PUBLICATIONS OF WASHINGTON UNIVERSITY

Series I. THE WASHINGTON UNIVERSITY RECORD. This series is issued in four numbers—October, December, February, and April—and is intended for the entire University constituency: faculties, alumni, students, and friends of the institution generally. It contains a résumé of the principal activities of the University for the period covered, and announcements of important future events. The numbers also contain, occasionally, articles of an untechnical character on literary, scientific, or educational subjects. One issue (Annual Review) embodies a full review of the academic year, with the Chancellor’s Report, abstracts of University legislation, a list of the writings of members of the Faculties, and other matters of University interest. The Record will be mailed regularly, upon request, free of charge.

Series II. THE CATALOGUES. This series includes the Annual Catalogue of the University and the Catalogues of the College, the Schools of Engineering and Architecture, the School of Commerce and Finance, the Henry Shaw School of Botany, the School of Graduate Studies, the School of Law, the School of Medicine, the School of Dentistry, the School of Fine Arts, and the Division of University Extension.

Series III. THE MEDICAL BULLETIN. This publication consists of reprints of papers by members of the Faculty of the School of Medicine, and the Proceedings of the Washington University Medical Society.

Series IV. WASHINGTON UNIVERSITY STUDIES. This series contains technical articles and monographs of scholarly import. Two numbers are devoted to literature, linguistics, philosophy, history, and the social sciences; two to contributions of scientific and technological character.

Series V. WASHINGTON UNIVERSITY DOCTORAL DISSERTATIONS. This series contains dissertations accepted by the Faculty of Arts and Sciences in partial fulfilment of the requirements for the degree of Doctor of Philosophy.

BOARD OF PUBLICATION

Otto Heller, Ph.D. . . . . . . Chairman, General Editor
Thomas Shearer Duncan, Ph.D. . . . Editor of the Record
William Roy MacKenzie, Ph.D. . Editors of the Catalogues
George William Lamke, B.S. .
Robert James Terry, M.D. . . Editor of the Medical Bulletin
Otto Heller, Ph.D. . . . . .
Benjamin Minge Duggar, Ph.D. .
LeRoy McMaster, Ph.D. . . . Editors of Washington University Studies.
Archer Taylor, Ph.D. . . .
James Adelbert McMillen, A.B., B.L.S.

Address all communications regarding publications to the Secretary of the Board of Publication, Washington University, St. Louis, Mo.
CALENDAR
1922-23
Examinations for Advanced Standing and Removal of Conditions, Monday, Tuesday, and Wednesday, September 25, 26, and 27, 1922.
Academic Year (First Trimester) begins Thursday, September 28, 1922.
Holiday, Thanksgiving Day, Thursday, November 30, 1922.
First Trimester ends Saturday, December 16, 1922.
Second Trimester begins Monday, December 18, 1922.
Christmas Recess, Saturday, December 23, 1922, to Tuesday, January 2, 1923, inclusive.
First Semester ends Saturday, February 3, 1923.
Second Semester begins Monday, February 5, 1923.
Second Trimester ends Saturday, March 17, 1923.
Third Trimester begins Monday, March 19, 1923.
Holiday, Good Friday, March 30, and Saturday, March 31, 1923.
Third Trimester ends Saturday, June 2, 1923.
Final Examinations begin Monday, June 4, 1923.
Commencement, Thursday, June 14, 1923.
1923-24
Examinations for Advanced Standing and Removal of Conditions, Monday, Tuesday, and Wednesday, September 24, 25, and 26, 1923.
Academic Year (First Trimester) begins Thursday, September 27, 1923.
Holiday, Thanksgiving Day, Thursday, November 29, 1923.
First Trimester ends Saturday, December 15, 1923.
Second Trimester begins Monday, December 17, 1923.
Christmas Recess, Monday, December 24, 1923, to Wednesday, January 2, 1924, inclusive.
First Semester ends Saturday, February 2, 1924.
Second Semester begins Monday, February 4, 1924.
Holiday, Washington's Birthday, Friday, February 22, 1924.
Second Trimester ends Saturday, March 15, 1924.
Third Trimester begins Monday, March 17, 1924.
Holiday, Good Friday, April 18, and Saturday, April 19, 1924.
Third Trimester ends Saturday, May 31, 1924.
Final Examinations begin Monday, June 2, 1924.
Commencement, Thursday, June 12, 1924.

FREDERIC ALDIN HALL, A.M., LITT. D., L.H.D., LL. D.
Bridge Chancellor of the University
A.B., Drury College, 1878, A.M., 1881, and Litt.D., 1901; L.H.D., Tufts College, 1912; LL.D., Washington University, 1918, and University of Missouri, 1917. Principal of Drury Academy, 1878-91; Goodell Professor of Greek, 1892-01, and Dean, 1898-01, Drury College; Collier Professor of Greek, Washington University, 1901-17; Acting Dean of the College, 1907-08; Dean of the College, 1912-18. Acting Chancellor, Washington University, 1913-17; Chancellor, 1917-.

5846 Julian Avenue

NATHANIEL ALLISON, M.D. Professor of Clinical Orthopedic Surgery, and Dean
M.D., Harvard University, 1901; Interne, Boston Children's Hospital, 1901-02; Assistant, Instructor, Clinical Lecturer on, Associate in and Associate Professor of Clinical Orthopedic Surgery, Washington University Medical School, 1904-19; Orthopedic Surgeon to Martha Parsons Free Hospital for Children, 1903-09; Surgeon to St. Louis City Hospital, 1910-12; Orthopedic Surgeon to St. Luke's Hospital. Associate Surgeon, Barnes and St. Louis Children's Hospitals; Chief of the Orthopedic Clinic, Washington University Dispensary; Chief Surgeon, Shriners Hospital for Crippled Children, St. Louis.

Hotel Chase

JOSEPH ERLANGER, M.D. ............... Professor of Physiology
B.S., University of California, 1895; M.D., Johns Hopkins University, 1899; Resident House Officer, Johns Hopkins Hospital, 1899-1900. Fellow in Pathology, Assistant, Instructor, Associate, and Associate Professor of Physiology, Johns Hopkins University, 1900-06; Professor of Physiology, University of Wisconsin, 1906-10; Member of the National Research Council (Division of Medical Sciences). Physiologist to Barnes and St. Louis Children's Hospitals.

5127 Waterman Avenue

* All the names before the break in the list are those of the full-time staff.
THE SCHOOL OF MEDICINE.

EUGENE LINDSAY OPIE, M.D. .......... Professor of Pathology
A.B., Johns Hopkins University, 1893, and M.D., 1897; Resident House Officer, Johns Hopkins Hospital, 1897-98, and Assistant Resident Pathologist, 1900-02. Fellow, Assistant, Instructor, and Associate in Pathology, Johns Hopkins Medical School, 1897-1904; Associate and Member of the Rockefeller Institute for Medical Research, New York, 1904-10; Pathologist to the Presbyterian Hospital of New York, 1907-10. Dean, Washington University Medical School, 1912-15; Member of National Board of Medical Examiners. Pathologist to Barnes and St. Louis Children's Hospitals.

5102 Westminster Place

PHILIP ANDERSON SHAFFER, PH.D. Professor of Biological Chemistry
A.B., West Virginia University, 1900; Ph.D., Harvard University, 1904. Resident Assistant Pathological Chemist, McLean Hospital, Waverley, Mass., 1900-03; Assistant, Fellow, and Instructor in Chemical Pathology, Cornell University, 1904-10; Chemist to Huntington Fund for Cancer Research, 1906-10; Pathological Chemist and Head of Chemical Section of the Laboratory of Bellevue Hospital, 1909-10. Dean, Washington University School of Medicine, 1915-19. Chemist to Barnes and St. Louis Children's Hospitals.

5466 Clemens Avenue

ROBERT JAMES TERRY, M.D. .......... Professor of Anatomy
M.D., Missouri Medical College, 1895; A.B., Washington University, 1901; Interne, St. Louis Female Hospital, 1896. Demonstrator in Anatomy, Missouri Medical College, 1896-99; Assistant Professor and Professor of Anatomy, Washington University, 1899-1901; Austin Teaching Fellow in Histology and Embryology, Harvard University, 1906-07. Anthropologist to Barnes and St. Louis Children's Hospitals.

9 Lenox Place

LEO LOEB, M.D. .......... Professor of Comparative Pathology
M.D., Zurich, 1896. Adjunct Professor of Pathology, College of Physicians and Surgeons, Chicago, 1900-01; Experimental Pathologist, New York State Pathological Laboratory, 1902; Research Fellow, McGill University, 1903; Demonstrator, 1908-04, and Assistant Professor of Experimental Pathology in Charge of Laboratory, 1904-10, University of Pennsylvania; Director, Department of Pathology, Barnard Free Skin and Cancer Hospital, St. Louis, 1910-15.

6803 Kingsbury Boulevard
WILLIAMS McKIM MARRIOTT, M.D. . . . . Professor of Pediatrics
B.S., University of North Carolina, 1904; M.D., Cornell University, 1910.
Assistant in Chemistry, University of North Carolina, 1908-04; Assistant in Bio-chemistry, Cornell University Medical School, 1904-06; Instructor in Biological Chemistry, Washington University Medical School, 1910-14; Instructor and Associate in Pediatrics, Johns Hopkins University, 1914-17; Associate Pediatrician, Johns Hopkins Hospital, 1915-17; Consulting Physician, St. Louis City Hospital, 1918-21. Physician in Chief to St. Louis Children's Hospital, Pediatrician in Chief to Barnes Hospital and Washington University Dispensary, and Consulting Physician, Infectious Disease Hospital.

4763 Westminster Place

EVARTS AMBROSE GRAHAM, M.D. . . . . Bixby Professor of Surgery
A.B., Princeton University, 1904; M.D., Rush Medical College, 1907; Intern, Presbyterian Hospital, Chicago, 1907-08. Fellow in Pathology, Rush Medical College, 1906-07; Fellow, Assistant, and Instructor in Surgery, Rush Medical College, 1908-19; Member of Staff of O. S. A. Sprague Memorial Institute for Clinical Research, Chicago, 1912-15; Consulting Surgeon, St. Louis City Hospital, 1919-21. Surgeon in Chief to Barnes Hospital, St. Louis Children's Hospital, and Washington University Dispensary.

4711 Westminster Place

HERBERT SPENCER GASSER, M.D. . . . . Professor of Pharmacology
A.B., University of Wisconsin, 1910, and A.M., 1911; M.D., Johns Hopkins University, 1915. Instructor in Physiology, 1911-13, and in Pharmacology, 1915-16, University of Wisconsin. Instructor, Associate, and Associate Professor of Physiology, Washington University School of Medicine, 1916-21. Pharmacologist to Barnes and St. Louis Children's Hospitals.

5246 Waterman Avenue

........................................ Busch Professor of Medicine

LOUIS HERBERT BURLINGTON, M.D. . . . . Lecturer on Hospital Administration
A.B., Yale University, 1902; M.D., Johns Hopkins University, 1906. Interne, Assistant Resident Physician, and Assistant Administrator, Massachusetts General Hospital, 1906-12; Assistant Superintendent, Peter Bent Brigham Hospital, 1912-17. Superintendent of Barnes Hospital and Administrator of St. Louis Children's Hospital.

4954 Lindell Boulevard
PHILIP CHARLES JEANS, M.D. Associate Professor of Pediatrics
A.B., University of Kansas, 1904; M.D., Johns Hopkins University, 1909; Interne, Garrett Hospital for Children, Baltimore, Hartford Hospital, Hartford, and Children's Hospital, Floating Hospital, and City Hospital, Boston, 1909-12. Resident Physician, St. Louis Children's Hospital, 1912-13. Student Instructor in Chemistry, University of Kansas, 1902-04; Assistant, Instructor, and Associate in Pediatrics, Washington University Medical School, 1913-17. Associate Physician to St. Louis Children's Hospital; Associate Pediatrician to Barnes Hospital; Chief of the Pediatric Clinic, Washington University Dispensary, and Visiting Physician, Infectious Disease Hospital.

McMillan Hall

MONTROSE THOMAS BURROWS, M.D. Associate Professor of Experimental Surgery
A.B., University of Kansas, 1905; M.D., Johns Hopkins University, 1909. Assistant, Rockefeller Institute for Medical Research, 1909-11; Instructor in Anatomy, Cornell University Medical College, 1911-15; Associate in Pathology, Johns Hopkins University, 1915-17; Acting Resident Pathologist, Johns Hopkins Hospital, 1915-17; Associate Professor of Pathology, Washington University School of Medicine, 1917-20; Associate Pathologist to Barnes and St. Louis Children's Hospitals, 1917-20; Director of the Research Laboratory, Burnard Free Skin and Cancer Hospital. Clinical Assistant to Barnes Hospital, and Surgeon to Out Patients, Washington University Dispensary.

39 Jefferson Road, Webster Groves

JEAN VALJEAN COOKE, M.D.... Associate Professor of Pediatrics
A.B., University of West Virginia, 1903, and Yale University, 1904; M.D., Johns Hopkins University, 1908; Resident Pathologist, Pennsylvania Hospital, 1910-11. Instructor in Pathology, University and Bellevue Hospital Medical College, 1908-10, and Tulane University, 1911-12; Assistant Professor of Pathology, University of California, 1912-17; Associate in Pediatrics, Washington University School of Medicine, 1918-20. Assistant Physician to St. Louis Children's Hospital, Assistant Pediatrician to Barnes Hospital, and Physician to Out Patients, Washington University Dispensary.

4920 Forest Park Boulevard

FRANK ADAM McJUNKIN, M.D. Associate Professor of Pathology
M.D., University of Michigan, 1906, and A.M., 1912; Interne, University Hospital, Ann Arbor, Michigan, 1906-07. Assistant in Pathology, New York Post-Graduate Hospital, 1907-08; Instructor in Bacteriology, Uni-
versity of Michigan, 1908-09; Professor of Pathology and Bacteriology, University of Utah, 1909-11; Assistant in Pathological Laboratory, Boston City Hospital, 1912-14; Professor of Pathology, Marquette University School of Medicine, 1914-20. Associate Pathologist to Barnes and St. Louis Children's Hospitals.

7239 Lyndover Place

HOWARD HOMER BELL, M.D. Associate Professor of Bacteriology
M.D., University of Pennsylvania, 1912; Interne, Harrisburg General Hospital, 1912-13. Assistant in Pathology and Bacteriology, University of Alabama School of Medicine, 1913-14; Assistant in Pathology, and Instructor and Associate in Bacteriology, Washington University School of Medicine, 1914-21.

4949 Forest Park Boulevard

CHARLES MERL MICHAEL GRUBER, PH.D., M.D. Associate Professor of Pharmacology
A.B., University of Kansas, 1911, and A.M., 1912; Ph.D., Harvard University, 1914; M.D., Washington University, 1921. Fellow in Physiology, University of Kansas, 1911-12; Austin Teaching Fellow, 1912-13, and Teaching Fellow in Physiology, 1913-14, Harvard University Medical School; Instructor in Physiology, University of Pennsylvania, 1914-15; Professor of Physiology and Pharmacology, Albany Medical College, 1915-17; Professor of Physiology and Pharmacology, University of Colorado, 1917-20; Associate in Physiology, Washington University School of Medicine, 1920-21.

4904 Buckingham Court

RALPH ALOYSIUS KINSSELLA, M.D. Associate Professor of Medicine
A.B., St. Louis University, 1906; A.M., 1910; M.D., 1911. Interne, St. Louis City Hospital, 1911-14. Fellow in Medical Research, 1914-17, and Instructor in Medicine, 1915-17, Columbia University; Assistant Attending Physician, Presbyterian Hospital, New York, 1917; Professor of Experimental Medicine, St. Louis University, 1919-21. Acting Physician in Chief to Barnes Hospital and Washington University Dispensary.

5808 Westminster Place

EDWARD ADELBERT DOISY, PH.D. Associate Professor of Biological Chemistry
A.B., University of Illinois, 1914, and M.S., 1916; Ph.D., Harvard University, 1920. Assistant in Biological Chemistry, Harvard Medical School, 1915-17; Instructor and Associate in Biological Chemistry, Washington University School of Medicine, 1919-22.

4121a De Tonty Street
Otto Henry Schwarz, M.D....Associate Professor of Obstetrics
M. D., Washington University, 1913; Intern, St. Louis Children's Hospital, 1918, and Washington University Hospital, 1914; Resident Obstetrician, Barnes Hospital, 1914-15. Assistant and Instructor in Clinical Obstetrics, 1915-21, and Associate in Obstetrics, 1921-22, Washington University School of Medicine; Assistant Gynecologist to Barnes Hospital, 1917-21. Obstetrician in Chief to Barnes Hospital and to Washington University Dispensary.

4937 Laclede Avenue

Robert Albert Gesell, M.D........Associate Professor of Physiology
A.B., University of Wisconsin, 1910; M.D., Washington University, 1914. Assistant, Instructor, and Associate in and Associate Professor of Physiology, Washington University School of Medicine, 1910-19; Professor of Physiology, University of California, 1919-22.

37 Denver Place, Webster Groves

Sherwood Moore, M.D.....Associate in Surgery (Radiology)
M.D., Washington University, 1905; Intern, St. Louis City Hospital, 1905-06; Resident, Washington University Hospital, 1906-07. Instructor in Obstetrics, Washington University Medical School, 1907-09; Assistant in Surgery, St. Louis Children's Hospital, 1910-18; House Physician, Massachusetts General Hospital, X-ray Department, 1916-17. Roentgenologist in Charge of the Actinographic Laboratory, Barnes Hospital.

Usona Hotel

Samuel Wolcott Clausen, M.D.....Associate in Pediatrics
A.B., Williams College, 1910; M.D., Johns Hopkins University, 1915; Intern and Assistant Resident Physician, Johns Hopkins Hospital, 1915-17. Instructor in Pediatrics, Washington University School of Medicine, 1917-20. Assistant Physician to St. Louis Children's Hospital, Assistant Pediatrician to Barnes Hospital, and Physician to Out Patients, Washington University Dispensary.

4949 Forest Park Boulevard

Robert William Kerr, M.D., Major, Medical Corps, United States Army. Assistant Professor of Military Science and Tactics
M.D., Yale University, 1908. Intern, New York Children's Hospital, 1903-04; New York Infant Asylum and Marion Street Maternity Hos-
12 BULLETIN OF WASHINGTON UNIVERSITY.

pital, 1904-05. Bacteriologist, 1907-08; Attending Physician, 1908, Newport Hospital.

5734 McPherson Avenue

GEORGE HOLMAN BISHOP, PH.D. Associate in Physiology
A.B., University of Michigan, 1912; Ph.D., University of Wisconsin, 1920. Instructor in Zoology, Northwestern University, 1919-20; Assistant Professor of Histology, University of Tennessee Medical College, 1920-21.

6052 Clayton Avenue

EDGAR ALLEN, PH.D. Associate in Anatomy

4015a Shaw Avenue

FRANK HENRY EWERHARDT, M.D. Associate in Physical Therapeutics
M.D., Washington University, 1910. Assistant in Anatomy, 1913-14, and Assistant and Instructor in Medicine, 1915-22, Washington University School of Medicine; Assistant Surgeon, Orthopedic Out Patient Clinic, St. Louis Children's Hospital, 1912-14; Surgeon to Out Patients, Washington University Dispensary, 1915-21. Physician in Charge of Physical Therapeutics, Barnes Hospital.

5204 Kensington Avenue

HARVEY LESTER WHITE, M.D. Associate in Physiology
B.S., Washington University, 1918, and M.D., 1920. Interne, St. Louis Children's Hospital, 1920. Assistant and Instructor in Physiology, Washington University School of Medicine, 1920-22.

Scott and Euclid Avenues

KIRSTEN UTHEIM TOVERUD, M.D. Instructor in Pediatrics
M.D., University of Norway, 1916. Interne, Kristiania Kommunale Sykehus, 1916-17; Voluntary Assistant in Pediatrics, University of Copenhagen, 1917-18; Assistant in Pediatrics, University of Norway, 1918-19. Assistant Pediatrician, Barnes Hospital; Assistant Physician, St. Louis Children's Hospital; and Physician to Out Patients, Washington University Dispensary.

5316 Pershing Avenue
L. S. Newman Walsh, M.D. ---------- Instructor in Pathology
D.V.M., Kansas City Veterinary College, 1912; M.D., St. Louis University, 1916. Assistant in Comparative Pathology, 1916-17, and Assistant in Pathology, 1919-21, Washington University School of Medicine; Resident Pathologist, Barnes Hospital, and Assistant Pathologist to the St. Louis Children's Hospital, 1918-19. Assistant Pathologist to Barnes Hospital.

4225 Delmar Boulevard

Ethel Ronzoni, A.M. (Mrs. George Holman Bishop)
Instructor in Biological Chemistry
B.S., Mills College, 1913; A.M., Columbia University, 1914. Instructor in Home Economics, University of Missouri, 1914-17; Assistant Professor of Home Economics, University of Minnesota, 1917-18; Assistant and Instructor in Physiology, University of Wisconsin, 1918-21.

