore, '43 (March), St. Louis, was elected chairman of the Missouri State Medical Association scientific programs.

Morris Alex, '43 (December), St. Louis, spoke to regional health officers of the United States

Three Washington University School of Medicine students participated April 19 in the annual Boston Marathon, and while none really threatened the winner, each had the satisfaction of completing the grueling 26-mile race. The three, among the 890 entered, were from left, Alan R. Cohen (who also ran in the 1965 and 1966 races while a student at Harvard Divinity School), Clifton G. Harris III, and Stever J. Taylor.
Donald C. Greaves, '49, Kansas City, participated in the Governor's Conference on Mental Health Services for Children and Youth as a member of the Advisory Commission for Institutional Management and Mental Health for the State of Kansas.

Marvin Rosecan, '49, St. Louis, attended the International Symposium of Thyrocalcitonin held at the London Post Graduate School of Medicine. He also was present at the Sixth International Diabetes Meeting in Stockholm, Sweden.

Russell D. Shelden, '49, Kansas City, has been installed as president of the Missouri Society of Anesthesiologists, Inc. He is also chief of the department of anesthesiology, Research Hospital and Medical Center.

THE '60s

Mark D. Eagleton, Jr., '50, St. Louis, was elected president of the Missouri State Radiological Society.

Lucien B. Guze, '51, Los Angeles, was given honorary alumni membership in Alpha Omega Alpha at the annual election held by the Washington University School of Medicine chapter.

John H. Knowles, '51, Boston, moderated a discussion on "Medical Care: Cost, Quality, and Equality" at the 49th Annual Session of the American College of Physicians. Dr. Knowles edited a volume of essays entitled "Views of Medical Education and Medical Care" published in the Journal of the American Medical Association.

Jack Mullen, '51, has been elected staff president and head of the department of internal medicine at Bonne Terre, Mo. Hospital.
Herbert B. Zimmerman, '51, spoke to the St. Louis Heart Association on "Management of Intensive Care Units."

William R. Cole, '52, St. Louis, has been appointed chief of surgery at Deaconess Hospital. He was co-author of a paper "Thoracic Duct Cannulation and Differential Diagnosis of Obstructive Jaundice" in the April Journal of the American Medical Association.

George E. Murphy, '52, St. Louis, spoke on the prevention of suicide at a "Crisis Hits the Family" symposium at the 15th annual meeting of the Marion, Ohio, County Association for Mental Health.

Brent M. Parker, '52, St. Louis, conducted a panel discussion on "Cardiology: Course of Muscular Subaortic Stenosis" for the American College of Physicians at the 45th annual session. Dr. Parker was elected secretary of the Missouri Heart Association at the annual meeting.

Julie P. Miller, Jr., '53, spoke on "Homosexuality" at a Washington University student assembly. He delivered an address, "What is Psychoanalysis?", to the Junior League of St. Louis.

Gerald W. Newport, '53, St. Louis, has been elected a fellow of the American College of Obstetricians and Gynecologists.

Robert C. Ahlvin, '54, has been appointed pathologist-in-chief at the Jewish Hospital of St. Louis.

Theodore Merrims, '54, St. Louis, spoke to the Mortar Club on "Moans, Groans, and Hormones." He also addressed the St. Thomas Aquinas High School science group on "Female Diseases."

Donald B. Rinsley, '54, Topeka, Kan., faculty member of the Menninger Foundation School of Psychiatry and chief of the adolescent unit of the Children's Division of Topeka State Hospital, has been named recipient of the Edward A. Strecker Memorial Award for 1968.

LeRoy A. Pesch, '56, has been appointed dean of the New York State University of Buffalo School of Medicine and director of the University Hospitals. He had been professor of medicine and associate dean at Stanford University School of Medicine since 1966.

Theodore R. Sadler, Jr., '56, was awarded a citation for outstanding service during his assignment at the Third Surgical Hospital in Vietnam. He is now on duty at Fort Leavenworth, Kan.

Robert S. Spitzer, '56, Los Altos Hills, Calif., has been named president of Science and Behavior Books, Inc. He is a psychiatrist and research associate at Mental Research Institute, Palo Alto.

Godofredo M. Herzog, '57, St. Louis, has been appointed editor of the St. Louis County Medical Society Bulletin. He was co-author of a paper, "Cyclic Endometrial Response to Monthly Injections of an Estrogen-Progestogen Contraceptive Drug," presented at the joint meeting of the International Academy of Pathology and the Latin American Congress of Pathology in San Juan, Puerto Rico.

