1955

Washington University School of Medicine bulletin, 1955
Block Plan of Washington University
Medical Group and School of Dentistry

1—South Building
   a. Biological Chemistry
   b. Physiology
   c. Pharmacology

2—Research Building
   a. Office of the Dean
   b. Office of the Registrar

3—North Building
   a. Library
   b. Auditorium
   c. Anatomy

4—Power House

5—Clinic Building
   a. Clinics
   b. Microbiology
   c. Pathology
   d. Preventive Medicine

6—McMillan Hospital and
   Oscar Johnson Institute
   a. Ophthalmology
   b. Otolaryngology

7—Edward Mallinckrodt
   Radiological Institute

8—St. Louis Maternity
   Hospital
   Obstetrics and Gynecology

9—Renard Hospital
   Neuropsychiatry

10—Wohl Hospital
    Laboratories of Experimental Medicine and
    Surgery

    Barnes Hospital

11—Medical Wing

12—Administration Building

13—Physical Therapy

14—Rand-Johnson Memorial
    Surgical Wing

15—Private Pavilion and
    Emergency Wards

16—Service Building
    a. Cafeteria
    b. Diagnostic Laboratories

17—Laundry

18—St. Louis Children's
    Hospital
    Pediatrics

19—Barnard Free Skin and
    Cancer Hospital

20—School of Nursing
    and Nurses' Residence

21—School of Dentistry

22—Department of
    Occupational Therapy

ACADEMIC DIVISIONS
OF WASHINGTON UNIVERSITY

ETHAN ALLEN HITCHCOCK SHEPLEY, A.B., LL.B., LL.D.
Chancellor of the University

All Schools except Medicine, Dentistry, and Nursing, are located on the Main Campus, at Lindell and Shinker Boulevards, St. Louis 5, Mo.

THE COLLEGE OF LIBERAL ARTS
Thomas S. Hall, Ph.D., Dean

Courses in the humanities, the social studies, and the natural sciences, leading to a Bachelor of Arts degree; curricula for prospective teachers; work leading to the Bachelor of Music degree; pre-professional studies for students who plan to enter the professional schools of Business and Public Administration, Law, Medicine, Dentistry, Nursing, Social Work, the Graduate School of Arts and Sciences, and the natural sciences, leading to the Bachelor of Education degree of Bachelor of Science in Retailing. 3. Bachelor of Science in Retailing. 3.

THE SCHOOL OF ENGINEERING
Lawrence E. Stout, Ph.D., Ch.E., Dean

Four-year prescribed course of study leading to the degree of Bachelor of Science in each of the following branches: Architectural Engineering, Chemical Engineering, Civil Engineering, Electrical Engineering, Engineering Physics, Geological Engineering, Industrial Engineering, and Mechanical Engineering. Provision is also made for alumni to qualify for the professional degree of Engineer in each of these branches.

THE SCHOOL OF ARCHITECTURE
Buford L. Pickens, B.S.Arch., A.M., Dean

Five-year program leading to the degree of Bachelor of Architecture.

THE SCHOOL OF BUSINESS AND PUBLIC ADMINISTRATION
Ross M. Trump, Ph.D., Dean

1. Two-year program, at the junior and senior level, leading to the degree of Bachelor of Science in the field of Business Administration, Public Administration, or Foreign Service. 2. Four-year program, open to freshmen, which leads to the degree of Bachelor of Science in Retailing. 3. Graduate work leading to the degrees of Master of Business Administration, Master of Public Administration, and Master of Science in Retailing, Accounting, Finance, or Marketing.

THE GEORGE WARREN BROWN SCHOOL OF SOCIAL WORK
Benjamin E. Youngdahl, A.M., LL.D., Dean

Two-year graduate professional curriculum leading to the degree of Master of Social Work; an additional professional two-year program leading to the degree of Doctor of Social Work.

THE HENRY SHAW SCHOOL OF BOTANY
Henry N. Andrews, Jr., Ph.D., Dean

Affiliated with the Missouri Botanical Garden. Graduate work in Botany leading to the degrees of Master of Arts in Botany, Doctor of Philosophy, administered by the Graduate School of Arts and Sciences.

THE SCHOOL OF LAW
Milton D. Green, J.D., Jurs.D., Dean

Three-year curriculum leading to the degree of Bachelor of Laws.

THE SCHOOL OF MEDICINE
Carl V. Moore, A.B., M.D., Dean

(400 South Kingshighway, St. Louis 10, Mo.)

Four-year curriculum leading to the degree of Doctor of Medicine; postgraduate courses.

the Division of Auxiliary Medical Services, instruction leading to the degrees of Bachelor of Dental Surgery, Bachelor of Science in Occupational Therapy, and Bachelor of Science in Physical Therapy; courses in Orthoptic Technology and X-Ray Technology leading to certificates; in cooperation with Barnes Hospital, courses for Laboratory Technicians, Medical Dietitians, and Nurse Anesthetists leading to certificates.

THE SCHOOL OF DENTISTRY
Lemoy R. Beling, Ph.D., Dean

(459 Scott Avenue, St. Louis 10, Mo.)

Four-year curriculum leading to the degree of Doctor of Dental Surgery, and courses for graduate students who may or may not be candidates for the degree of Master of Science in one of the dental specialties.

THE SCHOOL OF NURSING
Louise Kump, R.N., B.S., A.M., Director

(10 South Kingshighway, St. Louis 10, Mo.)

Advanced programs for graduate nurses leading to the degrees of Bachelor of Science and Master of Science in Nursing.

THE SCHOOL OF FINE ARTS
Kenneth E. Hudson, B.F.A., Dean

Specialized four-year programs leading to the Certificate of Attainment or the degree of Bachelor of Fine Arts in Painting, Sculpture, Illustration, Advertising Design, Fashion Illustration, Dress Design, the Crafts, and Art Teacher Education.

UNIVERSITY COLLEGE
Wills H. Beals, Ph.D., Dean

An adult education and evening division offering a wide range of classes for students who are unable to attend during the day, including courses which lead to the degrees of Bachelor of Science and Bachelor of Science in Education.

THE SUMMER SCHOOL
Stephen C. Gribble, Ph.D., Director

Courses from almost every division of the University, under the regular teaching staff, as well as special classes given by instructors who are invited to the campus for this purpose.

THE GRADUATE SCHOOL OF ARTS AND SCIENCES
Lewis E. Hahn, Ph.D., Dean

Work leading to the degrees of Master of Arts and Doctor of Philosophy in departments of the College of Liberal Arts, the School of Medicine, and, for the Ph.D. only, in the Schools of Engineering and Business and Public Administration; graduate professional degrees of Master of Arts in Education, Master of Science in Health and Physical Education, Master of Science in Counseling and Personnel, Master of Science in Speech and Hearing, Master of Music, and Doctor of Education.

THE SEVER INSTITUTE OF TECHNOLOGY
Lawrence E. Stout, Ph.D., Ch.E., Director

The graduate division of the School of Engineering, offering instruction leading to the degrees of Master of Science in Engineering, Master of Engineering Administration, and Doctor of Science in Engineering.

</table>
Washington University School of Medicine was formed in 1899 by the union of the first two medical schools established west of the Mississippi River, the Missouri Medical College and the St. Louis Medical College, popularly known as McDowell’s College and Pope’s College because of the close identification of the two schools with their respective Deans, McDowell of the Missouri Medical College and Pope of the St. Louis Medical College.

These pioneer colleges set high standards for medical education during the heyday of the medical diploma mills, when there were four times as many medical schools operating in the city of St. Louis as there now are in the entire state of Missouri. From their beginnings each school sought university affiliation. The St. Louis Medical College was established as the Medical Department of St. Louis University, became independent in 1855, and affiliated with Washington University in 1891, although it retained its name until the union with the Missouri Medical College in 1899. The Missouri Medical College was established as the Medical Department of Kemper College, was later the medical department of the University of Missouri; it finally became independent in 1857. In 1899, the Missouri Medical College affiliated with the St. Louis Medical College, and thus formed the Medical Department of Washington University.

Both colleges were particularly fortunate in attracting men of energy, integrity, and skill. Members of their faculties were well known at home and abroad. Charles A. Pope at thirty-six became the youngest president in the first hundred years of the American Medical Association, and his successor as professor of surgery at the St. Louis Medical College, E. H. Gregory, was elected president in 1886. John T. Hodgen, a graduate of the Missouri Medical College and later dean and professor of surgical anatomy at the St. Louis Medical College, was president of the American Medical Association in 1880. Hodgen originated the splint for hip fractures. The Hodgen splint is still used today.

Both colleges continued to raise their requirements, so that at the time they became associated in 1899, each required its students to complete satisfactorily a four-year graded course for the M.D. degree.

In 1909 Abraham Flexner began a survey of 155 medical schools in the United States and Canada for the Carnegie Foundation for the Advancement of Teaching. A similar survey by the American Medical Association and Flexner’s survey, the famous Bulletin Number Four on the state of medical education in the United States and Canada, created a national sensation. Some schools collapsed, others pooled their resources, while still others reorganized.

The Medical School of Washington University did not escape criticism. In the report Flexner made to Dr. Pritchett, president of the Carnegie Foundation for the Advancement of Teaching and former professor of astronomy at Washington University, he said that one of two courses must be adopted: “the department must be either abolished or reorganized.”

Dr. Pritchett mailed the report to Robert S. Brookings, a St. Louis merchant who
was president of the Board of Directors of Washington University. Mr. Brookings was shocked and immediately went to New York to see Flexner, demanding proof that the conditions were as bad as described. Abraham Flexner returned to St. Louis with Mr. Brookings, and the two men went through the School. In less than two hours Mr. Brookings was convinced that drastic action was necessary if the School were to be of highest caliber.

The meeting in 1909 of Robert S. Brookings and Abraham Flexner was of unsurpassed significance in the history of the Washington University School of Medicine, for it led to the complete reorganization of the School and the establishment of the present Medical Center. Abraham Flexner inspired the dream of a model medical school. Robert S. Brookings accepted the challenge, and with the energy and vision which characterized all his enterprises, made the dream a reality.

No time was lost in making changes. The Bulletin of the Medical School for July, 1910, makes the following general statement: "The Corporation of the University, becoming convinced that in no other direction could greater service be rendered than through a great, modern medical school, determined to reorganize the School and to place it in the front rank of American medical institutions. It has called to the heads of a number of the leading departments the ablest men it could secure, who shall give their time to teaching and research, providing each with a staff of permanent assistants, who likewise shall give their time to instruction and research, and has associated with this staff groups of the strongest men in the medical profession in St. Louis."

When Robert A. Barnes died in 1892, he left a will which directed that the trustees of his estate should use $100,000 for the erection and equipment of a hospital "for sick and injured persons, without distinction of creed, under the auspices of the Methodist Episcopal Church, South." Investigation by the trustees into the cost of building a modern hospital convinced them that the sum was not large enough to build an efficient, fireproof building, and they therefore invested the trust. By 1912 the value had increased to two million dollars, a sum which permitted the building of a hospital and left an endowment greater than the original fund. The trustees were studying hospital construction at the time Mr. Brookings was studying medical schools.

It was apparent to everyone concerned that the two projects, the building of a medical school and the construction of a modern hospital, were so interrelated that the purpose of each would be more successfully fulfilled by an affiliation. A medical school would provide a highly trained staff and would assure the most modern methods and superior laboratory facilities for the hospital. A teaching hospital would give the patient superior care and provide the essential clinical experience consistent with modern medical teaching methods.

During the spring of 1912 construction was begun on the medical school and hospital buildings which form the nucleus of the present center. The laboratories were moved from their old quarters in downtown St. Louis into the new buildings on Euclid and Kingshighway during the summer of 1914, and late in the fall of the same year the activities of the Washington University Hospital were transferred to the Barnes
AIMS

Hospital. Concomitantly, the St. Louis Children’s Hospital, then located on Jefferson Avenue, became affiliated with the School of Medicine and moved to its new quarters in the medical center.

On April 28, 29, and 30, 1915, exercises were held to celebrate the completion of this group of buildings designed to promote the practice, the teaching, and the progress of medicine. The dedication ceremonies marked what Dr. William H. Welch of the Johns Hopkins University called “one of the most significant events in the history of medical education in America.” Robert S. Brookings, the one man most responsible for the reorganization, voiced the hope that “our efforts will contribute, in some measure, to raising the standard of medical education in the West, and that we will add, through research activities, our fair quota to the sum of the world’s knowledge of medicine.”

These prophetic words of Mr. Brookings have been realized. Local, national, and international recognition has come to the School and to members of the faculty. Three members of the faculty have been given the St. Louis Award, and research done at the School has resulted in four Nobel Prizes. Three of the Nobel Laureates are still on the faculty, thus making the Washington University School of Medicine rather unique among medical schools the world over.

In the ensuing years the medical center has continued to grow, and now its facilities are unexcelled. With the increase in the physical plant there has also occurred a great increase in the size of the faculty; the expansion has been made without compromise in the standards which marked the early development of the medical center. As a result, significant achievements in both research and clinical areas have been recorded steadily.

AIMS AND GENERAL PLAN OF INSTRUCTION

The efforts of the School are directed toward providing able students with a stimulating and challenging milieu in which they may pursue the study of medicine. Because Washington University is a private institution, its School of Medicine is not bound by any arbitrary restrictions in its admissions policy; indeed, the School seeks the most able applicants without reference to geographic, racial, or religious origin. A large scholarship program, which continues to grow, helps to make it possible for the School to lend support to able students whose personal resources might otherwise prevent them from obtaining a medical education. At any given time, the student body includes representatives from most of the forty-eight states and from the territories and foreign countries as well.

The educational policies are such as to offer the student not only a factual background, but more importantly, the opportunity to acquire a long-term approach to medicine. In a field which is developing as rapidly as is medicine, education only begins in medical school and must be considered a continuing project. It is hoped
that this important concept will be inculcated in each student during his four years in the Medical School.

The educational exposure available makes it possible for students to develop the foundation for a career in medical practice or in medical education and research. The student research program enables any student interested to become acquainted with original laboratory investigation; a significant group avails itself of this opportunity, and a number of original contributions results from student research each year.

The course of study for candidates for the degree of Doctor of Medicine in all medical schools is designed as a basic preparation for the practice of medicine. As interpreted in this School, the basic preparation for a career in any field of medicine must include first of all an introduction to the principles of the medical sciences. There are reasons for strong emphasis on this point of view.

The phenomenal advances that characterize modern medicine and promise its continued progress for human betterment are the outgrowth of systematic experiments rather than merely of individual observation, experience, and skill. A fusion of accumulated systematic knowledge, the medical sciences, with the arts of medical practice constitute medicine of today and tomorrow. Orderly information in terms of the scientific principles involved, acquired by those having an inclination to apply them to practical problems, furnishes an attitude of mind as well as a factual background that are essential to the study of clinical medicine.

The technical knowledge that has created modern medicine will surely continue to grow. Medical students must, therefore, form the habit of keeping up with new developments, of preparing themselves for the continued study of the medical sciences; without that habit and preparation, the subsequent progress of medicine will bring obsolescence to the individual. These ideas pervade the spirit of the medical science courses given during the first and second years.

Before entering upon the examination and study of patients who exhibit and illustrate the phenomena of health and disease treated by the medical sciences, the student must become acquainted with and acquire practice in techniques of clinical examination. This beginning experience is gained mainly from the conjoint courses given by teachers from several clinical departments during the second year.

With this preparation the student is ready, when he enters the third-year class, to begin the observation and study—first hand—of a variety of manifestations of health and disease as seen and cared for in clinics and hospitals. This clinical instruction occupies the third and fourth years. It consists mainly of a series of clerkships in wards and hospitals and outpatient services, supplemented by systematic courses of lectures and clinical conferences.

It is this planned sequence of scientific and practical training, combined with individual experience of student with patients, under guidance of clinical teachers who are also physicians and surgeons, that characterizes the basic professional course in medicine.

Because every medical student, irrespective of the field or specialty of medicine in
which he may desire or expect to practice, must become first a broadly trained doctor of medicine, nearly all courses of the undergraduate medical curriculum are obligatory. At the same time all students are encouraged to cultivate their individual interests and talents by special study of subjects or topics of their own selection. For this purpose several half days are left free in the class schedules, during which able students may do additional work in subjects of their greatest interest. A large number of student research fellowships are awarded each year to qualified applicants for summer work. Certain junior and senior clerkships are offered during the summer so that students who elect to do so may satisfy course requirements in these subjects during the summer and may then devote an equal amount of time to research or other elective activities in the school year. In the senior year six weeks are set aside for elective courses or for research, and students who wish to arrange for eighteen weeks of uninterrupted free time for research may do so. The opportunity for special study is afforded in every department of the school.

The academic term of thirty-six weeks for each of the four courses is divided into three trimesters of twelve weeks. The program is an intensive one and demands the full time and best efforts of students. They are discouraged from attempting outside work or employment during the sessions, especially during the first two years.

MEDICAL SCHOOL BUILDINGS

The School is located along the eastern edge of Forest Park in the center of the city and is served by convenient public transportation; its site thus combines the advantages of pleasant surroundings and easy accessibility.

The laboratories and lecture rooms of the preclinical departments are housed in two wings of the main building of the School and in the building which also provides the facilities for the Washington University Clinics. The so-called North Building contains the new Medical School library, an auditorium, and the facilities of the Department of Anatomy. The Cancer Research Wing, added in 1950, houses the administrative offices, a student lounge, the bookstore, and numerous research laboratories. In the South Building are the Departments of Biochemistry, Physiology, and Pharmacology. The Departments of Microbiology, Pathology, and Preventive Medicine each occupy a floor in the Washington University Clinic Building, where are also located the Student Health Service and the outpatient departments of the affiliated hospitals.

THE HOSPITALS AND LABORATORIES

Adjacent to the Medical School building proper are the following hospital facilities: The Barnes Hospital. This unit, which constituted the first hospital structure in the center, has grown from 150 beds to its present total of 444. Included are the medical and surgical wards, representing about half of the total number of beds, as well as
the floors on which are available beds for semiprivate and private patients. In the extensive operating suite, all of the general surgical procedures as well as those relating to neurosurgery, thoracic surgery, urologic surgery, plastic surgery, orthopedic surgery, and gynecologic surgery are performed. A large central diagnostic laboratory, under the direction of the Medical School staff, provides diagnostic service to all of the medical center. In the Barnes Hospital there is also a large cafeteria for the professional staff and the medical students.

The McMillan Hospital, including the Oscar Johnson Institute for Medical Research. This building is owned by the School of Medicine, but like all the hospitals within the medical center proper with the exception of St. Louis Children's Hospital, it is operated by the Director of Barnes Hospital. In it are 156 beds for the treatment of patients whose diseases fall in the fields of ophthalmology or otolaryngology. A small number of general medical patients are also admitted to the McMillan Hospital. The operating rooms and outpatient clinics of both the Departments of Ophthalmology and Otolaryngology are situated in the McMillan Hospital. The Oscar Johnson Institute, occupying the top five floors of the building, provides unexcelled research facilities for the above two departments, and for the Division of Neurology as well.

The St. Louis Maternity Hospital. Now owned by the University, this hospital became affiliated with the University in 1923, and moved to its present quarters in the medical center in 1927. Its 100 beds are devoted to ward, semiprivate, and private obstetrical patients, and there are corresponding facilities for newborns, including a unit for premature infants. There are, in addition, 37 beds for gynecologic patients. The building also houses the research facilities of the Department of Obstetrics and Gynecology.

The St. Louis Children's Hospital. With the newly completed facilities there are now 200 beds for the care of infants and children. Also available are new outpatient facilities and extensive clinical and research laboratories for the Department of Pediatrics.

Edward J. Mallinckrodt Institute of Radiology. This unit, one of the largest and best equipped in the world, houses the diagnostic, therapeutic, and research activities of the Department of Radiology. The Institute, which is University owned, is connected on most of its floors with the adjoining Barnes and Barnard Hospitals, and through them with the other hospitals of the center, thus providing easy access for all inpatients. Many important advances, including the development of cholecystography by Dr. Evarts A. Graham and his associates, have been made at the Mallinckrodt Institute.

David P. Wohl, Jr., Memorial Hospital. Opened by the University in 1954, the Wohl Hospital contains 71 beds for the care of medical and surgical patients, and also provides excellent new laboratories and offices for the Departments of Medicine and Surgery. Within the building are located a large amphitheatre, several small classrooms, and a student lounge.

Barnard Free Skin and Cancer Hospital. This new building, opened in 1954, provides 40 beds for the treatment of indigent patients suffering from skin diseases and
tumors. The Barnard Hospital has a long and notable history, and its recent affiliation with the University medical center constitutes an important step in the development of both institutions.

Renard Hospital. The newest University building in the medical center, opened in 1955, the Renard Hospital provides 100 beds for patients with psychiatric diseases and also affords new laboratories and offices for the Department of Neuropsychiatry.

In addition to the above named facilities which comprise the Washington University Medical Center proper, there are available for teaching purposes patients in the various hospitals operated by the city of St. Louis; included are two general hospitals, the St. Louis City Hospital with 1,037 beds, the Homer G. Phillips Hospital with 680 beds, and the Koch Hospital for tuberculosis.

All members of the staffs of the various hospitals in the Washington University Medical Center hold University appointments, and the Medical School nominates members of its faculty to the staffs of the various municipal hospitals.

STUDENT ACTIVITIES

Although the demands of the medical curriculum impose a greater load on students than they usually face in undergraduate colleges, there are opportunities for extra-curricular activities, among which the following are of interest:

(a) Student Representative Council. This body is the official student government organization and is composed of the officers of the four classes. The Council works closely with the Assistant Dean of Students, and has responsibility for such matters as the examination honor system, the student curriculum report (an annual compilation which presents student opinion regarding course material, teaching methods, etc.), and other matters of interest or concern to the students.

(b) Washington University Medical Society. This society, whose membership includes the faculty and all students, holds five meetings yearly, at which members present investigative work being carried on at the Medical School. In addition, in the Spring of each year, the Student Research Assembly is held for the purpose of enabling seniors to report on original research completed at any time during their four years in the School.

(c) Athletic Facilities. Excellent facilities for indoor and outdoor sports are available on the main University Campus. Students are furnished tickets free of charge for the many intercollegiate athletic events which take place throughout the year.

