Hospital Ready If Power Fails

A electrical power outage or quick the northeastern por-

tion of the United States has raised serious question about the vulnerability of major United States cities to similar failure. Despite the many assurances that alternate sources of power are readily available, this apparently was not the case in the New York situation.

In the event of a similar emer-
gency striking the St. Louis area, preparations have been made in the Jewish Hospital of St. Louis. Dr. E. Grey Dimond, former St. Louis and Pennsylvania heart surgeon and now recognized as one of the world's outstanding cardiologists, has worked out plans to provide quick and effective service to the hospital and its patients.

"Both Mrs. Simon and I are very grateful to be able to establish this chair of medicine for these two outstanding institutions," Mr. Simon said.

The first recipient of the professorship for the chair in medi-
cine is Dr. Stanford Wessler, physician-in-chief at Jewish Hospital, and professor of medicine at Washington University Medical School.

"We feel that Dr. Wessler has the outstanding qualities for re-
cieving this position, and both institutions are fortunate in ob-
taining his services," Mr. Simon continued.

Dr. Wessler has been physician-in-chief at Jewish Hospital since July, 1963. Prior to that time he was at Beth Israel Hospital, Bos-
ton, and assistant professor of medicine at Harvard University Medical School.

Mr. and Mrs. Simon have had a long term interest in the study and practice of medicine: Mr. Simon did much of his under-
graduate work at Harvard Univer-
sity (18) in pre-medical study as well as extensive studies in economics.

Mr. Simon is a member of the Board of Directors of Jewish Hospital, on the Board of Gov-
ernors of the Association of New York Stock Exchange Firms, and has recently celebrated his 48th anniversary in investment bank-
ing. He is the senior partner of L. M. Simon and Company, founded in 1874 by his great uncle. Mr. Simon is also the founder and sole donor of the John Simon Foundation, a char-
itable, educational and religious agency.

ing. He is the senior partner of L. M. Simon and Company, founded in 1874 by his great uncle. Mr. Simon is also the founder and sole donor of the John Simon Foundation, a char-
itable, educational and religious agency.

Mr. and Mrs. JOHN E. SIMON (seated) are pictured as they announced the establishment of the "John E. and Adaline Simon Chair in Medicine" with (left to right, standing) Dr. Stanford Wessler, first recipient of the professorship shared by the Jewish Hospital and Washington University; Gordon Scherck, a vice-president of the Hospital; Thomas H. Eliot, Chancelor of Wash-
ington University; and John M. Shoenberg, former President of the Hospital, Gordon Scherck, a vice-president of the Hospital (the latter two acting for Joseph F. Ruwitch, President of Jewish Hospital) accepted the gift from Mr. and Mrs. Simon at a recent presentation.

Dr. Dimond, chief cardiolo-
gist at Scripps Institute, delivered the 7th Annual Arthur E. Strauss Lecture entitled, "Usefulness of the Exercise Electro-Cardiogram in the Diagnosis of Coronary Ar-
tery Disease." The speech was open to St. Louis physicians and was held in the Mark G. Stein-
berg Auditorium.

Dr. Dimond was born in St. Louis, and received his medical degree from the University of In-
diana Medical Center where he served as Resident in Med-
dicine. He later studied post-
graduate cardiology at Harvard University and Massachusetts General Hospital.

As an author, Dr. Dimond has published 136 scientific articles, 16 medical education articles, and written 4 medical books. Recently he co-edited a book, Paul Dudley White, A Portraits, published this year. (In 1956 Dr. Dimond re-
ceived the Paul Dudley White Traveling Scholarship and Visit-
-ing Lectureship for India, Thai-
land, The Phillipine Islands, Tai-
wan and Japan.)

He delivered a Fullbright lec-
ture in 1957 in the Netherlands, and was visiting professor at the Institute of Cardiology, London, England in 1959.