Herbert Lubowitz, '58, is co-author of a paper, "Clinical Disorders of Acid-Base Equilibrium," concerned with the laboratory procedure, and published in the July Journal of the American Medical Association.

Emil L. Mantini, '58, Gainesville, is assistant professor of surgery at the University of Florida division of thoracic and cardiovascular surgery. He is also chief of surgery at the V.A. Hospital.

Lester S. Garfinkel, '59, has become associate director of the department of medicine at Ellis Fischel State Cancer Hospital in Columbia, Mo.

Arnold M. Goldman, '59, was awarded a Bronze Star for meritorious service in Vietnam. He recently was discharged from the Army and has resumed his practice in internal medicine in St. Louis.

Gerald E. Hanks, '59, an X-ray specialist on the faculty of the Stanford University School of Medicine for the last three years, will become the first full-time director of the division of radiology at the University of North Carolina School of Medicine and North Carolina Memorial Hospital in Chapel Hill. He has been appointed an associate professor in the department of radiology.
Chancellor Thomas H. Eliot delivered the main address at the dedication of the $2.6 million nine-story Yalem Research Building at the Jewish Hospital of St. Louis on May 26 in the Mark C. Steinberg Memorial Amphitheatre. Pictured at the ceremonies were from left, Rabbi Lawrence Siegel, community chaplain; Melvin Dubinsky, president of the Jewish Federation; Julian L. Meyer, president of Associates of Jewish Hospital; Stanford Wessler, M.D., chief-of-medicine, and John E. and Adaline Simon Professor of Medicine; David A. Gee, hospital executive director; Chancellor Eliot; Edward B. Greensfelder, president of the hospital; Charles H. Yalem, for whom the building is named; Arthur E. Baue, M.D., chief-of-surgery, and Harry Edison Professor of Surgery; William H. Danforth, M.D., vice chancellor for medical affairs; Mrs. Stanley M. Cohen, president of the hospital auxiliary; and Morris Abrams, M.D., president of the medical staff and clinical associate professor of surgery. Medical research is being conducted on floors one to four, and surgical studies from five to eight. Animal facilities are on the top level.

RECEPTIONS SCHEDULED

Alumni, faculty, staff, former house staff, spouses and friends are invited to receptions to be held in conjunction with the following medical meetings:

Oct. 15
54th Annual Clinical Congress
American College of Surgeons
St. Denis Room 5:30-7:30 p.m.
Dennis Hotel Atlantic City

Oct. 19-24
37th Annual Meeting
American Academy of Pediatrics
Palmer House Chicago

Dec. 1-4
22nd Clinical Convention
American Medical Association
Miami Beach
Standing by the portrait painted in 1965, W. Barry Wood, Jr., M.D., Boury Professor and director of the department of microbiology, The Johns Hopkins University School of Medicine, Mrs. Wood, and Carl V. Moore, M.D., Busch Professor and head of the John Milliken Department of Medicine, reminisce following Dr. Wood’s special lecture on “Studies on the Pathogenesis of Fever.” The portrait of Dr. Moore’s predecessor was commissioned by house officers who had trained with him here from 1942 to 1955. This was the first time the Woods had seen the portrait, now hanging outside Clopton Amphitheatre.

THE ’60s

Eric A. Pfeiffer, ’60, Durham, N.C., assistant professor at Duke University, has been named a Markle Scholar. He recently authored the book, “Disordered Behavior: Basic Concepts in Clinical Psychiatry.”

Raymond B. Isely, ’61, Philadelphia, Pa., is on the staff of the Rebound Children and Youth Program, a federally sponsored program of comprehensive medical care for children.

Carl E. Michell, ’61, Nashville, Tenn., is in private practice in internal medicine and a clinical instructor at Vanderbilt University Hospital and Veterans Administration Hospital.

Billy B. Bauman, ’62, has been promoted to major in the Army Medical Corps at Letterman General Hospital, San Francisco, Calif., where he is the senior resident in pathology.

John H. Stone, III, ’62, Atlanta, Ga., has been named chief resident in medicine at Grady Memorial Hospital, and instructor in the department of medicine at Emory University School of Medicine.

