Morton J. May died, Life Long Hospital Patron

Morton J. May, a life member of the Jewish Hospital Board of Directors, died at the age of 86 at his home in Denver on July 17.

Mr. May had been a member of the board since 1914 and through the years had served as vice-president and treasurer.

Edward B. Greenfelder, president of the Board of Directors, said, “Morton J. May was a man of energy, vision and great concern for his fellow man. For 54 years he served on the Jewish Hospital Board of Directors as an officer and life member. He actively supported the programs at the Hospital by giving generously of his time as well as his financial support. In 1935, he recognized the importance of basic research, and established the Florence G. and David May Research Fund . . . for the purpose of research and support to be received by the Hospital.

The investigative work which was accomplished through this fund and has received national and international recognition.

“Mr. May was a key figure in obtaining building, research, and endowment funds for the Hospital. Morton J. May was dedicated to many civic and charitable activities . . . as a means of making a better community. He will be greatly missed by his many friends and associates.

Mr. May was a nationally known philanthropist and honorary life chairman of the May Department Stores.

He was the son of David May who entered the merchandising business in Leadville, Colorado, in 1876. From that modest beginning the May chain developed into one of the leading retail businesses in the country with stores in many American cities.

Born in Denver
Mr. May was born in Denver and the family moved to St. Louis in 1906 where, 12 years earlier, the elder May had acquired the Famous Co., a dry-goods store. In 1911, the William Barr Dry Goods Co. was acquired and consolidated with the Famous Co. to form the Famous-Barr Co.

After attending Riverview College in Pequannock, N. Y., and the University of Colorado, Mr. May went to work in a May store in Covington, Kentucky. In the age of 36, he took over the active direction of the May system. Mr. May turned over the majority of the company to his son, Morton D. May, in 1951.

Mr. May was the former Florence Goldman of St. Louis in 1909. In addition to Morton D. May, a daughter, Sarah Jane Waldheim, was born to them. Mrs. May died in 1938.

Yalem Research Building Dedication Held May 26

Formal dedication ceremonies for the new Yalem Research Building were held on Sunday, May 26, at 4 p.m., in the Mark C. Steinberg Memorial Amphitheater in the new facility. The nine-story, $2,600,000 structure was made possible by a $1 million gift from Charles H. Yalem, gifts from the community and a grant from the National Institutes of Health.

David A. Gee, executive director, served as master of ceremonies. The invocation was given by Rabbi Lawrence Siegel and guests were welcomed by Edward B. Greenfelder, president of the Hospital.

Elliot Key Speaker
Chancellor Thomas H. Eliot of Washington University, called St. Louis one of the truly great medical research centers of the country. He noted that such a center exists because of dedicated scientists, a high degree of institutional cooperation and great philanthropists.

“Among the happiest developments of the last few years have been not only the wonderful physical development of Barnes and all the other hospitals in this medical center, but the inclusion of the Jewish Hospital in the center’s formal organization, Washington University Medical School and Associated Hospitals.

“That this is far more than a formality is clear from the establishment through the generosity of Mr. and Mrs. John E. Simon and the Harry Edison Foundation, of the Washington University professional chairs whose incumbents are also the chiefs of the medical and surgical services at Jewish Hospital. All of us, proud and thankful for both the School and the Hospital, can rejoice in the increasing close inter-connection between the two.

“The great philanthropists have been among us for this half-century, and happily, one of the most outstanding of them is with us here today. Charles Yalem’s generosity has made the light to shine in many places in St. Louis, light that has brightened the lives of countless humble people.

“This Yalem Research Building is not just a magnificent addition to Jewish Hospital. It is Charles Yalem’s gift to people of all religions and races. And surely, while there will stand here for countless years this visible reminder of Charles Yalem’s philanthropy, it will be not as bricks and mortar, but as a source of human benefit that the Yalem Research Building will be known; that I know is the donor’s wish. I am sure that Washington University will do its part toward the fulfillment of that ennobling desire; I am sure that Jewish Hospital will make it come true.”