6952 Clayton Avenue

Beatrice Whiteside, Ph.D. .......... Instructor in Anatomy
A.B., Vassar College, 1913; Ph.D., University of Zurich, 1920.

4926 Forest Park Boulevard

Otto St. Clair Krebs, M.D. ............ Instructor in Obstetrics
B.S., Washington University, 1917, and M.D., 1919. Interne, Assistant Resident, and Resident Obstetrician and Gynecologist, Barnes Hospital, 1918-21. Assistant in Clinical Obstetrics and in Obstetrics, Washington University School of Medicine, 1920-22. Clinical Assistant to Barnes Hospital, and Obstetrician to Out Patients, Washington University Dispensary.

4483 Laclede Avenue

Leonard Tomb Davidson, M.D. .......... Instructor in Pediatrics
A.B., Oberlin College, 1912; M.D., Johns Hopkins University, 1919. Interne, Peter Bent Brigham Hospital, 1919-20; Assistant Resident Physician, Presbyterian Hospital, New York, 1920-21. Assistant in Medicine, Columbia University, 1920-21; Assistant in Pediatrics, Washington University School of Medicine, 1921-22. Resident Pediatrician, Barnes Hospital; Resident Physician, St. Louis Children's Hospital; and Physician to Out Patients, Washington University Dispensary.

St. Louis Children's Hospital
MILTON ROY STAHL, LL.B. . Instructor in Medical Jurisprudence
A.B., Missouri University, 1914; LL.B., Washington University, 1920.
Assistant in Political Science, Washington University, 1920-21.

Security Building

KENNETH LIVINGSTON BURDON, Ph.D. . Instructor in Bacteriology
Ph.B., Brown University, 1918; Sc.M., 1920; Ph.D., 1922. Chief Inspector,
Mosquito Control Work, Health Department, Providence, R. I., 1919-20;
Assistant Bacteriologist, Health Department and City Hospital, Providence,
1920-21; Graduate Assistant in Biology, Brown University, 1919-22.

4949 Forest Park Boulevard

ISAAC YALE OLCH, M.D. . . . . . . . . . . . . Instructor in Pathology
Ph.B., Brown University, 1917; M.D., Johns Hopkins University, 1921.
Interne and Assistant Resident, in Charge of Surgical Pathology, Johns
Hopkins Hospital, 1921-22; Assistant in Pathology, Johns Hopkins Un-
iversity, 1921-22.

4949 Forest Park Boulevard

ANDREW BLUCHER JONES, M.D. . . . Instructor in Neuropathology
M.D., Vanderbilt University, 1916. Instructor in Bacteriology and
Serology, Vanderbilt University, 1916-17. Interne and Assistant Resi-
dent in Neurology, Barnes Hospital, 1919-21; Resident and Instructor
in Psychiatry, State Psychopathic Hospital, University of Michigan,
1921-22. Visiting Physician, Glenwood Sanatorium. Physician to Out
Patients, Washington University Dispensary, and Visiting Physician,
St. Louis City Hospital.

1128a N. Hodiamont Avenue

MICHAEL SOMOGYI, PH.D. . . . Instructor in Biological Chemistry
Ch.E., Technische Hochschule of Budapest, 1905; Ph.D., University of
Budapest, 1914. Assistant, University of Budapest, 1905-06. Research
Assistant, Cornell University Medical College, 1906-07.

4949 Forest Park Boulevard

EDWARD VERNON MASTIN, M.D. . . . . . . . . . . Instructor in Anatomy
M.D., University of Pennsylvania, 1916; M.S., University of Minnesota,
1922. Interne, Philadelphia Polyclinic, 1916-17, and St. Mary’s and
Colonial Hospitals, Rochester, Minn., 1919-20. Fellow in Surgery, Mayo
Foundation, 1917-18 and 1919-22.

Wall Building
FOREST HENRY STALEY, M.D. . . . . . . . Assistant in Anatomy
A.B., University of Wisconsin, 1909; M.D., Washington University, 1918;
Interne, Assistant Resident Surgeon, and Acting Resident Surgeon,
Barnes Hospital, 1917-19. Assistant in Surgery and in Clinical Surgery,
Washington University School of Medicine, 1919-21.
4267 Manchester Avenue

IRENE KΟECΗIC, A.M. . . . . . . Assistant in Biological Chemistry
A.B., Washington University, 1912; A.M., 1918.
512 Waterman Avenue

ALFRED POYNEER BRIGGS, M.D. . . . . . . Assistant in Biological
Chemistry and in Medicine
B.S., University of Colorado, 1912; M.D., Washington University, 1922.
Assistant Physician to Out Patients, Washington University Dispensary.
4949 Forest Park Boulevard

GLOVER H. COPHER, M.D. . . . . . . Assistant in Surgery
A.B., University of Missouri, 1916; M.D., Washington University, 1918.
Assistant Resident and Resident Surgeon, Barnes Hospital, 1918-22.
Clinical Assistant, Barnes Hospital; Visiting Surgeon, St. Louis City
Hospital.
4433 Laclede Avenue

WILLIAM HAROLD CHAMBERS, Ph.D. Assistant in Experimental
Surgery
B.S., University of Illinois, 1915; M.S., 1917; Ph.D., Washington Univer-
sity, 1920. Assistant in Research Laboratories, Barnard Free Skin and
Cancer Hospital.
7347 Marietta Avenue

DUFF SHEDERIC ALLEN, M.D. . . Assistant in Surgery
M.D., Washington University, 1919. Interne, St. Luke's Hospital,
1918-19.
5942 Minerva Avenue

THEODORE EDWARD FRIEDEMANN, A.M. Assistant in Biological
Chemistry
B.S., Oklahoma Agricultural and Mechanical College, 1915; A.M., Uni-
versity of Missouri, 1921. Instructor in Chemistry, Michigan Agricultural College, 1915-17; Assistant Chemist, Michigan Agricultural Experiment Station, 1917-19; Assistant in Agricultural Chemistry, Missouri Agricultural Experiment Station, 1920-21.

4475 Forest Park Boulevard

CHARLES DARRELL O'KEEFE, M.D. . . . Assistant in Gynecological Surgery
A.B., University of Missouri, 1916; M.D., Washington University, 1918. Interne, Assistant Resident, and Resident Obstetrician and Gynecologist, Barnes Hospital, 1919-22; Assistant in Obstetrics, Washington University School of Medicine, 1921-22. Surgeon to Out Patients, Washington University Dispensary.

Wall Building

BRANSFORD LOUIS ADELSBERGER, M.D. . . . . Assistant in Surgery

Barnes Hospital

FREDERICK AUGUSTUS JOSTES, M.D. . . . . . . . Assistant in Surgery
B.S., Washington University, 1918; M.D., 1920. Interne, Barnes Hospital, 1920-21. Assistant Resident Surgeon, Barnes Hospital.

Barnes Hospital

BESS LUCILE LLOYD, B.S. . . . . . . . Assistant in Anatomy
B.S., Northwestern University, 1921.

McMillan Hall

ALEXIS FRANK HARTMANN, M.D. . . . . . . Assistant in Pediatrics
B.S., Washington University, 1919; M.S. and M.D., 1921. Interne, St. Louis Children's Hospital, 1921-22. Assistant Resident Physician, St. Louis Children's Hospital.

St. Louis Children's Hospital

LESTER J. EVANS, M.D. . . . . . . . Assistant in Pediatrics
M.D., Washington University, 1921. Interne, St. Louis Children's Hospital, 1921-22. Assistant Resident, St. Louis Children's Hospital.

St. Louis Children's Hospital
KEHAR SINGH CHOUKE, M.D. . . . . . . . Assistant in Anatomy
H.A., Agra Medical School, 1906; M.D., Washington University, 1922.
Instructor in Anatomy, Washington University School of Dentistry.

4949 Forest Park Boulevard

MILDRED TROTTER, M.S. . . . . . . . Assistant in Anatomy
A.B., Mount Holyoke College, 1920; M.S., Washington University, 1921.

McMillan Hall

WILLIAM ALEXANDER MICHAEL, M.D. . . Assistant in Obstetrics
M.D., Washington University, 1921. Interne, Barnes Hospital, 1921-22.
Resident Obstetrician, Barnes Hospital.

Barnes Hospital

RICHARD PADDOCK, M.D. . . . . . . . Assistant in Obstetrics
M.D., Washington University, 1921. Interne, Barnes Hospital, 1921-22.
Resident Obstetrician and Gynecologist, Barnes Hospital.

Barnes Hospital

ARCHIE DREYFUS CARR, M.D. . . . . . . Assistant in Neurology
B.S., Washington University, 1918; M.D., 1921. Assistant Resident
Physician, Barnes Hospital, and Physician to Out Patients, Washington
University Dispensary.

Barnes Hospital

PAUL SHIRMER BARKER, M.D. . . . . . . Assistant in Medicine
Interne, Presbyterian Hospital, New York, 1920-22. Physician to Out
Patients, Washington University Dispensary.

5637 Enright Avenue

ROLAND METZLER KLEMME, M.D. . . . . . . Assistant in Surgery
M.D., Washington University, 1921. Interne, Barnes Hospital, 1921-22.
Surgeon to Out Patients, Washington University Dispensary.

4366 W. Pine Boulevard

LEITH HOLLINSHEAD SLOCUMB, M.D. . . . . . . Assistant in Anatomy
M.D., Washington University, 1913. Interne, St. Louis City Hospital,
1913-14; Assistant in Medicine, Washington University School of Med-
icine, 1917-20; Assistant Physician and Physician to Out Patients, 1917-
20, and Assistant Surgeon to Out Patients, 1920, Washington University Dispensary; Physician in Charge, St. John's Hospital, Fort Smith, Ark., 1920-21.

Humboldt Building

**ALFRED GOLDMAN, M.D.** Assistant in Medicine
A.B., Washington University, 1916; M.D., 1920; M.S., 1922. Interne, Resident Pathologist and Assistant Resident Physician, Barnes Hospital, 1920-22; Assistant in Pathology, 1920-21, Washington University School of Medicine. Resident Physician to Barnes Hospital.

Barnes Hospital

**CHIN-SHENG WU, M.D.** Assistant in Medicine
B.S., University of Chicago, 1920; M.D., Washington University, 1922. Physician to Out Patients, Washington University Dispensary.

4949 Forest Park Boulevard

**VINCIL ROGERS DEAKIN, M.D.** Assistant in Pathology
M.D., Washington University, 1922. Resident Pathologist, Barnes and St. Louis Children's Hospitals.

Barnes Hospital

**WARREN HENRY COLE, M.D.** Assistant in Surgery
B.S., University of Kansas, 1918; M.D., Washington University, 1920. Interne, Bay View Hospital, 1920-21, and Barnes Hospital, 1921-22. Assistant Resident Surgeon, Barnes Hospital.

Barnes Hospital

**GEORGE CAMPBELL BATES, M.D.** Assistant in Surgery
M.D., Harvard University, 1921. Interne, Barnes Hospital, 1921-22. Assistant Resident Surgeon, Barnes Hospital.

Barnes Hospital

**OSCAR CHARLES ZINK, M.D.** Assistant in Surgery (Radiology)
M.D., Washington University, 1921. Interne, St. Louis City Hospital, 1921-22.

914 Lebanon Avenue, E. St. Louis

**EDWARD WATTS SAUNDERS, M.D.** Professor Emeritus of Diseases of Children and Clinical Midwifery

GENERAL STATEMENT
HISTORY AND ORGANIZATION

The Medical Department of Washington University, called in 1909 the Washington University Medical School, continues the work of the St. Louis Medical College and the Missouri Medical College, the two oldest medical schools west of the Mississippi River. In 1918 the name was changed by the Corporation to Washington University School of Medicine.

The Medical Department of Kemper College of St. Louis was organized in 1840; in 1845 it became the Medical Department of the University of the State of Missouri. By change of its charter in 1855, it was made an independent institution known as the Missouri Medical College. The work of the School was discontinued in 1862, but was resumed in 1865 at the end of the Civil War.

The Medical Department of St. Louis University, founded in 1842, was chartered as an independent institution in 1855 under the name of the St. Louis Medical College.

The Medical Department of Washington University was created by the Corporation in 1891, when the St. Louis Medical College became a part of Washington University. In 1899 the Missouri Medical College was merged with this department.

Graduates of the St. Louis Medical College number 2125; of the Missouri Medical College, 2915; and of the Medical Department of Washington University, 965.

In 1910 the Corporation of the University, appreciating the value of the service which a medical school can give to the community, with the cooperation of the Medical Faculty, reorganized the School in all departments and appointed heads of departments and instructors in anatomy, physiology, biological chemistry, pathology, medicine, surgery, and pediatrics, who devote themselves to teaching and research, and associated with this staff clinical instructors chosen from the medical profession of St. Louis. These changes were made with the aid of funds donated by philanthropic citizens of St. Louis.

In 1916 the sum of one and one-half million dollars was
contributed to the School of Medicine by the General Education Board, Mr. John T. Milliken, Mrs. Mary Culver and Mr. Edward Mallinckrodt. This sum has been divided into three equal parts designated as the John T. Milliken Fund for the Endowment of Clinical Teaching and Research in Medicine, the Mary Culver Fund for the Endowment of Clinical Teaching and Research in Surgery, and the Edward Mallinckrodt Fund for the Endowment of Clinical Teaching and Research in Pediatrics, respectively, and the income is devoted to the support of the departments named.

These endowments have enabled the School of Medicine to place the clinical departments of Medicine, Surgery, and Pediatrics upon the full university basis, under the direction and control of men devoting all of their time to university work. With them are associated practitioners of medicine giving part time to the work of the School of Medicine.

In 1919, the Department of Pharmacology was placed on a full university basis by an endowment for that department of three hundred thousand dollars, half of which was contributed by the General Education Board and half by a friend of the University.

An affiliation has been established between the Barnes Hospital and the St. Louis Children's Hospital and Washington University, by which the University agrees to provide the medical staffs of the hospitals, and the hospitals agree to permit the University to use the hospitals for purposes of teaching and research. These hospitals have erected buildings on Kingshighway overlooking Forest Park, which became available for use in the autumn of 1914. Adjacent to the hospital buildings, a dispensary and large, thoroughly equipped laboratories have been built (see below). This close association enables the teaching staff of the University to give laboratory and clinical instruction, and to conduct and direct research in all branches of medicine in a single compact plant. A similar affiliation has been established between Washington University and the Trustees of the Shriners Hospitals for Crippled Children. This Board of Trustees is erecting a hospital on Euclid Avenue, south of the South Building, which will be ready to receive patients during 1923.
THE BUILDINGS OF THE SCHOOL OF MEDICINE

The three buildings of the School of Medicine are connected by corridor and tunnel with the Barnes Hospital and the St. Louis Children's Hospital. They are the Building for the Dispensary and Hospital Laboratories, the North Laboratory Building and the South Laboratory Building.

THE BUILDING FOR THE DISPENSARY AND HOSPITAL LABORATORIES is situated at the northeast corner of the hospital lot. The Dispensary occupies the first floor and basement, the Laboratory of Internal Medicine the second floor, and the Department of Pathology the upper two floors, together with a western extension of the building connecting it with the Barnes Hospital, and containing the mortuary and the autopsy amphitheatre.

THE NORTH LABORATORY BUILDING on Euclid avenue opposite the Barnes Hospital contains the administrative offices of the School of Medicine, the Assembly Hall, the Library, and the Departments of Experimental Surgery, Comparative Pathology, and Anatomy.

THE SOUTH LABORATORY BUILDING is connected by corridor with the North Laboratory Building. It accommodates the Departments of Biological Chemistry, Pharmacology, and Physiology.

Unit systems prevail in the general construction of these buildings, and so far as advantageous in the fixtures and furnishings. Provision is made in all lecture rooms for the different methods of optical projection and for demonstrations involving the use of gas, water, electricity, and compressed air. Research laboratories and technicians' rooms are provided with forced-draft hoods, electricity, steam, and apparatus for controlling temperature. The attic space is utilized for the assembling of the air ducts from the chemical hoods and for the electric fans operating the draught. A steam still and tin-lined tanks for distilled water are located here, with block-tin pipes running from the tanks to the basement, with openings on each floor.

NURSES' HOME

This building is located on Kingshighway facing Forest Park, and just north of the Children's Hospital. It is of concrete con-
struction and fire-proof. On the first floor are reception rooms, a class room, and administrative offices. The upper floors are arranged to accommodate 125 nurses.

About 70 nurses are housed in one of the buildings of the Barnes Hospital.

**POWER PLANT**

The power plant is located east of Euclid avenue and north of the North Laboratory Building. It furnishes light, heat, power, refrigeration, and compressed air to the buildings of the School of Medicine, the Dispensary, the Barnes Hospital, and the St. Louis Children's Hospital.

**LIBRARY**

The Library contains (October 1, 1922) 33,637 bound volumes and receives 444 of the most important medical periodicals, selected with reference to the needs of students and investigators. Of these 391 are in complete series. Including obsolete journals, there are 652 complete sets.

The Library is open week days from 8:30 A.M. to 10:00 P.M., except Saturdays, 8:30 to 6:00. In summer vacation the hours are 9:00 A.M. to 5:00 P.M.

The stacks are open to readers. In the stack rooms every other stack has a table at the window end. There are also three study rooms where books can be placed for investigators.

The Library has been enriched by the acquisition of several private collections. Among these are the library of the late Julius Pagel, Professor of the History of Medicine at the University of Berlin, the gift of the late Mrs. Benjamin Brown Graham of St. Louis. This comprises about twenty-five hundred titles, including many works on the history of medicine, medical biography, bibliography, terminology, medical sociology, and ethics. There is also the fine collection of the late Dr. John Green of periodicals and books relating to ophthalmology; that of the late Dr. W. E. Fischel, on internal medicine, and the library of the late Dr. Frank J. Lutz, Clinical Professor of Surgery, containing many valuable works on anatomy, surgery, medical history, and biography.
The Beaumont Room, adjoining the main reading room, contains manuscripts, letters, and other valuable material of the pioneer American physiologist, William Beaumont, presented to the University by his granddaughter, the late Lily Beaumont Irwin. The original notes made during the investigations on the stomach of Alexis St. Martin form part of the collection. Here also may be seen the portrait of Beaumont by Chester Harding.

Other libraries in St. Louis containing literature relating to medicine, which are available to students, either directly or through the Library of the School, are the following:

- The Library of Washington University, Skinker road.
- The St. Louis Medical Library, 3525 Pine street.
- The St. Louis Public Library, Olive and Fourteenth streets.
- The Library of the Missouri Botanical Garden, Shenandoah and Tower Grove avenues.
- The Mercantile Library, Broadway and Locust street.

**MUSEUMS AND COLLECTIONS**

In the Department of Anatomy there is a museum for teaching and a collection of material for investigation.

The museum is combined with the class laboratories in order that it may be used for reference at all times. It comprises specimens and models of adult organs and organic systems, variations, and preparations illustrating development. Recently a valuable collection of anatomical specimens prepared with unusual skill and care by Bohumil Hochmann has been purchased for the museum. The collection contains a series of skeletons, of known race, sex and age, Indian crania and other material for anthropological study; microscopical sections, embryos, and models, and materials for the study of comparative anatomy.

The Museum of Pathology contains specimens prepared and catalogued for use in the teaching of pathological anatomy. Specimens needed by any department of the School for demonstrations or lectures may be obtained from the museum under regulations similar to those in force in the Library. The Departments of Surgery and Obstetrics have aided in the collection of material suitable for the teaching of these subjects and other special departments have the opportunity to cooperate in
making similar collections. Diseases of bones are well illustrated by a large number of specimens collected during the early history of the School by Dr. Charles A. Pope and Dr. John T. Hodgen. A section of the museum contains experimental pathological lesions.

MEDICAL BULLETIN OF WASHINGTON UNIVERSITY

The Medical Bulletin contains the proceedings of the Washington University Medical Society. It is distributed, at present, to the libraries of medical schools and certain other scientific institutions and, in the form of separates, to the alumni of the School of Medicine.

WASHINGTON UNIVERSITY MEDICAL SOCIETY

The Washington University Medical Society is conducted to promote the advance of medicine in the University and in the hospitals affiliated with it by the report and discussion of investigations undertaken in the laboratories and hospitals. Meetings are held on the second Monday of each month during the academic year. The meetings are open to students of the School. Physicians of St. Louis and visiting physicians are welcome.