(d) Social Fraternities. Several national fraternities are represented by chapters at the School. Each year distinguished scientists are invited to present the two guest lectureships sponsored by these organizations.
(e) Within the University community, many excellent concerts, lectures, and other cultural activities take place and are open to students in the School of Medicine. In the city of St. Louis, likewise, are accessible the City Art Museum, the Missouri Botanical Garden, the Museum of the Missouri Historical Society, and others. The St. Louis Symphony Orchestra offers a series of twenty concerts during the season, and tickets at special student rates are available through the University.

GRADUATE TRAINING

Although not required by all states for licensure, an internship in an approved hospital is considered essential preparation for the practice of medicine, and most graduates seek additional experience by serving as residents and later as fellows for periods up to five years.

In order to aid students in obtaining desirable intern appointments, an active counseling program is maintained by the Assistant Dean of Students. Thus, in their junior year, students are provided with general background information regarding the type of organization of the internships available. Since many more openings exist than there are candidates in any given year, students are able to exert a considerable measure of selection.

An open file is maintained in the Assistant Dean's Office wherein are kept brochures and other descriptive data regarding internships throughout the country; included are evaluations of their own appointments, obtained from recent graduates.

The School participates in the National Internship Matching Program, which is now in its fourth year of operation. It has represented a valuable advance in this area and offers distinct advantages to applicants.

The class of 1955, as did its predecessors, obtained excellent appointments; over 70% were placed in leading University Hospitals in the United States, and the remainder accepted positions in other fine civilian and military hospitals.

The School maintains an active interest in its graduates and is pleased to support them in subsequent years as they seek more advanced training or staff appointments in the communities in which they settle.

Photograph of the recently completed David H. Wohl, Jr., Memorial Hospital which houses the administrative offices and laboratories of the Departments of Internal Medicine and Surgery; in addition, it provides three floors for the care of patient...

CALENDAR

1955 - 56

Registration for all new students, Wednesday, September 7, 1955.
Registration for all former students, Friday, September 9, 1955.
Academic year begins Monday, September 12, 1955;
First Trimester ends Saturday, December 3, 1955.
Second Trimester begins Monday, December 5, 1955; ends Saturday, March 10, 1956.
Registration for second half-year, Monday, January 30, 1956.
Third Trimester begins Monday, March 12, 1956; ends Saturday, June 2, 1956.
Holidays, Good Friday, March 30, 1956, and Saturday, March 31, 1956.
Final Examinations for first, second, and third classes begin Monday, June 4, 1956.
Commencement, Wednesday, June 6, 1956.

1956 - 57

Registration for all new students, Wednesday, September 12, 1956.
Registration for all former students, Friday, September 14, 1956.
First Trimester begins Monday, September 17, 1956;
ends Saturday, December 8, 1956
Christmas Recess, Thursday, December 20, 1956, through Wednesday, January 2, 1957.
Third Trimester begins Monday, March 18, 1957; ends Saturday, June 8, 1957.
Commencement, Wednesday, June 12, 1957.
ENTRANCE REQUIREMENTS

Entrance requirements to the School of Medicine are:

1. Character, attitude, and interest suitable to carrying out the duties of a physician.
2. Intellectual ability and achievement, indicated by satisfactory scholastic work prior to entering medical school.
3. Completion of at least three years of college courses in an approved college or university, with minimum subject requirements as follows:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>6 semester</td>
</tr>
<tr>
<td>Chemistry</td>
<td>15 semester, including quantitative analysis and 4 hours of organic</td>
</tr>
<tr>
<td>Physics</td>
<td>8 semester</td>
</tr>
<tr>
<td>Biology</td>
<td>8 semester, at least 4 hours of which must be in zoology</td>
</tr>
</tbody>
</table>

4. Applicants are expected to have taken the Medical Aptitude Test of the Association of American Medical Colleges.

It is believed that students pursuing the course in medicine should have a well-rounded general education in addition to the specific requirements indicated above. In this regard the Committee on Admissions suggests that applicants obtain as much exposure to courses in other fields of knowledge as possible. Applicants should not feel obliged to take courses in the various scientific disciplines purely as an aid to gaining admission, since all candidates who have satisfied the minimal requirements are judged on an equal basis. Students who have majored in nonscientific fields are considered equally acceptable as long as they have acquitted themselves well in the premedical courses. It is especially emphasized that students should not feel obliged to take courses in such subjects as histology, physiology, and bacteriology, all of which are included in the medical school curriculum, unless they have particular interests in pursuing these subjects in great detail. They do not per se enhance a student's chances of admission. In regard to the scientific background of applicants, it is well to point out that because of the importance of chemistry in medicine, students desiring to obtain courses which will be especially helpful should consider additional training in chemistry, particularly physical chemistry.

The rest of the college work should be chosen with the object of developing the intellectual talents of the individual, rather than as required preprofessional preparation. The college work should include courses in language and literature, history, and the social sciences, or other subjects which may afford the foundation for cultural development. Unless that foundation is laid early, there is the danger that later demands of technical and professional training may lead to its neglect.

The interest and earnestness with which any study is done—more than the subject matter itself—may determine its lasting value. The spirit of a course may be more important than its content, if it stimulates interest and cultivates an inquiring and thoughtful attitude. Development of an inclination to study and the habit of reasoning is more valuable than an obligatory course taken merely to satisfy entrance requirements.
Applications should be filed as soon as possible after August 1 of the year preceding that in which admission is sought. Blanks will be furnished upon request, and instructions concerning fees and transcripts will be sent also.

ADMISSION TO ADVANCED STANDING

Applicants who have satisfactorily completed one or two years of study at another approved medical school may be accepted for admission to the second- or third-year class (when vacancies exist), provided:

(1) That they comply with the requirements above stated for admission to the first-year class.

(2) That courses equivalent in general content and duration to those in this School in the years for which credit is asked have been satisfactorily completed.

(3) That at the discretion of the Committee on Admissions, examinations may be required in any subjects already covered.

An applicant for admission to the upper classes must have studied as a matriculated medical student in an acceptable medical school for a period at least equal to that already spent by the class to which admission is sought.

ADMISSION OF GRADUATES IN MEDICINE

Applicants who hold the M.D. degree are not accepted as candidates for that degree except under unusual circumstances.

A program of courses for postgraduate students may be secured from the Director of the Division of Postgraduate Studies.

STANDING AND PROMOTION

The following procedure for action on promotion and graduation has been adopted:

(1) After the completion of a major course each department reports to the dean's office the order-rank of each student in the class for that course, designating in each case "honors," "pass" or "fail." The rank and designation may be based upon attitude and performance as well as upon examination grades. Final examinations are held at the close of each academic year.

(2) For each class there is a Promotions Committee which periodically reviews the records of all students in that class and acts in accordance with the following rules:

(a) A student having recorded failures in two major subjects (see list below) will be required to withdraw from the class.

Major Subjects.

First Year: Gross Anatomy, Microscopic Anatomy, Biochemistry, Physiology.
Second Year: Microbiology, Pathology, Pharmacology, Medicine, Surgery (1/2).
Third Year: Medicine, Neuropsychiatry, Obstetrics and Gynecology, Surgery, Pediatrics.
Fourth Year: Medicine, Obstetrics and Gynecology, Pediatrics, Surgery, Ophthalmology (1/2), Otolaryngology (1/2), Outpatient Clinics.

(b) All students will be promoted to the next class who rank in the upper four-fifths of the class in at least 60% of the scheduled clock hours, provided there are no failures.

(c) Students who at the end of any year have recorded only one failure in a major department will be required to remove this failure as directed by the department concerned. When, and if, the failure is removed, the subcommittee will consider the student's entire record under rules (b) and (c) above. A student who has recorded a second failure in the attempt to remove a first failure will be required to withdraw from his class.

(d) No student shall be promoted to the third year until there is satisfactory credit for all required subjects of the first and second year.

(e) Under exceptional circumstances the promotion committees may suggest to the Dean and to the Committee on Admissions and Scholarships that a student be allowed to repeat certain courses as a special student or to repeat the work of the entire year as a member of the next class.

The registration of a student may be canceled at any time if in the opinion of the faculty his further attendance is deemed undesirable. A prorata refund of the tuition will be made in such cases.

REQUIREMENTS FOR DEGREES

DOCTOR OF MEDICINE

Candidates must be more than twenty-one years of age and of good moral character. They must have attended not less than four courses of instruction as matriculated medical students, the last of which has been in this School. They must have passed all required courses, or their equivalent, and have received satisfactory grades in the work of the entire four classes. They must have discharged all current indebtedness to the University.

At the end of the fourth academic term, students who have fulfilled these requirements will be recommended for the degree of Doctor of Medicine. Candidates must be present when the degrees are conferred. A graduation fee of $5.00 must be paid before Commencement.

Beginning with the graduating class of 1955, degrees with honors will be awarded on the basis of: (1) a written thesis submitted at any time prior to April 1 of the senior year; and (2) the candidate's over-all scholastic record at the time of graduation.

BACHELOR OF ARTS (COMBINED PROGRAM)

A student who enters the School of Medicine with three years of work in the College of Liberal Arts of Washington University may become a candidate for the Bachelor of Arts degree at the end of the first year in the School of Medicine. Under this
REQUIREMENTS FOR DEGREES

combined program he must fulfill the premedical requirements and also the following additional requirements:

1. He must have completed at least 90 academic units, with a minimum grade-point average of 1.0, and 4 units in Air or Military Science and Tactics, Band, or Physical Education.

2. He must have completed all of the specific requirements of the Common Studies Program and at least 15 additional units in advanced courses in not more than 3 departments. These units will satisfy a part of the A.B. requirements relative to advanced courses.

3. To be eligible for the degree of Bachelor of Arts under the combined plan, a student transferring to Washington University must complete at least the last 30 units of A.B. work in the College of Liberal Arts at Washington University and must complete all specific requirements for the A.B. degree, with the exception noted in item 2 above.

4. In addition to completing at least 90 units of work in the College, a student in the combined program must also satisfactorily complete the first year in the Washington University School of Medicine; this work will complete the A.B. requirements for an area of concentration.

5. A candidate for the A.B. degree under the combined program must be recommended by the Dean of the School of Medicine to the Dean of the College of Liberal Arts.
The University reserves the right to change the fees herein stated at any time without notice. Whenever a change is made, it will become effective with the next installment due.

All fees and charges are payable in advance at the Office of the Registrar of the School of Medicine.

Checks should be made payable to Washington University.

**Tuition Fee.** For undergraduate students the tuition fee is $864.00, payable in two equal installments, at the beginning of the first and second semesters.

**Health Service Fee.** A health service fee of $21.00 per semester is charged to all students. This fee covers complete medical examination on entering the School and continued medical care including all necessary hospital costs, drugs, and limited dental service during the regular school year. Those students who remain at school during the summer may make arrangements for continuation of health service. The services of one or more physicians are available at designated times for consultation at the Student Health Clinic. A physician is available for emergency care either in the clinic or the student’s room when necessary. Hospital care is provided in the services of the Barnes Hospital. It is the aim of the staff to watch and safeguard the health of each student in the School. The responsibility of the Health Service automatically ceases when the student for any reason discontinues his enrollment. A partial refund of the Health Service fee will be made to such individuals.

**Diploma Fee.** The diploma fee for the degree of Doctor of Medicine is $5.00. This fee is payable before Commencement.

**Microscope and Diagnostic Instruments**

Each student entering the freshman class is required to possess a standard microscope equipped with a substage light. All students are required to provide themselves with stethoscopes, ophthalmoscopes, otoscopes, hemocytometers, percussion hammers, tape measures, flashlights, head mirrors, and skin pencils as the need for them arises.

Supplies and books may be purchased at the bookstore located in the Medical School.

**Estimate of Expenses**

An estimate of the average annual expenses of a student in the School of Medicine, excluding the cost of clothes, laundry, microscope, and incidentals, is given below. The amounts will vary considerably, according to the individual.

<table>

<td>$1701.00 to $1956.00</td>
</tr>
</tbody>
</table>
REGISTRATION

Registration for the first half-year, 1955-56, is scheduled for Wednesday, September 7 (new students) and Friday, September 9 (former students); for the second half-year, Monday, January 30, 1956.

Previously matriculated students who fail to register on any of the days set aside for that purpose will be charged a fee of $5.00.

WITHDRAWALS AND REFUNDS

A student who withdraws within the first two weeks of classes is charged 20% of the tuition fee; a student who withdraws during the third week is held for 40% of the charges; a student who withdraws during the fourth week is held for 60% of the charges; a student who withdraws during the fifth week is held for 80% of the charges. There is no refund of any portion of the tuition fee after the fifth week. No special fees are refundable after the second week of the term.

MEN'S DORMITORY

A dormitory housing about fifty students is in close proximity to the School of Medicine. Each occupant must furnish his own sheets, pillow cases, and blankets; otherwise the rooms are furnished.

Room rent is $100.00 per semester, payable in advance, at registration. Reservations are accepted only for the full academic year. Application for reservation should be made to the Registrar and must be accompanied by a reservation fee of $10.00. This fee will be returned should a room not be assigned. If a room is assigned, the fee will be held by the University as a bond against possible damage to room and furniture. Subject to such claim, it will be refunded at the end of the school year.

The residents of the dormitory each year elect four of their fellows to the Dormitory Council, which is the responsible administrative body for the entire group; the Council works closely with the Assistant Dean in charge of students in handling all matters pertaining to the dormitory. During the school year 1954-55 the council members were as follows:

<table>
<thead>
<tr>
<th>Name</th>

</table>

VETERANS' ADMINISTRATION

The School of Medicine is approved by the Veterans' Administration for full training under Public Laws 346, 16, and 550.

1 Beginning in 1956 room rent will be $110.00 per semester.
The Library reading room, air-conditioned and lighted by recessed fluorescent ceiling lights, is located on the second floor of the north building of the Medical School. Two conference rooms are provided for the use of the students. Three levels of stacks, which are open to students and faculty alike, are situated below the reading room. The Library contains (April 1, 1955), 78,114 bound periodicals and monographs, and receives currently 885 medical periodicals.

The Library has acquired by gifts and by purchase a number of private collections, among them the manuscripts, letters, and other valuable material of the pioneer American physiologist, William Beaumont.

Library hours are 8:30 a. m. to 10:00 p. m. on week days, and 8:30 a. m. to 5:00 p. m. on Saturdays.

A view of the main floor of the new library. At the far end is one of several conference rooms available for use by small groups of students.
FELLOWSHIPS AND SCHOLARSHIPS

THE JACKSON JOHNSON FUND. Under the will of Jackson Johnson, the sum of $250,000 was given to the University, the income to be used “to aid worthy and desirable students in acquiring and completing their medical education.” During recent years, the income from this fund has been devoted to Honor Scholarships named for the donor as well as to fellowships for needy students.

These Honor Scholarships are awarded on a regional basis with one or more scholarships being awarded annually to students from each of the following areas:

<table>

The Jackson Johnson Regional Scholarships have been established to enable young men and women with superior qualifications and promise for a career in medicine to come to Washington University, without regard to their financial circumstances.

Eligibility. Jackson Johnson Regional Scholarships are open to those who plan to enter the freshman class at Washington University School of Medicine or to transfer from a two-year medical school to the third-year class at Washington University. The candidate must have resided for three years before application in one of the specified Regions, and have completed premedical work or the first two years of medicine in the same Region.
FELLOWSHIPS AND SCHOLARSHIPS

**Stipend.** Since the Jackson Johnson Regional Scholarships are regarded as prizes to be competed for by all students, whatever their financial need, the stipends will vary with the financial resources of the students. In those cases in which there is no financial need, a scholarship without stipend will be awarded. The maximum stipend will be $1,200 a year.

**Selection.** The awards will be made by the Committee on Admissions and Scholarships with the approval of the Chancellor on the basis of the academic record in college or medical school, the score on the medical aptitude and other tests, the recommendations of professors and others concerning ability, character, qualities of leadership, and general all-round development, and the extracurricular activities both in and outside of the School.

**Renewals.** Awards may be renewed with the same or different stipends for the succeeding years of the medical course, provided the achievements of the scholar justify the continuance of the award. The School may withdraw a Jackson Johnson Regional Scholarship if at any time the student’s record or his actions in the School or outside prove him unworthy of it.

**Application.** All students accepted for admission are considered for the Jackson Johnson Regional Scholarships, making it unnecessary to file a special application.

**Jackson Johnson Fellowships.** In order to provide opportunities for able and promising young men and women, three Jackson Johnson Fellowships in the Preclinical Sciences will be offered annually.

**Eligibility.** All applicants must be graduates of a recognized school of medicine, and acceptable for admission to the Graduate School of Arts and Sciences of Washington University as candidates for a doctoral degree. Preference will be given to those who expect to pursue an academic career in one of the preclinical sciences.

**Stipend.** The stipend will vary with the needs and ability of the individual to a maximum of $2000 a year for the first year.

**Renewal.** Awards may be renewed with the same or different stipends for not to exceed, in all, three years, provided the achievements of the fellow justify continued study.

**Application.** All applications should be completed by March 1 for the period beginning the following July or September. Awards will be announced about April 1.

**The Danforth Medical Fund.** The Danforth Foundation, Inc., and Mr. William H. Danforth have given the sum of $400,000 to further and promote the acquisition and dissemination of the knowledge of medical science and to support research and new discoveries in basic and clinical medicine and surgery. The principal and income of the Fund shall be used to furnish scholarships, fellowships, outright grants, or other financial assistance to talented and promising young men and women engaged or preparing to engage in such fields of study and endeavor. Mr. Danforth has established a Danforth Medical Fund Committee which at the present time is comprised of Dr. Glover H. Copher, Chairman, Dr. Samuel B. Grant and Dr. James Barrett Brown.
The persons to or for whom funds shall be made available shall be proposed by the Committee on Scholarships and Loans of the School of Medicine and shall be finally selected and determined with the advice and consent of the Danforth Medical Fund Committee. The awards are made by the Chancellor.

A Fellowship in Neurological Surgery with a stipend of $1,200 a year is awarded on recommendation of the Department of Surgery. Candidates must be graduates in medicine who will have completed an internship.

The George F. Gill Scholarship, instituted in memory of a former Clinical Professor of Pediatrics, entitles the holder to remission of the tuition fee to the amount of $100.

The Alumni Scholarship Award of $100 to be applied on the payment of the tuition fee is given for excellence in work during the preceding scholastic year on the recommendation of the Committee on Loans and Scholarships and the President of the Medical Alumni Association.

The Dr. John B. Shapleigh Scholarship. From a bequest of Dr. John B. Shapleigh, supplemented by contributions by Mrs. Shapleigh and Miss Margaret Shapleigh, a fund has been established, the income of which is used to pay the tuition of students in need of assistance.

The Eliza McMillan Student Aid Fund. The annual income from a bequest of Eliza McMillan provides a scholarship of about $200 for a deserving woman student in the School of Medicine.

The T. Griswold Comstock Scholarships. Through the bequest of Marilla E. Comstock, the annual income from $12,000 is used for two scholarships for students who otherwise would be unable to obtain a medical education and who desire and intend to follow the practice of medicine and surgery.

The Joseph H. Roblee Scholarships. Provided through the gift of Mrs. Roblee, the income from the Joseph H. Roblee Scholarship Endowment Fund of $12,000 maintains two scholarships. They are awarded by the Chancellor to qualified, worthy, and deserving students in any division of the University.

The Robert Allen Roblee Scholarships. Through the gift of Mrs. Joseph H. Roblee, the income from the Robert Allen Roblee Scholarship Endowment Fund of $15,000 provides one or more scholarships for qualified, worthy, and deserving students.

Andrew Rankin Fleming and Susie Fleming Fund. Through the bequest of Susie Fleming, $150 from the income of this fund is available annually for scholarships for worthy and needy students in the School of Medicine.
FELLOWSHIPS AND SCHOLARSHIPS

THE ALINE RIXMAN LOAN FUND. Provided through the gift of William Rixman, the fund is used to alleviate unexpected financial emergencies that arise among medical students during the academic year. The fund is available to any student who, in the judgment of the Dean, gives promise of becoming a competent physician. It is expected that loans will be repaid within a reasonable time after the student has finished his training. The loans are granted by the Chancellor on the recommendation of the Dean.

THE W. McKIM MARSHOTT SCHOLARSHIP AWARD, instituted in memory of Dr. W. McKim Marriott, Dean and Professor of Pediatrics, by Dr. C. V. Mosby for the C. V. Mosby Co., entitles the holder to an award of $500, which provides partial tuition for the recipient in the School of Medicine. The scholarship is awarded annually, preferably to a deserving young man who shows promise in the field of pediatrics. The award is made by the Chancellor on the recommendation of the Dean and the Professor of Pediatrics.

W. K. KELLOGG FOUNDATION SCHOLARSHIP AND LOAN FUND. A generous gift has been made to this and other universities by the W. K. Kellogg Foundation to provide financial assistance to well-qualified medical students in need of such aid. A limited number of scholarships and loans are available from this fund.

THE G. H. REINHARDT MEMORIAL SCHOLARSHIP FUND. Through the bequest of G. H. Reinhardt, an amount of not more than $400 each year is available to deserving students during their second year. No more than $100 shall be loaned to any one student. The loans are granted by the Chancellor on the recommendation of the Dean.

THE AUGUST F. HENKE FUND. Through the bequest of August F. Henke, $200 is available for aid to medical students. The scholarships or loans are granted by the Chancellor on the recommendation of the Dean.

JOSEPH H. SCHARF SCHOLARSHIP. Through the bequest of Dr. Joseph H. Scharf, the annual income from $2,418.72 is available for scholarships for worthy and needy students in the School of Medicine. The scholarships are awarded by the Chancellor on the recommendation of the Dean.

THE ALEXANDER AND GERTRUDE BERG FELLOWSHIP. Through the bequest of the late Mrs. Gertrude Berg, $40,000 has been given to the School of Medicine to establish an endowment fund for a fellowship in the Department of Microbiology.

THE BERTHA REINHARDT GREEN MEMORIAL FUND. Through the bequest of the late Mrs. Bertha Reinhardt Green, $5000 has been given to the School of Medicine for a loan fund in Occupational and Recreational Therapy.