Other speakers were Dr. Stanford Wessler, physician-in-chief, and Dr. Arthur E. Baur, surgeon-in-chief. Dr. Wessler commented that the over-riding responsibility of the Hospital is to provide the best in patient care. “Yet”, he said, “the social and biological revolutions that are currently enveloping the medical sciences ultimately make sterile any program directed toward improving patient care alone. Maintenance of patient care at a high level today is facilitated by the hospital training of physicians at both the pre- and post-doctoral level and by the presence in the institution of physician-scientists who may help bridge the gap between molecular medicine and human illness. Hospital teaching and research, to be effective, require both a meaningful relationship with the University and an adequate physical facility for the pursuit of learning. This latter need has been in large measure fulfilled by the Yalem Building.”

(Continued on Page 4)
Mrs. Harry Milton, a member of the Jewish Hospital Board of Directors, has been appointed to a ten-member committee on hospital schools of nursing by the Board of Trustees of the American Hospital Association.

Mrs. Nadean Wright, R.N., director of Central Medical and Surgical Supply Service, attended the annual meeting of the National Association of Hospital Central Service in Atlanta recently where she was elected to the Board of Directors as chairman of the education committee.

Mrs. Barbara James, director of Community Relations, was recently elected to membership in the St. Louis Professional Chapter of Theta Sigma Phi, national society for women in journalism and communications.

Mrs. Phyllis Todd, R.N., was initiated into the Alpha Sigma Lambda Scholarship Fraternity in recognition of outstanding accomplishment at the University College of Continuing Education.

Rabbi Lawrence Siegel, Jewish Community Chaplain, recently wrote an article, "Reflections on Neo-Reform in the Central Conference of American Rabbis," which appeared in Volume 20, Number 1, of the American Jewish Archives.

William Chiles, personnel director, attended a seminar for directors of hospital personnel at the University of Missouri at Columbia presented by the University Extension Division, the School of Medicine and the School of Business and Public Administration in cooperation with the Missouri Hospital Association.

The Honor Roll for the first level students at the Jewish Hospital School of Nursing includes: Miss Joyce Boll, Miss Jeri Cobl, Miss Linda Eberle, Miss Sharon Eshen, Miss Sandra Huggins, Miss Janice Keckel, Miss Patricia Kegler, Miss Sally Lawy, Miss Claire Maruak, Miss Patricia Presley, Miss Darlene Rumber, Miss Janet Schroder, Miss Diane Spickett, Miss Susan Thompson, Miss Janice Toogliati, Miss Meridith Tregilton, Miss Leanna Walton, Miss Virginia Warzala and Miss Terry Zimmerman.

Miss Margaret Loh, R.N., director of Nursing, and Miss Laveran Ryder, R.N., director of the School of Nursing, attended the American Nurses Association meeting in Dallas, Texas, recently.

MRS. FRANCES STOVALL, director of Patient Relations, hands one of the personalized information brochures to a Hospital patient. The brochure includes a card with Mrs. Stovall's name and telephone number in the event the patient wishes to contact her at a later time.

The hostesses in the Hospital's Patient Relations Department are now decked-out in their new bright yellow uniforms and have been relocated in a more accessible area of the first floor lobby. Mrs. Frances Stovall, director of patient relations, said, "The move will greatly facilitate our job. It will be much easier for the families of patients to find us, and we will be better able to meet patients upon their arrival at the Hospital!" The patient relations desk has been located immediately across from the new admitting area, adjacent to the information desk.

"The Hospital patient relations program is directed toward orienting patients to Hospital procedures, and providing immediate assistance and information concerning any problems which patients may encounter.

In describing her job, Mrs. Stovall said, "Our goal is to establish a communications link between the patient and the many personnel who will be attending to his needs."

"We want the patient's stay in the Hospital to be as pleasant as possible, and we want them to know that we are all working for one thing... their recovery and a quick return home.

"Mrs. Stovall and Miss Phyllis Rubin make regular visits to patient rooms. Small individualized brochures have been prepared for each of the hostesses and are left with the patient. They provide general patient information and the name and telephone number of the Patient Relations office (station 277). The brochures are color coordinated with the uniforms.

In addition to her regular duties each day, Miss Stovall attends patients in the X-Ray department.

Weekend coverage for the program is provided during the summer months by Miss Marsh DeMere who has served as a hostess for the past several years.

Nursing Intern Program Begins

A nursing intern program is being conducted throughout the summer months for graduates of university and junior college nursing programs in the state of Missouri.

Miss Margaret Loh, director of Nursing, said, "This program, three months in length, will allow these nurses to develop their skills in a supervised service environment.