CLINICAL FACILITIES

The affiliation of the Barnes Hospital, the St. Louis Children’s Hospital, and the Shriners Hospital for Crippled Children with the Washington University School of Medicine makes these institutions for teaching purposes integral parts of the School of Medicine. These hospitals offer opportunities for study and observation in every important branch of medicine, and are closely connected with the Dispensary conducted by the University, which serves as the Out-Patient Department of these hospitals. This assures to the student unusual advantages in clinical work. The attending staffs of Barnes Hospital and St. Louis Children’s Hospital consist of the heads of the University Departments of Medicine, Surgery, Obstetrics, and Pediatrics, with their associates and assistants. The staff of the Shriners Hospital for Crippled Children consists of a chief surgeon, who is Professor of Clinical Orthopedic Surgery in the School of Medicine, and associated with him are the heads of the University Departments.
of Medicine, Surgery, Obstetrics, and Pediatrics, with their associates and assistants.

Free and pay patients may be admitted to Barnes and St. Louis Children's Hospitals, but every effort is made to prevent the pauperization of the individual, and patients who are able to pay are expected to meet the nominal rates in force. The Shriners Hospital for Crippled Children admits free patients only.

In all hospitals there is adequate laboratory equipment for the investigations necessary in diagnosis. In addition to the ward laboratories, there are special laboratories in all departments with facilities for research workers.

THE BARNES HOSPITAL

The buildings of the Barnes Hospital are situated upon a lot 837 feet in length, which runs from Kingshighway on the west to Euclid avenue on the east, facing Forest Park on the south and west. The group of hospital buildings proper consists of a central administration building, from which extend corridors leading to the medical and surgical wards, and to the private pavilion and service buildings. These buildings are of fire-proof construction.

The main entrance of the administration building opens upon a spacious rotunda. On either side of this rotunda are situated the general information office, the administrative office, the trustees' room, offices of the superintendent, the admitting office, and rooms for the physician-in-chief. The resident medical staff is housed in the second and third stories of this building. On the top floor is the operating pavilion and the lecture room for the Medical Department. The arrangement of the operating pavilion is such that the incoming patients may be conducted to the etherizing rooms by way of a separate corridor and are not brought into contact with the routine work of the department. There are one large and three small operating rooms, a small amphitheater, rooms for special examinations, offices of the surgeon in chief, dressing rooms, and workroom for the nurses. To the north of the administration building is the service building containing kitchens, dining-room, bakery, and rooms temporarily used by nurses, behind which the laundry occupies a separate building.
The building at the west of the hospital lot facing Forest Park both on the south and west is the private pavilion. Its separate entrance on Kingshighway gives to service the convenience of a private hospital with all the advantages of a general hospital.

The wings containing the wards of the hospital are situated on either side of the administration building. They are three stories high and have the shape of the letter T. On either side of the wards are porches for convalescent and bed patients.

With the space in the private pavilion the initial capacity of the Barnes Hospital is approximately 250 beds. Sufficient space is reserved to increase this number materially.

The Hospital contains numerous class rooms, laboratories, lecture rooms, and examining rooms, in addition to the accommodations usually found in general hospitals. Special provision has also been made for a modern equipment in the Departments of Actinography and Hydro- and Physical Therapy, and special wards and laboratories are provided for metabolic studies.

The Hospital is wired for the electrocardiograph, which is located in the Dispensary building.

THE ST. LOUIS CHILDREN'S HOSPITAL

The St. Louis Children's Hospital, which is placed on the same tract as the Barnes Hospital, immediately northwest of it and facing Forest Park on the west, offers facilities for bedside study and instruction in the diseases of infancy and childhood, including the infectious diseases. It is built of gray brick and harmonizes in color and design with the adjacent buildings. The Hospital has general medical wards, auditorium, and contagious wards with the accessory equipment of each.

The building devoted to general hospital work is five stories high and contains wards for general medicine, for infants, for general and orthopedic surgery, research laboratories, and rooms for the residents and internes. In connection with the third floor there is a large open-air ward on the roof of the auditorium building. In this part of the Hospital there are 120 beds.

The Building for Contagious Diseases contains 40 beds. The three floors may be isolated for the different contagious diseases. Accommodations have been made for mothers of sick children and to a limited extent for adults with infectious diseases.
Between the general hospital and the contagious building there is an auditorium two stories high, connected with the other two buildings. The out-patient department of the Hospital is located in the general out-clinic department of the School of Medicine.

A valuable adjunct to the St. Louis Children's Hospital is its Country Department, located on the Missouri Pacific Railway, one and one-half miles from Valley Park. The hospital building of this department is of brick and concrete construction and fireproof. It consists of two open wards, each to accommodate 25 children, overlooking the Meramee River to the south.

Funds have been collected and arrangements are being made to increase the number of rooms in the Hospital in St. Louis, and to improve the facilities at Ridge Farm.

THE SHRINERS HOSPITAL FOR CRIPPLED CHILDREN

The Ancient Arabic Order, Nobles of the Mystic Shrine, have located a hospital of eighty beds on Euclid Avenue in the city block immediately south of the South Building of the School of Medicine. This hospital is in course of construction, and will be open for the reception of patients in the summer of 1923. It will receive into its wards crippled children up to the age of fourteen years. The hospital is one of several hospitals which this organization is building in various localities in the United States and Canada. Its purpose is to give free care to crippled and deformed children who may be found in St. Louis and its surrounding territory. The hospital is being built and will be equipped as the most modern of orthopedic hospitals.

HOSPITAL FOR COLORED PATIENTS

Plans have been completed and specifications drawn for the erection of a new pavilion for colored patients, this building to be located on the hospital block between the Children's Hospital and the Service Building. Pending the construction of these quarters colored patients are being provided for in special wards set aside for their use in the Barnes Hospital.
WASHINGTON UNIVERSITY DISPENSARY
OUT-PATIENT DEPARTMENT OF THE BARNES AND ST. LOUIS CHILDREN'S HOSPITALS, AND THE JEWISH HOSPITAL OF ST. LOUIS

Since December, 1914, when the Washington University Dispensary moved into its new building, all clinics have been held at this one place. The Dispensary is an organic part of the School of Medicine and is entirely controlled by the Corporation of the University through a Committee of the Medical Faculty. It acts as the out-patient clinic for the Barnes Hospital, the St. Louis Children's Hospital, the Jewish Hospital of St. Louis, and the Shriners Hospital for Crippled Children. There were recorded in the Dispensary during 1920, 116,180 visits, during 1921, 158,619 visits, and during 1922, 157,994 visits. The heads of the various departments in the School of Medicine control their departments in the out-patient clinic and these departments are responsible for the care of patients. All clinical facilities are available for teaching purposes, and the members of the third and fourth year classes in small sections work in these clinics under the supervision of the out-patient staff. The work of all services is facilitated by the cooperation of the Departments of Nursing and Social Service.

SERVICE OF THE WASHINGTON UNIVERSITY SCHOOL OF MEDICINE IN THE CITY HOSPITALS

At the invitation of the authorities of the Hospital Division of the City of St. Louis, Washington University has assumed control and has become responsible for the medical care of one-half of the patients in the St. Louis City Hospital, and for one-half of the patients in the City Infectious Disease Hospital, and has further agreed to render such professional service in the other municipal institutions as the Hospital Commissioner might request.

The physical equipment of these hospitals is such that this service can be used to advantage for both undergraduate and graduate teaching, and the addition of these units to the clinical facilities of the University greatly broadens the opportunities for teaching. By this cooperation, it is also possible for the
University to render a distinct service to the community and to the sick poor. The number of beds made available by this arrangement is approximately 500.

The general plan of organization of the Washington University units in these hospitals is the same as that in operation at the Barnes and St. Louis Children's Hospitals. Each unit is organized with a chief of staff who is held responsible for the work of the department and for the proper assignment of work to his associates.

REQUIREMENTS FOR ADMISSION

Applications for admission must be made to the Registrar before June 15. Applications may be filed at any time, but except under unusual circumstances, they will not be considered formally before June 15. Notification of acceptance or of non-acceptance will be sent to all candidates as soon as possible after June 15 and not later than July 1. On acceptance of the applicant, he must make a deposit of twenty-five dollars, which shall be in the hands of the Registrar within ten days after the receipt of notification of acceptance. This deposit of twenty-five dollars will be applied towards the first payment of his tuition, and will not be returnable.

Applicants for admission are required to have satisfactorily completed a standard four-year high school course, or its equivalent, and college courses covering at least two full years of work and representing at least sixty semester hours of credit, in an acceptable institution.

The college work must include courses of at least the credits stated below in the following subjects:

1. English, six semester hours.
2. French or German, ten semester hours in either language.*

This requirement is intended to enable the student to read publications of the medical sciences in at least one of these languages,

* In the case of students who present high school credits in French or German for entrance to college, the following college credits will be accepted provided the college courses are in continuation of and do not duplicate the high school work:

- Eight semester hours following one high school unit,
- Six semester hours following two high school units,
- Four semester hours following three high school units.
and the demonstration of a reading knowledge of either language, by examination, will be accepted in lieu of college credit. So far as possible, students should acquire a knowledge of both languages.

3. Physics, eight semester hours. The laboratory work should be in part of a quantitative character.

4. Chemistry, twelve semester hours, of which at least eight semester hours must be in general inorganic chemistry, including four semester hours of laboratory work, and at least four semester hours must be in organic chemistry. In the interpretation of this rule, work in qualitative analysis may be counted as general inorganic chemistry. The preparation in chemistry should include also quantitative analysis.

5. Biology (Zoology and Botany), eight semester hours. In addition to the study of the structure, functions, and life history of selected types of animal and plant life, the preparation in biology should include laboratory instruction in elementary embryology.

Applicants for admission are required to submit credentials from the college in which they have studied, enumerating (1) credits accepted for admission to college, (2) all college courses taken and dates of attendance, (3) the grade attained in each course, and (4) the credits allowed. The degrees received and the number of years of collegiate study successfully completed must also be stated. Blank forms for recording these data will be furnished on application.

Candidates who are deficient in any of the above minimum requirements will not be admitted.

As the size of each class is limited, it is attempted, provided there is a larger number of applicants, to select seventy-five of the most promising, according to the status of the college in which the applicant completed his pre-medical work, his standing in pre-medical courses, and the estimate of his fitness to undertake the study of medicine as stated in a personal letter from one of his science instructors to the Dean.

While two years of collegiate work, as in part above specified, fulfill the minimum requirement for entrance to the School of Medicine, the broader training afforded by additional years of
academic work offers better preparation for the study and practice of medicine. Students intending to pursue the study of medicine should, if possible, complete the four-year college course.

Students in Washington University preparing for the study of medicine, and who can devote only two years to preparation, may follow either of two plans, depending upon whether or not they desire to become candidates for the degree of Bachelor of Science.

**BACHELOR OF SCIENCE**

The degree of Bachelor of Science is conferred in the College on those students who have satisfactorily completed the two years of work described below, and have in addition received good grades in all the required courses of the first and second years in the School of Medicine. The degree is not granted to students taking their pre-medical course elsewhere than in the College of Washington University.

**PRE-MEDICAL CURRICULUM**

**Freshman Year**

- General Descriptive Chemistry .......... Chemistry 1, 6 units.
- Composition and Rhetoric .............. English 1, 6 units.
- Elementary French ..................... French 2, 10 units,
  or
- Elementary German ..................... German 2, 10 units.
- General Biology ....................... Zoölogy 1, 6 units.
- Elective .............................. 6 units.
- Physical Education ................... Phys. Ed. 1,
  or
- Military Training ..................... M. S. and T. 1.

**Sophomore Year**

- Qualitative and Quantitative Analysis. Chemistry 11 and 14, 6 units.
- Organic Chemistry ................... Chemistry 21, 6 units.
- General Introduction to English Lit- erature ......................... English 11, 6 units.
Advanced French .......... French 8, 3 units, or
Advanced German .......... German 10, 3 units.
Elementary Physics .......... Physics 2, 8 units.
Embryology ................. Zoology 4, 3 units.
Physical Education .......... Phys. Ed. 2, or
Military Training .......... M. S. and T. 2.

The following options and restrictions are effective:
1. (a) Students presenting two years of high school French or German for entrance take French 6 or German 3, and those presenting three years of French, French 7. In this case two electives totaling twelve units are required in the Freshman year, but a ten-unit language course may be substituted for these.
   (b) Students attaining a grade of B (85-95%) in French 2 or German 2 may elect some other course in place of advanced French or advanced German.
   (c) Freshman electives may be selected from the list of electives open to Freshmen, and Sophomores may elect any course not specifically restricted to Juniors and Seniors, provided the prerequisites have been satisfied.
   (d) Candidates for the B.S. degree are required to attain an average grade of average C (77½%) in the required work of the Sophomore year.

2. Sixty semester hours, including the minimum requirements for admission to the School of Medicine, will be accepted for the B.S. degree, provided the candidate has attained an average grade of B (85-95%) in the courses offered.

3. Those students who do not wish to become candidates for the B.S. degree, and who do not wish to pursue the course outlined above, may elect their two years of college work in accordance with the following schedule:

**Freshman Year**

Chemistry 1, 6 units. Zoology 1, 6 units.
English 1, 6 units. Electives, 6 units.
French 1, 6 units, or
German 1, 6 units.
Sophomore Year

Chemistry 11 and 14, 6 units.  Physics 2, 8 units.
Chemistry 21, 6 units.  Zoology 4, 3 units.
French 6, 6 units, or  Electives, 3 units.
German 3, 6 units.

French or German may be omitted and an elective substituted by students who show evidence on examination of a reading knowledge of the language.

ADMISSION TO ADVANCED STANDING

Applications for advanced standing must be made to the Registrar before June 15. Applications may be filed at any time, but, except under unusual circumstances, they will not be considered formally before June 15. Notification of acceptance or of non-acceptance will be sent to all candidates as soon as possible after June 15 and not later than July 1. On acceptance of the applicant, he must make a deposit of twenty-five dollars, which shall be in the hands of the Registrar within ten days after the receipt of notification of acceptance. This deposit of twenty-five dollars will be applied towards the first payment of his tuition, and will not be returnable.

Applications for advanced standing will be considered only insofar as there are vacancies in the advanced classes.

Applicants for admission to advanced standing (1) must furnish evidence that the foregoing terms of admission in regard to preliminary training have been fulfilled; (2) must show that courses equivalent in kind and amount to those given in this School, in the year or years preceding that to which admission is desired, have been satisfactorily completed; and (3) must satisfactorily pass examinations in those subjects in the work for which they have asked credit. These examinations may be waived at the discretion of the instructor in charge of the corresponding course. The applicant must have studied as a matriculated medical student in an acceptable medical school for a period of time at least equal to that already spent by the class to which admission is sought.

(a) Students who have received from an approved medical
school credit for courses equivalent to those of the first year of this School in anatomy, chemistry, and physiology may be admitted to the second year class without examination, but, at the discretion of instructors, may be examined in these subjects at the end of the second year. (b) Students who have received from an approved medical school credits in anatomy, chemistry, physiology, bacteriology, pathology, and pharmacology may be permitted to enter the third year class, but no student may enter with a condition in any of these subjects. At the discretion of instructors, such students may be examined in any of these subjects at the end of the third year. (c) Students who have received credit from an approved medical school for all required courses given in this school in the first, second, and third years may be admitted to the fourth year class without examination, but all such students at the end of the year may be required to pass examinations covering any or all of the courses of the first, second, or third, as well as of the fourth year.

Graduates of other medical schools, who are permitted to enter this School with advanced standing as candidates for the degree, are required (a) to pay the fees charged for the years in which they are in attendance, and (b) to fulfill the requirements for graduation, as stated in this announcement.

Applicants for advanced standing are required to furnish, in addition to the credentials required for admission, credentials from the medical school in which they have studied, enumerating the completed medical courses for which credit is asked and stating the number of completed years of medical work.

ADMISSION OF GRADUATES IN MEDICINE

Graduate students may be admitted to the School on the following basis: (1) Those who may be qualified to participate in definite investigation, under the direction of a member of the staff, may, upon the written recommendation of the instructor in charge, endorsed by the head of the department, be accepted by the Faculty as volunteer research assistants and will not be charged fees. (2) Visiting graduates may, with the consent of the heads of the departments concerned, take special work in one or
more departments without paying fees. (3) A limited number of
graduate physicians, or others who may be qualified, may be ad-
mitted to courses with the undergraduate classes subject to the
consent of the instructors and the head of the department. Fees
for special courses, individual instruction, or material will be de-
termined in each case by the Dean, in conference with the
head of the department in which the work is done. A number of
special courses are being offered in medicine, surgery, and the
specialties, concerning which full information will be found in
that part of the catalogue devoted to Post-Graduate Instruction.

STANDING AND PROMOTION

To enter any course, the student must have fulfilled the pre-
requisites of that course, as announced in the catalogue.

Examinations to determine standing and promotion will be
held at the close of each academic year.

Students who at the end of the first or second year have re-
corded against them failures in any two of the following sub-
jects, dissection, histology with neurology, physiology, biological
chemistry, pharmacology, pathology, or bacteriology, will be re-
quired to withdraw from the School; or, under exceptional cir-
cumstances, the student may be allowed instead, to pursue dur-
ing one, two, or three trimesters additional work in the subjects
in which he is deficient before being admitted to the next class.

No student will be permitted to undertake the work of the
third year who has failed in any one of the subjects named above.

A student who at the end of the third year has failed in any
two of the following subjects, medicine, physical diagnosis, clinical
chemistry and microscopy, surgery, surgical pathology, or obstetrics, will be required to withdraw from the School, or may
be required to do additional work as above stated.

No student will be permitted to undertake the work of the
fourth year who has failed in physical diagnosis, clinical chem-
istry and microscopy, or surgical pathology.

A student who, because of poor quality of work in courses or
for any other reason, is judged by the Faculty as unfit for the
practice of medicine, will be required to withdraw.
The minimum time in which the courses required for the degree of Doctor of Medicine can be taken is four years.

Graduates of Washington University School of Medicine are exempt from the first and second examinations of the Conjoint Board of the Royal College of Physicians of London and the Royal College of Surgeons of England.

REQUIREMENTS FOR GRADUATION

The candidates must be more than twenty-one years of age and of good moral character. They must have attended not less than four annual courses of medical instruction as matriculated medical students, the last of which has been in this School. They must have taken all obligatory courses offered here, or their equivalent, and have received a satisfactory grade in the work of the entire four years. They must obtain a satisfactory grade in a general examination on the work of the four years, which will be given during the fourth year. They must have discharged all indebtedness to the School, and must be present when the degree is conferred.

At the end of the fourth year every student who has fulfilled these requirements will be recommended for the degree of Doctor of Medicine.

HOSPITAL APPOINTMENTS

In the second trimester of the year, internes for the Barnes Hospital, for the St. Louis Children's Hospital and for the Shriners Hospital for Crippled Children are selected by the School of Medicine.

The services begin July 1, and are for one year with the exception of the three rotating services which are for two years each. For 1923-24 these services are as follows:

Barnes Hospital
Medical Service, four positions.
Surgical Service, five positions.
Obstetrical Service, two positions.
Rotating Service, three positions.
St. Louis Children's Hospital
Pediatric Service, four positions.

Shriners Hospital for Crippled Children
Two positions.

Appointments to these positions are made from members of the fourth year class of the School of Medicine on the basis of class standing. Students in the first half of the class have a choice of the various services offered in the order of class rank. Appointees to the St. Louis Children's Hospital are required to complete one year's internship in an approved hospital, or at least a year in other acceptable clinical or scientific work before beginning service in the hospital.

About seventy other appointments are made each year to internships in the various hospitals of St. Louis not connected with the University. The fourth year students and graduates of this School may compete with those of other schools for these positions, which are filled upon the basis of examinations conducted by the respective boards of the hospitals.

PRIZES

Two George F. Gill Prizes are offered to the students of the School, viz.:

1. One prize of fifty dollars to be awarded at the end of the first year to the member of the class who shall have made the highest grade in anatomical work.

2. One prize of fifty dollars to be awarded to a member of the graduating class, of high general standing, who shall have done especially good work in the Department of Pediatrics.

A prize of twenty-five dollars is offered by the Alpha Omega Alpha Fraternity, to be awarded at the end of the first year to the member of that class who shall have made the highest general average for the year.

Winners of Prizes and Honors, 1921-22

Gill Prize in Anatomy
James Isaiah Knott
Gill Prize in Diseases of Children
Kehar Singh Chouke, H.A.

Alpha Omega Alpha Prize
James Isaiah Knott

FELLOWSHIPS AND SCHOLARSHIPS

A Surgical Fellowship has been established in the Department of Surgery for special neurological work. The income of this fellowship is $1200.00 per year. Candidates for this fellowship must be graduates in medicine. Applicants who have had one year's internship are preferred.

Two Surgical Fellowships are available in the Department of Surgery for general work. The stipends for these fellowships vary somewhat, depending upon the experience of the applicant.

Application for these fellowships should be made to the Professor of Surgery.

The George F. Gill Scholarship, instituted in memory of the late Dr. George F. Gill, Clinical Professor of Pediatrics, entitles the holder to remission of the tuition fee to the amount of the Scholarship, namely, $100.00.