STUDENT ASSISTANTSHIPS are available in a number of departments in the School. Information concerning these may be obtained from the heads of the departments concerned.

Applications for all fellowships, scholarships, and assistantships may be made to the Dean. The awards are made by the Chancellor on the recommendation of the Dean.
PRIZES

GEORGE F. GILL PRIZES:
1. One prize of fifty dollars is awarded at the end of the first year to the member of the class who has demonstrated superior scholarship in anatomical work.
2. One prize of fifty dollars is awarded to a member of the graduating class, of high general standing, who has shown especially good scholarship in the Department of Pediatrics.

ALPHA OMEGA ALPHA FRATERNITY PRIZE is awarded at the end of the fourth year to the member of that class who has made the highest average for the entire medical course.

ALPHA OMEGA ALPHA FRATERNITY PRIZE FOR STUDENT RESEARCH amounting to twenty-five dollars is awarded to the student who submits the best thesis on a research problem.

THE ALEXANDER BERG PRIZE of one hundred dollars is awarded to a student of high general standing who presents the best results in research in bacteriology.

THE BIOCHEMISTRY PRIZE is awarded at the end of the first year to the member of the class who has demonstrated superior scholarship in biochemical work.

THE PRIZE FUND OF THE MEDICAL FUND SOCIETY:
1. One prize of one hundred dollars is awarded annually to the student of the senior class who shall in the opinion of the faculty have excelled in the study of internal medicine, provided, however, that no student shall be eligible for this prize who has not been a bonafide student of medicine in the School of Medicine of Washington University for the full junior and senior years.
2. One prize of one hundred dollars is awarded annually to that student of the senior class who shall in the opinion of the faculty have excelled in the study of surgery, provided, however, that no student shall be eligible for this prize who has not been a bonafide student of medicine in the School of Medicine of Washington University for the full junior and senior years.

It is stipulated that no individual shall be eligible for both prizes.

THE HOWARD A. McCORDOCK BOOK PRIZE is awarded at the end of the second year to a member of that class for general excellence in pathology.

THE SIDNEY I. SCHWAB BOOK PRIZES are awarded at the end of the fourth year to members of that class for general excellence in neurology and psychiatry.

THE NU SIGMA NU AWARDS of twenty-five dollars each are awarded to the outstanding member of the first- and second-year classes.

THE BORDEN UNDERGRADUATE RESEARCH AWARD of five hundred dollars is awarded to that member of the graduating class who, during any year while enrolled in the School, has carried out the most meritorious undergraduate research.
LECTURESHPH

The Mu Chapter of the Phi Beta Pi fraternity established an annual lectureship in honor of Dr. Leo Loeb, Professor Emeritus of Pathology.

The Alumni of the School have established a Robert J. Terry Lectureship Fund "for the purpose of fostering greater appreciation of the study of human anatomy in relation to the teaching and practice of medicine" in honor of Dr. Robert J. Terry, Professor Emeritus of Anatomy.

Friends of the late Dr. Major G. Seelig and Mrs. Seelig have established an annual lectureship or fellowship in their honor.

A corner of the current reading room of the library where the most recent numbers of the 885 journals received are readily available.

A panoramic view of the Washington University Medical Center showing the buildings of the school and the affiliated hospitals. The view is from adjacent Forest Park.
The anatomical sciences are presented in two required courses (gross anatomy, microscopic anatomy). These are supplemented by clinical demonstrations supervised by members of other departments. Emphasis is placed upon the biological relationships of morphology to other disciplines of medical science. Lectures, demonstrations, and laboratory teaching are all used to call attention to the results of recent investigations and to acquaint students with the current literature. There are facilities for special work in gross anatomy, physical anthropology, embryology, neuroanatomy, cytology, histochemistry and electron microscopy.

Professor and Head of Department
FIRST YEAR

10 (501 and 502). Gross Anatomy. Each student shares a cadaver with one partner and so dissects one-half of the human body. An extensive collection of dissected specimens is housed in the dissecting rooms so that students may easily compare their dissections with museum specimens. X-ray equipment and films are used for presenting the internal structure of the body, and motion pictures of fluoroscopic examine-
tions are regularly presented. Special attention is given to surface anatomy. Students examine each other and are encouraged to learn as much as possible from the living subjects. Occasional attendance at autopsies is recommended. Frequent discussions are held with small groups of students. 336 hours.

(Drs. Trotter, Charles, Howell, Peterson)

11 (506 and 507). Microscopic Anatomy. Each student is required to have his own microscope, and is loaned a collection of prepared slides which he can study either at home or in the laboratory. He is also loaned a collection of electron micrographs which supplements the histological preparations. Fresh tissues are frequently used in the laboratory, and are especially valuable for determining some of the histochemical reactions of cells. Demonstrations are regularly presented, in which material involving complex techniques can be made available. Frequent and extemporaneous conferences are made possible by the use of laboratories seating about twenty students.

The latter part of the course is devoted to a study of the central nervous system. The principal tracts and nuclei are discussed in lectures, studied in the laboratory by means of dissections, prepared slides, and photographs, and related to the functions of the nervous system by lectures, discussions, and demonstrations. As in histology, morphological structure is related to growth, development, chemical composition, and physiological function. 282 hours.

(Drs. Dempsey, Hess, Clark, Weiss)

**ELECTIVE COURSES**

50. Topographical Anatomy. Laboratory study of topographical anatomy may be undertaken at any time during the year. Sections, museum preparations, and models are used as material. Hours to be arranged.

51. Dissection. Opportunities are offered at any time except August and September for students and physicians desiring to review the subject. Any of the following parts may be elected for study: head and neck, thorax and upper limb, abdomen and pelvis, lower limb. A fee will be charged, except for medical students who elect this for credit.

52. Advanced Work in Gross Anatomy, Histology, Cytology, Embryology, Neurology and Physical Anthropology. A study of the literature on certain selected problems accompanied by individual laboratory work. Hours to be arranged.

53. Research. Properly qualified individuals are encouraged to carry on research in the anatomical sciences. (See Bulletin of The Graduate School of Arts and Sciences.)
DEPARTMENT OF BIOLOGICAL CHEMISTRY

The department offers a first-year course in biological chemistry for students of medicine and for students in the Graduate School of Arts and Sciences. Students of medicine, as well as graduate students, are afforded the opportunity to pursue research work under the direction of the staff. Facilities are provided for research on the preparation and properties of enzymes, the mechanism of their action, and on the metabolism of carbohydrates and proteins. Some summer research fellowships are offered to students of medicine.

Professor and Head of Department
Carl F. Cori, M.D., University of Prague, 1920; Sc.D., Yale University, 1946; Sc.D., Western Reserve University, 1946; Sc.D., Boston University, 1948; Sc.D., Cambridge University (England), 1949.

Professor
Distinguished Service Professor Emeritus
Philip Anderson Shaffer, A.B., West Virginia University, 1900; Ph.D., Harvard University, 1904; Sc.D., University of Rochester, 1939; Sc.D., Washington University, 1953. (Also holds title of Lecturer.)

Associate Professor
Sidney F. Velick, A.B., Wayne University, 1935; Ph.D., University of Michigan, 1938.

Assistant Professors
David H. Brown, B.S., California Institute of Technology, 1942; Ph.D., 1948.
Robert K. Crane, B.S., Washington College, 1942; Ph.D., Harvard University, 1950.

Research Associates
Paul W. Preisler, B.S. in Chem. E., Washington University, 1923; M.S., 1925; Ph.D., 1927; LL.B., St. Louis University, 1954.

Fellows
Frank R. N. Gurd (Helen Hay Whitney Foundation and Guggenheim Foundation), B.Sc, McGill University, 1945; M.Sc., 1946; Ph.D., Harvard University, 1949.

First Year
10 (503). Biological Chemistry. Lectures, conferences and laboratory work covering those portions of the subject which are of especial importance to the student of medicine. First year; first semester. 312 hours. Graduate student credit: 10 units; lectures only: 4 units.

Elective Courses
50 (504). Advanced Work. For graduate students. Hours and credit to be arranged.
51. (515). Research. For graduate students. Hours and credit to be arranged.
Dr. Carl V. Moore, Busch Professor of Medicine, examining a patient during ward rounds with three senior students and a house officer.

THE JOHN MILLIKEN DEPARTMENT OF MEDICINE

(The Department of Medicine includes Internal Medicine and Dermatology)

For the purposes of both teaching and research the Department of Medicine is divided into specialty divisions, under the following directors:

- Arthritic Disease ........................................... Dr. Hagemann
- Cardiovascular Disease ................................. Dr. J. Smith
- Chest Disease ............................................. Dr. A. Goldman
- Dermatology .............................................. Dr. Lane
- Gastroenterology ......................................... Dr. Duden
- Hematology ................................................ Dr. Harrington
- Hypertension .............................................. Dr. Schroeder
- Immunology ................................................ Dr. Glaser
- Infectious Disease ....................................... Dr. Harford
Instruction in Medicine commences with the second trimester of the second year and continues throughout the third and fourth years of the curriculum. The teaching of the second year has two main objectives: first, the correlation of the basic sciences with the clinical aspects of disease, and second, training in the technical methods of physical examination and laboratory diagnosis. By the beginning of the third year the student is prepared for supervised clinical study of individual patients in the wards. The emphasis in the junior year is placed upon clinical diagnosis. In the final year each student acts for six weeks as clinical clerk in the wards of Barnes Hospital and also participates for twelve weeks in the co-ordinated outpatient clerkship under the supervision of the Department of Preventive Medicine. During his senior clinical clerkship he receives formal instruction in medical therapeutics.

Summer clerkships for which students may receive full credit are offered to both juniors and seniors. Students electing these summer clerkships may complete in advance their required work in Medicine and thus gain additional elective or vacation time during the regular academic year.

associate professors

- Carl Gayler Harford, A.B., Amherst College, 1928; M.D., Washington University, 1933.
- JohnEben Kirk, M.D., University of Copenhagen, 1929. (See Gerontology.)
- Albert I. Mendeloff, A.B., Princeton University, 1938; M.D., Harvard University, 1942; M.P.H., 1944. (See Department of Preventive Medicine.)
- Edward Humphrey Reinhard, A.B., Washington University, 1935; M.D., 1939. (See Department of Radiology.)
- Sol Sherry, A.B., New York University, 1935; M.D., 1939.
- Henry Alfred Schroeder, A.B., Yale University, 1929; M.D., Columbia University, 1933.

associate professors (clinical)

- Samuel C. Bukantz, B.S., New York University, 1930; M.D., 1934.

Professors Emeriti (Clinical)

- Richard S. Weiss (Dermatology), M.D., Washington University, 1909.

Resigned effective August 31, 1955.
2 Head of Department effective September 1, 1955.
3 Promotion to this rank effective July 1, 1955.
Alfred Goldman, A.B., Washington University, 1916; M.D., 1920; M.S., 1922.

Clinton Welsh Lane (Dermatology), A.B., St. Mary's College (Kansas), 1916; M.D., St. Louis University, 1921.

Cyril M. MacBryde, A.B., Washington University, 1926; M.D., Harvard University, 1930.

Edward Massie, A.B., Washington University, 1931; M.D., 1935.

Associate Professors Emeriti (Clinical)

Adolph H. Conrad (Dermatology), M.D., St. Louis University, 1906.

Joseph W. Larimore, A.B., DePauw University, 1908; M.D., Washington University, 1913.

Drew W. Luten, A.B., University of Kentucky, 1901; M.D., Johns Hopkins University, 1911.

William H. Olmsted, B.S., Coe College, 1909; M.D., Johns Hopkins University, 1913.

Llewellyn Sale, M.D., Washington University, 1907.

Assistant Professors

Fred Allison, Jr., B.S., Alabama Polytechnic Institute, 1944; M.D., Vanderbilt University, 1946. (See Department of Preventive Medicine.)

Bernard Bercu, M.D., Washington University, 1944.

Amoz I. Chernoff, B.S., Yale University, 1943; M.D., 1947.

William Hamilton Daughaday, A.B., Harvard University, 1940; M.D., 1943.

Albert B. Eisenstein, A.B., University of Missouri, 1941; M.D., Washington University, 1944. (See Department of Preventive Medicine.)

Herman Erlanger, A.B., University of Wisconsin, 1933; M.D., Washington University, 1937.

Robert Joy Glaser, S.B., Harvard University, 1940; M.D., 1943.

David Tredway Graham, A.B., Princeton University, 1938; M.A., Yale University, 1941; M.D., Washington University, 1943.

Samuel B. Guze, M.D., Washington University, 1945.

William J. Harrington, M.D., Tufts Medical College, 1947.

Virgil Loeb, Jr., M.D., Washington University, 1944.

Morris Moore (Dermatology), S.B., Boston University, 1923; A.M., Harvard University, 1929; Ph.D., Washington University, 1933.

Lillian Recant, A.B., Hunter College, 1941; M.D., Columbia University, 1946. (See Department of Preventive Medicine.)

Adolph Surtshin (Physiology), A.B., Columbia University, 1936; M.D., St. Louis University, 1941. (See Department of Physiology.)

Assistant Professors (Clinical)

Grace E. Bergner, A.B., Washington University, 1939; M.D., 1943.

Leon Bromberg, A.B., Rice Institute, 1920; M.D., Vanderbilt University, 1924.

Eugene P. Weber (Dermatology), M.D., Northwestern University, 1940.

Herbert C. Wiegand, A.B., Washington University, 1940; M.D., 1943.

Harry W. Wiese, B.S., Washington University, 1920; M.D., 1922.

Edward B. Williams, M.D., Meharry Medical College, 1944.

Instructors Emeriti (Clinical)

* Anthony B. Day, B.S., Harvard University, 1913; M.D., Washington University, 1919.

* George Manting (Dermatology), M.D., University of Michigan, 1915.

Assistants

William D. Ashworth, A.B., Brigham Young University, 1950; M.D., Yale University, 1954.

Fred B. Ballard, Jr., B.A., University of Virginia, 1949; M.D., 1953. (On leave of absence.)

John Frederick Bergmann, A.B., Washington University, 1950; M.D., 1954.

John N. Bickers, B.S., University of Georgia, 1951; M.D., 1954.

Donald Cecil Borg, S.B., Harvard University, 1946; M.D., 1950.

Donald L. Bornstein, A.B., Harvard University, 1950; M.D., 1954.

Martin Van Brown (Dermatology), B.Ed., Southern Illinois University, 1925; M.D., University of Illinois, 1930.

Edward F. Buchner, M.D., University of Tennessee, 1954.

Jean M. Burns, R.N., Washington University, 1944; B.S., 1944.

Philip Christiansen, B.S., Baylor University, 1950; M.D., Southwestern Medical School, 1953.

Lawrence Cohen, B.S., Western Reserve University, 1948; M.D., 1954.

Ralph Copp, Jr., A.B., Washington University, 1948; M.D., 1952. (On leave of absence.)

William H. Danforth, A.B., Princeton University, 1947; M.D., Harvard University, 1951.
John D. Davidson, A.B., Washington University, 1948; M.D., 1952.
Gerald A. Diettett, M.D., Washington University, 1954.
William Y. Eubank, M.D., Washington University, 1953.
John R. Gill, A.B., University of Virginia, 1950; M.D., 1954.
Paul W. Gordon, Jr., M.D., University of Virginia, 1953. (On leave of absence.)
Arwin Gorham, B.S., University of Tulsa, 1950; M.D., Washington University, 1954.
Neville Grant, B.A., Yale University, 1950; M.D., Columbia University, 1954.
Alan Hecht, A.B., Sarah Lawrence College, 1949; M.D. Washington University, 1953.
Charles Hogancamp, B.S., Murray State College, 1949; M.D., Washington University, 1953.
James H. Johnson, B.S., University of Richmond, 1950; M.D., University of Virginia, 1954.
Donald R. Kahn, A.B., Birmingham-Southern College, 1950; M.D., Medical College of Alabama, 1954.
Morris Kenton King, A.B., University of Oklahoma, 1947; M.D., Vanderbilt University, 1951.
Richard K. Lansche, B.S., Northwestern University 1950; M.D., Cornell University, 1954.
David M. Lieberman, M.D., Vanderbilt University, 1949.
William McCuen, B.S., Farman University, 1949; M.D., Bowman Gray School of Medicine, 1954.
George T. Mims, Jr., B.S., University of Georgia, 1950; M.D., 1954.
Alton J. Morris, M.D., Louisiana State University, 1951. (On leave of absence.)
Frede Mortensen, B.S., Wagner College, 1949; M.D., New York University, 1953.
Robert F. Owen, A.B., Princeton University, 1948; M.D., Yale University, 1952. (On leave of absence.)
Brent Mershon Parker, M.D., Washington University, 1952.
David Charles Poskanzer, A.B., Harvard University, 1950; M.D., 1954.
Alexander C. Reed, B.A., Bowling Green State University, 1949; M.D., Western Reserve University, 1953.
Eric Reiss, B.S., Randolph-Macon College, 1943; M.D., Medical College of Virginia, 1948.
Harold G. Richman, B.A., University of Minnesota, 1950; B.S., 1951; M.D., 1953.
Frank A. Riddick, Jr., B.A., Vanderbilt University, 1951; M.D., 1954.
William Davis Salmon, Jr., B.S., Alabama Polytechnic Institute, 1946; M.D., Vanderbilt University, 1949.
Sidney L. Saltzstein, B.S., Yale University, 1950; M.D., Johns Hopkins University, 1954.
William D. Sawyer, M.D., Washington University, 1954.
(On leave of absence.)
Charles J. Sherkov, B.S., Marquette University, 1949; M.D., 1952.
Leela Shourie, M.B.; B.S., Lady Hardinge Medical College (India), 1952.
Carl W. Smith, Jr., A.B., University of Oklahoma, 1953; M.D., 1953.
W. Kyle Smith, Jr., B.A., St. Johns College, 1948; M.D., University of Virginia, 1953.
Ross B. Sommer, A.B., Miami University, 1949; M.D., Cornell University, 1949.
James E. Sparks, M.D., Medical College of Alabama, 1949.
Marjorie Tittsworth, R.N.
Alvin S. Wenneker, A.B., Washington University, 1949; M.D., 1953.
Thomas Leo Wright, B.S., Purdue University, 1950; M.D., Washington University, 1953.
Myung-Sook Yun, B.S., Seoul Women's College, 1948; M.D., 1952.

Assistant (Clinical)
Aaron Birenbaum, M.D., Washington University, 1948. Joseph Efron, B.S., University of South Carolina, 1944; M.D., 1948. (On leave of absence.)
Irwin H. Eskeles (Dermatology), B.S., Washington University, 1920; M.D., 1922.
Albert F. Fricke, S.B., University of Chicago, 1939; M.D., 1941.
Jerome Greenhouse (Dermatology), B.S. in Medicine, St. Louis University, 1935; M.D., 1939.
Louis B. Kost (Dermatology), A.B., University of Texas, 1936; M.D., 1940.
Arnold S. Moe, B.S., University of Minnesota, 1938; M.B., 1939; M.D., 1940.
Lamar H. Ochs, A.B., Washington University, 1941; M.D., 1944.
Martin H. Powell, Jr., M.D., University of Oklahoma.
Maurice L. Sievers, B.S., University of South Dakota, 1947; M.D., Washington University, 1949.
Raymond R. Simpson (Dermatology), M.D., Southwestern Medical College, 1947. (On leave of absence.)
James C. Sisk (Dermatology), A.B., Washington University, 1943; M.D., 1946.

Research Assistants
Rita Frieda Bremer, M.D., University of Munich, 1953.
Mary Chapman Johnson, A.B., Washington University, 1938.
Laura E. Mahoney, B.S., Seattle University, 1948.
Edna Marie Menhard, B.S., St. Louis University, 1946.
Esther Mae Parker, A.B., Lindenwood College, 1948; M.S., University of Wisconsin, 1950.
Fellows

William N. Blalock, M.D., Washington University, 1952. (See Department of Radiology.)

Thomas Brittingham (U.S.P.H.S.) (Hematology), M.D., Harvard University, 1950.

Phillip Comens (Hypertension), B.S. in Medicine, University of Missouri, 1949; M.D., Washington University, 1951.

George L. Fischer (National Foundation for Infantile Paralysis), M.D., University of Rochester, 1951. (See Department of Preventive Medicine.)

Robert T. S. Jim (Hematology), B.S., University of Chicago, 1945; M.D., 1948.

Robert B. Katims (U.S.P.H.S.) (Metabolism), M.D., Washington University, 1952. (On leave of absence.)

Oliver A. McKee (Dermatology), L.R.C.P., Royal College of Physicians and Surgeons (Dublin), 1949; S.M., 1949.

Charles Ward Parker (Hypertension), M.D., Washington University, 1953. (On leave of absence.)

Research Fellows

Jack Barrow (Infectious Disease), M.D., Washington University, 1946.

Marvin E. Levin (National Foundation for Infantile Paralysis) (Metabolism), A.B., Washington University, 1947; M.D., 1951.

Kenneth C. Price (St. Louis Heart Association) (Cardiology), M.D., University of Washington, 1951.

Trainees

Elmer B. Brown, Jr. (National Institute of Arthritis and Metabolic Diseases) (Hematology), A.B., Oberlin College, 1946; M.D., Washington University, 1950.

Robert Monroe Roy (National Cancer Institute), B.A., Vanderbilt University, 1949; M.D., 1952.

SECOND YEAR

CONJOINT MEDICINE

The several courses given by the clinical departments during the sophomore year have been placed under the supervision of a Committee on Conjoint Medicine in order that teaching might be co-ordinated effectively. Even though individual courses are listed in the catalogue under departmental headings, representatives of several departments participate in the presentation of material. For instance, clinical diagnosis (see under Medicine) is taught jointly by the Departments of Medicine, Psychiatry and Neurology, Obstetrics and Gynecology, Ophthalmology, Otolaryngology, Pediatrics, and Surgery. The number of hours allotted to each department in the conjoint courses is included in the listing of courses under the respective departmental headings. The following courses are included in this arrangement:

Medicine: Clinical Diagnosis
Applied Pathologic Physiology
Laboratory Methods of Diagnosis

Psychiatry and Neurology: Introductory Course on the Patient-Physician Relationship; Neurological Examination in Clinical Diagnosis

59
Obstetrics and Gynecology: Introduction to Obstetrics
Ophthalmology: Introduction to Ophthalmology
Otolaryngology and Clinical Diagnosis
Pediatrics: Introduction to Pediatrics
Surgery: Introduction to Surgery

William J. Harrington.............................................Committee Chairman

20. **Elementary Medicine.**

(a) **Pathologic Physiology.** Observation and interpretation of the symptoms and signs of disease, with special reference to pathologic physiology. Part of Conjoint Medicine. 36 hours.