The nurses will spend one month each in surgery and medicine and one month in pediatrics.

Those graduates participating in the program are: Miss Sue Ellison and Miss Nina Westhaus, both graduates of St. Louis University; Mrs. Christine Feudo and Miss Rosemary Francois, both graduates of Forest Park Community College; and Mrs. J. M. Prather, a graduate of Northeast Missouri State Teachers College in Kirksville, Missouri.

Patient Relations Hostesses Decked Out in New Uniforms

The album title, "I've Come Across the Sea," is descriptive of Dale's flight to freedom during the attempted Hungarian Revolution in 1956.

All of the songs in the album were written by the chief electrician. Most of the titles relate to the sea. Dale said, "I love the sea. I attempted the whistling on a few of the songs while awaiting the arrival of the new recorder."

Those who have heard the album are certainly impressed. All of his selections feature a powerful wide-ranging piano. These pieces featuring his whistling are among the best and are as professional as any available on the general record market.

His performance on the piano is particularly amazing when one learns that he started with that instrument only six years ago in the Jewish Hospital School of Nursing auditorium. His formal music education ended when he gave up on the violin at age 12 in Budapest.

Dale credited Joe Bakkalor of the Stradivarius Supper Club in St. Louis with providing the encouragement necessary to go ahead and complete his album.

Hospital Electrician Records LP Album

Dale Attila Fogarasi, chief electrician at Jewish Hospital, has joined an exclusive group of people...those who have recorded their own record album.

The album, "I've Come Across the Sea," is a trial effort to see what people think. I only had 30 copies made and gave most of them away to "friends," said Dale.

"The reaction has certainly been encouraging. In fact, I'm going ahead with plans to make a regular release later this year. I've completed in January, is really a trial effort to see what people think. I only had 30 copies made and gave most of them away to "friends," said Dale.

"The reaction has certainly been encouraging. In fact, I'm going ahead with plans to make a regular release later this year. I've ordered a professional model recorder and I'm touching up a few of the songs while awaiting the arrival of the new recorder.

Those who have heard the album are certainly impressed. All of his selections feature a powerful wide-ranging piano. These pieces featuring his whistling are among the best and are as professional as any available on the general record market.

His performance on the piano is particularly amazing when one learns that he started with that instrument only six years ago in the Jewish Hospital School of Nursing auditorium. His formal music education ended when he gave up on the violin at age 12 in Budapest.

Dale credits Joe Bakkalor of the Stradivarius Supper Club in St. Louis with providing the encouragement necessary to go ahead and complete his album.

Dale Attila Fogarasi, chief electrician, shows the cover of his limited edition album which he recorded early this year. Dale recorded the album on the tape recorder in the background, which he constructed himself.
Dr. Arnold Goldman Returns; Describes Care in Vietnam

Arnold M. Goldman, M.D., a member of the Jewish Hospital Medical Staff, recently completed his military duty in Vietnam and has returned to private practice in St. Louis. Prior to entering the service in May, 1966, Dr. Goldman had been practicing medicine privately for three years.

Dr. Goldman had been assigned to the 53rd Evacuation Hospital with me. He completed the remainder of his first year of service at the base hospital at Fort Belvoir, Virginia. On May 1, 1967, he was assigned to the 93rd Evacuation Hospital located 18 miles northeast of Saigon at Long Bihn. While serving in Vietnam, Dr. Goldman was awarded the Bronze Star Medal.

The following is an interview with Dr. Goldman by the editor of the "216" concerning medical care rendered by the Armed Services.

Q: What is the quality of medical care rendered by the Armed Services?
A: I think the quality is excellent. Most of the doctors in Vietnam were well trained people with several years of experience. I think my medal was in recognition of performing one's duty.

Lois Tureen, M.D., Dies; Noted Author, Neurologist

In 1933 he became an assistant professor of clinical neurology at Washington University. Dr. Tureen held various positions with the Barnes, Homer G. Philips and Malcolm Bliss hospitals in the 1930s and 1940s. At the time of his death, he was staff neurologist at St. Mary's Hospital, a member of the neurological staff at the St. Louis University Hospitals, an active member of the Cardinal Glennon Children's Hospital staff and an attending neurologist at Jewish Hospital.

The third edition of "The Care of the Neurologist" was published in 1947. Dr. Tureen had been a member of the Neurological Society and the American Psychiatric Association. He was elected a fellow in the American Psychiatric Association in 1947.