The Alumni Scholarship, instituted by the Alumni of Washington University School of Medicine, entitles the holder to the same remission of the tuition fee, namely, $100.00.

Applications for these scholarships should be filed with the Registrar.

FEES AND EXPENSES

The University reserves the right to change the fees herein stated, at any time, without notice. Whenever a change is made, it will become effective as to the next instalment for payment due from the student.

Matriculation Fee

A matriculation fee of $5.00 is required of all students upon initial registration.

Late Registration Fee

A charge of $3.00 will be made against each student who fails to register during the first week of the academic year.
TUITION FEE

The tuition fee is $300.00, payable in two equal instalments, at the beginning of the first trimester and on February 1. There are no laboratory fees.

DIPLOMA FEE

At the completion of the course a diploma fee of $5.00 will be charged.

RENTAL OF MICROSCOPES

Students are required to furnish their own microscopes. The School of Medicine is willing to purchase a microscope for each student who does not already own one, and will charge a yearly rental for the instrument which will be approximately a quarter of the cost plus an interest of six per cent on the deferred payments. After the fourth payment, the microscope shall be the property of the student. These payments may be made yearly or at more frequent intervals. Students purchasing microscopes are held responsible for their return in good condition at the close of each year. Students must provide their own hemocytometers.

BREAKAGE DEPOSIT

Each student is required to pay $10.00 annually to cover breakage. Any balance of this deposit will be returned at the end of each year. No student will be granted the use of the laboratories or apparatus of the School until the required deposit has been paid.

All fees and charges are payable in advance at the office of the Treasurer in University Hall, or at the office of the Registrar of the School of Medicine. No rebate of the tuition fee can be made for absence, whether such absence occurs at the beginning, middle, or end of the trimester, except in cases of prolonged illness certified to by a physician. Checks should be made payable to Washington University.

STUDENT HEALTH

A physical examination is made of each student at entrance by a physician appointed by the Medical Faculty. This Physician to Students may be consulted daily. He keeps records of the
physical condition of the students and treats their minor ills. In cases of serious sickness, they are referred to their own physicians or to specialists.

MEN’S DORMITORY

A dormitory building containing rooms for about sixty students is located on Forest Park Boulevard, in close proximity to Forest Park, one of the most attractive localities in the city. There is a tennis court in the rear of the building, and there are public golf links, tennis courts and baseball grounds in Forest Park. Each room is furnished with the following articles: a bed and mattress, one pillow, one table, two chairs, one chifforobe, costume, toilet cabinet, student’s lamp, two small rugs. Each occupant must furnish his own bed covering, consisting of sheets, pillow cases, counterpanes, and blankets.

The rental of a room is $120.00 an academic year, payable in two instalments in advance, at the beginning of the first trimester and on February 1. Reservations are made upon the express understanding that the applicant agrees to occupy the room reserved until the close of the ensuing academic year. Application for reservation should be made on a prescribed form to the Registrar of the School of Medicine, and must be accompanied by a reservation fee of $10.00. This fee will be returned, should the room not be assigned, but it will not be refunded for any other reason. If a room is assigned, the fee will not apply on the room rent, but will be held by the University to cover losses resulting from possible damage to the room or to the furniture. Any portion not so used will be refunded.
GENERAL PLAN OF INSTRUCTION

Instruction in the School of Medicine is given to candidates for the degree of Doctor of Medicine and to graduate students who may or may not be candidates for higher degrees. Courses which are open to students in the University, not candidates for the degree of Doctor of Medicine, are listed in the announcements of the College and of the Graduate School.

The course of study required of candidates for the degree of Doctor of Medicine extends over a period of at least four academic years, and is designed for students who have already received certain preliminary training. As stated in detail on pp. 79 ff., the student on entering the School must have completed two years of college work, which includes a knowledge of chemistry, physics, biology, English and either German or French.

The academic year, extending from the last week of September to the first week in June, is divided into either semesters or trimesters. The required work keeps the student occupied for about thirty hours each week, and demands outside preparation. As far as possible the work is so arranged as to leave free several half days each week, during which time those students who profitably can are encouraged to take extra work in the subjects of their greatest interest. To meet this demand, suitable optional courses are offered by each department in the School.

The curriculum, covering four years, is divided into three distinct periods.

The first period includes the first year and the first and second trimesters of the second year. During this time the student studies the fundamental sciences of anatomy, biological chemistry, physiology, pathology, and bacteriology. For this first period, the whole interest of the student is concentrated on the scientific basis of medicine, and every effort is made to train the faculty of critical and independent observation. Anatomy and biological chemistry are studied during the first year. In the second semester of this year, the study of physiology begins. During the first two trimesters of the second year physiology and pathology...
are completed; and in the last trimester of this period courses in pharmacology, physical diagnosis, medical observation, and surgical technic are introduced, in preparation for the clinical work of the second period. A coördinating course of an hour a week is given throughout this two-year period in order to impress upon the student, by means of demonstrations on patients, the importance of the fundamental sciences in the interpretation and study of clinical conditions.

The second period, extending from the third trimester of the second year through the second trimester of the fourth year, is devoted primarily to clinical work. For the first half of this period, the student receives practical clinical instruction in the out-patient departments of medicine, surgery, and obstetrics, and attends clinics, lectures, and recitations in the clinical subjects. The work in the out-patient departments occupies from 6 to 8 hours per week. Patients are examined by the student and treated under the direction of the attending staff. During the second half of this period, the students are assigned to the various wards of the hospitals, and each section of the class serves a full trimester in the wards of medicine, surgery, and obstetrics and pediatrics, respectively. During the second period pharmacology is completed and courses are also given in clinical chemistry and microscopy, neurological pathology, surgical and gynecological pathology, and operative surgery on animals. Special emphasis is placed upon diagnosis and treatment of patients. There are few lectures. Instruction is given at clinics and at the bedside. Clinical work in the specialties is confined to the second half of the second period.

During the third and last period, which occupies the third trimester of the fourth year, there is no prescribed curriculum. The student must gain credit for 300 hours of elective work, 150 of which must be spent in some one department. It is expected that, during this period, the students will avail themselves of the opportunity to further any special interest they may have in any one of the fundamental sciences or clinical subjects, and that some few may attempt a certain amount of original work. Fourth year students whose mornings are occupied by prescribed studies will be required to elect 75 hours of work in not more than two
departments. At the present time, the entire curriculum is being recast with a view to making it more elastic. Less, though still considerable time will be left for electives in this trimester, thus gaining for the qualified student throughout all four years an opportunity to devote more attention than now is possible to the subjects of his greatest interest.

SUMMARY OF ENTIRE CURRICULUM BY HOURS

Giving the actual work required of each student graduating in June, 1923, exclusive of examination hours:

COURSES OF INSTRUCTION

ANATOMY

Robert J. Terry, M.D. . . . . . . Professor of Anatomy
Paul Y. Tupper, M.D. . . . . . . Clinical Professor of Surgery
Edgar Allen, Ph.D. . . . . . . Associate in Anatomy
Beatrice Whiteside, Ph.D. . . . . Instructor in Anatomy
Edward V. Mastin, M.D. . . . . Instructor in Anatomy
Forest H. Staley, M.D. . . . . . . Assistant in Anatomy
Bess Lloyd, B.S. . . . . . . Assistant in Anatomy
Mildred Trotter, M.S. . . . . . . Assistant in Anatomy
Kehar Singh Chouke, M.D. . . . . Assistant in Anatomy
Leith H. Slocumb, M.D. . . . . Assistant in Anatomy
Anne M. Thomson . . . . . . Research Assistant in Anatomy
William G. Becke . . . . . . Student Assistant in Anatomy
Ben M. Bull, A.B. . . . . . . Student Assistant in Anatomy

First Year

3. Histology. The subject is presented from an embryological viewpoint. The early part of the course is devoted to a review of the salient features of human embryology and an intensive study of the histogenesis of fundamental tissues. This is followed by a study of the organogeny, fine anatomy and history of the several systems. Each student is provided with a loan collection of selected preparations and also has access to a collection of reference slides. Lectures, demonstrations and recitations are designed to supplement and co-ordinate the work. Six mornings a week in the first trimester. 207 hours.

Professor Terry, Dr. Allen, Dr. Whiteside and Assistants

5. Neuro-Anatomy. A laboratory and lecture course on the development and macroscopic and microscopic anatomy of the central nervous system and sense organs. Collections of sections
through the brain stem, special Weigert and Golgi preparations, wax models, and embryological and adult material for dissection are provided. The gross dissection is followed by a study of neuro-histology, of fiber tracts, nuclei, the interrelations of the neurone systems, and functional significance of special organs. Eighteen hours a week during the first half of the second trimester. 104 hours.

Professor Terry, Dr. Allen, Dr. Whiteside, and Assistants

6. HUMAN DISSECTION. The course offers opportunity for the systematic study of the gross structure of the human body. Each student is provided with material for the preparation and study of the muscles, joints, and skeleton; the viscera; the vascular system and peripheral nerves. Lectures and demonstrations on certain aspects of human anatomy serving to systematize the observations made in the laboratory and to direct attention to human structure in relation to function, pathological change, medical and surgical application, variation and heredity are given from time to time during the year. Nine hours a week throughout the year. 342 hours.

Professor Terry, Dr. Mastin, Dr. Staley, Dr. Slocumb and Assistants

Second Year

9. APPLIED ANATOMY. The conventional surgical regions are considered and the skeleton, muscles, bloodvessels, nerves, and lymphatics are discussed from the surgeon’s point of view. Lectures and demonstrations two hours during the second trimester. 32 hours.

Professor Tupper

OPTIONAL AND ELECTIVE COURSES

8. Topographical Anatomy. Six hours a week in the third trimester in laboratory study of the position and relations of organs. Sections, museum preparations, and models are used as material for study. 72 hours. Dr. Staley

10. Advanced Course in Gross Anatomy. Dissection of the human body, study of preparations and sections. Hours to be arranged. Professor Terry
15. Anatomical Technology. Opportunity is afforded for gaining experience in the ordinary methods of preparing material for study. Among the methods undertaken are: preservation of gross material, color injection, preparation of bones, the technique of fixing, embedding, cutting, and staining microscopical objects. Six hours of laboratory work in the third trimester. 66 hours.

Dr. Allen

Graduate courses in Anatomy. See Bulletin of Washington University, 66th Annual Catalogue, p. 269.

BIOLOGICAL CHEMISTRY

Philip A. Shaffer, Ph.D. . . Professor of Biological Chemistry
Edward A. Doisy, Ph.D. . . Associate Professor of Biological Chemistry
Michael Somogyi, Ph.D. . . Instructor in Biological Chemistry
Ethel Ronzoni (Mrs. G. H. Bishop), M.S . . . . Instructor in Biological Chemistry
Theodore E. Friedemann, A.M. Assistant in Biological Chemistry
Alfred P. Briggs, M.D. . . Assistant in Biological Chemistry
Irene Koechig, A.M . . . . Assistant in Biological Chemistry
Milo L. Heideman, A.B. . . Student Assistant in Biological Chemistry

3. BIOLOGICAL CHEMISTRY. A systematic course of lectures, recitations, conferences, and laboratory work covering those portions of the subject which are of the greatest importance to the student of medicine. The laboratory work includes detailed study of the chemistry of fats, carbohydrates, and proteins; the synthetical preparation of a few organic substances; the analysis of the more important animal tissues and fluids; a study of the action of enzymes; the conduct of metabolism experiments by the student upon himself as illustrating some of the principles of nutrition; a study of the composition of important foods; and extended practice in chemical technique. During the latter part of the course, after reading the published records of original investigations, each student prepares a thesis upon a selected topic. So far as time permits, the theses are presented to the class for discussion. Prerequisite: courses in inorganic and or-
ganic chemistry and quantitative analysis. Second semester, lectures and recitations five hours, and laboratory eleven hours a week. Lectures and recitations 80 hours, laboratory 176 hours. Professor Shaffer, Professor Doisy, Dr. Somogyi, Mr. Friedemann

4. Advanced Work. Courses of laboratory work and selected reading in biological chemistry will be arranged to suit individual needs.

5. Research. The facilities of the department are available to students qualified to undertake investigation in biological chemistry.

6. Seminar. Conducted jointly by the Departments of Physiology and Biological Chemistry. Meetings at which papers of current journals are presented and discussed. Open only to students who have credit in, or are taking, physiology or biological chemistry. Once a week throughout the year.

PHYSIOLOGY

Joseph Erlanger, M.D. Professor of Physiology
Robert Gesell, M.D. Associate Professor of Physiology
George H. Bishop, Ph.D. Associate in Physiology
H. Lester White, M.D. Associate in Physiology
Roland W. Stuebner Student Assistant in Physiology
Ethan B. Pfefferkorn, M.S. Student Assistant in Physiology

First and Second Years

2. Physiology. Lectures. This course is designed especially to meet the needs of students of medicine, but is open to properly prepared students in the College. It consists of lectures, demonstrations and recitations covering systematically the field of human physiology. As far as practicable the lectures are descriptive of experiments demonstrated in the lecture room. Free use is made of charts, models, lantern slides, and records for the purpose of bringing to the attention of the student the experimental basis of those principles of the subject that do not lend themselves readily
to experimental demonstration. Weekly recitations are held upon the subject matter of the lectures. The lectures begin in the second semester of the first year and are continued during the first trimester of the second year. Properly prepared students in the College and, under exceptional circumstances, medical students will be permitted to begin the course at the opening of the college year. The course is so arranged that students are enabled to acquire some knowledge of anatomy, embryology, histology, neurology, and biological chemistry before the physiological aspects of the related topics are considered. The following subjects are covered in the lectures: muscle and nerve, central nervous system, senses, blood, circulation, respiration, secretion, digestion, nutrition, and reproduction. Only those students will be admitted to the course who have completed or have begun the study of anatomy and biological chemistry. 114 hours.

Professor Erlanger, Professor Gesell, Dr. Bishop, Dr. White

Second Year

3. Physiology. Laboratory Course. This course must be taken in conjunction with Physiology 2. The experiments are so arranged as to serve at one and the same time to illustrate fundamental principles of physiology and to familiarize the student with the more important bio-physical methods employed in experimental physiology and medicine. The class works in groups of two. Each group has its individual table, which is supplied with all the apparatus necessary for the performance of the general experiments. To the groups is assigned in rotation the apparatus needed for the performance of special experiments. As far as practicable the students serve as subjects of the special experiments and study upon themselves by quantitative methods certain phases of the physiology of muscle and nerve, and of the circulation, respiration, central nervous system, and sense organs. The instruction in the laboratory is largely individual. Weekly conferences are held for the discussion and correlation of the experimental data. First trimester of the second year. 146 hours.

Professor Erlanger, Professor Gesell, Dr. Bishop, Dr. White, Mr. Pfefferkorn, Mr. Stuebner

4. Demonstration Methods. This course is designed primarily
for students preparing to teach physiology, and who may desire a wider experience in experimental physiology than can be gained in Courses 2 and 3. It consists mainly of experiments demonstrated in Course 2. The time and the amount of work are not limited, except that assistance must be arranged for by definite engagements.

5. Research. The facilities of the laboratory will be offered to qualified students for the investigation of their own problems or of problems which the department is prepared to suggest.

6. Journal Club. The Journal Club, conducted conjointly by the Departments of Biological Chemistry, Physiology, and Pharmacology, meets once a week for the discussion of papers of physiological interest appearing in the current journals. This course is open to properly prepared students only. Once a week throughout the year.

THE EDWARD MALLINCKRODT DEPARTMENT OF PHARMACOLOGY

Herbert S. Gasser, M.D. . . Professor of Pharmacology
Charles M. M. Gruber,
Ph.D., M.D. . . . . . Associate Professor of Pharmacology
John W. Williams, Jr. . . Student Assistant in Pharmacology

1. Pharmacology. (a) Lectures, recitations, and demonstrations covering the general field of pharmacology. The action of each of the chief medicinal drugs on the individual organs or functions of the body is studied in detail, the subject matter of the lectures being correlated with the work of the laboratory. Attention is given to the methods of diagnosis and treatment of poisoning by the commoner drugs. The application of pharmacological principles to clinical medicine is emphasized. Students are required to familiarize themselves with prescription writing and the dosage of the more important preparations. Prerequisite, Anatomy, Biological Chemistry, and Physiology 2 and 3. Second and
third trimesters of the second year. Courses (a) and (b) are required of medical students, but course (a) may be taken alone by special students. 55 hours.

Professor Gasser, Professor Gruber

(b) Laboratory Course. Students work in small groups and complete sets of apparatus for the individual experiments are supplied to each group of students. The course is arranged to demonstrate the pharmacological action of the more important drugs, and at the same time to familiarize the student with methods and processes used in experimental pharmacology. The chemical reactions of groups of drugs and important compounds are studied briefly. Complete records of each experiment, giving all the data which do not lend themselves readily to graphic methods, are kept by the students and filed together with the tracings in permanent note books. Six hours a week during the third trimester of the second year. 66 hours.

Professor Gasser, Professor Gruber

2. Advanced Work. This is arranged to suit individual needs. Opportunity is offered for the extensive study of any special group of drugs desired. In addition students may elect work in toxicology. Hours and details of the work to be arranged.

3. Research. The facilities of the laboratory are available to those who wish to carry on original investigation, on problems of their own or on those the department is prepared to suggest.

PATHOLOGY AND BACTERIOLOGY

Eugene L. Opie, M.D. . . . Professor of Pathology
Frank A. McJunkin, M.D.. . Associate Professor of Pathology
Howard H. Bell, M.D. . . . Associate Professor of Bacteriology
L. S. Newman Walsh, M.D. . Instructor in Pathology
Kenneth L. Burdon, Ph.D. . Instructor in Bacteriology
Isaac Y. Olch, M.D. . . . Instructor in Pathology
Vincil Rogers Deakin, M.D. . Assistant in Pathology
Leslie A. Smith, B.S. . . . Student Assistant in Bacteriology
Myron W. Davis . . . Student Assistant in Pathology
First Year

1. Bacteriology. This course is a general survey of the entire field of bacteriology from the biological point of view. Special attention is given to the subjects of fermentation, putrefaction and toxin production, sterilization and disinfection, and the nature of infection and its effects. In the laboratory the methods of observing and staining bacteria and methods of bacteriological diagnosis are taught. Eleven hours a week during the third trimester. 110 hours.

Professor Bell

Second Year

2. Pathology. Prerequisite courses for pathology are represented by the required work of the first year in anatomy, biological chemistry, and bacteriology. Graduate students in the College whose major work lies in biology may elect pathology as a minor at the discretion of the department concerned. The course is subdivided as follows:

(a) Lectures and Laboratory Work. Instruction includes lectures, demonstrations, recitations, and work in the laboratory. General pathology will be taught by lectures and demonstrations given in association with the study of the gross and histological characters of lesions together with experiments performed by the student. Pathological histology will be studied by means of sections stained for microscopic examination by the student, supplemented by specially prepared specimens which are loaned; students are urged to describe and to draw the lesions they find. Some familiarity with the literature of pathology will be obtained by reports upon special topics made by members of the class during one hour each week in the second trimester. Lectures and laboratory work, 12 hours a week in the first trimester and 14 hours in the second trimester. 278 hours.

Professor Opie, Professor McJunkin, Dr. Walsh, Dr. Olch, Dr. Deakin

(b) Recitations. The work of each week is reviewed by a recitation, in which effort is made to determine how accurately the student has grasped the subjects studied in the laboratory. One hour a week. 26 hours.

Professor Opie, Professor McJunkin
(c) Conduct of Autopsies. Autopsies are performed before the class. Students are instructed in the methods of post-mortem examination and in small groups have opportunity to practice the methods employed. Special attention is given to the preparation of orderly records.

Professor Opie. Professor McJunkin, Dr. Walsh, Dr. Olch, Dr. Deakin

(d) Gross Pathology. Fresh pathological tissues are demonstrated to the class divided into small sections, and students study by personal contact the lesions which occur. Fresh material is supplemented by organs preserved as museum specimens. By means of sections prepared by freezing, the relation of gross to histological changes is defined. One or two hours once a week. 66 hours.

Professor McJunkin and Assistants

3. Infection and Immunity. Lectures on the nature of infection and immunity will be given in the first trimester of the second year. The changes which occur in blood as the result of immunization will be studied in the laboratory. Students will perform reactions which demonstrate the existence of amboceptor and complement, precipitins, and other substances; they will determine the strength of agglutinating sera, and will study the serum reactions used for the diagnosis of syphilis. One lecture and three hours of laboratory work each week during the first trimester. 52 hours.

Professor Opie, Professor Bell

4. Clinical and Pathological Conference. The clinical history and treatment of patients who have died is discussed before the class by the physicians and surgeons of the departments concerned. The specimens and microscopical slides from the corresponding autopsies are reviewed with reference to the clinical histories. The important gross and microscopical lesions are illustrated by lantern slides. One hour a week during five trimesters in the third and fourth years.