(b) **Clinical Diagnosis.** Lectures, demonstrations, and practical exercises in the technique of clinical diagnosis. Part of Conjoint Medicine. 144 hours.

(c) **Laboratory Methods of Diagnosis.** Lectures and laboratory course in microscopic, bacteriological, serological, and chemical methods of diagnosis. Part of Conjoint Medicine. 144 hours.

**Third Year**

30. **General Medicine.** Supervised Study of Patients on the Semi-Private Medical Service of the Barnes Hospital and on the Wards of St. Louis City Hospital. Students are assigned in rotation as clinical clerks to the patients admitted to these services. Teaching exercises include ward rounds, clinics, and afternoon work in the wards and laboratories. Students serve for six weeks on each of the two services. 408 hours.

31. **Clinical Pathological Conference.** 36 hours. (See under Fourth Year—Medicine 42.)

32. **Medical Clinics.** 36 hours. (See under Fourth Year—Medicine 41.)

**Fourth Year**

40. **Medicine.**

(a) **Clinical Clerkship in Hospital Wards.** For six weeks the entire day is spent in the medical wards at Barnes Hospital. Patients are assigned for complete study and are followed throughout their stay in the hospital. Cases are presented by the student before the attending physician at ward rounds on the General Medical Wards three times a week, and on the Neurology Service once a week. Special therapeutic conferences are held three times a week with the Medical Resident. The students also attend weekly Staff Rounds, X-ray conferences, and Clinicopathological conferences. 198 hours.
(b) Clinical Clerkship in Washington University Clinics. Part of Co-ordinated Clerkship in Outpatient Medicine under supervision of Department of Preventive Medicine. Students act as clinic physicians for twelve weeks under the supervision of consultants from the Department of Medicine in the following outpatient clinics:

**General Medical Clinics (Medicine A and B).** Three mornings a week for six weeks and two mornings a week for six weeks. 90 hours.

(Drs. Duden, Goldman, Kenamore, Massie, Brooks, and Staff)

**Dermatology Clinic.** One afternoon a week for six weeks. 18 hours.

(Dr. Lane and Staff)

**Psychosomatic Clinic.** One morning a week for twelve weeks and one afternoon a week for six weeks. 54 hours.

(Drs. Graham, Guze, and Staff)

**41. Medical Clinics.** Cases which have been studied by students working in the wards of the Barnes Hospital are presented before the third- and fourth-year classes to illustrate medical problems of particular interest. One hour a week throughout the year. 36 hours.

(Dr. Moore and Staff)

**42. Clinical Pathological Conferences.** Abstracts of the clinical records of patients upon whom post-mortem examinations have been performed are presented in advance to members of the third- and fourth-year classes and to members of the medical staff. At each conference the diagnosis is discussed in detail by the clinical staff before the anatomical findings are presented by the pathologists. 36 hours.

(Dr. Reinhard and Medical Staff; Dr. Hartroft and Pathology Staff)

**ELECTIVE COURSES**

**50. Student Internship, Private Medical Service, Barnes Hospital.** One senior student. Six or twelve weeks. Student will serve as substitute intern on Private Medical Service.

(Dr. Rouse and Staff)

**51. Student Internship, Ward Medical Service, Barnes Hospital.** One senior student. Six or twelve weeks. Student will serve as substitute intern on Ward Medical Service.

(Dr. Moore and Staff)

**52. Student Internship, Washington University Service of the St. Louis City Hospital.** Two senior students. Six or twelve weeks. Students will serve as interns on the Unit I Medical Service.

(Dr. Bercu and Staff)

**53. Medical Clerkships at Homer Phillips Hospital.** Six students. Morning only for six weeks. Attendance at ward rounds and conferences. Students will be given an opportunity to study selected patients admitted to the medical wards.

(Drs. J. Smith, E. Williams, and Staff)
54. **Psychosomatic Clinic.** Two students. Afternoons, twelve weeks. Participation in diagnosis and treatment of ambulatory patients with psychosomatic disorders. Only students who can arrange for longer elective periods than six weeks (see summer clerkships) will be accepted in the clinic. (Drs. Graham, Guze, and Staff)

55. **Medical Specialty Clinics.** Four students. Afternoons, six weeks. Gastrointestinal (Monday), Allergy (Tuesday), Arthritic or Rheumatic (Wednesday), and Endocrine (Thursday).

(Drs. Brooks, Hampton, Hagemann, Glaser, Scheff, and Daughaday)

Work in other medical specialty clinics, including cardiovascular (cardiac, hypertension, peripheral vascular), chest, endocrine (a.m.), hematology, and liver may be arranged individually with the physician in charge of each clinic.

56. **Diseases of the Chest. Koch Hospital.** Four students. All day for six weeks. Individual training in the clinical examination of patients suffering from thoracic disease. Assignment of selected cases. Discussion and demonstration of therapeutic procedures. Attendance at staff conferences and Clinical Pathological Conferences at Koch Hospital. (Dr. Friedman)

57. **Metabolic Diseases.** Two students. All day for six weeks. Rounds with metabolism consultant on the wards of the Barnes Hospital and attendance at Diabetic and Endocrine Clinics in Washington University Clinics. Training in special diagnostic tests applicable to the study of metabolic and endocrine diseases. (Dr. Daughaday)

58. **Infectious Diseases.** Two students. Six or twelve weeks. Observations of patients with infectious diseases in Barnes Hospital and the ward for contagious diseases at the City Hospital. Intensive study in the library of problems connected with these patients, followed by conferences with instructor. (Dr. Harford)

59. **Hematology.** One or two senior students may be accepted each trimester for special work in the Hematology Laboratory. Time is divided between study of patients with hematologic dyscrasias and training in special diagnostic procedure. (Dr. Harrington)

60. **Cardiology.** Seven students. All day for six weeks. The elective course in cardiovascular disease is offered every six weeks of each trimester. The course includes intensive training in the diagnosis and treatment of cardiovascular disorders, demonstrations in cardiovascular physiology, and instruction in electrocardiographic and roentgenographic diagnosis. The clinical instruction is carried out at the Homer G. Phillips Hospital and is supplemented by conferences and round table discussions. (Dr. J. Smith and Staff)

61. **Rotating Student Internship, St. Luke's Hospital.** One senior student. Six weeks. Students will serve as intern on medical, surgical, or obstetrical service. For medical service, apply to Dr. Paul O. Hagemann.
62. Research. Interested students are encouraged to participate in the clinical and laboratory research programs of the Department of Medicine. Each applicant is asked to arrange his schedule so that he can devote at least twelve consecutive weeks in his senior year to his research elective. Positions available include the following:

- Allergy—Drs. Bukantz and Hampton
- Cardiovascular Disease—Drs. J. Smith and Bercu
- Dermatology—Dr. Lane
- Gastroenterology—Dr. Mendeloff
- Hematology—Drs. Moore, Harrington, Reinhard, and Loeb
- Hypertension—Drs. Schroeder and M. Perry
- Infectious Disease—Drs. Harford and Allison
- Malignant Disease—Drs. Reinhard and Loeb
- Metabolic Disease—Drs. Daughaday, MacBryde, and Recant
- Nutrition—Drs. Shank and Eisenstein
- Psychosomatic Disease—Drs. Graham and Guze
- Rheumatic Disease—Dr. Glaser

Arrangements for these electives are made directly with the faculty member with whom the student wishes to work.
The research activities and the graduate teaching of microbiology are mainly in the areas of (1) intermediary metabolism (biochemistry), (2) genetics, (3) virology, and (4) immunology.

Intermediary metabolism includes studies of cellular nutrition, enzymatic mechanisms of metabolizing these nutrients and the processes whereby cells synthesize their proteins, nucleic acids, enzymes, coenzymes, carbohydrates, and characteristic structures. It is also concerned with the chemical basis for the production of substances peculiar to the microorganisms such as toxins, antibiotics, or pigments. Genetics encompasses efforts to understand the process of cellular reproduction and how the distinctive features of the progeny are derived. The nature of mutations, selection, resistance, and all the newly discovered mechanisms whereby cells are continually transformed and populations changed are included. The ease with which the growth of microorganisms can be regulated and the speed of their reproductive cycles (fifteen
minutes in certain bacteria) make it possible to study the development of populations of many billions of individuals in test tubes during the course of a few hours. Investigations in virology are concerned chiefly with bacterial viruses (bacteriophages) and the behavior of animal viruses in cell cultures. In this area biochemical and genetic questions are of prime importance. These studies blend imperceptibly into cancer research. Immunology is devoted largely to studies of antibody formation by animal tissues or cultures of tissue cells, to studies on the chemical nature of microbial antigens, and to the development of a better understanding of the antigen-antibody reaction.

Professor and Head of the Department

Arthur Kornberg, B.S., College of the City of New York, 1937; M.D., University of Rochester, 1941.

Associate Professor

*Melvin Cohn, B.S., College of the City of New York, 1939; M.S., Columbia University, 1941; Ph.D., New York University, 1949.

Associate Professor Emeritus

Hiromu Tsuchiya (Parasitology), A.B., University of Missouri, 1913; Sc.D., Johns Hopkins University, 1930. (Also holds title of Lecturer.)

Assistant Professors

*Paul Berg (American Cancer Society Scholar), B.S., Pennsylvania State University, 1948; Ph.D., Western Reserve University, 1952.

*Irving Lieberman, B.A., Brooklyn College, 1944; D.V.M., Middlesex Veterinary College, 1945; M.S., University of Kentucky, 1948; Ph.D., University of California, 1952.

Philip Leonard Varney, B.S., Oregon Agricultural College, 1923; M.S., Washington University, 1926; Ph.D., 1933.

Instructor

Robert I. DeMars, B.S., College of the City of New York, 1949; Ph.D., University of Illinois, 1953.

Research Assistants

Kengo Horibata, M.C.E., Hiroshima Technical College (Japan), 1945.

Sylvy R. Kornberg, A.B., University of Rochester, 1938; M.S., 1940.

Georgia Newton, B.S., University of Wisconsin, 1952; M.S., 1954.

Ernest S. Simms.

Fellow

Herbert Wiesmeyer, B.S., University of Illinois, 1954.

* Promotion to this rank effective July 1, 1955.

In addition to instruction of medical students, the department offers graduate training to a limited number of students.

Second Year

20 (531). Microbiology. Lectures and laboratory. This course will present the basic principles relating to the metabolism, growth, and reproduction of microorganisms and to the immune responses of the host to pathogenic microorganisms and their metabolic products. The organization of the course is as follows: pure culture methodology, biochemical mechanisms of nutrition and intermediary metabolism,
physiology of growth, fundamental genetics (with special emphasis on microbial aspects), immunology. In terms of the above concepts, specific groups of pathogenic organisms will then be considered: viruses, rickettsia, bacteria, fungi, protozoa, and certain metazoa. The interaction between host and parasite will be studied by analyzing the biochemical basis for the pathogenicity of the microbe and for the immune reaction of man. The factors which make microorganisms vulnerable or resistant to chemotherapeutic agents will also be examined. 264 hours.
DEPARTMENT OF OBSTETRICS AND GYNECOLOGY

Students are given practical instruction in obstetrics and gynecology in the St. Louis Maternity Hospital, the Barnes Hospital, the Washington University Clinics, and also at the St. Louis City and Homer G. Phillips Hospitals. There are approximately 6,000 confinements annually which are available for the teaching of obstetrics on the ward services of the St. Louis Maternity, the St. Louis City, and the Homer G. Phillips Hospitals. Instruction in the care of ambulatory obstetrical and gynecological patients is carried out in the University Clinics, where about 2,000 new patients are seen and about 25,000 follow-up visits are made annually. Instruction in gynecology is given in the University Clinics and on the wards of the St. Louis Maternity, the Barnes, and the Barnard Hospitals. There are approximately 2,000 admissions annually to the gynecological service, of which about one-fifth have malignant disease.
Professor and Head of the Department
 Willard Myron Allen, B.S., Hobart College, 1926; M.S., University of Rochester, 1929; M.D., 1932; Sc.D. (hon.) Hobart College, 1940.

Professor (Clinical)
 A. Norman Arneson, B.S., Texas Christian University, 1925; M.D., Washington University, 1928. (See Department of Radiology.)

Professor Emeritus (Clinical)
 Grandison D. Royston, M.D., Washington University, 1907.

Associate Professor
 William H. Masters, B.S., Hamilton College, 1938; M.D., University of Rochester, 1943.

Associate Professors (Clinical)
 Robert J. Crossen, A.B., Oberlin College, 1921; M.D., Washington University, 1925.
 John E. Hobbs, A.B., Southwest Missouri State Teachers College, 1923; M.D., Washington University, 1927.
 Frank P. McNalley, B.S., Washington University, 1915; M.D., 1917.
 Melvin A. Rolbee, B.S., Washington University, 1923; M.D., 1925.
 Samuel D. Soule, M.D., Washington University, 1926.

Assistant Professors
 Arthur L. Haskins, A.B., University of Rochester, 1938; M.D., 1943.
 Alfred I. Sherman, M.D., University of Toronto, 1944. (See Department of Radiology.)
 Ralph B. Woolf, B.S., Massachusetts Institute of Technology, 1935; M.D., University of Rochester, 1939.

Assistant Professors (Clinical)
 Kevin Charles Morrin, M.B., B.Ch., National University of Ireland, 1921.

Charles Darrell O’Keefe, A.B., University of Missouri, 1916; M.D., Washington University, 1918.
 Richard S. Paddock, M.D., Washington University, 1921.
 Helman C. Wasserman, A.B., Johns Hopkins University, 1928; M.D., Washington University, 1932.
 Carl Reinhard Wegner, A.B., North Central College, 1922; M.D., University of Nebraska, 1926.
 George J. L. Wulff, Jr., A.B., Washington University, 1929; M.D., 1933.

Assistant Professor Emeritus (Clinical)
 Adolph G. Schlossstein, M.D., St. Louis Medical College, 1894.

Instructors (Clinical)
 Hubert L. Allen, A.B., University of Kansas, 1932; M.D., Tulane University, 1936.
 Bryce H. Bondurant, A.B., Northeast Missouri State Teachers College, 1936; D.O., Kirksville College of Osteopathy and Surgery, 1940; M.D., Washington University, 1943.
 Francis J. Caneva, M.D., Washington University, 1922.
 Myron W. Davis, M.D., Washington University, 1925.
 Arthur T. Esslinger, M.D., Washington University, 1940.
 *Leon Foster, M.D., University of Georgia, 1933.
 Charles R. Gulick, A.B., Central College, 1940; M.D., St. Louis University, 1943.
 William D. Hawk, B.S., Shurtleff College, 1933; M.D., Washington University, 1938.
 Herman Hutto, A.B., University of Alabama, 1932; M.D., Washington University, 1935.

* Promotion to this rank effective July 1, 1955.
Frank B. Long, Jr., M.D., Washington University, 1947.
Paul F. Max, B.S., Washington University, 1932; M.D., 1932.
Milton H. Meyerhardt, A.B., University of Missouri, 1925; M.D., St. Louis University, 1927.
Seymour Monat, A.B., University of Pennsylvania, 1935; M.D., Long Island College of Medicine, 1939.
John B. O’Neill, B.S., St. Louis University, 1925; M.D., 1927.
Leslie E. Patton, B.S., St. Louis University, 1921; M.D., 1924.
James Pennoyer, B.S., Hobart College, 1933; M.D., University of Rochester, 1939.
David Rothman, B.S., Washington University, 1935; M.D., 1935.
William C. Scrivner, B.S., Washington University, 1926; M.D., 1930.
William L. Smiley, B.S., Ohio State University, 1933; M.D., 1937.
Frances Helen Stewart, M.D., Washington University, 1927.
Seth E. Wissner, A.B., Washington University, 1942; M.D., 1945.

Assistant Emeritus (Clinical)
Grover Bernard Liese, A.B., Real-Gymnasium, Cassel, Germany, 1910; M.D., University of Heidelberg (Germany), 1918.

Assistants
John William Ballew, B.S., University of Nebraska, 1949; M.D., Washington University, 1952.
Peter Bartsch, M.D., Johann Wolfgang Goethe University (Germany), 1952.
H. Marvin Camel, M.D., Creighton University, 1950.
Ira Clyde Gall, B.S., University of Cincinnati, 1948; M.D., 1951.

Thomas S. Gilpatrick, A.B., Harvard University, 1948; M.D., University of Washington, 1953.
Hanna Klaus, A.B., University of Louisville, 1948; M.D., 1950.
Justin F. Kraner, M.D., University of Michigan, 1949.

Laurence E. Maze, M.D., Washington University, 1948.
Pedro Mejia, M.D., National University of Mexico City, 1948.
Richard Munford, A.B., University of Rochester, 1947; M.D., Yale University, 1951.
Gerald Newport, A.B., Washington University, 1948; M.D., 1953.
Marion L. Stahl, M.D., University of Tennessee, 1948.
Robert L. Sullivan, M.D., Yale University, 1952.
Julia Tsuei, M.D., National Shanghai Medical School, 1952.
Robert W. Wintemute, B.A., University of Saskatchewan, 1948; M.D., University of Alberta, 1952.

Assistants (Clinical)
Alfred F. Sudholt, A.B., University of Missouri, 1940; B.S., 1942; M.D., Washington University, 1943.
Alva C. Trueblood, Jr., A.B., Washington University, 1940; M.D., 1943.
Mitchell Yanow, M.D., Washington University, 1941.
Research Assistant
Samuel J. Hayward.

Fellows
John J. Carroll, A.B., Miami University, 1943; M.D., Loyola University, 1946.
Francis J. Riley, M.D., Harvard University, 1949.

SECOND YEAR

20. Introduction to Obstetrics. Instruction is given to small groups of students in the University Clinics. (Part of Conjoint Medicine. See page 59.) (Dr. Woolf and Staff)

THIRD YEAR

30. Obstetrical and Gynecological Pathology. One session of three hours each is used for lectures and study of representative slides (in sections of one-third of the class). 36 hours. (Dr. Hobbs and Staff)

31. Clinical Clerkship. Students spend six weeks on the obstetrical and gynecological wards of the St. Louis Maternity, Barnes, and Barnard Hospitals, where they become an integral part of the organization studying cases in detail and assisting at operations and deliveries. During this period they are also given instruction in abdominal palpation, pelvic examination, and measurement of the pelvis. Numerous informal lectures are given by various members of the attending staff.

FOURTH YEAR

40. Clinics and Lectures. Entire class each second week throughout the year. 18 hours. (Dr. Allen and Staff)

41. Co-ordinated Outpatient Clerkship. During this period of twelve weeks students divide their time between various outpatient departments. New obstetrical and gynecological patients in the clinics are examined by the students and the diagnosis and treatment discussed by members of the attending staff.

42. Obstetrical Service. One-twelfth of the class spends three weeks on obstetrical call. Some students work at the St. Louis Maternity Hospital and others at the St. Louis City and Homer G. Phillips Hospitals. During this period normal multiparous patients are delivered by the students under the supervision of the house staff.

43. Tumor Service. Instruction in the diagnosis and treatment of neoplastic disease is given three hours once weekly in the tumor clinic for a period of six weeks. Informal lectures covering the use of X-ray, radium, and radio isotopes are given. (Dr. Sherman and Staff)
ELECTIVE COURSES

50. *Gynecological Pathology.* Two students at a time may serve as assistants in the laboratory. Six weeks, full time, all trimesters. 

(Dr. Hobbs)

51. *University Clinics.* Three students at a time may serve as clinical clerks, all day for six weeks.

52. *Obstetrical Services.* One or two students may serve as clinical clerks, living in the hospital for six weeks.

53. *Maternal Health.* All students are urged to attend the Planned Parenthood Clinic, where practical instruction is given in the practical aspects of family planning. This course is given in the evening at the local offices of the Planned Parenthood Association.
DEPARTMENT OF OPHTHALMOLOGY

The instruction in the Department of Ophthalmology begins in the second year with a single three-hour session on the examination of the eye. Emphasis is placed on the use of the ophthalmoscope.

During the junior year a series of twelve didactic lectures are given as an introduction to various aspects of ophthalmology.

During the fourth year, students are assigned to the Eye Clinic once a week for six weeks. This affords opportunity for work with patients under supervision.

Professor and Head of the Department
Bernard Becker, A.B., Princeton University, 1941; M.D., Harvard University, 1944.

Professors Emeriti
Lawrence Tyler Post, A.B., Yale University, 1909; M.D., Johns Hopkins University, 1913.

Martin Hayward Post, A.B., Amherst College, 1908; M.D., Johns Hopkins University, 1912.

William Ewing Shahan, A.B., Washington University, 1901; M.D., 1904; A.M., 1912.

Meyer Wiener, M.D., Missouri Medical College, 1896.
Associate Professors (Clinical)

Howard Rommel Hildreth, M.D., Washington University, 1928.
William Mahlon James, B.S., Drury College, 1923; M.D., Washington University, 1926.
Theodore Eugene Sanders, B.S., University of Nebraska, 1931; M.D., 1933.

Associate Professors Emeriti

Bennett Young Alvis, B.S., St. Louis University, 1916; M.D., 1918.
Frederick Oscar Schwartz, M.D., Washington University, 1910.
Frederick Eno Woodruff, M.D., Missouri Medical College, 1897; A.B., Washington University, 1923.

Assistant Professors (Clinical)

Edmund B. Alvis, M.D., Washington University, 1934.
Carl Conrad Beisbarth, B.S., Washington University, 1922; M.D., St. Louis University, 1926.
Adolph Charles Lange, B.S., Washington University, 1928; M.D., 1930.
Paul W. Miles, A.B., University of Kansas, 1935; M.D., 1938.
Harry David Rosenbaum, M.D., Washington University, 1934.

Instructors

Paul A. Cibis, M.D., University of Berlin, 1936; M.D., University of Heidelberg, 1944.
Marguerite A. Constant (Biochemistry), B.S., George Washington University, 1947; Ph.D., University of Wisconsin, 1951.