Dr. Tureen was a member of the American Psychiatric Association, the American Academy of Neurology, the American Academy of Cerebral Palsy and the American Medical Association.

Arnold M. Goldman, M.D., was awarded the Bronze Star Medal for his service in Vietnam. Here he displays the certificate which accompanied the medal.

Louis Tureen, M.D., attending neurologist in the Division of Neurology, Department of Medicine, at Jewish Hospital, died June 18, following a long illness.

Dr. Tureen was professor and chairman of the neurology section of the St. Louis University School of Medicine and a leader in multiple sclerosis and muscular dystrophy research. He was the author of more than 50 scientific papers and was one of several doctors in this country doing research on the causes of multiple sclerosis.

He was a graduate of the Washington University School of Medicine and was an assistant in pathology there in 1927-28. After completing his medical internship, he entered private practice in 1930.
EDWARD B. GREENSFELDER, president of the hospital, signs the guest book for the Yalem Building dedication.

(Far Right) DR. STANFORD WESSLER, physician-in-chief, described the research that is being done by the Department of Medicine in the new facility.

MR. YALEM's SON, Richard (left) and daughter, Mrs. Joseph Kutten (center), pose with Mr. Yalem and his photograph which was unveiled. The Charno portrait was hung in the lobby of the building.

MR. AND MRS. YALEM visit the laboratory of Dr. Rex Jamison, director of the Renal Division, Department of Medicine. Miss Betty Nash, a technician from the Human Development Corporation, is in the foreground.

SEVERAL HUNDRED GUESTS in attendance sampled the delicious hors d'oeuvres prepared by Boris Axelrod of the Jewish Hospital Food Services Department.

Yalem Research Building is Dedicated

(Continued from Page 1)

"Hospitals in 1968 must develop and sustain scientific inquiry in the care of the sick or lose their effectiveness," said Dr. Baue. "Mr. and Mrs. Yalem have very generously made this choice with the Jewish Hospital in providing this magnificent structure in which we are gathered." Dr. Baue continued, "Recent exciting events in the transplantation of organs have stirred our imaginations and suggested a new threshold in man's ability to treat disease." Dr. Baue noted that part of the new building is being used for transplantation studies which should form the basis for further progress in the transplantation of organs in man.

Special features of the dedication included the unveiling of a portrait of Mr. Yalem and a unique ribbon-cutting ceremony. Against a back-drop of color slides of the building, Mr. Yalem cut the ribbon, symbolizing the formal opening of the new facility.

In response to tributes paid him by the speakers, Mr. Yalem said: "I am deeply grateful for the privilege of participating with you in the dedication ceremonies for the Jewish Hospital research center. It is particularly appropriate that the dedication is taking place in the spring season. This occasion is much like a college commencement — it marks the completion of an important task, but it also marks a beginning of a new and more significant work in the future. Seeing the building completed is a culmination of the plans and efforts of many, among them Joseph Ruwitch, who served devotedly as president of the Hospital and played a dominant role in developing plans for the new research building.

"To the members of the board, to doctors, nurses, staff — to all who've given time, energy and resources to achieve this goal — I express my heartfelt gratitude. Let us now look forward to the beginning of the work, to medical research and training which will meet the future needs of our community and the entire world."

Tours of the laboratories and refreshments concluded the afternoon's activities. Arrangements for the dedication were made by the newly-formed organization, The Associates of the Jewish Hospital of St. Louis.
THE DEDICATION CEREMONIES were held in the Steinberg Amphitheatre on the ground floor of the new building.

MRS. STANLEY M. COHEN, president of the Jewish Hospital Auxiliary, pins a corsage on Mrs. Yalem prior to the dedication ceremonies.

THE ASSOCIATES OF JEWISH HOSPITAL, who handled the arrangements for the dedication, and the Hospital Board of Directors presented Charles H. Yalem with a birthday cake honoring his 75th birthday, May 27.

MRS. STANLEY M. COHEN, president of the Jewish Hospital Auxiliary, pins a corsage on Mrs. Yalem prior to the dedication ceremonies.
The Jewish Hospital has announced the names of fifty-eight physicians and dentists appointed to its House Staff for 1968-69. Thirty of the doctors are new to the Hospital this year. The new interns and residents assumed their duties on July 1.