Professor Opie and Staff

5. Medical Zoology. The student will be provided with material suitable for the study of protozoa, parasitic worms and parasite and blood-sucking insects. He will familiarize himself
with the clinical diagnosis of animal parasites and the pathological changes caused by them in man. The inspection of meat to determine the presence of laval parasites will be practiced. The relation of the subject to public health will be considered. Hours to be arranged in the third trimester.

Professor Opie, Dr. Walsh

6. Pathology of Tuberculosis. The course is offered to physicians who are making a special study of tuberculosis. The pathology of first infection in tuberculosis will be studied at autopsy by means of pathological specimens and by X-ray plates and its relation to the apical lesions of adults will be considered. Special attention will be given to latent tuberculosis and its relation to clinical tuberculosis will be considered. The relation of human and bovine bacilli to various types of human tuberculosis will be determined by appropriate methods. Problems of experimental tuberculosis will be considered and experiments will be performed. Physicians with the necessary preliminary training who desire to take the course will give their entire time to the work. Hours to be arranged. Professor Opie

7. Research. The laboratory offers facilities for research in pathology and bacteriology. Specialists with adequate training who desire to extend their knowledge of the pathology of their specialty will be given opportunity for this study.

COMPARATIVE PATHOLOGY

Leo Loeb, M.D. . . . Professor of Comparative Pathology

1. Seminar for the discussion of selected problems in comparative and general pathology. Open to a limited number of students.

2. Qualified students may be admitted to the laboratory for research in comparative pathology.

3. Lectures on selected problems in comparative and general pathology.
THE JOHN T. MILLIKEN DEPARTMENT OF MEDICINE*

(The Department of Medicine includes Internal Medicine, Neurology and Psychiatry, and Dermatology.)

———, M.D. . . . . . Busch Professor of Medicine

Ralph Kinsella, M.D. . . . . Associate Professor of Medicine
Frank H. Ewerhardt, M.D. . . Associate in Physical Therapeutics

Alfred P. Briggs, M.D. . . . Assistant in Medicine
Paul S. Barker, M.D. . . . . Assistant in Medicine
Alfred Goldman, M.D. . . . . Assistant in Medicine
Chin-Sheng Wu, M.D. . . . . Assistant in Medicine

Elsworth S. Smith, M.D. . . Clinical Professor of Medicine
Albert E. Taussig, M.D. . . Associate Professor of Clinical Medicine

Warren P. Elmer, M.D. . . Associate Professor of Clinical Medicine

R. Walter Mills, M.D. . . . Associate in Clinical Medicine
William H. Olmsted, M.D. . . Associate in Clinical Medicine
George W. Wilson, M.D. . . Associate in Clinical Medicine
Walter Baumgarten, M.D. . . Instructor in Clinical Medicine
Jerome E. Cook, M.D. . . . Instructor in Clinical Medicine
Llewellyn Sale, M.D. . . . . Instructor in Clinical Medicine
Louis H. Hempelmann, M.D. . Instructor in Clinical Medicine
Jacob J. Singer, M.D. . . . Instructor in Clinical Medicine
Walter Fischel, M.D. . . . . Instructor in Clinical Medicine

Drew W. Luten, M.D. . . . . Instructor in Clinical Medicine
Frank D. Gorham, M.D. . . . Instructor in Clinical Medicine
Joseph W. Larimore, M.D. . . Assistant in Clinical Medicine
Adolph M. Frank, M.D. . . . Assistant in Clinical Medicine
Oliver H. Campbell, M.D. . . Assistant in Clinical Medicine

*All the names before the break in the column are those of the full-time staff.
Charles H. Eyermann, M.D. . . Assistant in Clinical Medicine  
Raleigh K. Andrews, M.D. . . Assistant in Clinical Medicine  
Lionel S. Luton, M.D. . . Assistant in Clinical Medicine  
Arthur E. Strauss, M.D. . . Assistant in Clinical Medicine  
Selig Simon, M.D. . . . . . . Assistant in Clinical Medicine

Second Year

1. Physical Diagnosis. Lectures, demonstrations, and practical exercises in the technique of physical diagnosis and in the interpretation of the signs elicited by inspection, palpation, percussion and auscultation in health. Second trimester. 44 hours.  
Professor Elmer

2. Elementary Medicine. The course is composed of the following subdivisions:

(a) Recitations in Medicine. Based on reading assigned in a text-book of medicine in correlation with co-incident classwork in Pathology. 44 hours.  
Dr. Luten

(b) Introductory Clinic. The observation and interpretation of symptoms and signs in ward and dispensary patients with special reference to pathological physiology and its relation to diagnosis. Instruction in the preparation of clinical histories is also included. 22 hours.  
Professor Kinsella

Second and Third Years

4. Physical Diagnosis. Practical training in the physical methods of diagnosis. This includes not only the ordinary methods of physical diagnosis but the technique and application of sphygmomanometry, fluoroscopy, and the like. Records and diagrams of the findings in all cases examined by members of the class are handed in and criticised. The class is divided into small groups and each group studies patients in the hospital wards and in the dispensary. The course covers three trimesters, beginning in the third trimester of the second year. Students entering the third year take this course throughout the entire third year. Two hours a week for three trimesters. 66 hours.  
Professor Taussig and staff
5. **Clinical Chemistry and Microscopy.** A series of lectures and a laboratory course in methods of microscopic and chemical diagnosis. The subjects are the urine, blood, stomach contents, sputum, feces and puncture fluids. Material is obtained from cases in the hospitals and dispensaries. Considerable reading is required outside of laboratory hours. Seven hours a week, first trimester. 84 hours. Professor Kinsella, Dr. Olmsted

6. **Medicine.** Medical Dispensary. One-third of the class in the medical dispensary during each trimester. This group is subdivided and the sub-groups rotate through the general medical, gastro-intestinal and tuberculosis clinics. The students take histories, and make physical and laboratory examinations under the direction of the staff. Two hours four days a week for one trimester. 88 hours. Dr. Eyermann, Dr. Wilson, Dr. Strauss, Dr. Sale, Dr. Singer, Dr. Gorham

7. **Therapeutics.** A course designed to give students a practical knowledge of the methods, the various drugs, and the agencies employed in the treatment of disease. Special emphasis is laid upon understanding the disease to be treated, and lectures in clinical bacteriology and physiology are used as bases for determining the kind of treatment which must rationally be applied. One hour a week during two trimesters. 22 hours. Professor Kinsella, Dr. Ewerhardt, Dr. Olmsted, Dr. Barker

8. **Dietetics.** Lectures and recitations upon foods, beverages and condiments in health and disease. One hour a week for one trimester. 11 hours. Dr. Olmsted

---

**Third and Fourth Years**

10. **Medicine.** The course is subdivided as follows:

(a) Medical Ward Work. The class is divided into three sections. Each section is in daily attendance for eleven weeks. Ward rounds 9-10 a.m. daily. The students are assigned cases in the medical wards and are required to write the histories and make physical and laboratory examinations, write
résumés with diagnosis and prognosis and describe treatment in detail. The patients are examined, the work of the section scrutinized and criticised, methods of diagnosis and treatment discussed and practiced, and special reading assigned. The specimens from autopsies on medical patients are studied with reference to the clinical histories and the gross and microscopic anatomy. 150 hours.

Professor Kinsella, Professor Smith, and Assistants

(b) Clinical Conferences. Patients whose cases have been investigated by students working in the wards are presented before the class and diagnosis, pathology, and treatment discussed from various points of view. Once a week for one year. 33 hours.

Professor Kinsella

(e) A weekly clinic in which a series of subjects, such as gastrointestinal diseases, arterial hypertension, disturbances of internal secretions, pulmonary tuberculosis, and the mechanism of the heart beat are presented. Material from the Out-Patient Department is presented by members of the dispensary staff. 33 hours.

Professor Smith, Professor Schwab, Dr. Mills, Dr. Sale, Dr. Singer, Dr. Luten, Dr. Strauss, Dr. Eyermann, Dr. Gorham

(d) Clinical and Pathological Conferences. Students attend these conferences during their third and fourth years. The staffs of the various clinical departments and of the Department of Pathology participate in giving this course. (See Pathology 4.)

18. Diagnosis and Treatment of Diseases of the Digestive Tract. The course consists of history taking and physical diagnosis of the abdomen, including radiology, fluoroscopy, plate reading, sigmoidoscopy, etc. Hours by special arrangement.

Dr. Mills, Dr. Larimore

14. Diagnosis and Treatment of Heart Disease. A practical course in the technique of polygraphic and electrocardiographic methods for the study of cardiac disorders; their use in diagnosis and treatment of heart disease will be considered. Open to a limited number of students. Hours by special arrangement.

Dr. Strauss
15. Advanced Work in Laboratory Diagnosis. An elective course for those qualified. Undergraduates who can devote one entire trimester to the work and graduates in medicine with the necessary previous training who wish to investigate problems in clinical pathology are eligible. Hours to be arranged.

Professor Kinsella

16. Research in Medicine. Specially qualified students are encouraged to undertake research in problems bearing on medicine in the laboratories of the department. Credit to be arranged. Maximum credit 24 units. Professor Kinsella

Neurology and Psychiatry

Sidney I. Schwab, M.D. . . . Professor of Clinical Neurology
Leland B. Alford, M.D. . . . Associate in Clinical Neurology
Andrew B. Jones, M.D. . . . Instructor in Neuropathology
James Lewald, M.D. . . . . Assistant in Clinical Psychiatry
Groves B. Smith, M.D. . . . Assistant in Clinical Neurology
Archie D. Carr, M.D. . . . Assistant in Neurology

Second and Third Years

1. Neurology.
(a) Introductory course in neurology and psychiatry, lectures, and demonstrations in clinical anatomy and physiology of the nervous system. Methods of neurological examination, history taking, study of case histories, etc. One hour a week for two trimesters. 22 hours. Professor Schwab

(b) Neuropathology. Laboratory demonstration of the material covered in Course (a), with a study of gross and microscopic lesions of the nervous system, fibre tracts, etc. Exercises in examination and description of microscopic preparations of the more common diseases of the nervous system. Two hours a week for one trimester. 22 hours. Dr. Carr

(c) Neurological Dispensary. Students in small groups spend part of their time in the neuro-psychiatric dispensary attending the neurological, psychiatric, and mental deficiency clinics. Diagnosis and treatment of neuro-psychiatric conditions are studied. Two hours a week for one trimester. 22 hours.

Professor Schwab, Dr. Jones, Dr. Carr and Assistants
Third and Fourth Years

(a) Neurological ward rounds with the medical group. Neurological and such psychiatric cases as are suitable for hospital treatment are studied. Two hours a week for one trimester for each medical group. 22 hours. Professor Schwab

(b) Neurological Conference. A series of clinical demonstrations before the whole class in which all available types of nervous and mental diseases found in the hospital are discussed. One hour a week for three trimesters. 33 hours. Professor Schwab

4. Psychiatric Clinic. Selected cases illustrating the various groups of mental disorders are demonstrated and discussed. This clinic is held at the St. Louis City Sanitarium. Three hours a week for one trimester. 33 hours. Dr. Lewald

Dermatology

Martin F. Engman, M.D. . . Clinical Professor of Dermatology
William H. Mook, M.D. . . Instructor in Clinical Dermatology
Richard S. Weiss, M.D. . . Instructor in Clinical Dermatology
Adolph H. Conrad, M.D. . . Instructor in Clinical Dermatology

Third Year

(a) Dermatology. A lecture course on diseases of the skin and syphilis, by which the student will be prepared to understand clinical dermatology in the succeeding year. This course will be a general survey of the etiology, symptomatology, pathology, and treatment of skin diseases and the history and pathology of syphilis. Second trimester. 11 hours. Professor Engman

Fourth Year

(b) Dermatology. A clinical course, conducted in the Dispensary, in which the student examines patients and is instructed in the diagnosis and treatment of diseases of the skin, and syphilis. 33 hours. Professor Engman, Dr. Mook
Medical Jurisprudence

Milton R. Stahl, LL.B. . Instructor in Medical Jurisprudence

MEDICAL JURISPRUDENCE. A course given in the fourth year embracing medical evidence and testimony; expert testimony; dying declarations; rights of medical witnesses; establishing identity from living and dead bodies; sudden death from natural causes and by violence; criminal acts determined by medical knowledge; the legal relation of physician to patients and the public; insanity, and malpractice. 11 hours.

THE MARY CULVER DEPARTMENT OF SURGERY*

(The Department of Surgery includes General Surgery, Orthopedic Surgery, Neurological Surgery, Genito-Urinary Surgery, Gynecology, Ophthalmology, Otology, and Laryngology and Rhinology.)

Evarts A. Graham, M.D . Bixby Professor of Surgery
Montrose T. Burrows, M.D. . Associate Professor of Experimental Surgery
Sherwood Moore, M.D. . Associate in Surgery (Radiology)
Glover H. Copher, M.D. . Assistant in Surgery
William H. Chambers, Ph.D. . Assistant in Experimental Surgery
Frederick A. Jostes, M.D. . Assistant in Surgery
Bransford L. Adelsberger, M.D. . Assistant in Surgery
Duff S. Allen, M.D. . . Assistant in Surgery
Roland M. Klemme, M.D. . Assistant in Surgery
George C. Bates, M.D. . . Assistant in Surgery
Oscar C. Zink, M.D. . . Assistant in Surgery (Radiology)
Justus B. Rice, M.D. . . Fellow in Neurological Surgery
Paul K. Webb, B.S. . . Fellow in Surgery
Kirby A. Martin, M.D. . . Fellow in Surgery
Hans Deutsch, Ph.B. . . Fellow in Surgery

*All the names before the break in the column are those of the full-time staff.
Paul Y. Tupper, M.D. . . . Clinical Professor of Surgery
Harvey G. Mudd, M.D. . . . Clinical Professor of Surgery
Nathaniel Allison, M.D. . . Professor of Clinical Orthopedic Surgery
Ernest Sachs, M.D. . . . Professor of Clinical Neurological Surgery
Major G. Seelig, M.D. . . Professor of Clinical Surgery
John R. Cauk, M.D. . . . Associate Professor of Clinical Genito-Urinary Surgery
Vilray P. Blair, M.D. . . . Associate Professor of Clinical Surgery
Barney Brooks, M.D . . . Associate Professor of Clinical Surgery
Willard Bartlett, M.D. . . Associate in Clinical Surgery
Malvern B. Clopton, M.D. . Associate in Clinical Surgery
Arthur O. Fisher, M.D. . . Associate in Clinical Surgery
J. Archer O'Reilly, M.D. . . Associate in Clinical Orthopedic Surgery
Charles A. Stone, M.D. . . Instructor in Clinical Orthopedic Surgery
Edwin P. Lehman, M.D. . . Instructor in Clinical Surgery
Warren R. Rainey, M.D. . . Instructor in Clinical Surgery
Walter C. G. Kirchner, M.D. . Assistant in Clinical Surgery
Charles E. Hyndman, M.D. . Assistant in Clinical Surgery
William M. Robertson, M.D. . Assistant in Clinical Genito-Urinary Surgery
H. McClure Young, M.D. . . Assistant in Clinical Genito-Urinary Surgery
Ellis Fischel, M.D. . . . Assistant in Clinical Surgery
Harry G. Greditzer, M.D. . . Assistant in Clinical Genito-Urinary Surgery
J. Edgar Stewart, M.D. . . Assistant in Clinical Orthopedic Surgery
Dalton K. Rose, M.D. . . . Assistant in Clinical Genito-Urinary Surgery
Earl C. Padgett, M.D. . . . Assistant in Clinical Surgery
Second and Third Years

1. INTRODUCTION TO SURGERY. A laboratory, demonstration and lecture course in which are studied certain fundamental processes of physiology and pathology as applied to surgery. Special emphasis is laid on the growth of tissues, with particular reference to wound healing and transplants, the effects of tissue asphyxia and similar subjects. Attention is directed to a study of the processes involved rather than merely to the end results. The students also test and practice various methods of sterilization of hands, instruments, etc., using bacterial cultures as checks on the methods. The course includes the demonstration of patients who illustrate various points under discussion. Five hours weekly during the second trimester of the second year. 55 hours. 

Dr. Lehman

2. SURGERY. The course is subdivided as follows:

(a) SURGICAL OUT CLINIC. For one trimester, four times weekly, beginning with the third trimester of the second year, a third of the class serve as dressers in the Surgical Out Clinic. Cases are examined by the students and demonstrated to them. Under the supervision of the assistants, the students take histories and apply dressings and bandages. 88 hours.

Professor Graham, Professor Sachs, and Assistants

(b) SURGICAL RECIATIONS. A weekly recitation during the fall and spring trimesters on assigned surgical reading. A standard text-book is followed, and so far as possible the essentials not given in other courses are covered. 22 hours.

Professor Seelig

(c) FRACTURES. Demonstrations, conferences, and lectures on the more common fractures. Patients both in the hospitals and in the dispensary will be used in this course. One hour weekly during the second trimester. 11 hours. This is supplemented by several optional hours at the City Hospital, during which time the extensive fracture material of that hospital is shown to the students.

Professor Allison, Professor Brooks, and Dr. Rainey

(d) OPERATIVE SURGERY. A three-hour exercise given weekly during the second trimester of the third year. Actual case histories are discussed, and the operations indicated from these dis-
cussions are performed on animals by the students. The surgical technique is as rigid as in the operating room, and it is required that the operations shall be performed without pain to the animal. The course is given in two sections. 33 hours.

Professor Sachs, Dr. Fisher

(e) Surgical Clinic. A weekly clinic throughout three trimesters. See course 4 (b). 33 hours. Professor Graham

(f) Surgical Conference. The pathology, diagnosis, and treatment of surgical conditions, as illustrated by ambulatory outpatient cases, are discussed. A weekly exercise during three trimesters. 33 hours. Professor Sachs

(g) Genito-Urinary Surgery. Lectures and recitations in genito-urinary surgery. Second trimester, third year. 11 hours. Professor Caulk

3. Surgical Pathology. A weekly exercise of two hours for three trimesters, at which specimens from the operating room and from the museum are studied in gross and microscopically. Case histories are presented with the specimens. 66 hours. Professor Brooks

Third and Fourth Years

4. Surgery. The course is subdivided as follows:

(a) Surgical Wards. For one trimester the student serves as assistant in the surgical wards from 9 a.m. to 12 m. five days a week.

Rounds are made from 9 to 10 a.m. Professor Graham and the surgical resident discuss the general surgical cases. Professor Sachs makes rounds on the special neurological cases once a week. Professor Allison, Professor Caulk, Professor Blair, and Dr. Clopton make rounds from time to time on their special cases.

The students, under the direction of the house staff, take case histories, make physical examinations, and the usual laboratory examinations. They assist at some of the operations and with the anesthetic, and do some of the surgical dressings. They also
attend autopsies performed on the cases studied by them and are required to be present at the weekly pathological conference at which these cases are discussed. (See Pathology 4.) One day each week the group spends the period from 9 a.m. to 12 m. at the St. Louis Children's Hospital, where Professor Allison demonstrates the orthopedic cases and Dr. Clopton the general surgical cases. 198 hours.

Professor Graham, Professor Allison, Professor Sachs, Professor Caulk, Professor Blair, Dr. Clopton, Dr. Fisher, the Resident

(b) SURGICAL CLINIC. A weekly exercise throughout three trimesters. Students of the fourth year examine the patients and present the cases for discussion. Students of the third year attend this exercise. 33 hours.

Professor Graham, Professor Sachs

5. GENITO-URINARY OUT CLINIC. The student serves as dresser in the Genito-Urinary Out Clinic six times a week for one-half trimester under the same conditions as in Course 2. 33 hours.

Professor Caulk and Assistants

6. ORTHOPEDIC SURGERY. Instruction is given at the Barnes Hospital and at the St. Louis Children's Hospital as described in course 4 (a). Special lectures on this subject are given in course 4 (c).

Professor Allison, Dr. O'Reilly

7. Operative Surgery on the Cadaver. Two hours weekly during the third trimester of the fourth year. Instruction is given by the actual practice of surgical operations performed on the cadaver. 22 hours.

Professor Tupper

8. Advanced Operative Surgery. Two-hour exercises are given once weekly during the first trimester of the fourth year. The students are instructed in the technique of special operations by performing these operations on animals under regulations of the surgical operating room, and are encouraged to work at some unsolved problem. 22 hours.

Dr. Bartlett
9. **Surgical Pathology.** Members of the Surgical Group of the third and fourth year classes take charge of the specimens which are received at the Surgical Laboratory and under the supervision of the staff describe the gross material and make the microscopic diagnosis.

10. **Principles of Roentgenology.** A course of lectures one hour a week for one trimester of the fourth year on X-ray diagnosis. Lectures and demonstrations of plates. Dr. Moore

11. **Research in Surgery.** Specially qualified students are encouraged to undertake research in problems bearing on surgery in the laboratories of the department.