Instructor Emeritus

Jay S. Crawford, A.B., Millisitown Academy, 1902; B.S., Spring Garden Institute, 1905; M.D., Temple Medical College, 1906.

Instructors (Clinical)

Daniel Bisno, B.A., University of Wisconsin, 1927; M.D., Johns Hopkins University, 1931.
James Howard Bryan, A.B., Washington University, 1932; M.D., 1936.
Ruth Schreiber Freedman, A.B., Washington University, 1938; M.D., 1942.
David Merrill Freeman, A.B., University of Missouri, 1940; B.S. in Medicine, 1941; M.D., Washington University, 1943.
S. Albert Hansen, B.S., St. Louis University, 1933; M.D., 1937.
William Harry Middleton, A.B., Oberlin College, 1940; M.D., Washington University, 1943.
Benjamin Milder, M.D., Washington University, 1939.
Lawrence T. Post, Jr., M.D., Washington University, 1948.
Philip T. Shahan, A.B., Harvard University, 1938; M.D., Washington University, 1942.

Assistants

Charles R. Barnes, B.A., Pomona College, 1948; M.D., C.M., McGill University, 1953.
Robert E. Christensen, A.B., Stanford University, 1949; M.D., University of Southern California, 1954.
George Richard Keskey, M.D., University of Michigan, 1952.
Albert P. Ley, B.S., Antioch College, 1940; M.D., Harvard University, 1943.
James E. Miller, B.S., Tulane University, 1946; M.D., Medical College of Alabama, 1949.
William A. Moor, A.B., Washington University, 1935.
Jacques Noisette, B.A., University of Montreal, 1944; M.D., 1950.
William A. Pettit, Jr., A.B., University of Southern California, 1945; M.D., University of Pennsylvania, 1949.
Bill George Prater, M.D., Washington University, 1951.
Second Year

20. Ophthalmology. Lectures and demonstrations are given as a part of the course in Conjoint Medicine. (See page 59.) 3 hours.

(Drs. Becker, L. T. Post, Jr., James, and Resident Staff)

Third Year

30. Ophthalmology. Twelve didactic lectures are given in each trimester to one-third of the class.

(Drs. Becker, Freeman, L. T. Post, Jr., James, Sanders and Resident Staff)

Fourth Year

40. Clinical Ophthalmology. Practical instruction in diagnosis and treatment of eye diseases is given to small sections of the class. Three hours a week for six weeks. 18 hours.

(Drs. Becker, Bryan, Hildreth, Lange, Meinberg, Rosenbaum, Schwartz, and Resident Staff)
Dr. Theodore E. Walsh, Professor of Otolaryngology, reviews a student's dissection of the inner ear.

DEPARTMENT OF OTOLARYNOLOGY

Otolaryngology is presented to the students during the sophomore, junior and senior years. In the sophomore year the importance of careful examination of the ear, nose, and throat is emphasized, and the students are taught the use of instruments peculiar to the specialty. In the junior year lectures are given which are intended to supplement the information obtainable in textbooks. In the senior year the student examines patients in the outpatient clinics. Those students who have a particular interest in the specialty are accepted for an elective period during their senior year.

Professor and Head of Department

Professors
Hallowell Davis (Research), A.B., Harvard University, 1918; M.D., 1922. (See Department of Physiology.)
Sol Richard Silverman (Audiology), A.B., Cornell University, 1933; M.S., Washington University, 1938; Ph.D., 1942.

Professor (Clinical)
James B. Costen, A.B., University of Arkansas, 1917; M.D., Washington University, 1922.

Professor Emeritus (Clinical)

Associate Professors
Walter Page Covell, B.S., Oregon State College, 1921; M.S., 1923; Ph.D., University of Minnesota, 1926; M.D., University of Chicago, 1933. (See Department of Anatomy.)
Joseph H. Ogura, A.B., University of California, 1937; M.D., 1941.

Associate Professors (Clinical)
French K. Hansel, M.D., St. Louis University, 1918; M.S., University of Minnesota, 1923.

Associate Professors Emeriti (Clinical)
Arthur M. Alden, A.B., University of Oklahoma, 1907; A.M., 1909; M.D., St. Louis University, 1915.
Issac Dee Kelley, Jr., B.A., St. Louis University, 1903; M.D., 1908.

Assistant Professors (Clinical)
William T. K. Bryan, A.B., Washington University, 1929; M.D., 1933.
Alfred J. Cone, B.S., State University of Iowa, 1921; M.D., 1923; M.S., 1927.
Lee W. Dean, Jr., B.S., Yale University, 1930; M.D., Washington University, 1933.
Harry N. Glick, A.B., Cornell University, 1916; M.D., St. Louis University, 1922.
Edward H. Lyman, B.S., Washington University, 1937; M.D., 1937.
Robert E. Votaw, B.S., State University of Iowa, 1927; M.D., 1929.

Research Associates
Ira J. Hirsch (Audiology), A.B., New York State College for Teachers (Albany), 1942; M.A., Northwestern University, 1943; M.A., Harvard University, 1947; Ph.D., 1948.
Catherine A. Smith, A.B., Washington University, 1935; M.S., 1948; Ph.D., 1951.

Instructor
Allan Goodman (Audiology), A.B., Brooklyn College, 1941; M.S., University of Michigan, 1949; Ph.D., 1952.

Instructors (Clinical)
Harold M. Cutler, A.B., University of Maine, 1930; M.D., Tufts College, 1937.
Morris Davidson, B.S., Indiana University, 1936; M.D., 1938.
Guerdan Hardy, M.D., Washington University, 1929.
Daniel D. Klaff, B.S., University of Virginia, 1933; M.D., 1936.
Allen B. Potter, A.B., William Jewell College, 1916; M.D., St. Louis University, 1924.
Herbert M. Smit, M.D., St. Louis University, 1933.
A. Chesterfield Stutsman, B.S., Roanoke College, 1927; M.D., University of Virginia, 1931.
Joseph Warren West, M.D., Duke University, 1944.
Doris Surles Woolsey, B.S., Duke University, 1938; M.D., 1939.

Assistants
Che Jen Chen, M.D., National Taiwan University (Formosa), 1951.
Alfred Dietrich, M.D., University of Frankfurt (Germany), 1951.
Fernando Otte Fuente, M.D., University of Chile, 1950. (Also Kellogg Foundation Fellow.)
Alfred Hamilton, M.D., Southwestern Medical College, 1944.
Aguinaldo de Araijo Jurema, M.D., Faculdade de Medicina do Recife (Brazil), 1952.
Ralph Kustoff, B.S., University of Tennessee, 1948; M.D., 1950.
Tsang Li, B.S., National Defense Medical School (Shanghai, China), 1942; M.D., 1947.
Elsey L. Milner, M.D., University of Arkansas 1948.
Gerald L. Smith, A.B., Colgate University, 1947; M.D., Washington University, 1951.
Naci Yildizalp, M.D., University of Istanbul (Turkey), 1949.

Assistants (Clinical)
Benard Adler, B.S., Washington University, 1937; M.D., 1937.

SECOND YEAR

20. Otolaryngology and Physical Diagnosis. The class is divided into small groups with individual instructors for a total of six hours for instruction in the methods of otolaryngological diagnosis and the use of instruments peculiar to this field. (Part of Conjoint Medicine. See page 59.)

THIRD YEAR

30. Otolaryngology. Twelve lectures are given in each trimester to one-third of the class. (Drs. Walsh and Ogura)

FOURTH YEAR

40. Otolaryngology. Practical instruction in diagnosis and treatment is given to small sections of the class. Three hours a week for 6 weeks. 18 hours. (Drs. Votaw, Lyman, Woolsey)

ELECTIVE COURSE

50. Clerkship in Otolaryngology. Two students may serve as externs in the clinics for six weeks. Permission of the Head of the Department is necessary before registration for this elective. Full time. (Dr. Walsh and Staff)
Pathology for medical students is given during the second, third, and fourth years. In the second year the course covers General and Special Pathology, and in the third and fourth years the students attend the Clinical and Pathological Conferences conducted in collaboration with the Clinical Departments.

Properly qualified students may register in the School of Medicine or Graduate School of Arts and Sciences for any of the courses. Pathology 501 is a prerequisite for all other courses.

The staff in pathology of several hospitals in and about St. Louis are members of the faculty of the department: Ellis Fischel State Cancer Hospital (Dr. Johnson), Missouri Baptist Hospital (Dr. W. Platt), DePaul Hospital (Dr. J. Bauer), St. Louis City Hospital (Drs. Saxton, M. Silberberg, R. Silberberg, and L. Yuan), Homer G. Phillips Hospital (Dr. Blache), and Jewish Hospital (Dr. Handler). Material from these hospitals is available for teaching and research.
For the purpose of both teaching and research, the Department of Pathology is
divided into specialties under the following directors:

Cardiovascular Pathology...............................................................Dr. Thomas
Clinical Pathology........................................................................Dr. V. Loeb, Jr.
Dentistry.........................................................................................Dr. Burstone (on leave of absence)
Gerontology....................................................................................Dr. Saxton
Infectious Diseases........................................................................Dr. M. G. Smith
Medicolegal Pathology.................................................................Dr. O'Neal
Metabolic Diseases.........................................................................Dr. Hartroft
Neuropathology............................................................................Dr. David Smith
Surgical Pathology.........................................................................Dr. Ackerman

Edward Mallinckrodt Professor and
Head of Department
Walter Stanley Hartroft, B.Sc. in Medicine,
University of Alberta, 1941; M.D., 1941;
Ph.D., University of Toronto, 1950.

Professor
Lauren V. Ackerman, A.B., Hamilton Col-
lege, 1927; M.D., University of Rochester,
1932. (See Department of Surgery.)

Professor Emeritus
Leo Loeb, M.D., University of Zurich, 1896;

Associate Professors
David English Smith, A.B., Central College,
1941; M.D., Washington University, 1944.
Margaret Gladys Smith, A.B., Mount Holy-
oke College, 1918; M.D., Johns Hopkins
University, 1922.

Assistant Professors
John Albion Saxton, Jr., A.B., Yale Univer-
sity, 1929; M.D., Washington University, 1934.
Martin Silberberg, M.D., University of Bres-
lau, 1920.
Ruth Silberberg, M.D., University of Bres-
lau, 1931.

* Wilbur A. Thomas, B.A., University of
Mississippi, 1941; M.D., University of Ten-
nessee, 1946.

Lecturer Emeritus
Thomas B. Pote, D.V.S., McGill University,
1892; M.D., Washington University, 1902.

Instructors
John D. Bauer, B.Sc., University of Inns-
bruck (Austria), 1938; L.R.C.P. & S., Univer-
sity of Glasgow (Scotland), 1944; M.D., Mar-
quetter University, 1947.
Julian Blache, M.D.
Fred P. Handler, M.D., Washington Univer-
sity, 1947.
Richard E. Johnson, A.R., Lafayette College,
1935; M.D., Johns Hopkins University, 1939.
Teoöl Kheim, M.D., University of Budapest
(Hungary), 1933. (Also Gerontology.)
Robert M. O'Neal, B.S., University of Miss-
sissippi, 1943; M.D., University of Tennessee,
1945.
William R. Platt, B.S., University of Mary-
land, 1936; M.D., 1940.
Harlan J. Spjut, B.A., University of Utah,
1943; M.D., 1946. (See Department of Sur-
gery.)
Richard Lee Swarm, A.B., Washington Univer-
sity, 1949; B.S., 1950; M.D., 1950. (On
leave of absence.)

* Promotion to this rank effective July 1,
1955.
PATHOLOGY

Louis S. K. Yuan, M.D., Aurora University (China), 1938.

Assistants
Carvelle Balecock, B.S., University of Chicago, 1948; M.D., 1953.
Walter Carl Bauer, B.Sc., Ohio State University, 1946; M.D., Washington University, 1954.
Ernest L. Frank, M.D., Friedrich-Alexander University, 1942.
Emily M. Gray, B.S., Beloit College, 1935; M.D., University of Wisconsin, 1950.
John Dudley Keye, Jr., M.D., Duke University, 1950.
William R. Murphy, Ph.B., University of Chicago, 1945; M.D., University of Arkansas, 1951.

Ursula Schafford, B.S., Howard University, 1942; M.D., 1945.
Gordon Shaw, A.B., Washington University, 1945; M.A., University of Toronto, 1949; M.D., 1953.

Research Assistants
Phyllis Merritt Hartroft, B.S., University of Michigan, 1949; M.A., University of Toronto, 1951; Ph.D., 1954.

Fellow
Kyu Taik Lee (China Medical Board), M.D., Severance Union Medical School (Korea), 1943.

SECOND YEAR
20 (501). Pathology. General and special pathology are covered by lectures, gross and microscopic demonstrations, and laboratory work. In general pathology, degenerations, inflammations, infectious diseases, and tumors are considered. The diseases of each organ system are studied during the time devoted to special pathology. Small groups are given instruction in post-mortem technique, and in gross pathology. 336 hours. (Drs. Hartroft, M. G. Smith, D. Smith, Thomas, O’Neal, Harkin, and Staff)

THIRD AND FOURTH YEARS
30 and 40. Clinical and Pathological Conference.
The clinical history and treatment of patients who have died are discussed before the class by the physicians and surgeons of the departments concerned. These conferences afford the students an opportunity to interpret the clinical observations in the light of the post-mortem findings. One hour a week during the third and fourth years. (Drs. Hartroft, David Smith and Margaret Smith)

ELECTIVE COURSES
50 (502). Major Research. The laboratory offers facilities for research in pathology. Specialists and students with adequate training who desire to extend their knowledge of pathology will be admitted. (Drs. W. S. Hartroft, Margaret Smith, D. Smith, P. M. Hartroft, and Thomas)
51 (595). *Journal Club.* The current journals concerned with morphological and experimental pathology and oncology are reviewed by the members of the staff. Properly prepared students may attend or participate.

52 (596). *Seminar in Gross Pathology.* The autopsies for the affiliated hospitals are performed by the junior members of the staff. The entire Department meets, and the cases are evaluated by the senior staff at this conference. Two hours once a week throughout the year.  
(Drs. Hartroft, D. Smith, and M. Smith)

53 (597). *Seminar in Microscopic Pathology.* The microscopic sections from each autopsy are presented by the prosector at a conference. 
(Drs. Hartroft, D. Smith, and M. Smith)

53 (598). *Elective Course in Experimental Pathology.* Conducted during the third trimester one afternoon a week. General Pathology portion of 501 is the prerequisite. The course consists of the production of experimental lesions in small animals, using a variety of techniques. Only a limited number of students can be accepted. 
(Drs. W. S. Hartroft, Thomas, P. M. Hartroft, and Staff)

54. *Clerkship in Pathology at Washington University.* Students may serve as clerks in the Department of Pathology. The students will assist at autopsies and prepare reports for presentation at a seminar once a week. Six half-days a week, or full-time throughout the year. 
(Drs. Hartroft, D. Smith, and M. Smith)

55. *Research.* Those students who during a preceding summer or school year have initiated a research problem in Pathology may continue the work during the elective trimester of the fourth year. Full time for six weeks. All trimesters. 
(Drs. W. S. Hartroft, D. Smith, M. Smith, P. M. Hartroft, and Staff)

The Department offers facilities for fulfilling requirements for the degree of Ph.D. in Pathology.
Students, house officers and an attending physician examine an infant during rounds on the contagious ward at the St. Louis Children's Hospital as a part of the pediatric clerkship.

THE EDWARD MALLINCKRODT DEPARTMENT OF PEDIATRICS

In its undergraduate teaching program, the primary aim of the Department of Pediatrics is to enable the graduate to practice a good brand of pediatrics as a general practitioner. The training of the pediatric specialist is through the residency program at the St. Louis Children's Hospital. It is also expected that as a result of the combined undergraduate and postgraduate programs, a liberal number of top-ranking students will be encouraged to embark upon an academic pediatric career.

The major clinical facilities are in the St. Louis Children's Hospital and the St. Louis Maternity Hospital. The former has a bed capacity of 196, and accepts all types of problems in children under 15 years of age, averaging about 5,000 yearly admissions. The pediatric outpatient department is conducted in the hospital and averages about 50,000 yearly visits. In the St. Louis Maternity Hospital the yearly number of newborn infants averages more than 4,000.
Professor and Head of Department
Alexis F. Hartmann, B.S., Washington University, 1919; M.S., 1921; M.D., 1921.

Professors Emeriti
Jean V. Cooke, A.B., West Virginia University, 1903; A.B., Yale University, 1904; M.D., Johns Hopkins University, 1908. (Also holds title of Lecturer.)
Borden Smith Veeder, M.D., University of Pennsylvania, 1907; Sc.D., Colgate University, 1929.

Associate Professors
David Goldring, A.B., Washington University, 1936; M.D., 1940.
William Klingberg, A.B., University of Wichita, 1938; M.D., Washington University, 1943.

Associate Professor Emeritus (Clinical)
Adrien S. Bleyer, M.D., Missouri Medical College, 1899.

Assistant Professors
M. Remsen Behrer, A.B., Williams College, 1942; M.D., Long Island College of Medicine, 1945.
John C. Herweg, B.S., Drury College, 1943; M.D., Washington University, 1945.

**Research Assistant**

**Fellows**

Amilcar Aponte (Visiting), A.B., Barcelona University, 1937; M.D., University of Venezuela, 1943.

Frances K. Graham (Research), B.A., Pennsylvania State University, 1938; Ph.D., Yale University, 1942. (See Department of Neuropsychiatry.)

Ruth Matarazzo, A.B., Brown University, 1948; M.A., Washington University, 1952; Ph.D., 1955 (January). (See Department of Neuropsychiatry.)

Chongcharoensuk Soodsarkorn (Visiting), M.D., University of Medical Science (Bangkok), 1948.

Pauline A. Swarm (Research), A.B., Baylor University, 1947; M.D., Washington University, 1951. (On leave of absence.)

Helen Knott Thornton (Research in Bacteriology), B.S., University of Washington, 1939; M.S., 1939; Ph.D., Ohio State University, 1944.
SECOND YEAR

20. In the course on Applied Pathologic Physiology the student is introduced to pediatrics and the full-time staff through the medium of eleven lectures designed to acquaint him with the nature of human growth and development, and the relationship of age to reaction to injury and disease. In the course on Conjoint Medicine the student is taken to the wards and given instruction in physical diagnosis. (See page 59.)

(Entire full-time Staff)

THIRD YEAR

30. Twelve lectures on nutritional requirements, infant feeding, and contagious diseases are given to the entire class. One-sixth of the class works as clinical clerks for six weeks. This work consists of the following: (1) Assignment to intern or resident with joint responsibility of caring for inpatients; (2) Daily ward rounds and bedside conferences with house staff and their full-time supervisor; (3) Twice weekly bedside conferences with members of the visiting staff; (4) Weekly clinical-pathological conference; (5) Weekly clinical conference primarily designed for fourth-year students; (6) Weekly Saturday morning sessions in the Metabolic Clinic; (7) Special demonstrations in common nursing procedures, which include the preparation of artificial formulae.

(Entire full-time Staff)

FOURTH YEAR

40. One-twelfth of the class works for one week in the St. Louis Maternity Hospital with newborn infants, and for two weeks in the pediatric outpatient department.

(Entire Staff)

41. The entire fourth-year class attends weekly amphitheatre demonstrations and discussions of selected cases from the Hospital.

(Entire full-time Staff)

ELECTIVE COURSE

50. Six weeks of elective time may be spent according to the individual desires of the student—as intern substitute, in the research laboratory, or by combining clinical and laboratory work.
Dr. Oliver H. Lowry, Professor of Pharmacology, observes two students as they carry out an experiment as part of their research project in the Pharmacology course in the second year.

THE EDWARD MALLINCKRODT DEPARTMENT OF PHARMACOLOGY

The number of useful drugs is steadily increasing. As new and better drugs are introduced, some of the older ones are discarded. It is therefore the purpose of the pharmacology course, through discussions of existing drugs, to develop general principles which will be applicable as well to drugs of the future.

Pharmacology draws heavily on biochemistry, physiology, and bacteriology for an understanding of drug action. It looks toward pathology, medicine, and surgery for its uses. For this reason the course is constructed as a part of the continuum of medicine rather than a separate discipline.

Many drugs are harmful in excessive amounts; toxicology is therefore included in the course as a logical part of pharmacology.

The laboratory portion of the course is divided roughly in half. The first part consists of selected animal experiments designed to illustrate and give reality to the action
of drugs. The second part is comprised of a small research project for each group of four students. The problems are of student choice and frequently require the use of special equipment in the research laboratories of the department. The results are reported at a final meeting of the class.

Professor and Head of the Department
Oliver Howe Lowry, B.S., Northwestern University, 1932; Ph.D., University of Chicago, 1937; M.D., 1937.

Professor
Helen Tredway Graham, B.A., Bryn Mawr College, 1911; M.A., 1912; Ph.D., University of Chicago, 1915.

Associate Professors
Robert F. Furchgott, B.S., University of North Carolina, 1937; Ph.D., Northwestern University, 1940.
Francis Edmund Hunter, B.S., Mount Union College, 1938; Ph.D., University of Rochester, 1941.

Assistant Professors
Morris Enton Friedkin, B.S., Iowa State College, 1940; M.S., 1941; Ph.D., University of Chicago, 1948.
Jack Strominger (Markle Scholar), A.B., Harvard University, 1946; M.D., Yale University, 1948.

Research Associates
Helen B. Burch, B.S., Texas State College for Women, 1926; M.S., Iowa State College, 1928; Ph.D., 1935.

SECOND YEAR
20. (501 and 502). Pharmacology. (a) Lectures, conferences, panel discussions. 70 hours.
(b) Laboratory Course. 146 hours.

Elective Course
51. (590) Research. The facilities of the laboratory are available to those who wish to carry on original investigation on problems of their own or on those the department is prepared to suggest.

Esther Goossen Brice, B.S., University of Manitoba, 1942; Ph.D., University of California, 1954.

Research Assistants
Elizabeth Jane Crawford, B.S., Cornell University, 1943.
Buford Dewayne Roberts, B.S., Oklahoma Agricultural and Mechanical College, 1950.