A director of the Cardio-Pul-
monary Institute at the Scripps Foundation since 1960, Dr. Di-
mond is also a member of the Clinic and Research Foundation in La Jolla and at the same time is a lecturer in Medicine at the University of Kansas Medical School. From 1953 to 1963 he was civilian consultant in medi-
cine for the U.S. Bureau of Labor in Washington, D.C. Dr. Dimond is a member of 11 research and medical societies, and has six honorary professorships and member-
ships in South America and the Far East.

In the construction program presently going on at the School of Nursing building, corridor and stairwell wiring are being installed so that this building can be hook-
ed up to the emergency generator. Similar requirements relating to the new research building will provide a second emergency gener-
ator for use in that building.

Prior to the installation of the (Continued on Page 8, Col. 1)
THREE ATTEND HOME CARE PROGRAM IN CAPITAL

A crash program to assist states and local communities in developing certifiable Home Health Services under Medicare was proposed last week in Washington, D.C., at a meeting called by the Medical Care Division of the Department of Health, Education and Welfare.

Attending the meeting of the seven Regional Home Care Training Centers were Dr. Franz U. Steinberg, Director, and Mrs. Sandra C. Howell, Coordinator of The Jewish Hospital of St. Louis Training Center; and Dr. Aaron Birenbaum, Medical Director of Jewish Hospital's Division of Home Care.

“Local communities are searching for information on how they can prepare for Medicare," said Dr. Steinberg, "and we hope to provide consultation to local communities on personnel and program standards that will be required under the law, jointly with State Health Departments who will be certifying agencies under Medicare.

Assimilation

Most communities will be able to shift gears quite smoothly to the most successful drill ever conducted from the standpoint of communications and rapid processing of casualties through the triage area.

More THAN 40 student nurses participated last month in a drill simulating an earthquake. Philip Bassin, assistant director, reported that this was the

United Fund Goal Reached

The United Fund Goal at Jewish Hospital has been surpassed; the total received was $12,745. The combined record for both the Jewish Federation and the United Fund campaigns places us at the top in per-capita giving of all hospitals in the city.

More THAN 100 patients were in hospital as of Dec. 29 at the Jewish Hospital of St. Louis. The party was sponsored by Rabbi Lawrence Siegel, community chaplain; and the Department of Long-term Care. The party was paid for by an anonymous gift to the hospital. Assisting in the program were Robert Meister, social worker; Lynne Geller, vocational counselor; Mrs. Arline Greenberg, occupational therapist; Philip Bassin, assistant director; and Mrs. Betty Jaspriz, editor. Guests above (at left) are Ray Highfill and Kenneth C. Garland, director, report that this was the

New Executive Housekeeper

Kenneth C. Garland, the new executive housekeeper at Jewish Hospital, had 20 years experience in hospital work, the majority with the United States Army in Europe.

A Missourian born in Maiden, Mr. Garland was called to active duty in the Navy in 1941-42. His commander sent him to the hospital corps school where he became a pharmacists’ mate.

For this beginning in hospital work he did many other hospital jobs in the Navy, then later attended the Army School for One-year-old boys live in the city.

Beulah Sanders Recently Retired

Mrs. Beulah Sanders, executive housekeeper, has retired from her duties at Jewish Hospital. Mrs. Sanders served as executive housekeeper from October 1946, and is officially a member of the Hospital family until December 31st of this year.

Prior to coming to 216 South Kingshighway, she was in the service of the Jewish Hospital at The Jewish Sanatorium on Fee Fee Road for more than 20 years. In 1954 Mrs. Sanders was awarded a trophy as Housekeeper of the Year from the National Executive Housekeepers’ Assn. in Denver, and also was elected to the association board of directors. Mrs. Sanders was charter president of the St. Louis N.E.H.A.

As executive housekeeper, she instituted an in-service training program for employees. She also turned in the duty of all aspects of large-scale housekeeping.

Mr. Garland’s hobbies include hunting, fishing and camping. He, his wife Wanda, and their 12-year-old boy live in the city.
Medical Staff

P. L. FRIEDMAN, M.D., director of the division of anesthesiology, was guest speaker at the Missouri Assn. of Nurse Anesthetists annual workshop held at Jefferson Barracks. His topic was, "Fluid Replacement During Surgery." Several members of the house staff recently attended a two-day annual meeting of the Central Society for Clinical Research in Chicago, Illinois. Doctors who made the trip included: BENJE, BOONSBARTH, BARRY M. COHEN, LEONARD NEWMARK, MORTON A. LEVY and CHARLES WALLACE.