12. **Journal Club.** Approved students may attend the staff journal club, which meets weekly, at which current literature of interest is discussed.

**Gynecology**

Harry S. Crossen, M.D. . . . Clinical Professor of Gynecology
Frederick J. Taussig, M.D. . . Associate Professor of Clinical Gynecology
Quitman U. Newell, M.D. . . Instructor in Clinical Gynecology
Reinhard E. Wobus, M.D. . . Instructor in Clinical Gynecology
John R. Vaughan, M.D. . . . Assistant in Clinical Gynecology
Charles D. O'Keefe, M.D. . . . Assistant in Gynecology
Raymond M. Spivy, M.D. . . . Assistant in Clinical Gynecology
Treston R. Ayars, M.D. . . . Assistant in Clinical Gynecology

1. **GYNECOLOGY.** The course is divided as follows:

(a) Clinical Lectures on Selected Gynecological Subjects. One hour a week during the second trimester of the third year. 11 hours.

(b) Gynecologic Examination (Dispensary) and Gynecologic Pathology (Laboratory). One subsection (one-sixth of the class) works in the Dispensary under supervision and receives instruction in history taking, examination and minor treatment of gynecological conditions.
cologic patients. At the same time the other subsection (one-sixth of the class) works in the laboratory studying the pathology, both microscopic and gross, of specimens illustrating the various gynecological lesions. Two hours a week for eleven weeks (in sections of one-third of the class). 22 hours.

Dr. Newell (Dispensary) and Dr. Wobus (Laboratory)

2. GYNECOLOGICAL WARD WORK. Sections composed of one-sixth of the class work in the gynecological division of the Barnes Hospital for a period of five and a half weeks. The members of these sections, under guidance of instructors, participate in the entire work. They take histories and make examinations (including those of the laboratory), make ward rounds, and attend the diagnostic and operative clinics. Six hours a week for five and a half weeks. 33 hours. Professor Crossen and Assistants

Ophthalmology

William E. Shahan, M.D. . Professor of Clinical Ophthalmology
Meyer Wiener, M.D. . . Associate Professor of Clinical Ophthalmology
William F. Hardy, M.D. . . Associate in Clinical Ophthalmology
Frederic O. Schwartz, M.D. Instructor in Clinical Ophthalmology
M. Hayward Post, M.D. . . Instructor in Clinical Ophthalmology
Lawrence Post, M.D. . . Instructor in Clinical Ophthalmology
Max W. Jacobs, M.D. . . Instructor in Clinical Ophthalmology
Bennett Y. Alvis, M.D. . . Assistant in Clinical Ophthalmology
Amalie M. Napier, M.D. . . Assistant in Clinical Ophthalmology

(a) OPHTHALMOLOGY. Eleven lectures are given in the second trimester of the third year. 11 hours. Professor Wiener
(b) **OPHTHALMOLOGY.** Practical instruction is given to small sections of the fourth year class twice weekly during one trimester. Under the supervision of instructors, the students take histories, make complete examinations, and carry out the routine treatment. 44 hours. Professor Shahan, Professor Wiener, Dr. Hardy, and Instructors

(c) **OPHTHALMOLOGICAL PATHOLOGY.** A course in pathology of diseases of the eye, consisting of lectures, demonstrations, and recitations, is given during the first trimester of the fourth year. 11 hours. Dr. Hardy

**Otology**

Harry W. Lyman, M.D. . . . . . Associate in Clinical Otology
Isaac D. Kelley, M.D. . . . . . Instructor in Clinical Otology
Arthur W. Proetz, M.D. . . . . Instructor in Clinical Otology
Millard F. Arbuckle, M.D. . . Assistant in Clinical Otology
Charles L. Davis, M.D. . . . . Assistant in Clinical Otology

(a) **OTOLOGY.** Eleven lectures are given during the third trimester of the third year. 11 hours. Dr. Lyman, and Assistants

(b) **OTOLOGY.** Practical instruction is given to sections of the class during the third trimester of the third year and the first and second trimesters of the fourth year, each section attending four hours a week during one trimester. Cases are demonstrated and patients are assigned to the students, who are required, under supervision, to make examinations and diagnoses, and carry out routine treatment. 44 hours. Dr. Lyman, and Assistants

**Laryngology and Rhinology**

Greenfield Sluder, M.D. . . . Clinical Professor of Laryngology and Rhinology
William M. C. Bryan, M.D. . Instructor in Clinical Laryngology and Rhinology
Millard F. Arbuckle, M.D. . Instructor in Clinical Laryngology and Rhinology
Arthur W. Proetz, M.D. . . Instructor in Clinical Laryngology and Rhinology
Eugene R. Van Meter, M.D. . . Assistant in Clinical Laryngology and Rhinology
Herman B. Miller, M.D. . . Assistant in Clinical Laryngology and Rhinology
William L. Hanson, M.D. . . Assistant in Clinical Laryngology and Rhinology

(a) LARYNGOLOGY AND RHINOLOGY. Eleven lectures are given during the second trimester of the third year. 11 hours.
Professor Sluder

(b) LARYNGOLOGY AND RHINOLOGY. Small sections of the fourth year class receive practical instruction twice weekly in the Out Patient Clinic. 44 hours.
Professor Sluder and Assistants

OBSTETRICS*

Otto H. Schwarz, M.D. . . Associate Professor of Obstetrics
Otto St. Clair Krebs, M.D. . . Instructor in Obstetrics
William A. Michael, M.D. . . Assistant in Obstetrics
Richard Paddock, M.D. . . Assistant in Obstetrics
Grandison D. Royston, M.D. . Associate in Clinical Obstetrics
Hugo Ehrenfest, M.D. . . . Associate in Clinical Obstetrics
Frank P. McNalley, M.D. . . Instructor in Clinical Obstetrics
Adolph G. Schlossstein, M.D. . Assistant in Clinical Obstetrics
E. Lee Dorsett, M.D. . . . Assistant in Clinical Obstetrics
Samuel F. Abrams, M.D. . . Assistant in Clinical Obstetrics

Second and Third Years

1. OBSTETRICS.
(a) Recitations and Demonstrations. This course, beginning in the third trimester of the second year and ending the second

*All the names before the break in the column are those of the full-time staff.
trimester of the third year, consists of recitations and demonstrations based upon assigned reading of a prescribed text-book. Recitations and demonstrations during the three trimesters deal with the physiology and pathology of pregnancy, labor, and the puerperium. 33 hours.  

Dr. Royston, Dr. Krebs

(b) Obstetrical Diagnosis and Obstetrical Histology and Pathology. Obstetrical history taking and the keeping of obstetrical records are taken up. The signs and symptoms of pregnancy are studied on house and dispensary patients; the mechanism of labor is discussed in detail and demonstrated.

The laboratory work consists of a review of the histology of the pelvic organs. Ovulation, menstruation, fertilization, and development of the ovum are covered in this course. Specimens illustrating numerous obstetrical lesions are studied both grossly and microscopically in connection with their clinical histories. Four hours a week for eleven weeks (in sections of one-third of the class). 44 hours.

Professor O. Schwarz, Dr. Dorsett, Dr. McNalley, Dr. Krebs, Dr. Abrams

Fourth Year

2. Obstetrics.

(a) Attendance on Obstetrical Cases. The obstetrical service furnishes more than 900 cases (about 450 hospital and about 450 out-clinic cases). The students attend these cases personally during delivery and visit them during the lying-in period. All work is done under the supervision of instructors. Attendance on these cases is required during the five and one-half weeks’ period that the student is assigned to Obstetrics during his senior year. Twelve cases are required for each student. Students are urged to volunteer for obstetrical out-patient duty during the summer vacation between the junior and senior years, as the required number of cases cannot be obtained during the assigned five and one-half weeks’ period.

Professor O. Schwarz, Dr. Royston, Dr. Krebs, Dr. McNalley

(b) Clinical Lectures on Selected Obstetrical Topics. One hour a week during the second trimester. 11 hours.

Professor H. Schwarz, Professor O. Schwarz, Dr. Royston, Dr. Ehrenfest, Dr. Dorsett
(c) Obstetrical Ward Work. Sections composed of one-sixth of the class act as clinical clerks in the obstetrical division of the Barnes Hospital for a period of five and one-half weeks. The members of these sections, under the guidance of instructors, participate in the entire work of the division; they take histories and make examinations (including those of the laboratory); make ward rounds; assist at major obstetrical operations; attend clinical conferences and manikin practice. Twelve hours a week for five and one-half weeks. 66 hours.

Professor O. Schwarz, Dr. Royston, Dr. Schlossstein, Dr. Krebs

THE EDWARD MALLINCKRODT DEPARTMENT OF PEDIATRICS*

W. McKim Marriott, M.D. Professor of Pediatrics
Philip C. Jeans, M.D. Associate Professor of Pediatrics
Jean V. Cooke, M.D. Associate Professor of Pediatrics
Samuel W. Clausen, M.D. Associate in Pediatrics
Kirsten Utheim Toverud, M.D. Instructor in Pediatrics
Leonard T. Davidson, M.D. Instructor in Pediatrics
Alexis F. Hartmann, M.D. Assistant in Pediatrics
Lester J. Evans, M.D. Assistant in Pediatrics

George M. Tuttle, M.D. Clinical Professor of Pediatrics
Borden S. Veeder, M.D. Professor of Clinical Pediatrics
Theodore C. Hempelmann, M.D. Associate in Clinical Pediatrics
Hugh McCulloch, M.D. Associate in Clinical Pediatrics
Adrien Bleyer, M.D. Instructor in Clinical Pediatrics
Phelps G. Hurford, M.D. Assistant in Clinical Pediatrics
Maurice J. Lonsway, M.D. Assistant in Clinical Pediatrics
Park J. White, M.D. Assistant in Clinical Pediatrics
Samuel E. Pesetke, M.D. Assistant in Clinical Pediatrics

Second and Third Years

1. PEDIATRICS. Physical diagnosis as applied to infants and children. Bedside instruction to small groups of students in the

*All the names before the break in the column are those of the full-time staff.
wards of the St. Louis Children’s Hospital. Two hours a week for one trimester. 22 hours. Dr. McCulloch, Dr. Davidson

2. **PEDIATRICS.** A systematic course in General Pediatrics. Recitations, lectures, clinical demonstrations, and discussions of case histories. The subjects considered include the growth and development of the normal child; hygiene and preventive medicine as applied to children; nutrition and feeding, especially of infants; the more important diseases of infants and children; the contagious diseases. Two hours a week for three trimesters. 66 hours. Professor Marriott, Dr. Clausen

Third and Fourth Years

3. **PEDIATRICS.** The course is composed of the following subdivisions:

(a) Pediatric Ward Work. Examination of assigned cases and discussion of diagnosis and treatment. Individual instruction in preparation of milk formulae, examination of throat cultures, and such procedures as lumbar puncture, intubation, administration of antitoxin, vaccination, etc. Daily for five and one-half weeks: 33 hours. Professor Marriott, Professor Veeder, Professor Jeans, Professor Cooke, Dr. Clausen

(b) Pediatric Dispensary. Practical work in history taking, physical and laboratory diagnosis, and infant feeding. Two afternoons a week for one trimester. 44 hours. Professor Jeans, and Assistants

Fourth Year

4. **PEDIATRIC CLINIC.** A weekly amphitheater clinic is held throughout the school year. Demonstration of selected cases from the Hospital and from the Dispensary. 33 hours. Professor Marriott, Professor Tuttle, Professor Veeder, Professor Jeans, Dr. Clausen, Dr. McCulloch

5. **CLINICAL AND PATHOLOGICAL CONFERENCES.** This course is given jointly by the Clinical Departments and the Department of
Pathology. Each student is supplied with the clinical histories of the cases coming to autopsy. The pathological material is demonstrated and the cases discussed from the clinical and pathological sides. Approximately one-third of the course is devoted to pediatric cases. (See Pathology 4.)

6. Pediatrics. Elective course. This course is offered during the last trimester of the fourth year. Students are required to make an intensive study of certain disease conditions from the clinical and laboratory standpoints and to report on assigned literature. 150 hours.

7. Research. Properly qualified students may engage in clinical or laboratory research under the direction of the Pediatric Staff. Fourth-year students may elect to do research in place of Course 6.

Preventive Medicine

Third Year

1. Preventive Medicine and Hygiene. Lectures upon the transmission and prevention of infectious diseases (including the important tropical diseases), infant mortality, occupational diseases, and some other subjects bearing upon the maintenance of health, will be given twice a week during the first trimester and once a week during the second. 33 hours. Dr. Bleyer

Military Science and Tactics

Robert W. Kerr, M.D., Major,
M.C., U. S. A. . . . . . Assistant Professor of Military Science and Tactics

Under the authority of the Army Reorganization Act of June 4, 1920, there has been established in Washington University School of Medicine a Medical Corps Unit of the Reserve Officers' Training Corps. Instruction is given by a medical of-
ficer of the Regular Army detailed to the School as Assistant Professor of Military Science and Tactics. The course is given in order to instruct medical students in the outlines of military medicine as a preparedness measure.

Enrollment in the course in Military Science and Tactics is voluntary.

Military Science and Tactics is divided into a basic course and an advanced course. The basic course is given in the first two years and the advanced course in the last two years. A student who enrolls in the basic course need not continue in the advanced course unless he so elects. Enrollment in the advanced course depends upon having completed satisfactorily the basic course and having demonstrated fitness and ability to take up the advanced work. In case a student who is enrolled in either the basic or advanced course severs his connection with the School, he automatically terminates his obligation to the Government insofar as this school is concerned. Students who are enrolled in the advanced course will receive commutation of subsistence at the rate of the value of an army ration for the last two years that they are members of the Medical Corps Unit. It is required by the law, as set forth in the above-mentioned act, that all students must attend one summer encampment in order to have completed the advanced course in Military Science and Tactics. Students attending this encampment are paid at the rate of $21 per month, and in addition receive traveling allowance of five cents per mile, quarters, rations, medical attendance, and medical supplies while attending the camp. The summer encampment is held at Carlisle, Pennsylvania.

Upon graduation and completion of the advanced course, the student becomes eligible for a commission in the Medical Officers' Reserve Corps.

First and Second Years

1. Basic Course. This course consists of lectures and recitations devoted to medico-military instruction and particularly to teaching the organization and functions of the Army in peace and war, the relations of the Medical Department therein, and the basic principles of the following subjects: hygiene, customs
of the service, equipment of the sanitary soldier, elements of sketching and map reading, posts of the Medical Department in open and stable warfare, and toxic gases in warfare.

Third and Fourth Years

2. Advanced Course. There is further development of the subjects given in the basic course by lectures and recitations upon the manual and pamphlets of the Medical Department of the U. S. Army. These deal with organization and equipment of the sanitary units attached to a regiment, brigade, division, corps, and army. The instruction also includes casualty expectancy tables, the supply system of the army, hospitalization, military psychiatry and malingering, army regulations, field sanitary regulations, rules of land warfare, abstracts of the Manual for Courts Martial, and organized voluntary aid in war.

3. Military Instruction at Summer Encampments. The camp to be established for the training of Medical Corps R. O. T. C. Units will be maintained at Carlisle, Pennsylvania, where the Medical Department has established a Field Training School. Attendance of all students taking the advanced course is compulsory for at least one encampment, either at the end of the second year or the end of the third year, or as may be modified by army regulations. Upon arrival at the camp, students are issued the necessary uniforms and equipment by the Government. The instruction is practical, including military and sanitary tactics and an opportunity to demonstrate in the open the theoretical knowledge acquired in the military courses at the School of Medicine. As far as possible, actual field service conditions will be simulated. The students will be required to live under tentage. Physical training, including athletic competition, will be given special attention.
TRAINING SCHOOL FOR NURSES

Helen Wood, A.B., R.N. . . Director of the School and Superintendent of Nurses
Hanna Peterson, R.N. . . Assistant Superintendent of Nurses
Grace L. Reid, R. N . . . Theoretical Instructor
Alma Corbitt, R.N. . . . Practical Instructor

The Washington University Training School is under the management and direction of the University through the Executive Faculty of the School of Medicine. This co-ordination makes possible unusual opportunities for the adequate education of nurses.

During the preparatory course of six months, instruction is given in the laboratories and by the departmental staffs of the School of Medicine in anatomy, chemistry, physiology, and bacteriology; and class-room instruction and practice in all the fundamental nursing procedures, hygiene, history of nursing, drugs and solutions, ethics, nutrition and cookery, are given by the nursing staff.

Following this preliminary course the pupils are given instruction in the wards of Barnes and St. Louis Children's Hospitals and the Washington University Dispensary. In addition to medical and surgical work, opportunities are given for experience in diet kitchen, operating room, obstetrical and contagious wards.

During the last year students may elect special work in the Social Service Department and Public Health Nursing. Visiting nursing, baby welfare and tuberculosis work are phases of Public Health Nursing to which pupils are introduced. A few well qualified senior students may be placed in charge of wards for executive experience.

Throughout the three years' course, in addition to the practical instruction in the wards, series of lectures are given by the Hospital staffs and technical instruction by the staff of the Training
School. Included in the curriculum is a required course in English, which is given by the Department of English of the University.

Credit is given to students holding degrees from recognized colleges or universities. One scholarship each year is available for some member of the Senior class who may wish to take graduate work.

The separate catalogue of the Training School may be obtained upon application to the office of the Director of the School, 600 South Kingshighway.
DEPARTMENT OF SOCIAL SERVICE

Edith M. Baker . . . . . . . . . . . . . . . . Director

The Department of Social Service conducts its work in the Washington University Dispensary, the Barnes Hospital, the St. Louis Children's Hospital, and the Jewish Hospital of St. Louis. At the head of the Department of Social Service is a director, under whom are an associate director and seventeen paid workers, each of whom is responsible for a special type of work.

Students in the School of Medicine may volunteer in the department and gain thereby a knowledge of the living conditions of the poor, which is of great value to them in their study of the diseases treated in the Dispensary, and which gives them experience in working out the individual problems of the patients seeking relief. Such students gain as well an understanding of the function of social agencies in community life.

Nurses who are undergoing training in the Washington University Training School for Nurses are given instruction in the methods of conducting social service work in hospitals and dispensaries, as well as the relationship which social service work bears to medicine and nursing. Any graduate of the Training School for Nurses may be assigned to practical work in the Department of Social Service.
POST GRADUATE INSTRUCTION

GENERAL STATEMENT

The graduate studies are planned to meet the requirements of three distinct types of students: (1) Those who desire to enroll in the Graduate School of Washington University with the purpose in view of complying with the requirements necessary for obtaining a graduate degree in medicine. These requirements are outlined in the catalogue of Washington University; and each applicant for such graduate work will be considered individually after receipt of his application. (2) Those who desire to spend a year or more of work, leading to ultimate qualification as a specialist. (3) Those who wish to spend from four to twelve weeks in brushing up on clinical or laboratory methods, in order to keep abreast of the times, and to maintain a high degree of personal professional efficiency. The courses will utilize all the teaching facilities at the disposal of the Washington University School of Medicine, the various laboratories, Barnes Hospital, Washington University Dispensary, the St. Louis Children's Hospital, City Hospital No. 1, Jewish Hospital, and the Library and Reading Room of the Washington University School of Medicine.

ADMISSION

The following are eligible for admission:

A. Registered Practitioners. Any reputable person licensed to practice medicine may be admitted to such courses as he is qualified to take.

B. Graduates in Medicine who are not registered practitioners. Graduates of an acceptable medical school, who are not registered practitioners, are eligible for admission.

C. Undergraduates in Medicine. Undergraduates of the School of Medicine of Washington University or of medical schools in Class A (A.M.A. classification) may be admitted for such courses as they are competent to take. During the sessions
of their own schools such undergraduates will be accepted only by special vote of the Executive Faculty of Washington University School of Medicine.

The Faculty of the School of Medicine of Washington University reserves the right:

(1) To judge the qualifications of all candidates for admission and to refuse such as in its opinion are undesirable.

(2) To terminate a student's connection with the School for such reason as it deems proper.

(3) To refuse to admit a student to any course for such reason as it considers proper, even if he be admitted to other courses in the School.

(4) To exclude a student from any course to which he may have been admitted, if in the opinion of the faculty he is not qualified to continue the course, or for any other reason which the faculty may consider proper.

These reservations are made especially for the benefit of the students. In those instances where it may be necessary to exclude a student, a refund of fee will be made, but this refund is never to be more than one-half of the total fee for the course.

Fees. The four-week courses are arranged on the basis of occupying all the time either of half or a whole day. Those courses running for one-half a day will be charged for at the rate of $75.00 for the four-week period, and the whole day course at the rate of $100.00 for the four-week period. A fee of $125 will be charged for combination courses where the morning is devoted to work in one department and the afternoon to work in another department, for the four-week period.