Medical School: George Washington University  
Family Status: Single  
Position: Resident, 3rd Year

Name: Stephen M. Patz  
Department: Administration  
Place of Birth: Pittsburgh, Pennsylvania, March 6, 1943  
College: University of Pittsburgh  
Medical School: University of Pittsburgh  
Family Status: Single  
Position: Administrative Resident
Student Nurses
Wind Up a Busy Spring

Cardinal Baseball

"NURSES ARE MY FAVORITE PEOPLE," said Cardinal manager Red Schoendienst as he signed autographs for a group of Jewish Hospital senior nursing students after a recent game. The nurses, quite flattered, chanced back to Red, "Well, ballplayers are our favorite people." The students, clustered about manager Schoendienst, left to right, are Miss Susan Barnett, Miss Mary Diekmann, Miss Nancy Kubrik and Miss Janet Hopkins. The senior class was entertained by the Hospital Nursing Committee at Trader Vic's prior to the game.

Basketball Champions

THE JEWISH HOSPITAL SCHOOL OF NURSING BASKETBALL TEAM won their second consecutive basketball championship in the St. Louis Nursing Schools' League recently. The undefeated team is pictured above: (back row, left to right) Carolyn Widdows, Antoinette Klapp, Vicki Carson, Patricia Kegler, Kathleen Hagan and Patricia Hogan; (front row, left to right) Diana Spickett, Claire Maruska, Carol Singleton, Jane Higgins and Diedre Knight.

Spring Dance

"NURSES ARE MY FAVORITE PEOPLE," said Cardinal manager Red Schoendienst as he signed autographs for a group of Jewish Hospital senior nursing students after a recent game. The nurses, quite flattered, chanced back to Red, "Well, ballplayers are our favorite people." The students, clustered about manager Schoendienst, left to right, are Miss Susan Barnett, Miss Mary Diekmann, Miss Nancy Kubrik and Miss Janet Hopkins. The senior class was entertained by the Hospital Nursing Committee at Trader Vic's prior to the game.

Officers Installed

MISS CHRISTY HENSON, daughter of Mr. and Mrs. Otis Henson of 2340 O'Hare Avenue, Granite City, Illinois, was elected Senior Queen of the School of Nursing's Spring Formal. Miss Henson's escort is Bill Landolt of St. Louis.

Judo Class

MISS LINDA BYRNE, freshman at the Jewish Hospital School of Nursing, practices a judo maneuver with Harry Peacostad, a police academy student and holder of the brown belt, during a judo class held at the School of Nursing.
Major Research Fund
Plaques Established in
Yalem Research Building

FIRST FLOOR: Lawrence K. Roos, (left) St. Louis County Supervisor, and David A. Gee, executive director, are shown with the plaque commemorating the Selma K. Roos Fund for Research. This endowment fund, established by Sol Roos, has provided vital support for many research projects. Unable to be present for the picture were John J. Roos and Mrs. Michael Freund of Coronado, California.

SECOND FLOOR: Mrs. Gustav L. Harris and Edward B. Greensfelder, president, stand by the plaque commemorating the Gustav and Jean F. Harris Research Fund. The endowment fund was established through a bequest from the estate of Mr. Harris. In addition to the Research Fund, Mr. Harris gave the Hospital a gift of $25,000 in memory of his father, Benjamin Harris.

THIRD FLOOR: Sydney M. Shoenberg, Jr. and John M. Shoenberg view the plaque commemorating the fund established by the Shoenberg family in memory of their mother, Stella H. Shoenberg. This important fund will provide annual support for medical research in thrombosis and clotting under the direction of Stanford Wessler, M.D., physician-in-chief. Unable to be present for the photograph were Sydney M. Shoenberg, Sr. and Robert H. Shoenberg.

FOURTH FLOOR: (Left to right) Julian Simon, Mrs. Herbert Simon, Mrs. Ira Simon and Edward B. Greensfelder are shown with the plaque established in recognition of the Ira and Herbert Simon Fund for Research. This important memorial endowment has provided support for research projects in psychiatry, obstetrics and gynecology, and other activities. Julian Simon is the brother of Ira and Herbert Simon.