Fellows
Aurele Beaulnes, B.A., University of Montreal, 1947; M.D., 1953.
John M. Kissane (National Foundation for Infantile Paralysis), A.B., University of Rochester, 1948; M.D., Washington University, 1952. (See Department of Neuropsychiatry.)
Marilyn W. McCaman (Life Insurance Medical Research Fund), A.B., Grinnell College, 1950.
David B. McDougal, Jr. (National Foundation for Infantile Paralysis), A.B., Princeton University, 1945; M.D., University of Chicago, 1947.
First year students making observations during one of the laboratory sessions in physiology.

DEPARTMENT OF PHYSIOLOGY

The department occupies one and a half floors of the South Building and one-half floor of the Cancer Research Building. The student laboratories are shared with the Department of Pharmacology, whose student laboratory work is done in the first trimester of the second year. Students work in groups of two at individual tables, except for special experiments where groups of two or four are assigned. The principal research interests of the department at present are the peripheral and central nervous systems, circulation, smooth and striated muscle, respiration, and the kidney.

Professor and Head of Department
Harvey Lester White, B.S., Washington University, 1918; M.D., 1920.

Professor
Hallowell Davis, A.B., Harvard University, 1918; M.D., 1922; Sc.D. (hon.), Colby College, 1954. (See Department of Otolaryngology.)
Professor Emeritus

Joseph Erlanger, B.S., University of California, 1895; M.D., Johns Hopkins University, 1899; LL.D., University of California, 1932; Sc.D., University of Wisconsin, 1936; Sc.D., University of Pennsylvania, 1936; Sc.D., University of Michigan, 1937; Sc.D., Washington University, 1945; LL.D., Johns Hopkins University, 1947; Doctor (hon.), Free University of Brussels, 1949.

Associate Professors

Arthur S. Gilson, Jr., B.S., Dartmouth College, 1919; A.M., Harvard University, 1922; Ph.D., 1924.
Albert Roos, M.D., University of Groningen (Netherlands), 1940. (See Department of Surgery.)
Gordon Marcus Schoepfle, A.B., DePauw University, 1937; A.M., Princeton University, 1939; Ph.D., 1941.
William Sleator, Jr. (Biophysics), A.B., University of Michigan, 1938; M.S., 1939; Ph.D., 1946.

Assistant Professor

Adolph Surtshin, A.B., Columbia University, 1936; M.D., St. Louis University, 1941. (See Department of Medicine and Division of Gerontology.)

Instructor

Stanley Lang, Ph.B., University of Chicago, 1946; S.B., 1948; S.M., 1949; Ph.D., 1952.

Research Assistants

Doris Rolf, A.B., Harris Teachers College, 1936.
Shizuo Watanabe, M.S., Hokkaido University (Japan), 1944; Ph.D., 1953.

Fellow

Werner P. Schmandt, M.D., University of Muenster (Germany), 1952.

* Promotion to this rank effective July 1, 1955.

FIRST YEAR

The lectures cover systematically the field of human physiology. The laboratory experiments are selected with the twofold objective of (a) supplying a basis for the understanding of the more important physical methods employed in physiology and in clinical medicine, and (b) elucidating certain fundamental physiological principles essential to the intelligent practice of medicine as well as to the further pursuit of physiology. The student serves as the subject in many of the experiments. The course is designed primarily to meet the needs of medical students.

Two types of conferences are held. In the class conferences selected students present their experimental results to the entire class, followed by discussion from the floor. Instructors aid in guiding the discussions so that principles as well as findings may be considered. In the group conferences small groups of students meet with individual instructors to consider individual experiments and their principles in more detail. An incidental result is that the instructors become better acquainted with the capabilities of the student, but the primary objective is to instruct.

Open to students who have completed or have begun the study of anatomy and biological chemistry.
10 (502). Lectures in second and third trimesters of first year. 114 hours.

11 (503). Laboratory and conferences. Third trimester of first year. Laboratory 152 hours, conferences 40 hours.

(Drs. White, Gilson, Schoepfe, Roos, Sleator, Surtshin, Lang)

ELECTIVE

50 (590). Research. The facilities of the laboratory are offered to qualified students for the investigation of their own problems or of those which the department is prepared to suggest. The most appropriate time for student research is the summer months or free time in the senior year.
DEPARTMENT OF PREVENTIVE MEDICINE AND PUBLIC HEALTH

Instruction in preventive medicine and public health is given in the first, second, and fourth years of the undergraduate medical curriculum. In the first trimester of the first year the staff of the Student Health Service, which is a part of the department organization, presents a course in health and health management applied most specifically to health problems peculiar to the medical student and physician. Throughout the four years the Health Service attempts to teach by precept as students appear for health counsel or treatment of illness. Later in the first year, a course in statistical methods in medicine is given and is introductory to the later use of statistical procedures in courses of other departments. The principles of epidemiology and the concepts of the natural history of disease are presented in a second-year course. From these are deduced the opportunities for individual and community action in the prevention and control of disease. The teaching of the department in the fourth year is included in the Co-ordinated Outpatient Clerkship. At this time emphasis is placed upon the
opportunities for health promotion and disease prevention in the contacts of physician with patients in office practice. In addition, as suitable opportunities present, the student visits certain patients at home and contacts community agencies for assistance for the patient and family.

**Professor and Head of the Department**

Robert Ely Shank, A.B., Westminster College, 1935; M.D., Washington University, 1939. (See Department of Medicine.)

**Associate Professor**

*Albert I. Mendeloff, B.S., Princeton University, 1938; M.D., Harvard University, 1942; M.P.H., 1944. (See Department of Medicine.)

**Assistant Professors**

♦ Fred Allison, Jr., B.S., Alabama Polytechnic Institute, 1944; M.D., Vanderbilt University, 1946. (See Department of Medicine.)

Herbert R. Domke (Public Health), B.S., University of Chicago, 1939; M.D., 1942; M.P.H., Harvard University, 1948.

Albert Eisenstein, A.B., University of Missouri, 1941; M.D., Washington University, 1944. (See Department of Medicine.)

Lillian Recant, A.B., Hunter College, 1941; M.D., Columbia University, 1946. (See Department of Medicine.)

*Promotion to this rank effective July 1, 1955.

**Research Associate**

Alfred G. Etter (Nutrition), A.B., Washington University, 1941; Ph.D., 1950.

**Instructors**

Janet Chandler (Social and Environmental Studies), B.A., University of Michigan, 1932; M.S.W., Washington University, 1950.

M. Frances Watson (Social and Environmental Studies), B.S., Northeast Missouri State Teachers College, 1932; M.S.W., Washington University, 1949.

** Assistants**

Chuan-huan Wu Cheng (Research in Nutrition), B.S., National Central University (China), 1944; M.S., Cornell University, 1950.

Mary B. Koch (Research), A.B., Miami University, 1936.

**Lecturer**

Barbara Hixon (Statistics), B.S., University of Illinois, 1941.

**Fellow**

George Fischer (National Foundation for Infantile Paralysis), M.D., University of Rochester, 1951. (See Department of Medicine.)
FIRST YEAR

10. Health and Health Maintenance. The purpose of this course of twelve lectures is to introduce considerations of health and health planning, relating these particularly to the medical student and physician in practice. The environment and conditions in which the student is to spend the next four years are considered in detail. How the student may plan to adapt his habits of living, work, and recreation so that a state of health may be most readily assured and disease prevented is discussed. In addition students are introduced to the services available through the Health Service. First trimester, 1 hour a week, 12 hours. (Dr. Allison and Staff)

11. Statistical Methods in Medicine. Twelve lecture hours are devoted to an introduction to statistical methods important in the study of medicine. Lectures and exercises are concerned with collection of data, descriptive statistics, common theoretical distributions, tests of significance, correlation, and regression. A knowledge of these is presented as essential in the design of experiments and in the interpretation of data recorded in the medical literature. The material in the course affords background material for later use of statistics in courses of the Departments of Pharmacology, Physiology, and Preventive Medicine. Third trimester, 1 hour a week, 12 hours. (Mrs. Barbara Hixon)

SECOND YEAR

20. Natural History of Disease. This is a series of lectures reviewing the principles of epidemiology and the utilization of epidemiologic data in arriving at description of the natural history of disease. The course is concerned with multiple rather than the specific causes of disease and demonstrates how a knowledge of the natural history of a disease is of assistance in diagnosis, prognosis, and prevention of that disease. Each student is required to submit a treatise on the natural history of a selected disease. Third trimester, 1 hour a week, 12 hours. (Drs. Shank, Mendeloff, Allison, Domke, Eisenstein, and Recant)

FOURTH YEAR

40. Co-ordinated Outpatient Clerkship. The purpose of this clerkship is to afford experience in dealing with the problems of ambulatory patients. Each student is assigned for the period of one trimester. He cares for patients in the following clinics: Medicine, Surgery, Obstetrics and Gynecology, Psychiatry, Neurology, Ophthalmology, Otolaryngology, and Dermatology. The student becomes the physician for the patient, and his instructors are his consultants. Patients who are seen on initial visits in the Medicine Clinic by the student but who require examination in other specialty clinics are given appointments in the second clinic at times corresponding to the periods in which the student is also assigned to that clinic. The opportunity is available for the student to observe and follow each patient for as long as desirable in each of the participating clinics. In addition, the student is responsible for maintaining contact
with patients during periods of hospitalization and for visiting certain patients in
the home.

The clerkship is under the general direction of the Department of Preventive
Medicine. The teaching of the department is directed at opportunities for institution
of preventive measures and for health management in the office practice of medicine.
In addition, the student is taught to evaluate the social and environmental factors
which pertain in the individual case and to take account of these in planning programs
of therapy. He is given information about and encouraged to utilize the facilities of
a variety of health and welfare agencies in dealing with his patients' problems. The
teaching of the department is carried out through weekly seminars, student interviews
with assigned instructors, and socio-medical case studies. By assignment, 31 hours
a week, 372 hours.

ELECTIVE

50. Public Health Elective. Junior or senior students are afforded an opportunity
to participate in epidemiologic and public health programs for a period of six weeks
in the St. Louis County Health Department. The activities to be undertaken are
determined after consultation with the staff but will ordinarily include participation
in selected public health programs and special projects which relate to the particular
interests of the student. Full time, six weeks. (Dr. Domke)
A research installation in the psychosomatic clinic; the two rooms are separated by a one-way mirror. Here Dr. George Saslow, Professor of Psychiatry, interviews a patient whose responses are observed and recorded by a research fellow in the observation room.

DEPARTMENT OF PSYCHIATRY AND NEUROLOGY

Instruction in psychiatry and neurology is given in all four years of the medical course. In the third trimester of the first year a course is given which is basic to the understanding of human behavior. Major emphasis is given to a presentation of psychological research in the field of early development, learning, emotion, and similar topics.

In the second year, correlated with medical and surgical instruction in history-taking and in physical examination, instruction is given in the approach to the patient as a person. This is done in lectures, demonstration interviews, and discussion. The student begins to appreciate the chief patterns of behavior that characterize a given person; the vulnerabilities of the person when these patterns are inadequate for important life situations; the symptoms (disturbances in physiology, emotion, and thinking) associated with ineffective management of common and uncommon life crises; and the adequate reactions to life crises.
In the third year, psychiatric teaching covers the field of clinical psychiatry in a systematic series of patient clinics. The students spend one week on an inpatient psychiatric service. They have the opportunity to observe and participate in emergency service psychiatric problems in addition to their work on the wards.

In the fourth year, psychiatric and neurologic teaching are carried out in the concurrent outpatient clerkship. Neurological clinics are presented in alternate weeks. Students may select electives of special interest from a variety of opportunities. In the psychiatric teaching, whether regular course or elective, major emphasis is upon psychosomatic medicine and upon psychotherapy.

Neurological instruction commences in the first year with a series of case demonstrations designed to acquaint the freshman student with the applicability of anatomical and physiological knowledge of the nervous system in the localization of neurological lesions. In the second year the neurological part of physical diagnosis is covered by lectures and exercises. Third and fourth year work centers upon in- and outpatient clerkship studies in clinics and on hospital wards. Systematic lecture series are provided for both third and fourth years. Electroencephalography is available as a fourth-year elective.

Wallace Renard Professor of Psychiatry and Head of Department

Edwin Francis Gildea, A.B., Colorado College, 1920; M.D., Harvard University, 1924.

Professors

James Lee O'Leary (Neurology), S.B., University of Chicago, 1925; Ph.D., 1928; M.D., 1931.

Mary A. Mills (Psychiatry), A.B., Washington University, 1941; M.D., 1944.
Warren B. Mills (Neuropsychiatry), B.S., Washington University, 1941; M.D., 1942.
Robert J. Mueller (Neuropsychiatry), M.D., Washington University, 1936; M.S., University of Michigan, 1942.
Paul H. Painter (Child Psychiatry), M.D., St. Louis University, 1947.
Reese H. Potter (Psychiatry), A.B., University of Kansas, 1931; B.S., University of Missouri, 1933; M.D., Washington University, 1935.
Frank O. Shohe (Psychiatry), A.B., Washington University, 1938; M.D., 1942.
Paul J. Zentay (Neurology), M.D., University of Kolosvar, 1914. (See Department of Pediatrics.)

Assistants

Thomas T. Bennett (Neuropsychiatry), B.S., University of Oregon, 1950; M.D., 1952. (Also National Institute of Mental Health Trainee in Psychiatry.)
Mary McFayden Bishop (Neuropsychiatry), A.B., Washington University, 1936; M.D., 1940.
Charles C. Carter (Neurology), A.B., Reed College, 1946; M.D., University of Oregon, 1948.
Robert Bailey Deitchman (Neuropsychiatry), B.A., University of Virginia, 1949; M.D., 1953. (Also National Institute of Mental Health Trainee in Psychiatry.)
Edward James Manley (Medical Psychology), B.B.A., St. John’s University, 1936.
Ruth G. Matarazzo (Medical Psychology), A.B., Brown University, 1948; M.A., Washington University, 1952; Ph.D., 1955 (January). (See Department of Pediatrics.)
William I. Stryker (Neuropsychiatry), M.D., St. Louis University, 1953. (Also National Institute of Mental Health Trainee in Psychiatry.)
Fernando Tapia-Lopez (Neuropsychiatry), B.A., University of Iowa, 1943; M.D., 1947.
Edith E. Trugly (Neuropsychiatry), B.A., New York University, 1948; M.D., Women’s Medical College of Pennsylvania, 1953. (Also National Institute of Mental Health Trainee in Psychiatry.)
Edward F. Vastola (Neurology), B.S., Yale University, 1944; M.D., Columbia University, 1947. (Also U.S. Public Health Service Fellow in Neurology.)
Hubert E. Wuesthoff (Neuropsychiatry), M.D., University of Southern California, 1949.

Assistants (Clinical)

Edmund V. Cowdry, Jr. (Psychiatry), A.B., Princeton University, 1942; M.D., Washington University, 1945.
Barbara S. Kendall (Medical Psychology), A.B., Radcliffe College, 1913; Ed.M., Harvard University, 1928.
Edward H. Kowert (Psychiatry), A.B., Washington University, 1940; M.D., 1943.
John H. McMahan (Neuropsychiatry), A.B., Southeast Missouri State Teachers College, 1939; M.D., St. Louis University, 1943.
Jackson C. Neavles (Psychiatry), A.B., Washington University, 1938; B.S., 1942; M.D., 1942.

Research Assistants
Margaret H. Clare (Neurophysiology), B.S. in Ed., Southeast Missouri State Teachers College, 1940; M.A., Washington University, 1951.
John C. Glidewell (Medical Psychology), A.B., University of Chicago, 1949; Ph.D., 1953.
Margaret Johnson (Psychiatry), R.N., Baylor University Hospital School of Nursing, 1940; B.S., University of Chicago, 1948.
Irene Posner Lowe (Psychiatry), B.S., George Washington University, 1945; M.S., 1949; Ph.D., Washington University, 1954.
Billie Mandl (Medical Psychology), A.B., University of Alabama, 1946; M.A., 1949; Ph.D., Purdue University, 1954.
Lee N. Robins (Psychiatry), A.B., Radcliffe College, 1942; M.A., 1943; Ph.D., 1951.
Louise Rosenzweig (Medical Psychology), A.B., Indiana University, 1929; M.S., Smith College, 1936.
Stanley M. Wald (Neuropsychiatry), M.D., Washington University, 1946. (See Department of Medicine.)
Jerome D. Pauker (Medical Psychology), B.A., Brooklyn College, 1949; M.S., Purdue University, 1950.

Lecturer
Joseph B. Bounds (Psychiatry), A.B., University of Colorado, 1933; M.D., Baylor University, 1937.

Fellows
Hummie Allen Coker Broekman (Research in Psychiatry), B.A., Baylor University, 1948; M.D., 1952. (On leave of absence.)
Leopold Hofstatter (Research in Neuropsychiatry), M.D., University of Vienna, 1920.
John M. Kissane (National Foundation for Infantile Paralysis Research), A.B., University of Rochester, 1948; M.D., Washington University, 1952. (See Department of Pharmacology.)
Harold J. Mandl (U.S. Public Health Service Fellow in Medical Psychology), B.S., Purdue University, 1952; M.D., 1954.
George E. Murphy (Psychiatry), B.S., Oregon State College, 1949; M.D., Washington University, 1952.
Jeanne S. Phillips (Medical Psychology), A.B., Washington University, 1951.
Seymour Reichlin (Lowell M. Palmer Senior in Neuropsychiatry), A.B., Antioch College, 1945; M.D., Washington University, 1948; Ph.D., University of London, 1954. (See Department of Medicine.)
Henry H. Weiss (Medical Psychology), A.B., Hunter College, 1950.

FIRST YEAR

Introduction to Medical Psychology. Through lectures and discussion a framework for understanding human behavior (both in illness and in health) is presented. The behavior of ill people is presented as following the same principles (laws of learning, influence of organismic factors, role of emotion, etc.) as in the better understood behavior of well persons. 12 hours. (Dr. J. D. Matarazzo)

Integrative Neurology (Given as part of Anatomy 12). A series of four clinics is held in the second trimester to acquaint students of neuroanatomy and neurophysiology with the applicability of these subjects in localizing lesions of the central and peripheral nervous system. The series commences with spinal and cranial nerve deficits and
proceeds systematically through spinal cord, brain stem, basal ganglia, cerebellum and cerebral cortex, utilizing currently available cases from the neurological and neurosurgical services.  
(Dr. O'Leary and Staff)

SECOND YEAR

20. Psychiatry.

*The Pathology of Behavior.* (Part of Conjoint Medicine. See page 59.) Emphasis is upon (a) effective interviewing as preparation for medical history-taking; (b) evaluation of the patient as a person, to determine the possible etiological relevance of personality to illness from the viewpoint of comprehensive medicine; (c) an introduction to psychiatric medicine. Lectures, demonstration interviews, written assignments, group discussions with participation of psychiatrists, internists, surgeons, obstetrician, neurologist, psychologist, etc. 36 hours.  
(Dr. G. Saslow)

*Neurological Examination in Clinical Diagnosis.* (Part of Conjoint Medicine. See page 59.) Lectures, demonstrations, and exercises in the neurological examination of the patient. 6 hours.  
(Dr. Levy in conjunction with Neurology Staff)

THIRD YEAR

30. Psychiatry.

(a) *Clinical Psychiatry:* A systematic presentation of the field of clinical psychiatry is given by means of case presentations and discussion. 18 hours.  
(Drs. Robins, Ulett, O'Neal, and associates)

(b) *Clinical Clerkship:* Students in groups of four spend one week on the inpatient service of St. Louis City Hospital. The students are assigned patients for complete study and for partial study. They see emergency psychiatric problems when on emergency call with some member of the house staff. Ward rounds are devoted to the patients the students have themselves studied. 56 hours.  
(Drs. Ulett, K. Smith, and associates)

The third-year neurology inpatient clerkship is offered as a part of the larger medicine clerkship. This is divided between Barnes and City Hospitals and emphasizes the pathophysiologic approach to neurological disorders. A series of six lectures, repeated for each clerkship group throughout the year, emphasizes the practical considerations in early neurological diagnosis.  
(Dr. O'Leary and Staff)
FORTH YEAR

40. Psychiatry.

(a) Senior students obtain experience with medical problems in which personal and social factors have a high degree of relevance in that portion of the concurrent outpatient clerkship conducted by the staffs of the Medicine D and Psychiatry Clinics. The objectives of this part of the clerkship are skill in defining, understanding, and dealing with personal and social factors in a variety of medical problems. 54 hours. (Dr. G. Saslow and Staff)

(b) Psychiatric Aspects of Clinical Medicine. (See Medicine — Dr. David T. Graham.)

(c) Pediatric Psychiatry. The staff of the Child Guidance Clinic participates in consultation and informal instruction when the students are in their clerkship in Pediatrics. (Dr. Starr)

41. Neurology.

Fourth-year neurological training continues to emphasize early diagnosis and the treatment of the commoner neurological conditions. Each student passes through an inpatient clerkship which is a part of the larger senior medicine clerkship, and an outpatient clerkship where acute and chronic ambulatory cases are worked up by the students under staff supervision. A series of 18 lectures is given on alternate weeks through the academic year, covering in systematic fashion the field of clinical neurology. (Dr. O’Leary and Staff)

ELECTIVE COURSES

51. Psychiatry. Work may be elected for six weeks (for twelve weeks with Dr. Saslow). Student’s preference as to type of experience desired will be met so far as possible. Students may work in Renard Hospital, the Bliss Institute, the City Sanitarium, the Barnes Hospital, or the University Clinics. Each student must make his wishes known to Dr. E. F. Gildea and must then obtain the approval of the staff member who will supervise the work. (Drs. E. Gildea, Saslow)

52. Research in Neurology, Neuropathology, Psychology, and Psychiatry. Facilities are available for qualified students to undertake original research in the laboratories of the department or in the clinics or wards. (Drs. E. Gildea, O’Leary, Mensh)

53. Staff Conferences. Students are invited to attend certain of the psychiatric and neurological staff conferences. These are as follows: a psychiatric staff conference held weekly at the Bliss Institute; neurological staff conferences held weekly at the Barnes Hospital; conferences of the neuropsychiatric and neurosurgical staffs held weekly at Barnes Hospital.
54. *Psychoanalysis.* Introduction to psychoanalysis is presented at weekly seminars lasting one trimester. Some didactic material is given, but most of the session is devoted to discussion. (Drs. Cruvant, Fingert, Kaplan, Sommer)

55. *Barnes Hospital Clerkship.* Neurology outpatient clinics, ward rounds, Neurology-Neurosurgery-Neuropathology Conferences, EEG. Full time for three or six weeks. (Drs. Kempinsky and Landau)

56. *City Hospital Externship.* Ward care for neurological patients; opportunity to see consultation and outpatient material, ward rounds, Neuropathology Conferences. Full time for three or six weeks. (Drs. Kempinsky and Landau)
Two fourth year students observing Dr. William B. Seaman, Professor of Radiology, as he adjusts the controls of the Betatron preparatory to beginning therapy on a patient suffering from malignant disease. This installation, one of the few available in medical schools in this country, makes it possible to deliver 24,000,000 electron volt X-rays.