Those students desiring to elect special work may arrange with the registrar concerning the fee.

APPLICATION AND REGISTRATION

Application for courses should be made to the Registrar, Washington University School of Medicine, Scott and Euclid Avenues, St. Louis, Mo.
In his application the candidate must state: Name; residence; date of birth; when and where medical diploma was obtained; when and where hospital internship, if any, was pursued; when and where licensed (if licensed); type of practice engaged in (general or a specialty). He must state the course or courses he desires to take. With his application the applicant must enclose a registration fee of $10.00. No course will be available to any applicant who fails to send this registration fee with his application. The registration fee will constitute a part payment of the cost of the course. Fees for all courses are payable in advance on the first day of the course.

Applications will be considered in the order of their receipt. It is important, therefore, since most of the courses are limited as to the number of students who may participate in them, that applications be sent in at the earliest moment.

INTERNAL MEDICINE

The Department of Internal Medicine of Washington University offers to Doctors of Medicine a short course in internal medicine. The course covers a period of four weeks and is designed to consume the entire time of the students. It consists of a series of courses covering the more important special divisions of internal medicine. The courses are so arranged as to devote the entire mornings to clinic, ward rounds, and lectures, while the afternoons will be largely devoted to laboratory work.

The courses comprising the full course are outlined below.

1. General Medicine. (a) Tuesdays and Fridays, 3 to 4 p. m. Dr. Olmsted, Dr. Strauss, Dr. Wilson, Dr. Everhardt

Illustrated lectures on important medical subjects, including endocrine disturbances and physical therapy.

(b) City Hospital No. 1, Thursdays, Fridays, and Saturdays, 9 to 11 a. m. Dr. Kinsella, Dr. Fischel

A series of visits to the medical wards in which the diagnosis and treatment of disease is discussed and exemplified by the study of patients.
(c) Washington University Dispensary, Tuesdays, 9 to 10 a.m.  
Dr. Eyermann

Protein sensitization and asthma.

2. Diseases of the Chest. Washington University Dispensary. Mondays and Wednesdays, 10 a.m. to 12 m.  
Dr. Singer

A series of eight clinical lectures and demonstrations in the Out-Patient Department, on diseases of the chest. Particular emphasis is laid on the study of pulmonary tuberculosis, including physical diagnosis, fluoroscopy, roentgenography, the use of tuberculin and pneumothorax.

3. Diseases of the Heart. Washington University Dispensary. Tuesdays, 10 a.m. to 12 m.  
Dr. Strauss

A series of four clinical lectures and demonstrations in the Out-Patient Department, including a discussion of the graphic methods of recording cardiac disturbances.

4. Diseases of Metabolism. Barnes Hospital. Mondays and Wednesdays, 9 to 10 a.m.  
Dr. Olmsted

A series of eight lectures and clinical demonstrations with special emphasis on the more recent methods of study of diabetes, nephritis, and diseases of the endocrine glands.

5. Diseases of the Central Nervous System. Washington University Dispensary. Mondays and Thursdays, 12 m. to 1 p.m.  
Dr. Schwab, Dr. Alford, Dr. Jones

A series of eight clinics on selected cases exhibiting the more common disorders of the central nervous system.

6. Diseases of the Gastro-Intestinal System. Washington University Dispensary. Wednesdays and Fridays, 12 m. to 1 p.m.  
Dr. Gorham, Dr. Gay

A series of eight clinical lectures on the diagnosis and treatment of disorders of the stomach and intestines.

6a. X-Ray Diagnosis of Gastro-Intestinal Diseases. Tuesdays and Saturdays, 12 m. to 1 p.m.  
Dr. Mills
7. **Clinical Microscopy and Chemistry.** Washington University Dispensary. Wednesdays and Thursdays, 2 to 4 p.m.  
Dr. Kinsella, Dr. Wilson

A series of eight lectures and laboratory exercises in the laboratory methods of diagnosis of disease. Subjects discussed are urine, sputum, gastric contents, feces, blood, and puncture fluids. Eight periods of two hours each.

7a. **Clinical Bacteriology.** Mondays, 2 to 4 p.m.  
Dr. Kinsella

A series of demonstrations and exercises illustrating clinical methods such as blood cultures, smear staining and diagnosis, agglutination reactions and interpretation of Wassermann tests.

8. **Clinical Pathological Conference.** Autopsy Amphitheatre, Barnes Hospital. Mondays, 4 to 5 p.m., and Thursdays, 4:30 to 5:30 p.m.

A series of conferences of the staffs of the clinical and pathological departments in which the cases that have come to autopsy are discussed from the point of view of the clinical and pathological findings.

The fee for the entire course for a full day of instruction over a period of four weeks is $100.00. The fee for a half day of instruction over a period of four weeks is $75.00. The fee for single courses will be $25.00 each, except for course No. 7, for which the fee will be $50.00.

**Special Intensive Courses in Medicine**

For those who desire more intensive courses in some of the divisions of Internal Medicine, the following are offered:

9. **Tuberculosis.** Washington University Dispensary.  
Dr. Singer and assistants

This course consists of a series of didactic lectures on the epidemiology of tuberculosis, the physics of sound and light in relation to physical diagnosis of the chest, fluoroscopic and roentgenographic examination of the lungs, the use of tuberculin in
the diagnosis and treatment of tuberculosis, the use of artificial pneumothorax and the general treatment of tuberculosis. In addition there will be practical exercises on patients, covering the above subjects. Special stress will be laid upon the social aspects of the tuberculosis problem, including demonstrations by social workers trained in the field. Students will be expected to devote their entire time daily to this work, and the course will extend over a period of four weeks. Limited to not more than seven students and not less than three. Fee $50.00.

10. A special course in the technique of roentgenographic and fluoroscopic examination of the chest, designed to supplement the preceding course. Limited to not more than seven students and not less than three. Fee $50.00.

11. GASTRO-ENTEROLOGY. Washington University Dispensary. Tuesdays, 10 a.m. to 12 m. Dr. Gorham

This course consists of a series of practical exercises in diseases of the gastro-intestinal system, in which the anamnesis and the examination of cases are taken up. New cases will be carried through their history and physical examination with special attention given to developing the symptomatology of gastro-intestinal diseases and other complications. A special outline for developing the anamnesis is followed. The course will last indefinitely, depending upon the applicant's wishes. Limited to four students. Fee $50.00.

11a. PROCTOSCOPY. Wednesdays and Thursdays, 12 m. to 1 p.m. Dr. Mills

This course consists of a series of demonstrations and practical exercises in the technique of making proctoscopic examinations. Duration of course, four weeks. Limited to four students. Fee $25.00.

11b. Fridays, 12 m. to 1 p.m.

This course consists of a clinical review of completed cases of gastro-intestinal disease in which a final diagnosis has been determined by X-ray examination, operation, or autopsy. Limited to eight students. Fee $25.00.
12. Physical Diagnosis. City Hospital No. 1. Daily, 10 a.m. to 12 m. Dr. Luton

A series of practical exercises and demonstrations in the principles and technique of elementary physical diagnosis. Duration two weeks. Fee $25.00.

The foregoing special intensive courses are not given at stated periods of the year, but will be given upon application, subject to the conditions noted. The time will have to be arranged between the applicants and instructors.

</table>
The Department of Pediatrics offers a four-weeks' postgraduate course in Pediatrics. The course is given twice yearly, in October and in April. The major portion of the instruction is given in the wards of the St. Louis Children's Hospital. This hospital has 160 beds and provides for children from birth to 14 years of age. Medical, surgical, and contagious cases are admitted. The hospital also maintains a Country Department for the treatment of nutritional conditions and bone and joint tuberculosis. At the Country Department students are instructed in the technique of the Rollier treatment. Practical instruction is also given in the Children's Division of the Out-Patient Department of the Washington University Dispensary. Approximately 1,200 visits are made to the Children's Clinic each month. Additional instruction is given in the pediatric wards of the St. Louis City Hospital and in the Municipal Welfare clinics.

The schedule is so arranged that the physician has his entire time occupied in intensive work during the month. The course is a systematic one, designed especially for the needs of the practitioner. It is given independently of undergraduate instruction.

The course includes the following divisions:

1. **Infant Feeding.** Lectures, demonstrations, and ward rounds in the St. Louis Children's Hospital and practical work in the out-patient feeding clinics. The fundamental principles of infant nutrition are discussed in relation to the feeding of normal and sick infants. Instruction in the preparation of milk mixtures. Treatment of gastro-intestinal and nutritional disorders peculiar to infancy.

   Dr. Marriott, Dr. Veeder

2. **Common Diseases of Children.** Lectures, demonstrations, and ward rounds in the St. Louis Children's Hospital and the St. Louis City Hospital. Especial emphasis is laid on diagnosis and treatment. Consideration of the clinical value and interpretation of X-ray plates, electrocardiographic tracings, etc., physical diagnosis as applied to children, instruction in such procedures as lumbar puncture and intravenous and intraperitoneal methods of administration. Consideration of the diagnosis and
control of contagious diseases and instruction in intubation and examination of throat cultures.

Dr. Marriott, Dr. Veeder, Dr. Tuttle, Dr. Jeans,
Dr. Cooke, Dr. Hempelmann, Dr. McCulloch

3. NEWLY BORN CLINIC. Instruction given in the obstetrical nursery of the Barnes Hospital. Care and feeding of the newly born infants. Diseases peculiar to the newly born. Dr.–

4. CHILD HYGIENE. Preventive medicine and hygiene as applied to infants and children. Practical work in the Welfare clinics.

Dr. Veeder

5. DIAGNOSTIC METHODS. Instruction in the more important laboratory methods of diagnosis, especially as applied to diseases of children. Examination of blood, urine, and spinal fluids. The newer methods of laboratory diagnosis are especially considered. Each member of the class is given the opportunity to carry out the methods himself.

Dr. Cooke, Dr. Clausen

6. SPECIALTIES. A series of lectures and demonstrations in the wards and Out-Patient Department by members of the teaching staff other than those of the Department of Pediatrics. Specialties are considered in their clinical application to children and include general surgery, orthopedic surgery, oral surgery, dermatology, laryngology, ophthalmology, psychiatry, and physio-therapy.

7. ROUND TABLE DISCUSSIONS. These are informal discussions conducted by members of the staff. Each student is urged to bring up his especial problems or the topics he wishes discussed.

Dr. Marriott

8. CLINICAL PATHOLOGICAL CONFERENCE. A course conducted jointly by the Department of Pathology and the Department of Pediatrics. Detailed consideration of autopsy findings on cases previously studied in the wards.

Dr. Opie, Dr. Marriott

9. CURRENT LITERATURE. Critical reviews and discussions of recently appearing pediatric literature.

FEES. The fee for the month's course, including all of the divisions indicated, is $100.00. The number of students admitted to this course is limited to sixteen.

A general arrangement of the courses and the time devoted to each is indicated in the following schedule:

Sunday, 10:00 a.m.—Ward Walk, St. Louis Children's Hospital. Dr. Marriott.
ADVANCED WORK

A limited number of physicians who desire to specialize further in Pediatrics are, on completion of the regular graduate course, permitted to continue work in the wards of the hospital and in the clinic. They are privileged to attend any of the teaching exercises of the department. Those doing such advanced work are encouraged to make a special study of certain types of cases and to do work under supervision which is calculated to advance our knowledge of disease in children. For further information regarding graduate work in Pediatrics, address the Department of Pediatrics, 500 S. Kingshighway, St. Louis.

NEUROLOGY

1. A four-weeks' course in neuro-pathology and study and interpretation of spinal fluids. Laboratory course four weeks. Daily (hours to be arranged later).

   Dr. Schwab, Dr. Alford, Dr. Jones

   This course is primarily intended for the general practitioner or internist who is interested in the field of neuro-psychiatry.
   It is especially planned to meet the requirements of the general practitioner who is so situated that he finds it a difficult matter to obtain special neurological advice or consultation.
   This course can be taken with Course 2, which is the clinical application of the groundwork demonstrated in Course 1.

   Lectures and demonstrations on the normal anatomy and histology of the central nervous system, together with the general physiology of the central nervous system.

   A routine and detailed examination of microscopic sections of the important organic diseases of the central nervous system, with a study of tract degeneration, chiefly from the clinical point of view. The student will be expected in this course to make drawings of sections and prepare a laboratory book.

   During this course special instruction will be given in the technique of lumbar puncture, examination of cerebro-spinal fluid, cell counts, simple chemical reactions for globulin, preparation and interpretation of colloidal gold test, quantitative sugar, etc.

2. Neuro-Psychiatry. Four weeks. Daily (hours to be arranged later.)

   Dr. Schwab, Dr. Jones
The course in Neuro-Psychiatry will be carried out in the Out-Patient Department and the wards of the Barnes Hospital. An attempt will be made to demonstrate important diseases which occur in such material. As far as possible, it will be the purpose to make use of the information gained in the laboratory in its application to actual clinic work. Special attention will be given to syphilis of the central nervous system, methods of examination, the technique of testing special sense organs, preparation of visual fields, etc., in such a way that the general practitioner can master such methods for use in the everyday examination of neurological cases.

3. PSYCHOMETRIC CLINIC. Three times a week (days and hours to be arranged later), for four weeks. Dr. Smith

This course is designed to acquaint the practitioner with methods and interpretation of intelligence measurements. This course is to be given with special reference to its use by men and women engaged in institutional work, or work with defective children, in juvenile court and social service work.

In this course the student will be personally instructed in obtaining the data necessary for arriving at and estimating the mental age of children and adults.

4. CLINIC AT GLENWOOD SANATORIUM. Three afternoons a week. Dr. Jones

In this course an opportunity is given to a limited number of practitioners to study the commoner types of mental disease requiring institutional care. Modern methods of hydrotherapy, psychotherapy, etc., will be discussed and illustrated. This course is limited to three.

The fee for all of these courses will be $75.00. For each course, if taken separately, the fee will be $25.00.

GENERAL SURGERY

The general plan of arrangement of the post-graduate instruction in general surgery is such that the student may devote all or part of his time to this subject. The clinical courses are all
given in the mornings and the laboratory courses in the afternoons. The student may register for all the courses as The Combined Course in general surgery and this will occupy all of his time during the four weeks of post-graduate instruction. He may register for the clinical courses only and thus leave his afternoons free for doing work in other departments. Finally, he may register for all or part of the laboratory courses either in combination with or independently of the clinical courses. The clinical course, or morning course, must be registered for as a whole.

Clinical Course—Course A (Mornings)

The schedule for this course is such that the group registering for it spend five mornings each week from 9 to 12 o'clock in the wards and operating rooms of the Barnes Hospital, the St. Louis Children's Hospital, the Jewish Hospital, and the St. Louis City Hospital, in which hospitals there is abundant material for review of the various phases of general surgery, the teaching in each hospital being done for the most part by the surgeon in chief of the hospital. One morning each week is spent in the Out-Patient Department in which the treatment of ambulatory patients is studied. On four days each week there is an hour clinic or lecture on certain of surgical specialties; viz., Neurological Surgery, Genito-Urinary Surgery, Orthopedic Surgery, and Oral and Plastic Surgery. These lectures or clinics are given by the surgeons in charge of these surgical specialties. Provision is made for the student to attend the regular weekly clinic of Dr. Graham. The remaining hour each week is devoted to a surgical conference of the entire group with Dr. Seelig, in which conference there is an open discussion of any question which may be brought up by any student.

Laboratory Course—Course B (Afternoons)

1. Operative Surgery. North Building. Tuesdays and Fridays, 2 to 5 p.m. Dr. Sachs

This course occupies two entire afternoons each week, during which the students under careful supervision perform selected operations on animals. In addition to operative technique, the
student is instructed in methods of hemostasis, asepsis, and anesthesia. The students work in groups of two or three and alternate as operator and assistant. It has been found from experience that the student learns more by this method than when he is assisted by the instructor. Each operation is carried out under the same precautions as are used in the hospital operating room.

2. **Surgical Pathology.** North Building. Mondays and Wednesdays, 3 to 5 p.m. Dr. Lehman

This course occupies two hours on each of two afternoons a week. Under the guidance of the instructor the students study material from the operating room, both fresh and preserved. Emphasis is placed on the gross changes resulting from disease and the progress of these changes. The object of the course is to correlate the underlying pathological processes with the clinical course of surgical disease as seen by the practicing surgeon. There will be given demonstrations on animals of the pathology of such conditions as intestinal obstruction and peritonitis.

3. **Roentgenology.** Roentgen Laboratory, Barnes Hospital. Mondays and Wednesdays, 2 to 3 p.m. Dr. Moore

Two periods of one hour each are devoted to the study of the diagnostic value of the X-ray. The abundant material in the X-Ray Department of the Barnes Hospital is used. No attempt is made to instruct the students in the technical phase of roentgenology; the instruction is confined to the interpretation of X-ray plates.

4. **Special Lectures and Demonstrations.**

These special lectures are being included in post-graduate instruction for the first time. The lectures are intended to reveal to the student as clearly as possible the pathologic anatomy, physiology, and chemistry of what may be called the "Operation Period." The lectures will be given by the heads of the various departments and such demonstrations as may be instructive will
be prepared. In addition, one lecture will be given on the special physiology of thoracic surgery.

5. **Clinical Pathological Conference.** Autopsy Amphitheatre, Barnes Hospital. Thursdays, 4:30 to 5:30 p.m. 

Dr. Opie

This is a conference of the clinicians and pathologists, concerning the relation between the ante-mortem and post-mortem findings of selected hospital cases which have come to autopsy. All post-graduate students are urged to attend these conferences.

**Fees**

- Combined Course, Mornings and Afternoons: $100.00
- Clinical Course—Course A: 75.00
- Laboratory Course—Course B: 75.00
- Operative Surgery: 50.00
- Surgical Pathology: 35.00

ORTHOPEDIC SURGERY

To those students primarily interested in surgery of the skeletal system, muscles, tendons, and joints, the Department of Orthopedic Surgery offers a set of six courses during the morning hours, for a period of four weeks. The fee for these six courses is $75.00. The full course is limited to eight students.

1. Orthopedic Surgery in Adults. Barnes Hospital. Wednesdays and Saturdays, 9 to 10 a.m. Dr. Stewart

This course will consist of bedside instruction, by ward rounds, in the methods of examination and differential diagnosis of orthopedic cases in adults. It will include instruction in pre-operative and post-operative measures in cases which require operative treatment.

2. Operative Clinic. Barnes Hospital. Tuesdays, 9 to 10 a.m. Dr. Allison and staff

This course will consist in a demonstration of the various operative procedures incident to the correction of congenital deformities, the mobilization of joints by manipulation and arthroplasty, and the stabilizing of joints by arthrodesis. In this course the patients demonstrated and operated upon will be almost exclusively adults.

3. Diagnostic Ambulatory Clinic. Washington University Dispensary. Daily, 10 a.m. to 12 m. Dr. O'Reilly, Dr. Stone, Dr. Stewart, Dr. Ewerhardt, Dr. Brookes

This course will consist in the diagnosis and treatment of all ambulatory cases, including tuberculosis of bones and joints, osteoarthritis, back strain, flat foot and foot strain. Instruction will be given in the use and application of plaster of Paris in ambulatory cases, measurement and application of braces and orthopedic appliances. One period a week will be devoted to the use of hydro- and mechano-therapeutics, massage and exercises in the treatment of diseases and injuries of the bones and joints, flat foot, and postural defects.
4. **Orthopedic Surgery in Children.** Children's Hospital.  
Mondays and Thursdays, 9 to 10 a.m.  
Dr. Stone  
This course will consist of ward rounds, devoted to bedside instruction in the diagnosis and treatment of Pott's disease, tuberculosis of the hip and tuberculosis of other joints, acute and chronic poliomyelitis, congenital club foot, congenital dislocation of the hip and other malformations.

5. **Operative Clinic.** Children's Hospital and Barnes Hospital.  
Fridays, 9 to 10 a.m.  
Dr. Allison and staff  
This course, devoted almost exclusively to orthopedic diseases of children, will be devoted to operations for the correction of congenital and acquired deformities; stabilizing operations, such as muscle and tendon transference and fusion of joints; operations for the correction of rachitic deformities.

6. **Ambulatory Clinic for Children.** Washington University Dispensary.  
Daily, 10 a.m. to 12 m.  
Dr. O'Reilly, Dr. Stone, Dr. Ewerhardt, Dr. Stewart,  
Dr. Brookes  
This course embraces the diagnosis and treatment of all ambulatory cases, including tuberculosis of bones and joints, non-tuberculous arthritis, and poliomyelitis. Instruction will be given in the use and application of plaster of Paris bandages in the correction of scoliosis. One period a week will be devoted to instruction in the application of hydro- and mechano-therapeutics, massage and muscle training in the treatment of poliomyelitis and other nerve conditions and corrective exercises in the treatment of postural defects. One morning during this course will be devoted to a trip to the Convalescent Home at Valley Park for a demonstration by Dr. O'Reilly of the open-air and heliotherapy methods in the treatment of bone and joint tuberculosis.  
The Clinical Pathological Conference, Thursdays, 4:30 to 5:30 p.m., is open to all post-graduate students.