ARTHUR E. STRAUSS, M.D., consultant in medicine cardiology, recently visited the University of Texas Medical School where he attended a lecture in honor of his long time friend, DR. NEIL H. SOREN on his 75th birthday. The visiting lecturer was MAXWELL FINLAND, M.D., Chief of the Hartford Service at Boston City Hospital.

ALEX C. SONNENWIRTH, Ph.D., director of the division of microbiology, has been elected to a two-year tern as National Councilor of the American Society for Microbiology; becoming a member of the governing body of the Society. The Society has over 8,000 members, and is a professional organization of general, agriculural, industrial and medical microbiologists and virologists. Dr. Sonnenwirth has also written a book review by invitation called "Anaplastic Bacteriology in Clinical Medicine." It was published in the November issue of the American Society for Microbiology News.

FRANZ U. STEINBERG, M.D., recently spent two days in Cincinnati, Ohio by invitation of the University of Cincinnati Medical College. He participated in a symposium on spasticity and muscle relaxant drugs, and served as a panel member on Community Health, and Rehabilitation.

FRANK B. WILSON, Ph.D., director of speech pathology, was a member of a panel on Evaluation of Language Disorders in Children at the same meeting.

FRANK B. WILSON, Ph.D., director of speech pathology, presented two papers, "Speech and Language Educational Needs and Procedures Used with the Cerebral Palsied Child," and "Differential Diagnosis in Speech and Hearing with the Cerebral Palsied Child." They appeared in the Speech and Language Therapy with the Cerebral Palsied Child. The proceedings of the workshop in Speech and Language Therapy with the Cerebral Palsied Child conducted at The Catholic University of America under the auspices of the Director of Workshops, June 11-12, 1966. The book was edited by W. T. Dally.

DR. B. Y. GLASSBERG has given a series of lectures at the Des Petes Presbyterian Church on, "Causes of Marital Discord," and "Making the Marital Sexual Relationship Fulfilling." Dr. Glassberg also spoke at the Soldan PTA on "Boy-Girl Dating Problems." In January he plans to speak to the PTA at Summer High School.

MISS BARBARA BURNER, C.R.N.A., anesthesiology, was one of the first to volunteer for the new employee's Blood Donor Program. She is pictured in this issue by David Kovenksy, husband of Mrs. Reya Kovenksy, Public Relations.

**THE WILLIAM and Jerome Molasky Memorial Heart Fund** was established by Mr. William Molasky, Mrs. Jerome Molasky and her daughter, Mrs. Robert Bernstein, and the Alan Molasky family, after initial contributions had been received from a great number of friends in the St. Louis area. Two large patient rooms were named in recognition of the $25,000 endowment fund to be used for cardiac patient care and research. The Molasky family includes (left to right): Robert Bernstein, Allan Molasky, Mark Molasky, Mrs. Helen Molasky, Mrs. Alvin Molasky, Robert Bernstein, and Mrs. Jerome Molasky.
New Eternal Light for Chapel

A new eternal light will grace the Hospital chapel as a gift from Mrs. Louise Aronberg, only daughter of Louis M. and Clara Monheimer.

As a result of Mrs. Aronberg's gift in memory of her parents, their names will be placed on the "Friends of the Chapel" plaque to be at the entrance of the Chapel.

The Monheimer family has supported research in pancreatitis for many years at Jewish Hospital. Mr. Monheimer was a former vice-president of the May Department Stores Company. Following his death, his widow Mrs. Clara Monheimer London established and continued to support work research through the Monheimer fund. This study of pancreatitis is co-sponsored by the May Foundation.

In addition to her recent contribution to the chapel, Mrs. Aronberg annually contributes to the Hospital through the Monheimer Memorial Fund. Mrs. Aronberg is the mother of three girls: Barbara, Betty and Laurie.