DEPARTMENT OF RADIOLOGY

The Department of Radiology of Washington University is housed in the Edward Mallinckrodt Institute of Radiology and connects by corridor or tunnel with all of the hospitals and clinics constituting the Medical Center. The Department provides both diagnostic and therapeutic radiological services for the patients of Barnes, St. Louis Children's, St. Louis Maternity, McMillan, Wohl, Barnard, and Renard Hospitals, and the Washington University Clinics. In addition, laboratory facilities for research in radiochemistry, radiation physics, and radiobiology are housed in the Institute.

Four floors of the Institute building are devoted to diagnostic roentgenographic facilities. The first floor houses a business office, film library, and consultation viewing room. The radiation therapy section, including low and high voltage X-ray
therapy equipment and radioactive isotope service, is housed on the fifth floor. A 24 Mev. betatron is located in Barnard Hospital immediately adjacent to the Institute. Two floors of the Institute provide research laboratories for the staff and experimental diagnostic and therapeutic service for other departments of the School.

The undergraduate teaching program is designed to present both diagnostic and therapeutic radiology to students as part of their clinical clerkship experience. One introductory course in the third year provides an opportunity to present the principles of roentgenological interpretation and radiation therapy during the surgical clerkship. Every effort is made to provide an opportunity to correlate roentgen and clinical findings through interdepartmental conferences, consultations, and group discussions.

Professor and Head of the Department and Director of the Mallinckrodt Institute of Radiology
Hugh Monroe Wilson, A.B., Illinois College, 1924; M.D., Washington University, 1927; M.A. Yale University, 1945. (See Department of Anatomy.)

Professor
♦ William B. Seaman, M.D., Harvard University, 1941.

Professor Emeritus
Sherwood Moore, M.D., Washington University, 1905. (Also Lecturer in Radiology and Consultant in Radiology to the Division of Tumor Services.)

Consultants
Arthur L. Hughes (Physicist), B.Sc., Liverpool University, 1906; M.Sc., 1908; D.Sc., 1912; B.A., Cambridge University, 1910.
Mildred Trotter (Anatomy), A.B., Mount Holyoke College, 1920; M.S., Washington University, 1921; Ph.D., 1924. (See Department of Anatomy.)

Associate Professors
Martin D. Kamen (Radiochemistry), B.S., University of Chicago, 1933; Ph.D., 1936.
Edward H. Reinhard, A.B., Washington University, 1933; M.D., 1939. (See Department of Medicine.)

Associate Professors (Clinical)
A. Norman Arneson, B.S., Texas Christian University, 1924; M.D., Washington University, 1926. (See Department of Obstetrics and Gynecology.)

Assistant Professors
Gladden V. Elliott, A.B., Central College, 1943; M.D., Washington University, 1946.
Harvey A. Humphrey, A.B., University of Rochester, 1941; M.D., Yale University, 1944.
Michel M. Ter-Pogossian (Radiophysics), B.A., University of Paris, 1942; M.S., Washington University, 1948; Ph.D., 1950.

Assistant Professor (Clinical)
Oscar C. Zink, M.D., Washington University, 1921.

Instructors
Henry C. Blount, Jr., B.S., University of Kentucky, 1944; M.D., Vanderbilt University, 1946.
Alfred I. Sherman (Radiotherapy), M.D., University of Toronto, 1944. (See Department of Obstetrics and Gynecology.)

Instructors (Clinical)

Donald S. Bottom, A.B., Washington University, 1932; M.D., 1940.
Mark D. Eagleton, Jr., A.B., Amherst College, 1946; M.D., Washington University, 1950.
Wayne A. Simril, A.B., Culver-Stockton College, 1941; M.D., Washington University, 1944.

Assistants

Richard L. Benz, B.S., University of Washington, 1941; M.D., St. Louis University, 1944.
Arthur L. Coleman, Jr., A.B., University of New Hampshire, 1944; M.D., Yale University, 1948.
Sumner Holtz, A.B., Tufts College, 1944; M.D., St. Louis University, 1948.
Joe Breese Johnson, B.S., University of Tennessee, 1951; M.D., 1952.
William R. Letsch, B.A., Iowa State Teachers College, 1948; M.D., Yale University, 1952.

Robert A. MacNaughton, A.B., University of Wichita, 1945; M.D., St. Louis University, 1949.
Guy Weaver Van Sykele, A.B., Dartmouth College, 1945; M.D., Cornell University, 1948.
W. Holmes Yealy, B.S., St. Vincent College, 1946; M.D., Columbia University, 1948.

Research Assistants

Henry A. McQuade, A.B., Washington University, 1938; M.A., University of Missouri, 1940; Ph.D., Washington University, 1949.
Jack W. Newton (Radiochemistry), A.B., Miami University, 1950; M.S., University of Wisconsin, 1952; Ph.D., 1954.

Fellow

William Neal Blalock (Gastrointestinal Roentgenology), M.D., Washington University, 1952. (See Department of Medicine.)

THIRD YEAR

30. Introduction to Diagnostic and Therapeutic Radiology. The principles of roentgenological interpretation of diagnostic X-ray examinations in the major fields of clinical application are presented for group discussions. Radiophysics and the principles of radiation therapy are discussed. One trimester, 18 hours.

(Drs. Wilson, Seaman, Elliott, Humphrey, Blount, and Ter-Pogossian)

ELECTIVE COURSES

50. Clerkships in Diagnostic or Therapeutic Radiology. Electives may be chosen in any section of the Department. The student will spend full time as an extern working under the supervision of the residents and senior staff in that section. Limited to two students per section. Six weeks, full time.

a. Roentgenology of the Chest ................................. Dr. Wilson
b. Gastrointestinal Roentgenology ............................ Dr. Elliott
c. Pediatric Roentgenology ................................. Dr. Humphrey
d. Therapeutic Radiology ................................. Dr. Seaman
51. *Special Elective Course.* By special arrangements students in groups of six or more may arrange for supervised group study of any diagnostic or therapeutic radiologic field of interest. Hours to be arranged.

52. *Research Electives.* Opportunity is available to carry out supervised research in the fields of diagnostic and therapeutic radiology, radiation physics, and radiochemistry under the direction and supervision of the heads of these sections.
THE MARY CULVER DEPARTMENT OF SURGERY

(The Department of Surgery includes General Surgery, Orthopedic Surgery, Neurological Surgery, Genitourinary Surgery, and Thoracic Surgery)

The instruction in the Department of Surgery begins with an introduction to surgical principles at the end of the second year. These surgical principles for the most part are derived from fundamental concepts in the preclinical sciences which have been occupying the student since the beginning of the freshman year. Although in this course a few patients are used for the demonstration of lesions which illustrate the principles of surgery, it is really in the junior year that the first actual contact with patients occurs. Each student then is assigned to a clinical clerkship in the hospital wards and in that way is given an opportunity to study the more common and important kinds of surgical diseases. The junior clerkship in surgery lasts for one trimester and is divided between the surgical services at Barnes and St. Louis Children’s Hospitals and at St. Louis City Hospital. Instruction during the clerkship
in the junior year covers the field of general surgery and the major specialties excepting neurosurgery and urology, and the broad general principles of pathology, pathologic physiology, diagnosis, and treatment are extensively discussed. At St. Louis City Hospital special attention is given to the study of trauma and acute surgical emergencies. Students are given the opportunity of seeing all operations on patients assigned to them. Special instruction in history writing, in the examination of the patient, and in various diagnostic and therapeutic techniques is given to small groups of students by the resident and assistant resident house officers. These small groups are in the nature of tutorial classes.

During the junior year also the students attend a course in surgical pathology, and a weekly surgical clinic lasting throughout the year. During the latter part of the year there are various symposia on surgical subjects held in conjunction with other departments for the entire class.

In the senior year the students spend one-half of a trimester on a surgical clerkship, dividing the time between Neurological Surgery and Urology.

Bixby Professor and Head of the Department
Carl Alfred Moyer, A.B., Northern State Teachers College, 1930; M.S., University of Michigan, 1934; M.D., 1937.

Henry Mallinckrodt Professor of Anesthesiology
(Position to be filled.)

Professors
Lauren V. Ackerman (Surgical Pathology), A.B., Hamilton College, 1927; M.D., University of Rochester, 1932. (See Department of Pathology.)

Thomas H. Burford (Thoracic Surgery), A.B., University of Missouri, 1931; B.S. in Medicine, 1933; M.D., Yale University, 1936.

Justin J. Cordonnier (Urology), B.S., Washington University, 1926; M.D., 1928.

Henry Gerard Schwartz (Neurological Surgery), A.B., Princeton University, 1928; M.D., Johns Hopkins University, 1932.

Bixby Professor Emeritus
Evarts Ambrose Graham, A.B., Princeton University, 1904; M.D., Rush Medical College, 1907; LL.D., Central College, 1926; Sc.D., University of Cincinnati, 1927; M.S. (hon.), Yale University, 1928; Sc.D., Princeton University, 1929; Sc.D., Western Reserve University, 1931; Sc.D., University of Pennsylvania, 1940; Sc.D., University of Chicago, 1941; F.R.C.S. (hon.), England, 1943; Sc.D., McGill University, 1944; LL.D., University of Glasgow, 1951; LL.D., Johns Hopkins University, 1952; LL.D., Washington University, 1952; LL.D., University of Leeds, England, 1954; (hon.) F.R.C.S. (Ed.), Edinburgh, 1954; Sc.D., Emory University, 1954. (Also holds title of Lecturer.)

Professors (Clinical)
James Barrett Brown, M.D., Washington University, 1923.

Robert Elman, B.S., Harvard University, 1919; M.D., Johns Hopkins University, 1922.

Peter Heinbecker, B.S., McGill University, 1918; M.D., 1921.

Professors Emeriti (Clinical)
Vilray P. Blair, A.B., Christian Brothers College, 1890; M.D., Washington University, 1893.

*J. Albert Key, B.S., Alabama Polytechnic Institute, 1913; M.D., Johns Hopkins University, 1918.

*Promotion to this rank effective July 1, 1955.
Ernest Sachs (Neurological Surgery), A.B., Harvard University, 1900; M.D., Johns Hopkins University, 1904.

Associate Professors
Charles Leonard Eckert, M.D., Washington University, 1939. (See Tumor Services.)
Albert Roos (Physiology), M.D., University of Groningen (Holland), 1940. (See Department of Physiology.)

Associate Professors (Clinical)
Eugene Myron Bricker, M.D., Washington University, 1934.
Louis T. Byars, B.S., University of Arkansas, 1928; M.D., Washington University, 1932.
Glover H. Copher, A.B., University of Missouri, 1916; M.D., Washington University, 1918.
Rogers Deakin (G.U. Surgery), M.D., Washington University, 1922.
Leonard Thompson Furlow (Neurological Surgery), B.S., Emory University, 1923; M.D., 1925.
Frank McDowell, A.B., Drury College, 1932; M.D., Washington University, 1936.
Richard T. Odell (Orthopedic Surgery), A.B., Westminster College, 1935; B.S. in Medicine, University of Missouri, 1941; M.D., Washington University, 1943.
Fred C. Reynolds (Orthopedic Surgery), A.B., Washington University, 1931; M.D., 1934.

Assistant Professors
Harvey R. Butcher, A.B., Central College, 1941; M.D., Harvard University, 1944.
John D. Elder, Jr. (Anesthesiology), B.S., Hamilton College, 1942; M.D., Johns Hopkins University, 1945.

Robert B. King (Neurological Surgery), M.D., University of Rochester, 1946. (Also Markle Fellow.)
Charles Barber Mueller, A.B., University of Illinois, 1938; M.D., Washington University, 1942.
Morton Donald Pareira, A.B., Washington University, 1933; M.D., 1937.
Theodore E. Weichselbaum (Experimental Surgery), B.S., Emory University, 1930; Ph.D., University of Edinburgh, Scotland, 1935.

Assistant Professors (Clinical)
Robert Wilson Bartlett, B.S., University of Michigan, 1926; M.D., 1930.
Clarence Harrison Grego, Jr. (Orthopedic Surgery), B.S., Union University, 1921; M.D., University of Michigan, 1923.
Minot P. Fryer, A.B., Brown University, 1936; M.D., Johns Hopkins University, 1940.
Heinz Haffner, B.S., University of Arizona, 1931; M.D., Washington University, 1935.
Oscar Perry Hampton, Jr. (Orthopedic Surgery), M.D., University of Tennessee, 1928.
Carl J. Heifetz, B.S., Washington University, 1927; M.D., 1929.
Carl Edward Lischer, A.B., University of California, 1933; M.D., Washington University, 1937.
H. Relton McCarroll (Orthopedic Surgery), A.B., Ouachita College, 1927; M.D., Washington University, 1931.
John Franklin Patton (G.U. Surgery), M.D., Washington University, 1928. (On leave of absence.)
J. G. Probstein, M.D., Loyola University, 1917.
Carl A. Wattenberg (G.U. Surgery), A.B., University of Kansas, 1934; M.D., 1937.

Assistant Professor Emeritus (Clinical)
Arthur Oscar Fisher, A.B., University of Wisconsin, 1905; M.D., Johns Hopkins University, 1909.
Research Associate

Instructors
Falls Bacon Hershey, B.S., University of Illinois, 1939; M.D., Harvard University, 1943.
George Hugh Lawrence (Thoracic Surgery), M.D., Harvard University, 1946.
Charles H. Nicolai (Urology), A.B., Washington University, 1943; M.D., 1946.
Harlan J. Spjut (Surgical Pathology), B.A., University of Utah, 1943; M.D., 1946. (See Department of Pathology.)

Instructors (Clinical)
*J. Byron Beare (G.U. Surgery), B.S., St. Louis University, 1935; M.D., 1939; M.S., University of Minnesota, 1947.
Cyril J. Costello, B.S., University of Texas, 1935; M.D., 1939.
Virgil Otto Fish, M.D., Washington University, 1930.

Zelig Lieberman, M.D., Tulane University, 1950.
Herbert Lourie (Neurological Surgery), B.S., University of South Carolina, 1948; M.D., Duke University, 1952. (On leave of absence.)
Milton Lu (Plastic Surgery), D.D.S., West China Union University, 1943; M.D., 1946; M.S., University of Rochester, 1951.
Arthur D. Mason, Jr., B.S., University of Tulsa, 1948; M.D., Washington University, 1951. (On leave of absence.)
Huitt E. Mattax, Jr., A.B., Duke University, 1951; M.D., 1954.
Albert E. McGinnis (Orthopedic Surgery), A.B., Miami University, 1943; M.D., Washington University, 1952.
Edward B. McKenzie, A.B., University of North Carolina, 1947; M.D., University of Rochester, 1951.
James E. McKittrick, A.B., Harvard University, 1949; M.D., 1953. (On leave of absence.)
John S. Metcalf, M.D., University of Maryland, 1952.
Verlyn Miller, M.D., University of Iowa, 1951.
John A. Moncrief, M.D., Emory University, 1948. (On leave of absence.)
Tillman M. Moore, Jr., B.S., Iowa State College, 1949; M.D., Washington University, 1953.
William T. Newton, M.D., Yale University, 1950.
Shemuel Nissan, M.D., Hebrew University Hadassah Medical School, 1952.
Robert Ogilvie (Surgical Pathology), B.A., University of Utah, 1943; M.D., 1946.
David A. Oldsizer, B.S., St. Louis University, 1941; A.B., Johns Hopkins University, 1950; M.D., University of Rochester, 1954.
George Allan Oliver, A.B., Washington University, 1948; M.D., 1952. (On leave of absence.)
Harold D. Paxton (Neurological Surgery), M.D., Johns Hopkins University, 1948.
Paul E. Prillaman, Jr., A.B., University of Virginia, 1951; M.D., 1954.
Don Chalerm Prommas, M.D., University of Medical Sciences (Bangkok), 1951.
George B. Rader, M.D., Washington University, 1951.
C. H. Johnson Reason, M.D., University of Western Ontario, 1951.
George Duncan Robertson, A.B., Princeton University, 1949; M.D., Harvard University, 1953.
G. Douglas Romney, M.D., University of Rochester, 1950.
Charles L. Roper, M.D., University of Colorado, 1953.
Irwin K. Rosenberg, B.S., Franklin and Marshall College, 1949; M.D., Yale University, 1953. (On leave of absence.)
William Shieber, M.D., Washington University, 1953.
Katheryn Jean Sommers.
John S. Spratt, Jr., M.D., Southwestern Medical College, 1952. (On leave of absence.)
James G. Stickney (Plastic Surgery), B.S., University of Arkansas, 1942; M.D., 1946.
Jessie L. Ternberg, A.B., Grinnell College, 1946; Ph.D., University of Texas, 1950; M.D., Washington University, 1953.
John D. Thorpe (Surgical Pathology), B.S., University of Idaho, 1948; M.D., Washington University, 1952.
Charles R. Underwood, A.B., Emory University, 1948; M.D., 1952.
Dorothy Wolf.
Dean H. Wooldridge, B.S., Texas Christian University, 1950; M.D., Vanderbilt University, 1953.

Assistants (Clinical)
Robert R. Anschuetz, M.D., Washington University, 1940.

Vilray P. Blair, Jr. (Orthopedic Surgery), M.D., Washington University, 1939.
William W. Carter (G.U. Surgery), M.D., St. Louis University, 1945.
James T. Channness, M.D., University of Pennsylvania, 1914.
Katherine Jean Crawford, B.S., Michigan State College, 1942; M.D., Woman's Medical College of Pennsylvania, 1946.
Harry Cutler (G.U. Surgery), B.S., St. Louis University, 1926; M.D., 1930.
Arthur R. Dalton, B.S., University of Missouri, 1938; B.S. in Medicine, Northwestern University, 1940; M.D., 1941.
Gerhard E. Gruenfeld, M.D., Friedrich-Wilhelms University (Germany), 1923.
Earl P. Holt, Jr. (Orthopedic Surgery), A.B., Duke University, 1942; M.D., 1945.
Alan P. Klippel, A.B., Amherst College, 1944; M.D., St. Louis University, 1946.
Jules H. Kopp (G.U. Surgery), M.D., University of Arkansas, 1931.
Alan McAfee, B.S., Washington State College, 1938; M.D., Washington University, 1942.
Roland E. Neumann (Orthopedic Surgery), A.B., University of Missouri, 1942; B.S., in Medicine, 1943; M.D., Washington University, 1944.
Lawrence W. O'Neal, M.D., Washington University, 1946.
Joseph C. Peden, Jr., B.S., Harvard University, 1940; M.D., 1943.
Mathier Pfeifenberger, Jr., A.B., Yale University, 1941; M.D., Harvard University, 1944.
Sam F. Schneider, A.B., Washington University, 1922; M.D., 1936.
Richard G. Sisson, B.A., Harvard University, 1943; M.D., Yale University, 1946.
George L. Watkins, A.B., Washington University, 1938; M.D., 1942.

Research Assistants
Harry W. Margraf.
John R. Robinson, B.S., Northwestern University, 1936; B.M., 1939; M.D., 1940.
Dorothy O. Weinstein, B.A., University of Miami, 1952.

Fellows
Richard P. Andrews (Research), M.D., Harvard University, 1953.
Gordon Cameron (Orthopedic Surgery).
Theodore J. Capeci (Plastic Surgery).
James G. Gabillard (Thoracic Surgery), M.D., University of Texas, 1948.
Hemprova Ghosh (Surgical Pathology), M.D., University of Calcutta, 1941.
Rex E. Kenyon (American Cancer Society Fellow in Surgical Pathology), B.S., University of Oklahoma, 1947; M.D., 1951.
Fred W. L. Kerr (Neurological Surgery), M.D., National University of Buenos Aires, 1949.
Hak Yoon Kim (Thoracic Surgery), M.D., Chonnam University, 1948; M.S., 1954.
Gomes Kruatrachue, M.R.C.S., L.R.C.P., Royal College of Physicians and Surgeons (London), 1938; M.B., B.S., London University, 1938; D.T.M.H., London School of Tropical Medicine and Hygiene, 1939.
J. E. Maltais (Plastic Surgery), B.A., University of Montreal, 1944; M.D., 1951.
John N. Meagher (Neurological Surgery), A.B., Kenyon College, 1946; M.D., University of Cincinnati, 1950.
Harry C. Morgan, A.B., University of Missouri, 1949; B.S. in Medicine, 1951; M.D., Harvard University, 1953.
Jerome P. Murphy (Thoracic Surgery), M.D., Indiana University, 1947.
Eamonn P. O'Kelly (Orthopedic Surgery), M.B., B.Ch., National University of Ireland, 1949; D.C.H., Royal College of Surgeons (Ireland), 1950.
Augusto J. Ramos (Surgical Pathology), M.D., University of Santo Tomas (Manila, P.I.), 1947.
A. Hewitt Rose (Thoracic Surgery), A.B., University of North Carolina, 1943; M.D., McGill University, 1950.
William H. Schlattner (Plastic Surgery), M.D., St. Louis University, 1948.
Werner Schmandt, M.D., University of Muenster (Germany), 1952. (See Department of Physiology.)
Colin F. Vorder Bruegge (Surgical Pathology), M.D., University of Tennessee, 1939.
Thomas Zaydon (Plastic Surgery), B.S., Pennsylvania State College, 1941; M.D., Hahnemann Medical College, 1944.