HOSPITAL ADMINISTRATION

The following changes have been reported by alumni of the Washington University School of Medicine Graduate Program in Hospital Administration.

William E. Claypool, ’49, from: Administrator, West Allis, Wis., Memorial Hospital, to: Assistant Administrator, The Toledo Hospital, Toledo, Ohio.

William R. Ramsey, ’50, from: Assistant Director, American Medical Association, to: Executive Director, American Society of Internal Medicine, San Francisco, Calif.

Hugh R. Vickerstaff, ’51, from: Assistant to the Dean, Baylor University College of Medicine, to: Vanderbilt University School of Medicine, Nashville, Tenn.

Richard Yarmain, ’54, from: Assistant Director, McLaren General Hospital, Flint, Mich., to: Administrator, Mary Free Bed Hospital, Grand Rapids, Mich.

Tasker K. Robinette, ’55, from hospital administrator to associate director of program planning and development, the Washington-Alaska Regional Medical Program, Seattle, Wash.

Wade C. Henry, ’58, from: Assistant Administrator, Southern Baptist Hospital, New Orleans, La., to: Assistant Administrator, Deaconess Hospital, Evansville, Ind.
A facsimile of the $100,000 check from Metropolitan Life Insurance Company to Washington University School of Medicine was presented for photographic purposes by Paull Robinson, '28, vice president and chief medical officer of the insurance firm, left, to William H. Danforth, M.D., vice chancellor for medical affairs, center, and Gerald T. Perkoff, '48, professor of medicine and of preventive medicine and public health, director of the division of health care research, under whose guidance the funds will be utilized to establish, operate and study a demonstration group-practice type program in ambulatory medical care. Metropolitan Life has expresses intent of additional grants of the same amount annually for another four years.

Glenn Lanier, '59, from: Administrator, Jess Parrish Hospital, Titusville, Fla., to: Associate Administrator, Children's Hospital, Pittsburgh, Pa.

Kenneth G. Hawthorne, '60, from: Administrator, Logan County Hospital, Russellville, Ky., to: Administrator, Athens-Limestone Hospital, Athens, Ala.

Maj. James Collom, '61, from: Chief, Administrative Service, USAF Hospital, Scott Air Force Base, Ill., to: Doctoral Student, Graduate Program in Hospital and Health Administration, University of Iowa, Iowa City.

Frederick M. Allison, '62, from: Associate Director, Pittsfield, Mass., General Hospital to: Administrator, Henry County General Hospital, Paris, Tenn.

C. Thomas Thorpe, '62, from: Administrator, Doctors Hospital, Mobile, Ala., to: Associate Director, North Carolina Regional Medical Program, Durham, N.C.

Capt. Myron Kraff, '65, from: Administrative Assistant, USAF Hospital, Tachikawa, Japan, to: Doctoral Student, Graduate Program in Hospital and Health Administration, University of Iowa, Iowa City.

Charles D. Setliffe, '65, from: Assistant Administrator, Fort Sanders Presbyterian Hospital, Knoxville, Tenn., to: Assistant Administrator, Saints Mary and Elizabeth Hospital, Louisville, Ky.

Maj. Burton Kaplan, '66, from: Assistant Administrator, USAF Hospital, Travis Air Force Base, Calif., to: Class No. 44, Armed Forces Staff College, Norfolk, Va.

Charles B. Daniel, '67, from: Administrative Assistant, Good Samaritan Hospital, Phoenix, Ariz., to: Assistant to the Administrator, Tucson Medical Center, Tucson, Ariz.

Robert J. Nelson, '67, from assistant director, Barnes Hospital, to assistant director and first full-time instructor, Washington University School of Medicine Graduate Program in Hospital Administration.

First Lieut. Gary Robinson, '67, from: Administrative Assistant, Methodist Hospital, Dallas, Tex., to: Surgical and Evacuation Hospital, Vietnam, MVBAS Personal Mail Service, APO, San Francisco, Calif. 96381.

Thomas C. Winston, '67, from: administrative assistant to assistant director, Barnes Hospital, St. Louis, Mo.

NEW DIVISION FORMED

Gerald T. Perkoff, '48, has been appointed director of the newly created division of health care research, to be established as a separate division of the Medical School.