MRS. LOUISE S. ARONBERG

EQUIPMENT DONATED

Mrs. Charles Wise and gardener have donated a hospital bed with side rails in the memory of their son, Richard Dean, to the Home Care Department.

Volunteers Meet Need In Central Supply

Some folks ask the cherry-coated volunteers, "What do you work?" When their response is, "Central Supply," the return usually is, "Well, what do you do? — roll or fold bandages to keep busy?"

The day of old (long before the volunteer program was instituted at the Hospital) when rolling and folding bandages in order to have them around was the order of the day. Modern machinery can do these tasks on a fast production line at a limited cost. There is more important work to be done in Central Supply; work that cannot be bought from the hospital supply houses in the particular way the Hospital needs it.

Central Supply, directed by Mrs. Nadean Wright, is the hub of the main wheel that provides the Hospital with many supplies. Without Central Supply, the patient could only be fed from the kitchen, receive housekeeping services and a portion of his medications and a few special tests. It is at this stage that major work is done by the Central Supply personnel and it is vital in the operating rooms, delivery rooms and at the patients' bedside.

Work in Central Supply is the foundation for a better hospital. There is no room for striking union members here. Their contact is direct to patients and personnel in the form of goods: gels, sponges carefully folded by hand; rubber bands used as small sterile tourniquets or drains by the surgeon; tiny shirts and blankets folded and packed in kits for the nursery. All these and more are carefully hand-prepared for the autoclaves which finish the sterilization process.

There are many hospital rules but the workers in Central Supply add more in this sterile preparation area: their heads are to be covered at all times; they may not eat, smoke or drink so that no foreign particles may fall into or on to the supplies. Special instructions for taping supplies to make efficiency at a maximum are part of the training for the workers. They also help pack a kit prepared to all new mothers, customary for every possible need.

"In a sense," Mrs. Wright said, "these ladies spoil our patients, doctors and nurses at the Hospital. They are mother hens who take special care of and with the supplies. Some ladies come early in the morning and work until the sun sets; some take three or even four hours to get to the Hospital in all kinds of weather, but, most of all, these ladies who work in this bottleneck room care enough about the work they are doing, to do it graciously. We thank them."

SIMONS

(Continued from Page 1)

foundation. He is a member of the Advisory Board of Maryville College, an active member of the Missouri Historical Society, and a benefactor of the City of St. Louis Art Museum.

One of Mr. and Mrs. Simon's chief hobbies is the game of contract bridge. They have both been on winning teams in national tournaments. Mrs. Simon was a member of the women's winning team in 1959; Mr. Simon was on the men's championship team with Charles Goren in 1965; he had previously been a representative on the United States Olym-

X-Ray Waiting Room

Five Artists Donate To The Hospital

Mrs. Wolf said that the canvas includes six nannies, several policemen, two gentlemen, four ladies and nine children, (some with hoops) playing in the English park scene. It was painted for the west wall.

Mrs. Dorothy Dubinsky gave an abstract painting for the south wall that is hung next to a rhododendron donated by the Auxiliary. Mrs. Dubinsky's painting includes orange, greys, blacks, and various shades of green colors.

Three works have been hung on the east wall, and Mrs. Helen Schwartz's "Primordial Demogra-

y), 1961, gives the impression of a cool forest. It is a print of green and blue adding serenity to the scene, framed in gold on a white background. One patient said, "I could look at this all day and still enjoy it."

Mrs. Myrtle Kornblum's larger abstract, "Autumn Landscape," with its bright fall colors is fall personified. It is greatly admired by many of the patients who know her, as well as those who do not. She has shown her work in Madrid as well as St. Louis.

Mrs. Beatrice S. Wolff's "Blue Bowl" monotype 1/2 was sprayed on a white background. One patient said, "I could look at this at all day and still enjoy it."

Mrs. Myrtle Kornblum's larger abstract, "Autumn Landscape," with its bright fall colors is fall personified. It is greatly admired by many of the patients who know her, as well as those who do not. She has shown her work in Madrid as well as St. Louis.

