WOMEN'S ATHLETICS
Coaches

Great credit is due Miss Kate Williams and Miss Childs for what they have accomplished in this, their first year in the Department of Physical Education for Women. Through their efforts and understanding, not only has the standard of the course been raised, but the bond of friendship between instructor and pupil has been strengthened.

Under their direction there have been many innovations in the course, among which are the introduction of soccer for women, and the substitution of character and folk dancing for the aesthetic training of former years. And, too, gymnasium classes consisting of apparatus work and calisthenics have been substituted by active participation in baseball, swimming, basketball, or some other sport during the class period.

May Day was different than ever before, as the program consisted of a play, adapted from "The Foresters," by Tennyson. The co-ed rollicked through Morris and Lincoln Green Dances instead of attempting to transmit the freedom of their spirits into the portrayal of nymphs and Baccantes.

Miss Williams and Miss Childs are graduates of the Chicago Normal School of Physical Education from which the former receives her degree in 1914, the latter in 1920.