In the post Dr. Perkoff will hold a joint appointment as professor of medicine and of preventive medicine and public health. He also will serve as consultant for medical care planning for the Washington University Medical School and Associated Hospitals (WUMSAH), which operate outpatient clinics in the Jewish Hospital of St. Louis, St. Louis Children's Hospital, and the Washington University Clinics, administered by Barnes Hospital.

Dr. Perkoff has served as chief of the Washington University Medical Service at St. Louis City Hospital, Max C. Starkloff Division since 1963.

Initial funding for the new division will come from grants from the W. K. Kellogg Foundation, to both the University and to the WUMSAH board, and from the National Fund for Medical Education.

In announcing the appointment, William H. Danforth, M.D., vice chancellor for medical affairs and president of the WUMSAH board, commented, "The rapid advances in medical science and therapy make it now essential for Washington University School of Medicine to turn attention to methods of bringing medical benefits to all, efficiently and at reasonable cost. Dr. Perkoff will give leadership in the study of the delivery of medical care and will make available instruction in this area for medical students and residents. We are fortunate to have a clinician and teacher of outstanding and well-recognized ability to serve as director of the unit."

PROMOTIONS ANNOUNCED

Forty faculty and staff members received promotions effective July 1.

Elevated to emeritus rank are Frank R. Bradley, M.D., hospital administration; James Barrett Brown, M.D., clinical surgery; and Walter P. Covell, Ph.D., M.D., anatomy and otolaryngology.

New professors are Stephen C. Kinsky, Ph.D., pharmacology; John M. Kissane, M.D., pathology and of pathology in pediatrics; Ruth Silberberg, M.D., George D. Sorenson, Jr., M.D., and William E. Stehbens, Ph.D., M.D., pathology; Edward Massie, M.D., clinical medicine; Walter G. Wiest, Ph.D., biochemistry in obstetrics and gynecology; and William H. McAlistcr, M.D., radiology and radiology in pediatrics.

Newly elevated associate professors are Robert C. Ahlvin, M.D., pathology; Louis V. Avioli, M.D., medicine; David Oliver Davis, M.D., radiology; Heinz Haffner, M.D., Carl E. Lischer, M.D., and C. Alan McAfee, M.D., clinical surgery, Alexis F. Hartmann, Jr., M.D., pediatrics; Allan E. Kolkcr, M.D., ophthalmology; Virgil Loeb, Jr., M.D., and Robert Paine, M.D., clinical medicine; Frank M. Matschinsky, M.D., pharmacology; David Schlessinger, Ph.D., microbiology; and Carl A. Wattenberg, M.D., clinical genitourinary surgery.

Appointed assistant professors are William C. Black, M.D., and Frederick T. Kraus, M.D., pathology; Arthur R. Bortnick, M.D., clinical obstetrics and gynecology; Neville Grant, M.D., Robert S. Karsh, M.D., and Burton A. Shatz, M.D., clinical medicine; Franz U. Steinberg, M.D., clinical medicine and clinical preventive medicine; Antonio Hernandez, Jr., M.D., pediatrics; Earl P. Holt, Jr., M.D., Robert E. Kulhman, M.D., and Willard B. Walker, M.D., clinical surgery; Vernon J. Perez, medical psychology; Jacqueline A. Reynolds, Ph.D., and Ernest S. Simms, microbiology; Luis H. Schwarz, M.D., psychiatry; and Bernd Silver, M.D., clinical ophthalmology.

THREE RECEIVE MARKLE SCHOLARSHIP

An assistant professor of surgery and two Washington University School of Medicine alumni were among the 25 named this year to receive Markle Scholarships.

John A. Collins, M.D., who joined the surgery department in 1967 following two years duty in the U.S. Army Medical Corps, is a 1959 graduate of Columbia University College of Physicians and Surgeons.

The two WUMS graduates are Edwin W. Salzman, ’53, assistant professor of surgery, Harvard Medical School; and Eric A. Pfeiffer, ’60, assistant professor of psychiatry, Duke University School of Medicine.

The John and Mary R. Markle Foundation of New York provides each school with $6,000 a year for five years to aid in the development of the Scholar as a teacher or investigator.

These faculty members also have been or presently are Markle Scholars: 1961, Walter F. Ballinger II, M.D., Bixby Professor and head of the Mary Culver Department of Surgery; 1955,
Harvey R. Butcher, Jr., M.D., professor of surgery; 1956, David M. Kipnis, M.D., professor of medicine; 1962, George R. Morrison, M.D., assistant professor of preventive medicine and of medicine; 1963, Clarence S. Weldon, M.D., associate professor of cardiac surgery; and 1964, William L. Green, M.D., assistant professor of medicine, and Joe W. Grisham, M.D., assistant professor of pathology.