MORTON J. MAY, who gave the first research grant to the Hospital, congratulates Charles H. Yalem at the groundbreaking ceremony.

Yalem Groundbreaking Ceremony

The following remarks are excerpts from the address by Charles H. Yalem for the groundbreaking ceremony dinner of the Yalem Research Building, held on December 15, 1965, at the Jewish Hospital of St. Louis.

"I am deeply grateful for the privilege of participating with you on this occasion which marks the groundbreaking ceremony for the new medical research center at the Jewish Hospital of St. Louis.

"I feel that all of us here tonight, and the entire community as well, owe a debt of gratitude to the many dedicated persons who have played an important role in bringing about this moment of fulfillment.

"There are many who can take pride in witnessing the beginning of the construction of the new research center, a center, which most assuredly will play a tremendous role in future medical research here in St. Louis. Today, research at the Jewish Hospital is being carried out by 92 full-time personnel who are constantly probing for new knowledge in medicine and surgery, and fields related to them.

"In the new building, additional research and educational programs will be implemented. The nine-story building will be dedicated to education as well as medical research.

"When completed (in approximately a year and a half) the structure will house a total of 220 physicians, educators and research people who will devote their time to new discoveries and developments to help man's centuries-old battle against disease and human suffering.

"This research building will become a symbol of change from a local community hospital to a major medical research and teaching center. It will also reflect Jewish Hospital's affiliation with the Washington University School of Medicine as a major teaching affiliate, as part of an over-all complex where medical students as well as physicians will receive added training.

"I look forward to the great research and training activities which will take place here, not only as an investment in the future health needs of America (and perhaps the entire world), but as activities which will permit us to bring the latest and finest treatment techniques to the 30,000 patients treated here annually.

"We must have a sense of responsibility toward others and the community in which we live. We must constantly strive to do something in this world for those less fortunate than ourselves.

"I share with you tonight my pride and gratification in witnessing the start of the construction of this new project. I am doubly proud that the new building will be known as the Yalem Research Center. I speak for myself and all of the members of my family in saying that we are deeply moved and honored, for there can be no greater satisfaction than having a building named in one's honor that will forever be devoted to the cause of life and health, and the needs of humanity.

"I want you to know that I have been filled with new inspiration to continue my efforts to achieve further goals for humanitarian institutions. You have given me renewed faith, courage and enthusiasm to carry on my endeavors, and to devote myself to new causes for the betterment of mankind."

Charles H. Yalem

LOUIS TIGER, Life Member of the Board of Directors, presents opening remarks for the ceremony at the construction site. Rabbi Lawrence Siegel, community Chaplin, and Hon. Lawrence K. Roos, Supervisor of St. Louis County are to his left.

"I share with you tonight my pride and gratification in witnessing the start of the construction of this new project. I am doubly proud that the new building will be known as the Yalem Research Center. I speak for myself and all of the members of my family in saying that we are deeply moved and honored, for there can be no greater satisfaction than having a building named in one's honor that will forever be devoted to the cause of life and health, and the needs of humanity.

"I want you to know that I have been filled with new inspiration to continue my efforts to achieve further goals for humanitarian institutions. You have given me renewed faith, courage and enthusiasm to carry on my endeavors, and to devote myself to new causes for the betterment of mankind."

SHARING THE occasion with Mr. Yalem are (from left to right) David A. Gee, executive director, Dr. Morton Pareira, chief of surgery, and Dr. Stanford Wessler, chief of medicine at the Hospital.

CHARLES H. YALEM and his son (right) Richard M. Yalem visit Joseph F. Ruwitch, president of the Board of Directors after the groundbreaking ceremony dinner. Mr. Ruwitch is convalescing from a recent automobile accident.
Dr. London: Sports Enthusiast

Dr. Stanley L. London has been a sports enthusiast since he was quite young. Today he is an assistant attending surgeon at the Hospital, and still is an enthusiastic participant as well as spectator. He is a champion handball player, and has been the Hawks’ surgeon since the team moved to St. Louis.