SECOND YEAR

20. Introduction to Surgery. A lecture course in which are studied certain fundamental principles of physiology, biochemistry, and pathology as applied to surgery. Recitations, demonstrations, and clinics to amplify the lectures are included. Three hours weekly during the second trimester. (Part of Conjoint Medicine. See page 59.)

(Drs. Moyer and Eckert)
THIRD YEAR

30. Surgical Clinic. A weekly exercise throughout two trimesters. Patients presenting the more usual general surgical conditions are demonstrated and their diagnostic and therapeutic problems are discussed. 24 hours. (Surgical Staff)

31. (a) Surgical Wards. For one trimester the student serves as a clerk in the surgical wards of Barnes, St. Louis Children's, and St. Louis City Hospitals. The time is divided between the Barnes Hospital service and that at City Hospital. While on the City Hospital service the student spends two weeks on emergency call at the hospital and sees all emergencies admitted. Ward conferences are held regularly both at City Hospital and at Barnes Hospital, and fundamental subject matter is systematically covered. The students take the case histories and make the physical examinations and the usual laboratory examinations on the patients assigned them. They assist at the operations and do some of the surgical dressings. Surgical pathological material is followed as an integral part of the case study. The students attend autopsies performed in the cases studied by them and are encouraged to be present at the pathological conference at which these cases are discussed. The student is encouraged to consult the library frequently in the solution of problems concerning his patients. Both at Barnes and St. Louis City Hospitals the students are met at regular intervals by the residents and assistant residents in informal conferences, at which times various questions which have arisen during the day are discussed and various aspects of the care of the patient considered. Particular effort is made to see that the student comes in contact with the more frequent and important surgical lesions and that the cases assigned to him are sufficiently diversified to afford him an accurate perspective of surgery. 168 hours. (Various members of the staff)

(b) Fractures. All students are assigned to the fracture service of the City Hospital for two weeks (full time). In addition, a co-ordinated series of lectures and demonstrations on fractures is given to the entire clerkship group each Wednesday morning at City Hospital. The fundamentals of the diagnosis, treatment, and healing of common fractures are covered at this time. 12 hours. (Orthopedic Staff)

(c) Outpatient Service. In the junior year each student attends rectal clinic one morning a week for 4 weeks. He is assigned referred patients for examination and diagnosis and helps in carrying out simple procedures under the supervision of an instructor and members of the surgical house staff.

32. Surgical Pathology. Weekly exercises of two hours for three trimesters, at which time both early and late pathological changes are considered from the standpoint of their clinical manifestations. Pathological material from the operating room and the museum is studied both in the gross and microscopically. 72 hours. (Drs. Ackerman and Eckert)

FOURTH YEAR

40. Surgical Clinic. A weekly exercise throughout the year. 36 hours. (Surgical Staff)
41. Surgical Clerkship. Six weeks. (Three weeks in Neurological Surgery and three weeks in Urology.)

Urology

Complete history, physical examination, and urologic work-up on all ward and semi-private patients, including assisting in cystoscopic study and surgery. These patients are assigned in rotation. Case presentations, three hours weekly, Dr. Nicolai and House Staff. Grand rounds, two hours weekly, Dr. Cordonnier and Staff. Pyelogram Conference, five hours weekly, Drs. Cordonnier, Zink, and Nicolai. Didactic study of special urologic subjects, two hours weekly, Dr. Cordonnier. Surgical Pathology Conference, one hour every other week, Drs. Cordonnier, Nicolai, and Spjut.

Neurological Surgery

1. Admission history and physical examination on all new patients (ward and private) in rotation.
2. Progress notes on all patients (except Infants Ward, Children's Hospital).
3. All clinical microscopy and laboratory work on ward patients (except Infants Ward, Children's Hospital).
4. Perform minor diagnostic procedures on ward patients (lumbar punctures, visual fields, etc.), with supervision.
5. Attend Neurosurgery Clinics (Monday and Thursday afternoon and Saturday morning), and work up all patients.
6. *Attend morning rounds (8:00 to 9:30 a.m.), five days a week.
7. *Attend lectures and clinical demonstrations on Tuesday, 9:00 to 10:00 a.m., and 10:00 to 11:00 a.m., in 1200 Classroom.
8. Attend Neuropathology and Neurology-Neurosurgery Conferences, Wednesday afternoon, 2:00 to 5:00 p.m.
9. *Attend (optional) grand rounds Friday, 3:45 to 5:30 p.m.
10. At the end of each three-week period a written or oral quiz is given, and the results are then reviewed with the students. On rare occasions (three times) the quiz has not been given, when the students' performance as a group, during the clerkship, has been outstanding.

42. Outpatient Service. In the senior year the outpatient service in general surgery is part of a co-ordinated clinical clerkship shared with the other departments in the Washington University Clinics. One-third of the class is divided into four groups of about eight students each. Each group attends all clinics concurrently for one trimester of 12 weeks, one morning session each week being assigned to surgery. The student

*Students present their own cases.
is able to follow a patient for this entire period and in most cases through any other clinic he attends for subsequent diagnosis and treatment. The student is the first to see the patient, take the initial history and examination, and to make his own diagnosis, following which he calls on one of the instructors for consultation and final disposition. In addition to instructors, advanced members of the surgical house staff are assigned to the surgical clinic for supervision and assistance. The student may also carry out or assist in carrying out the relatively simple surgical procedures done in the operating room of the clinic. Attendance at the urological clinic for 6 weekly afternoon sessions is part of this course. For other surgical specialties such as plastic, orthopedic, thoracic, and neurosurgery, time for outpatient service is provided during the senior clerkship.

43. Tumor Clinic. As part of the conjoint clinic program each student attends the general surgery tumor clinic one afternoon each week for half the trimester. During this time an attempt is made to integrate patient visits with other clinics to allow the student to follow patients whom he may have referred to this outpatient division. 18 hours. (Surgical Staff)

44. Tumor Conference. One hour each week for twelve weeks during the surgery, pediatric, and gynecology trimester. Problem cases are presented for illustration and discussion of all aspects of neoplastic disease. 12 hours. (Dr. Eckert, Dr. Ackerman, and other members of the staff)

ELECTIVE COURSES

50. Surgical Pathology. Two students full time for six weeks, all trimesters. The elective will consist of a correlation of the clinical records of hospital patients with the pathological findings. Time will be devoted to current surgical journals as related to surgical pathology, as well as a brief review of pathological techniques. (Dr. Ackerman)

51. Washington University Clinics. General Surgery, six weeks for four students, mornings. The students will serve as clerks to outpatients, the time being spent in the study and care of the patients with special attention to minor surgical procedures.

52 (511). Research in Surgery. Six weeks, full time. This elective is for those students who have been carrying on surgical research in their spare time the previous year and who wish to devote their entire time toward the completion of their problems. (Dr. Moyer)

53. State Cancer Hospital. Four students to service as clinical clerks at the State Cancer Hospital, Columbia, Missouri, full time for six weeks. The duties assigned the student will be the routine duties required of any clinical clerk, consisting of both in and outpatient work, particularly related to malignant disease.

54. Anesthesia. One or two students. Six weeks, full time. Since the surgical operative schedules begin early each morning, the hour to report will be 7 o’clock. This will enable the student to inspect and test mechanical equipment prior to its use.
The student will be assigned to certain nights on call duty with the supervisor to take emergency cases which arise. The course embraces a special training in the practical administration of anesthetics by approved modern techniques, this instruction taking place daily, except Sundays, during the weekly schedules in which the student participates in the operating room. The theoretical aspects are covered by specific periods of classroom instruction followed by examination at stated intervals. The administration of ether, nitrous oxide-oxygen, ethylene, cyclopropane, and basal anesthetics is taught and practiced.

55. Urology Clerkship in Barnes Hospital. One student, mornings for six weeks.

57. Advanced Clerkships. Four students will be given advanced clerkships on the general surgery service at Barnes Hospital for periods of six weeks. Arrangements should be made with Dr. Moyer.

58. Surgical Clerkship at Homer Phillips Hospital. Full time for six weeks. Students will be given an opportunity to study selected patients admitted to the surgical wards. (Dr. Elman)
DIVISION OF POSTGRADUATE STUDIES

Washington University does not have a separate Graduate School of Medicine, but postgraduate educational programs are conducted by the School of Medicine and graduate courses leading to a master's and a doctorate degree are offered by the Graduate School of Arts and Sciences. For further information, write the Assistant Dean, Division of Postgraduate Studies, Washington University School of Medicine, St. Louis 10, Missouri.

MEDICAL JURISPRUDENCE

William W. Crowds, LL.B..........................Lecturer in Medical Jurisprudence

Medical Jurisprudence. A course given in the fourth year embracing medical evidence and testimony, expert testimony; dying declarations; rights of medical witnesses; establishing identity from living and dead bodies, sudden death from natural causes and by violence; criminal acts determined by medical knowledge; the legal relation of physician to patients and the public; insanity, and malpractice. 12 hours.

MISCELLANEOUS APPOINTMENTS

Virgil Loeb, A.B., University of Missouri, 1903; M.D., St. Louis University, 1906; D.D.S., 1906; Lecturer Emeritus in Stomatology.

Mary Lewis, A.B., University of Iowa, 1933; M.S.W., Washington University, 1946, Lecturer in Medical Social Work and Director of the Department of Social Work.

Catherine Jones, A.B., Northwestern University, 1939; M.S.W., Washington University, 1950, instructor in Medical Social Work.
TEACHING AND RESEARCH DIVISIONS

DIVISION OF GERONTOLOGY

Gerontology and Geriatrics are subjects of increasing importance in the health and welfare of the people of the United States. The Division of Gerontology forms the staff of the hospital for the aged of the City of St. Louis (City Sanitarium), conducts a research laboratory at the hospital, and integrates teaching of the subject in the School of Medicine.

Through a bequest from the late Mrs. Ina Champ Urbauer a generous fund has been established for research in geriatrics and allied fields.

Director of Research
John Eshen Kirk, M.D., University of Copenhagen, 1929. (See Department of Medicine.)

Director of Clinical Services
William B. Kountz, M.D., Washington University, 1926. (See Department of Medicine.)

Research Associate
Adolph Surtshin, A.B., Columbia University, 1936; M.D., St. Louis University, 1941. (See Department of Physiology.)

Research Assistants
Philip G. Ackermann, B.S., Oregon State College, 1931; Ph.D., Johns Hopkins University, 1936.

Martin Dyrybe, M.D., University of Copenhagen, 1951.
Teofil Kleim, M.D., University of Budapest, 1934. (See Department of Pathology.)
Leif Sorensen, M.D., University of Copenhagen, 1954.
Kenneth Hawkins, B.S., State University of Iowa, 1943; M.S., 1944.

Fellow
Raymond Schaus, M.D., University of Nancy (France), 1953. (In the Laboratory of Cancer Research.)

DIVISION OF TUMOR SERVICES

The Division of Tumor Services was organized in 1949 as a co-ordinating committee for the Cancer Teaching Program. Inasmuch as cancer, as other subjects in the medical curriculum, is given in a departmental manner, the Tumor Clinic is the principal site on which this Service functions. An attempt is made in this center to give a supplementary picture of the cancer problem as it exists today. In the senior year, time is allotted from the period on gynecology and surgery for work in this clinic. The Tumor Conference, which is held for one-third of the senior class, postgraduate students, and visitors each week, serves the purpose of demonstrating some of the more complex problems in diagnosis and therapy which arise in patients with malignant disease.

IDA JORGENSEN FINKELNBURG AND EMMA JORGENSEN WERNSE
LABORATORY OF CANCER RESEARCH
Through the generosity of Emma Jorgensen Wernse, the School has established a special laboratory of cancer research. Investigation is largely in the fundamental field. Similar and related studies are also carried on in other departments of the School.

Director of the Wernse Laboratory
Edmund Vincent Cowdry, A.B., University of Toronto, 1909; Ph.D., University of Chicago, 1912. (See Department of Anatomy.)

Research Associate
Valentina Suntzeff, M.D., Women’s Medical Institute (Petrograd, Russia), 1917.

Research Assistant
Kuang-Mei H. Wang, B.S., Southwestern National Associated University, 1942; M.S., Syracuse University, 1949; Ph.D., University of Missouri, 1951.

Fellows
Carlo Bruni, M.D., University of Perugia, 1911.
Suk Chul Chang (China Medical Board), B.S., Seoul National University, 1944; M.D., 1948.
Raymond Schaus (Institute of International Education), M.D., University of Nancy (France), 1953.

CHILD GUIDANCE CLINIC
The Child Guidance Clinic is operated as a joint enterprise of the Departments of Neuropsychiatry, Pediatrics, Psychology, Social Work, and Education with the assistance of the Children’s Research Foundation and the Community Chest.
Phillip H. Starr, M.D. .................................................. Director

DIVISION OF AUXILIARY MEDICAL SERVICES
The Division of Auxiliary Medical Services of the School of Medicine provides instruction in the more important technical fields which are necessary to the physician in providing modern health care.
As with the educational program of the medical student, the Division of Auxiliary Medical Services is a joint enterprise of the School of Medicine and the affiliated hospitals—Barnes, Children’s, McMillan, and Maternity Hospitals. As a matter of convenience some departments are administered by the School and others by the Barnes Hospital.

Departments conducted by the School of Medicine include Hospital Administration, Occupational Therapy, Orthoptic Technology, and Physical Therapy. Schools operated by the Barnes Hospital include Laboratory Technology, Medical Dietetics, and Anesthesiology. All of the courses are approved by the American Medical Association or other certifying agencies and graduates are admitted to examinations. For further information write the Director of the Department or School, Washington University School of Medicine, St. Louis 10, Missouri.

DEPARTMENT OF HOSPITAL ADMINISTRATION

Professor and Director of the Course
Frank R. Bradley, M.D., Washington University, 1928; LL.D., Central College, 1943.

Assistant Professor and Associate Director

Lecturers
William Anderson (Hospital Accounting).
Henrietta Becker (Dietetics), B.S., University of Kansas, 1937.
George Allen Bowles (Chaplaincy), A.B., Southern Methodist University, 1927; B.D., 1930; D.D., Central College, 1952.
Ann Jones Campbell (Nursing), R.N., Vanderbilt University, 1930; B.S., 1933.
John W. Claiborne, Jr., A.B., Vanderbilt University, 1929; M.D., 1932.
Donald J. Horsh (Hospital Jurisprudence), B.S., University of Nebraska, 1941; M.H.A., Washington University, 1951; LL.B., St. Louis University, 1953.

John H. Jenkins (Hospital Purchasing), B.S., St. Louis University, 1943.
Cornelia S. Knowles, R.N., Washington University, 1925.
Julius Krasner (Hospital Laundries)
David Littauer, A.B., Cornell University, 1927; M.D., New York University, 1933.
Ted Lloyd (Rural Community Hospitals).
Curtis H. Lohr, B.S., Washington University, 1920; M.D., 1922.
Eugene J. Mackey (Hospital Architecture), Bachelor of Architecture, Carnegie Institute of Technology, 1936; Master of Architecture, Massachusetts Institute of Technology, 1939.
Harry J. Mohler (Industrial Hospitals).
Paul I. Robinson (Army), B.S., Washington University, 1926; M.D., 1928.
William Shearer (Private Clinics).
Martha Spencer (Personnel), A.B., Lindenwood College, 1941.
Crofford O. Vermillion, A.B., DePauw University, 1939; M.D., Washington University, 1947.
Herbert S. Wright, A.B., Central College, 1927; M.A., State University of Iowa, 1933.
A two-year course leading to a certificate or the degree of Master of Hospital Administration. The first year is given on the main campus of the University and at the School of Medicine, and includes courses in accounting and statistics, social work, public health, and hospital administration. The second year is spent in field work in an approved hospital. A degree is conferred on completion of a satisfactory thesis.

Applicants must hold a bachelor's degree or be graduates of an approved school of medicine.

DEPARTMENT OF OCCUPATIONAL THERAPY

**Assistant Professor and Elias Michael Director of the Department**

**Lecturer Emeritus**

**Instructors**

Dorothy L. Flint.

Ada Wells Ford.

**Assistant**

Betty M. Bishop, A.B., Duke University, 1913.

Helen D. Harkness, B.S., Columbia University, 1926; M.A., 1928.

**Lecturer**

A three-year course leading to the degree of Bachelor of Science in Occupational Therapy is offered. During the first two years the student acquires knowledge of both the physical and mental aspects of disease and disabilities, familiarity with manual and creative activity media, and a basic understanding of how these are correlated to provide Occupational Therapy measures. The student also becomes oriented to the role of Occupational Therapy as co-ordinated with various medical and social resources of rehabilitation. Curriculum includes: sciences such as anatomy, physiology, psychiatry, and neurology; clinical subjects such as general medical, orthopedic, and cardiac disease; interpretation of principles and practices of Occupational Therapy in specific areas of disabilities; technical instruction in manual and creative activities. The third year consists of ten months of hospital practice in approved clinical affiliation centers.

Applicants must have completed two years of college work including specified courses in biology, physical science, psychology, and sociology.
DIVISION OF AUXILIARY MEDICAL SERVICES

Candidates for B.S. degree
Tuition (two academic years) ... Per year $525.00
Student Health Fee (two academic years) ... Per year 42.00
Tuition (clinical year) ... Per year 100.00
Late Registration Fee ... 5.00

Advanced Standing Course
Tuition (academic year) ... 525.00
Student Health Fee (academic year) ... 42.00
Tuition (clinical year) ... 100.00
Late Registration Fee ... 5.00

DEPARTMENT OF ORTHOPTIC TECHNOLOGY

Bernard Becker, M.D. ... Director

An eight-months course leading to a certificate. The course is devoted to basic ophthalmology with emphasis on extraocular and practical orthoptic techniques. Applicants must be graduates of an approved high school in the upper two-thirds of the class. Tuition is $400.00 for the school year.

DEPARTMENT OF PHYSICAL THERAPY

Instructor in Physical Therapy and Director of the School
Beatrice F. Schulz, B.S., Washington University, 1949.

Instructor
Lorraine Lake, B.S., Washington University, 1950; M.A., 1954. (See Department of Anatomy.)

Lecturer
John W. Deyton, A.B., University of North Carolina, 1925; M.D., Rush Medical College, 1929.

A two-year course for the training of physical therapy technicians, leading to a degree of Bachelor of Science in Physical Therapy. The program is presented to give the students a basic knowledge of normal human anatomy, physiology, and pathology so that they may be better prepared to apply physical therapy techniques. The various modalities of treatment used by physical therapy technicians are thoroughly studied by means of lecture, demonstration, and practical application.
DIVISION OF AUXILIARY MEDICAL SERVICES

Applicants must have completed two years of college including certain specified courses.

SCHOOL OF X-RAY TECHNOLOGY

A course for X-ray technicians is offered by the Edward Mallinckrodt Institute of Radiology. The course will cover by lectures and group discussions the following subjects: Anatomy and Physiology; Radiographic Technic; Radiation Physics; Darkroom Processing Procedures; Nursing Procedures; Administration; Radiation Therapy; Professional Ethics.

The course is two years in length. On satisfactory completion of the first year’s work, the student will be assigned to tours of duty in the various sections of diagnostic and therapeutic disciplines for practical experience, and during the second year will be paid a small monthly stipend of $50.00.

Candidates for admission must present evidence of successful completion of four years’ education in an accredited high school. Special consideration will be given to graduates of Schools of Nursing which are recognized by the State Board of Nurse Examiners and to students who have passed college entrance examinations for admission to an accredited college or university. The fees for the course are as follows:

SCHOOL OF DIETETICS

Henrietta Becker, B.S. Director

A twelve-months course for the training of dietitians leading to a certificate.

The course includes theoretical and practical training in food and personnel administration, food cost and control, diet therapy, Washington University Clinics, St. Louis Children’s Hospital and teaching food and nutrition.

A bachelor’s degree from an accredited college or university is required for admission. Certain courses in chemistry, biology, social science, education, foods, nutrition and dietetics, and institutional management are essential.

There is no tuition fee, but a matriculation fee of $10.00 must be deposited as soon as an application is accepted.
SCHOOL OF MEDICAL TECHNOLOGY

Virgil Loeb, Jr., M.D. ..................................................Director
Mary Wayne Page, B.S. ..............................................Assistant Director

A twelve-months course for the training of medical technologists leading to a certificate. The course includes theoretical and practical training in blood banking, clinical microscopy, tissue pathology, parasitology, bacteriology and serology, biological chemistry, electrocardiography, and basal metabolism.

Applicants must present at least two years of college training approved by the Registry of Medical Technologists, Muncie, Indiana. The tuition is $100.00 for the entire course.

DEPARTMENT OF ANESTHESIA

Mrs. Dean Eberhardt Hayden, R.N. ..................................Associate Director

An eighteen-months course for comprehensive special training in the practical administration of anesthetics by approved medical techniques, and the theory underlying their skilled administration. Upon satisfactory completion of the course, a certificate is awarded.

The theoretical aspect of the subject is covered by specific periods of organized instruction. Instruction in the practical administration of anesthetics takes place in the operating rooms, where at first the student observes, then administers anesthetics under an instructor's supervision, and eventually conducts complete anesthesias upon her own responsibility.

The course is open to graduates of accredited schools of nursing. The tuition is $100.00. Full maintenance is provided. A stipend of $50.00 per month is paid after six months.
The Alumni Association, whose membership is made up of all graduates of the School of Medicine, is active in its support of the School and of the student body. Each year the President of the Association participates in the exercises welcoming the incoming class, and prior to commencement, the Association sponsors the annual Alumni dinner, at which the graduating seniors are guests. On the day of the dinner, a reunion is held, featuring a scientific program presented by graduates and faculty members.

The Association also maintains a loan fund for students, and through the contribution to the Class Endowment Fund made by the class celebrating its twenty-fifth reunion, provides a source of important financial aid for the School.

The Corporation of the University includes one representative, elected by the Medical Alumni Association.

For the year 1954-55, the following alumni served as officers of the Washington University Medical Alumni Association:

President: Guy N. Magness '28
1st Vice-President: Paul O. Hagemann '34
2nd Vice-President: Leslie C. Drews '29
Secretary-Treasurer: Ernest T. Rouse '43

Dean Carl V. Moore, third from right, and a group of alumni in an informal discussion after the scientific program of the annual reunion.