NEW FACULTY COUNCIL OFFICERS
Neal S. Bricker, M.D., professor of internal medicine and head of the division of renal disease, has been elected chairman of the Faculty Council.
Malcolm McGavran, M.D., associate professor of pathology, was named vice chairman. Secretary is Milton Schlesinger, Ph.D., associate professor of microbiology, and Edward H. Reinhard, M.D., professor of internal medicine and head of the division of malignant disease, is clinical representative to the Executive Faculty.

GRANT TO AID TEACHING
Washington University School of Medicine is one of 30 schools that will share a $10 million grant from the Richard King Mellon Charitable Trusts for expanding and strengthening medical teaching.

The grant to Washington University is for $50,000 per year for five years.
Dean M. Kenton King, M.D., said of the grant, "This gift is for one of the greatest single needs of academic medicine today: that of increasing the number and enhancing the caliber of junior faculty members. "As in the case with other medical schools, we are finding it increasingly difficult to attract qualified young men and women to enter fulltime careers in teaching. With this addition to our existing funds, and with freedom to use the money where it is needed the most, we will be able to recruit and support promising young physicians and medical scientists."

TWO SURGERY HEADS NAMED
Appointment of heads of two divisions in the Mary Culer Department of Surgery have been announced.
Clarence S. Weldon, M.D., on July 1 became associate professor of cardiac surgery and Barnes Hospital cardiac surgeon-in-chief. The same date, John E. Hoopes, M.D., became associate professor of plastic and reconstructive surgery and Barnes plastic surgeon-in-chief.

Both come from the Johns Hopkins University School of Medicine where they also received their medical degrees — Dr. Weldon in 1955, and Dr. Hoopes in 1957.

CITY HOSPITAL CHIEF NAMED
Malcolm L. Peterson, M.D., Ph.D., assistant professor of medicine and head of the division of gastroenterology since 1961, on Sept. 15, 1968, will become chief of the Washington University Medical Service at City Hospital, Max C. Starkloff Division.
He succeeds Gerald T. Perkoff, M.D., professor of medicine, who has held the position since 1963, and who recently was appointed director of the newly created Division of Health Care Research.
In announcing Dr. Peterson's appointment, Carl V. Moore, M.D., Busch Professor and head of the John Milliken Department of Medicine, said, "During Dr. Perkoff's tenure at City Hospital a great many strides have been made in the area of health care research. To protect this investment; Washington University School of Medicine made a zealous search for an individual qualified to continue the progress. We are convinced that Dr. Peterson is this person."

Commenting on the aims and opportunities of his appointment, Dr. Peterson said, "We envision developing a program of health care structured just as it would be for a pre-paid group practice at any income level — in this case, designed for that population which the municipal hospitals are serving, namely the medically indigent."

"Dr. Perkoff and the staff he brought to City Hospital have been very productive in the research conducted in the cramped facilities presently at their disposal. It is anticipated in the near future that the laboratories will be expanded."

"The third-year medical clerkships at City Hospital will continue," Dr. Peterson noted, "and the Washington University house staff will have further opportunities to participate in the care of patients under ideal circumstances for teaching."

Dr. Peterson's research interests are in the studying of lipid and carbohydrate absorption and the causes of malabsorption syndromes. He received the B.S. degree in chemistry from Stanford University in 1950, the M.D. degree from the University of Washington School of Medicine in 1954, and the Ph.D. degree is biochemistry from the Rockefeller Institute in 1960.

His professional affiliations include Alpha Omega Alpha (he delivered the annual AOA Lecture in 1967, "The Physician as a Scholar — Changing Roles in the 20th Century"), American Gastroenterological Association, Central Society for Clinical Research, and Sigma Xi.
ON THE COVER
The Medical Class of '68, led by its president, John Shillinglaw, makes the triumphal march toward the Brookings Quadrangle for commencement exercises.

Outlook is published periodically for the faculty, staff, alumni, students and friends of Washington University School of Medicine. Correspondence is invited, and may be addressed to 660 South Euclid Avenue, St. Louis, Missouri 63110.