When he became ineligible for major sports in school, Dr. London turned to handball for his recreation. He now can be found working out from two to three times per week.

Handball is a sport that Dr. London chose because it provided the outlet he desired with good exercise in a short time span. He hopes to continue playing as long as he is physically capable.

Al Goldstein, his partner, and he work out more frequently before a tournament. Dr. London and Mr. Goldstein recently won the National Invitational Handball Tournament held in Kansas City for the fourth time.

Singles Champion

Last summer, Dr. London won the State Singles Class A from 40 other handball players at the St. Louis Fire Department Annual Four-Wall Tournament. He and Mr. Goldstein also won the doubles tournament there. Their other victories include Memphis, Omaha, Texas, Cincinnati and St. Louis at invitational tournaments. In the National Open, the team has come as close as 2nd.

When Dr. London was a medical student at Washington University, he was honored by his teammates as well as most campus organizations with a Stan London night, and was given a medical kit at the end of his three seasons. He was elected team captain 13 times. Dr. London played baseball and basketball his first three years in medical school and coached these two sports during his senior year. He frequently missed practices and ball his first three years in medical school, but played baseball and basketball at DePauw University. He made several Missouri Valley All-Star and All-American teams.

Dr. London declined professional basketball and baseball offers at the end of his active career in those sports in order to continue his medical pursuits. He was born in Springfield, Illinois, and came to St. Louis in 1943. He and his wife Jacqueline recently celebrated their 14th wedding anniversary. Their three children, Jimmy, 12, Cynthia, 9, and David, 5, are also avid Hawk basketball fans.

Dr. London and Dr. I. C. Middleman, surgeon for the baseball Cardinals, have been partners in the practice of general surgery for more than 10 years. Their partnership has a sports overtone, and the treatment of athletic injuries is an integral part of their practice.

"Newsboys" Raise $82

The old newsboys who worked at Jewish Hospital in the cold, rain and reckless driving, were able to earn $82 for the annual activity which donates funds to underprivileged children.

Those who participated included Mrs. Barbara Janes, chairman, Dr. Stanley Lang, Dr. I. C. Middleman, Dr. Ben Goldstein, William H. Chiles, Irwin Albrecht, Phillip Basin, Max Appel, Robert Hickok, Mrs. Sandra Howell, Mrs. Raya Koenigs, Miss Twick stern and student nurse: Miss Mary Brown, Miss Rebecca Campbell, Miss Angela Church, Miss Jane Craft, Miss Kathleen Crawford, Miss Linda Dalton, Miss Mary Dean, Miss Barbara Drake, Miss Karen Hahn, Miss Sharon Wells.

Help For Local Hero

Two members of the Jewish Hospital family participated in the recent award given to James Michael Sidwell, one of three youths who rescued three others from a flaming automobile recently. Mr. Sidwell was given an award for his heroism presented by Mayor Nathan B. Kaufman of University City, and many of the friends of Dr. Silvermintz. Miss Estelle Miller, who works in the hospital admissions office, alerted Dr. Silvermintz to the need for a scholarship for James, a 17-year-old student at the Junior College Florissant Valley campus. The City Council had recently adopted a resolution commending him, and the other two. They all received a $25 savings bond from the Sertoma Club of St. Louis.

Miss Miller, a neighbor of the Sidwells, suggested the possibility of a scholarship to Dr. Silvermintz; he then talked to 21 others, lawyers, doctors and a businessman. New Jersey has enough scholarship money for tuition and repairs on his car for transportation. (There is no public transportation from where he lives to Florissant.)

When Mr. Sidwell came to the scene of a three-car crash at North Lindberg boulevard and Natural Bridge Road, Bridgeport, he risked danger from the explosion of a gasoline tank in burning wreckage. Sidwell began to rescue them. He was joined by two others who saved a woman, her unconscious grand-daughter and a man, from possible serious injury.

Why?

"He just though that could be me," Miss Miller said. All three rescuers suffered minor burns, and Sidwell was treated for smoke inhalation.