**Genito-Urinary Surgery**

The various courses outlined below have been planned so as to constitute a combined course of four weeks' duration. Every
effort will be made to give intensive training on any one phase to those desiring it, and an abundant opportunity will be given the practitioner to handle routine cases of genito-urinary diseases.

1. Clinical Course. Washington University Dispensary. Mondays, Tuesdays, Thursdays, and Fridays, 9 a.m. to 12 m.

Dr. Rose

In surgical urological diseases the cases are followed through from the history taking, examinations, general and special, including cystoscopic, endoscopic, functional tests and X-ray, to the final diagnosis and in the majority of instances to operation. An opportunity will be given to the student to learn the use of the cystoscope and endoscope in the diagnosis and treatment of bladder, kidney, and urethral diseases in both male and female. Particular attention will be given to the treatment of venereal diseases and to the diagnosis and treatment of deep infections of the prostate, seminal vesicles, and deep urethra. Minor operations, such as drainage of bubos, circumcisions, dorsal incisions, meatotomies, and the treatment of chancroids and venereal warts, will be included. This course is designed to equip the student to diagnose and carry out the treatment of ordinary types of genito-urinary diseases. They will be familiarized with ureteral catheterization, functional kidney tests, pyelography and treatment of bladder tumors by the high-frequency current. Instructions will be given also on the Wassermann reaction, gonorrheal fixation test, and the various blood examinations which have a bearing on kidney function.

2. Operative Course. Amphitheatre, Barnes Hospital. Wednesdays, 9 a.m. to 12 m., and other days as the material presents.

Dr. Caulk

Here the student will be given an opportunity to watch major operations upon the kidney, ureters, bladder, and genitals, and be thoroughly drilled in operating-room technique. This course is supplemented by the ward rounds. Tuesdays from 9 to 10 a.m. Wards of the Barnes Hospital and St. Louis Children's Hospital. In the latter, kidney infections in children and congenital malformations, such as hypospadias and the like, may be studied.
3. **Urological Conference.** Washington University Dispensary. Tuesdays, 3 to 5 p.m.

This course will consist of didactic lectures on genito-urinary topics with suggestions to the student regarding a study of the literature on topics of interest in order that he may be made familiar with the progress of urology; also all current cases will be discussed.

**Library.** Wednesday, 2 to 3 p.m.

This time is to be devoted to looking up references given at the urological conferences and it is hoped the student will familiarize himself with current periodicals.

4. **General Course.** St. Louis City Hospital No. 1. Mondays, 2 to 4 p.m.; Fridays, 3 to 5 p.m.

Dr. Robertson, Dr. Young

This course will be given in the operating room and wards of City Hospital No. 1, and will afford the student the opportunity to see the routine cases, to observe and handle the cystoscope in the diagnosis and treatment of genito-urinary diseases, to follow the surgery of these cases and to see the patients on the wards and to carefully watch their after-treatment. In this course there will be an opportunity to see more of the urgent urological cases, such as extravasation of urine, traumatic injuries, etc.

5. **Surgical Pathology.** Washington University Dispensary. Saturdays, 9 a.m. to 12 m.

Gross specimens and their microscopic sections will be demonstrated, together with the history of the case, of kidney and bladder, testicle, etc., removed at operation.

6. **Syphilography.** Skin Clinic, Washington University Dispensary. Tuesdays, Thursdays, Fridays, and Saturdays, 2 to 3 p.m.

Dr. Weiss, Dr. Conrad, Dr. Coleman

To those registering for the Genito-Urinary course this will include only the diagnosis and treatment of syphilis. This work is further supplemented at the option of the student by the Skin Night Clinic and the plan to be followed is: Tuesdays and
Thursdays, 2 to 3 p. m., venipuncture and salvarsan administrations. Fridays, 2 to 3 p. m., clinical lecture on skin and syphilis. Saturdays, 2 to 3 p. m., mercury injections. Tuesdays, 6:30 to 7:30 p. m., mercury injections. Thursdays, 6:30 to 7:30 p. m., mercury injections. Fridays, 6:30 to 7:30 p. m., venipuncture.

**Clinical Pathological Conference.** Autopsy Amphitheatre, Barnes Hospital. Thursdays, 4:30 to 5:30 p. m.

In this conference autopsy material is presented and discussed with reference to the clinical history preceding autopsy. The important gross and microscopical lesions are described in detail, with lantern slides. The medical and surgical aspects of the lesions are discussed before the class by the physicians and surgeons who conducted the treatment in the hospital.

Fees $100.00 for the entire course.

GYNECOLOGY

The Department of Gynecology offers a special course of four weeks for those desiring to concentrate their time in this field of study. Various combinations with courses offered by the Department of Surgery and the Department of Obstetrics can be arranged as outlined below (Courses 2 to 5). Special emphasis will be laid upon diagnosis and non-operative treatment, but ample opportunity will be given to see at close range the various forms of operative procedure. A majority of the operative cases will be examined before operation by the members of the group and in as many cases as possible opportunity will be given to palpate structures during the course of the operations. Direct assistance in operations cannot, however, be arranged for.

1. GYNECOLOGY. This course will occupy the full time for the entire four-week period, as shown in the accompanying schedule. Besides operative clinics, diagnostic clinics, laboratory work, and radiotherapy, it will include courses in gynecologic anatomy and pathology and special demonstrations and clinics in the associated surgical specialties of obstetrics, orthopedics, urology, oral surgery, neurologic surgery, and general surgery. There will be the usual training in bimanual examination and differential diagnosis, and in addition a demonstration of the various methods of non-operative treatment with radium, X-ray, hydrotherapy, organotherapy, pessary, etc. The operative clinics will furnish opportunities to see the various regular procedures in surgical treatment. The course in anatomy will utilize the material and collections of the Anatomical Department in a brief review of the topography of the pelvic organs. The course on gynecologic pathology will lay stress on the recognition of the important diseases and tumors in the gross specimens. A series of special lectures by Dr. Erlanger, Dr. Opie, Dr. Shaffer, and Dr. Graham will be given on such border-line topics as shock, anesthesia, metabolism, and thoracic surgery. An hour's round-table conference each week will give opportunity for questions and discussions on topics selected by members of the group. Limited to six students.
2. **Gynecology-Surgery.** This course follows the schedule for gynecology in the morning and that of general surgery in the afternoon.

3. **Surgery-Gynecology.** This course follows the schedule for surgery in the morning and that of gynecology in the afternoon.

4. **Gynecology-Obstetrics.** This course follows the schedule for gynecology in the morning and that of obstetrics in the afternoon.

5. **Gynecology and Animal Operations.** This course follows the schedule for gynecology with the exception of Tuesday and Friday afternoons, when Dr. Sachs' course in operative work on animals will be substituted for the regular schedule.

Any combination of work or arrangements for spending half time in post-graduate study can be made only if a vacancy is left after the full-time men have been provided for.

The fees for these courses will be in accordance with the general statement under the head of Fees.

OBSTETRICS

The Department of Obstetrics offers a four-weeks' course in Obstetrics to general practitioners. This course will utilize all of the teaching facilities at the disposal of the Washington University School of Medicine, the various laboratories, Barnes Hospital, Washington University Dispensary, St. Louis City Hospital and the Library and Reading Room of the Washington University School of Medicine. Three mornings each week will be devoted to work in the Barnes Hospital and the remaining three mornings will be given to work with the large amount of material in the City Hospital.

Every effort will be made to teach the men taking this course to make an accurate obstetrical diagnosis so as to enable them to make a safe and efficient forceps delivery and also to repair all obstetrical injuries.

In connection with this work, special emphasis will be given methods of examination, pelvimetry, the usual laboratory methods employed in obstetrics, etc. An instructor from the St. Louis Children's Hospital will devote an hour daily to the newborn infants in Barnes Hospital.

Special lectures on obstetrical subjects, such as the toxemias of pregnancy, eclampsia, placenta previa, hemorrhage, contracted pelvis, etc., will be given three times each week; in addition to which one hour each week will be devoted to an informal round-table discussion on subjects to be selected by the men taking the course.

The afternoons will be devoted to work in the obstetrical clinic of the Washington University Dispensary, where individual instruction will be given daily. This work is seldom finished before 4 p. m., after which mannikin practice, including the usual forceps operations, perineal repairs, etc., will be practiced from 4 to 6 p. m. three times each week. On Thursdays from 4:30 until 5:30 p. m. the Pathological Conference is held in the autopsy amphitheatre of Barnes Hospital.

All post-graduate students are privileged to attend normal labors at all times and will be called for every abnormal case delivered in the Barnes Hospital and the City Hospital during this course.
1. **Ward Rounds.** Barnes Hospital. Mondays, Wednesdays, and Fridays, 9 to 10 a.m.  
Dr. Otto Schwarz

Diagnosis and treatment of pregnant, parturient, and puerperal patients are given special consideration. The management of labor, obstetrical asepsis, the use of anesthetics, including nitrous oxide oxygen and twilight sleep, are taught in the delivery rooms.

2. **Obstetrical Technique and Essential Laboratory Work for Obstetrical Patients.** Barnes Hospital, Mondays, Wednesdays, and Fridays, 10 to 11 a.m.  
Dr. Krebs

Includes methods of obtaining material for examinations in the laboratory, examinations of blood, urine, vaginal, and uterine smears and cultures, blood pressure and other means of examination employed in making an obstetrical diagnosis.

3. **Care of Newborn Babies.** Barnes Hospital. Mondays, Wednesdays, and Fridays, 11 a.m. to 12 m.  
Dr. Davidson

4. **City Hospital.** Tuesdays, Thursdays, and Saturdays, 9 to 11 a.m.  
Dr. Dorsett, Dr. Abrams

Examination and care of pregnant, parturient, and puerperal women.

5. **Round-Table Discussion.** Barnes Hospital. Mondays, 12 m. to 1 p.m.  
Dr. Otto Schwarz

Informal discussion of topics suggested by the post-graduates, so as to bring out for free discussion subjects that might otherwise be overlooked.

6. **Special Lectures on Obstetrical Subjects.** Barnes Hospital. Tuesdays, Thursdays, and Saturdays, 12 m. to 1 p.m.  
Dr. Henry Schwarz, Dr. Royston, Dr. Ehrenfest

Lectures on obstetrical subjects, covering the usual abnormalities.
7. Work in Washington University Obstetrical Dispensary. Daily, 2 to 3:30 p. m.

Dr. Ehrenfest, Dr. McNalley, Dr. Andrews

Includes examination and care of pregnant and puerperal women, obstetrical diagnosis, methods of determining positions and approximate size of fetus, pelvimetry, etc.

8. Operative Course on Mannikin. Barnes Hospital. Mondays, Wednesdays, and Fridays, 4 to 6 p. m.

Dr. Royston and Dr. Krebs

Includes various forceps applications, version, breech extractions, episiotomy, repair of perineal lacerations, etc.

Fees. The fee for the whole course is $100.00.

DERMATOLOGY

The Department of Dermatology offers the following courses. If all of them are taken, they will furnish the student with a comprehensive outlook on Dermatology, but they are not intended in any way to qualify him as a specialist. Special courses, extending over a period of one to two years, may be arranged for those physicians who intend to become specialists in Dermatology. All of the courses run for four weeks.

1. **WASHINGTON UNIVERSITY DISPENSARY.** Mondays and Fridays, 2 to 3 p. m. Barnard Free Skin and Cancer Hospital. Wednesdays, 2 to 3 p. m. Dr. Engman, Dr. Mook, Dr. Weiss

This course will consist of the clinical demonstration of patients who present themselves at the Dispensary for the cure of skin diseases and syphilis. Methods of diagnosis and treatment will be described. The weekly clinical conference at the Barnard Free Skin and Cancer Hospital is conducted by Dr. Engman. At this conference all of the rarer types of skin diseases and syphilis are presented and discussed.

2. **SYPHILIS.** Washington University Dispensary. Tuesdays, Thursdays, and Saturdays, 2 to 3 p. m., and Tuesdays, Thursdays, and Fridays, 6:30 to 7:30 p. m.

   Dr. Conrad, Dr. Coleman

   (a) The technique of venipuncture.
   (b) Intramuscular mercury injections.
   (c) Intravenous mercury injections.
   (d) Arsphenamine administration.

This course will provide a short intensive training in the treatment of syphilis.

3. **DERMATOLOGY AND SYPHILIS.** City Hospital No. 1. Tuesdays, Thursdays, and Saturdays, 10 to 11 a. m.

   Dr. Weiss, Dr. Conrad

   Ward rounds at the St. Louis City Hospital. Demonstration of patients with short talks on the various phases of syphilis and skin diseases.
4. GENITO-URINARY CLINIC. Washington University Dispensary. Mondays, Wednesdays, and Fridays, 9 a.m. to 12 m.

Dr. Rose and associates

Diagnosis and treatment of ambulant genito-urinary cases. This course does not include major genito-urinary surgery, endoscopy or cystoscopy, and is intended to supplement the Dermatology course. It may be taken only in conjunction with the entire Dermatology course.

The fees for this course will be in accordance with the general statement under the head of Fees.

OPHTHALMOLOGY

The department of ophthalmology offers a one-year course to graduate students, beginning October 1st of each year. The purpose of the course is to give a thorough grounding in the fundamentals and sufficient practical training to enable graduates from this course to begin the practice of the specialty.

The schedule of the course follows:

**MORNINGS**

Monday, Wednesday and Friday

*Physiological Optics.*—October 1st to October 31st, 8:30 a.m. to 12:30 p.m.

*Ophthalmoscopy.*—November 1st to November 30th, 8:30 a.m. to 12:30 p.m.

*Ophthalmological Neurology.*—December 1st to December 31st, 8:30 a.m. to 12:30 p.m.

Dr. W. E. Shahan

*Practical Refraction.*—January 1st to September 30th, 9:00 a.m. to 12:30 p.m.

Tuesday, Thursday and Saturday

*Anatomy and Embryology.*—October 1st to November 30th, 8:00 a.m. to 12:30 p.m.

Lectures by Dr. W. F. Hardy, 8:00 a.m. to 9:00 a.m.

*Pathology, Bacteriology and Pathological Technique.*—December 1st to March 31st, 8:30 a.m. to 12:30 p.m.

Lectures by Dr. Max Jacobs, Dr. Lawrence Post, Dr. M. H. Post and Dr. F. O. Schwartz.

*Surgery.*—April 1st to May 31st, 8:00 a.m. to 12:30 p.m.

Lectures by Dr. Meyer Wiener, 8:00 a.m. to 9:00 a.m.

*Practical Refraction.*—June 1st to September 30th, 9:00 a.m. to 12:30 p.m.

**AFTERNOONS**

Monday to Saturday, Inclusive.

Clinical Teaching and Practice by Members of the Staff and Assistants, 2:00 p.m. to 5:00 p.m.

The fee for this course is five hundred dollars.

Two months' courses in certain branches of the specialty are offered, beginning October 1st and February 1st. The registrar will furnish detailed information concerning these courses upon request.
OTO-RHINO-LARYNGOLOGY

The Departments of Oto-Rhino-Laryngology of Washington University offer to doctors of medicine organized courses in the diseases of the ear, nose, and throat, covering a period of twelve months, planned for those wishing to become specialists in this field and for those who desire simply to review the subject.

The courses have been arranged as follows:

Course 1.

For physicians wishing to become specialists, but who are not conversant with the work, the course extends over a period of twelve months and begins with the school year the fourth Thursday in September, with succeeding one-year courses commencing each six months thereafter.

In addition to the daily clinical work in ear, nose, and throat carried on throughout the year, supplemented by complete didactic lectures, there are given full courses in anatomy, pathology, physiology, and cadaver operative surgery. The major portion of the time assigned to clinical work is given over to the important and difficult matter of learning to make correct diagnoses and of carrying out proper treatment. In the beginning, the nasal sinus suppurations are demonstrated by artificial reproduction on the cadaver, followed by demonstrations of the various operative procedures in ear, nose, and throat work on the cadaver. Each student is expected to do as many operations as cadaver material permits.

After the student has demonstrated his ability to recognize the indications for operative procedure, he is then expected to operate under the guidance of an instructor and to carry on the post-operative care of the patient.

The subject matter of each day’s teaching is given on matriculation. Certain hours are assigned daily to reading, and instruction in the methods of using the oto-laryngological literature is given.

Students who have satisfactorily completed this course are encouraged, as further training, to accept appointments as assistants in the oto-laryngological clinic.
Course 2.

The course is designed for those who desire training in more advanced work and require, therefore, a shorter period of time in the clinic. The advanced student may arrange for any part of the work desired, but especially, that work is recommended which is covered in the first four months of each year's course; because during this period, all the didactic clinical lectures and fundamental courses in anatomy, pathology, physiology, etc., together with the cadaver operative courses, are given. In this connection, however, the applicant's attention is again called to the importance and the necessity of an intimate knowledge of the indications for operative procedures before starting out to learn operative technique.

Course 3.

For specialists desiring a more intimate working knowledge of any of the special subjects taught during the year. Schedule sent on request.

Course 4.

For the physician who wishes merely to be able to recognize any departure from the normal in this field, daily clinical instruction is offered during any period of the twelve months. The time required for this training is comparatively short.

Arrangements may be effected by correspondence, or preferably by personal interview with the director of post-graduate courses in oto-laryngology. All communications and requests for information concerning this course should be addressed to the Registrar, Washington University School of Medicine, Scott and Euclid Avenues, St. Louis.

Fees

Twelve months' course, $500; four months' course, $300; individual courses, $100.

Outline of Courses with Number of Periods Devoted to Each Subject

Clinical Pathological Conference. Autopsy Amphitheatre, Weekly during the academic year.

Ear

1. Anatomy. Dispensary Lecture Room. 5 periods.
2. Histo-Pathology. Pathology Laboratory. 6 periods.
5. Operative (Cadaver) Course. Department of Anatomy. 5 periods.
6. Clinic (Out Patients). Dispensary. 12 months daily.
8. Ear Operations. Barnes and St. Louis Children’s Hospitals. 12 months daily (as they occur).
10. X-Ray Demonstrations. X-Ray Department, Barnes Hospital. 2 periods.

NOSE AND THROAT

2. Histo-Pathology. Pathology Laboratory. 10 periods.
3. Lectures (Dr. Sluder). Surgery Lecture Room. 12 periods.
5. Broncho-Oesophagoscopy (Clinic). Barnes Hospital. 24 periods.
7. Cadaver Operations. Department of Anatomy. 5 periods.
8. Tonsillectomy. Dispensary Operating Room. 48 periods.
10. Clinic (Out Patients). Dispensary. 12 months daily.
11. Hospital Rounds. Barnes and St. Louis Children’s Hospitals. 12 months daily.
13. X-Ray Demonstrations. X-Ray Department, Barnes Hospital. 2 periods.

CURRENT MEDICAL LITERATURE

Library of the Washington University School of Medicine.  
Dr. Loeb

The purpose of this course is to study current medical literature, at convenient hours, either late in the afternoon or in the evening. The aim of the course is two-fold: (1) to survey the principal publications in the various fields of theoretical and practical medicine and to discuss ways and means of tracing the literature in a certain field; (2) to become acquainted with some of the principal problems, especially in theoretical medicine, under investigation at the present time.

This course will run for four weeks. Fee for the course $25.00.

ANATOMY

In the Departments of Surgery, Gynecology, Ophthalmology, Otology, and Laryngology and Rhinology, the Department of Anatomy co-operates in the anatomical teaching. The various courses in regional anatomy outlined under the heads of the different departments are all given under the direction of the Department of Anatomy.

Students who complete the course in accordance with the regular schedule will have the third trimester of the fourth year available for elective work; during this trimester credit must be gained for a minimum of 300 hours of elective work, 150 of which must be done in some one department.

Students who enter the School after the completion of their second year without credit for the clinical work given in this School in the third trimester of the second year will complete the required work of the fourth year during the mornings of this trimester. The afternoons of the third trimester of the fourth year will be available for elective work; during this trimester credit must be gained for a minimum of 75 hours of elective work, which may be taken in not more than two subjects.

Choice of elective courses is subject to the approval of the head of the department in which the work is to be done.
Washington University

I. The College (Skinker road and Lindell boulevard)
   George O. James, Ph.D., Dean

II. The School of Engineering (Skinker road and Lindell boulevard)
    Walter E. McCourt, A.M., Dean

III. The School of Architecture (Skinker road and Lindell boulevard)
     Walter E. McCourt, A.M., Dean

IV. The School of Commerce and Finance (Skinker road and Lindell boulevard)
    William F. Gephart, Ph.D., Dean

V. The Henry Shaw School of Botany (Shenandoah and Tower Grove avenues)