MRS. BARBARA JANES, (left) director of Community Relations, accepts a check for $1,500 from Mrs. Lester Klauber, president, The Ben A'Kiba Aid Society, at the organization's Annual Donor Luncheon, May 16, at the Chase Park Plaza. The gift will be used to purchase recreation equipment and supplies for the Ben A'Kiba Recreation Center in the Jewish Hospital Department of Rehabilitation. William H. Kahn, executive director of the Jewish Community Center Association, looks on.

MRS. SAM PEARL, (left) donor luncheon chairman, and Mrs. Jacob Mellman, projects chairman for the Noahim Rachmonot Mothers and Babies Welfare Society, present three checks amounting to $2,100 to Robert Burstein, M.D., Department of Obstetrics and Gynecology. The gifts are for support of research activities in the department, purchase of a Kreiselman Baby Warmer and a Watson Delivery Table. Also present at the luncheon was Bernard Schwartzman, M.D., Department of Pediatrics, who accepted a check for $895 to purchase a Sierracin Cradle Warmer for the nursery.

HYMAN SENTURIA, M.D., (left) director, Department of Radiology, explains the operation of the electroencephalograph to Mr. and Mrs. Arthur A. Scharff, Jr., who donated the instrument to the Hospital. The device utilizes ultrasonic waves to detect brain damage caused by tumors and other lesions in the brain. The portable instrument can be moved to the patient's bedside and is also adaptable for use in the departments of Ophthalmology and Obstetrics.

Graduation Set

CANDY STRIPER CHAIRMEN OF THE DAY are a new feature at Jewish Hospital this summer. Seven selected Candy Stripers serve one day each as a liaison between the young volunteers and the volunteer office. Pictured above are chairmen (left to right) Miss Terry Winter, Miss Kay Haley and (center) Miss Helene Wise. The other chairmen, available for the photograph, are Miss Terri Bosch, Miss Pam Rosenkoetter, Miss Sandy Soli and Miss Gale Courtney.

Dr. Baue, Surgeon-in-Chief, Develops Heart Massager

Arthur E. Baue, M.D., surgeon-in-chief at Jewish Hospital, is a co-developer of a new mechanical heart massager. The device has revived eight persons declared dead after conventional means of heart massage had failed.

Dr. Baue also is a professor of surgery at the Washington University School of Medicine, says his mechanical device is now ready for possible use in reviving a person whose heart has stopped beating or for preserving organs which might be used for transplantation.

"The normal way to revive a person whose heart is stopped is by massaging his chest or making an incision and massaging the heart directly. This new device is simply a better means of resuscitating a man after his heart had stopped."

"The usual method can be tried anywhere by anyone with two hands," he said. "The new machine is much more effective, however, in maintaining a more normal blood pressure and also the amount of blood the heart pumps per minute."

Dr. Baue began developing the device about three years ago while working at the University of Pennsylvania School of Medicine with Dr. George Anastadis, who is now associated with the School of Aerospace Medicine in San Antonio, Texas.

"Many tests were run with animals, and about one year ago, we began to use the device on humans," Dr. Baue said.

"We used it on the first eight as a last resort. We tried the conventional methods of heart massage on each of them first and that failed. Each of the eight was an irreversible case."

Dr. Baue said that in the cases of seven of the first eight patients the person died as soon as the device was removed from the heart. However, a 49 year old woman whose heart had stopped was attached to the machine for an hour. When the machine was removed, the heart continued beating and the woman lived for one week.

The device, which fits over the heart ventricles, is a small glass cup about the size of a softball. The inside of the device is lined with plastic which is inflated in a balloon-like manner and squeezes the heart. Two air hoses link the device to twin pumps, which drive air into and out of a small space between the plastic lining and the inner wall of the glass.

May and Monheimer Funds Are Endowed

Florence G., Morton J. and David May Memorial Research Fund

The Florence G. and David May Research Fund, which Morton J. May, established at Jewish Hospital in 1933, has been converted to a permanent endowment, to be known as the Florence G., Morton J. and David May Memorial Research Fund.

The annual income from this fund will be used by the Director of the Department of Surgery for surgical research.

Mr. and Mrs. Morton J. May were the first persons to step forth in the community with support for research activities at Jewish Hospital. Mr. May's interest and enthusiasm for research was evidenced through the years by his continuing support of this fund. Dr. Probstein has served as trustee for the fund which was used in conjunction with the Monheimer Fund for research activities.

Persons wishing to make a memorial tribute to Mr. May can contribute to the fund, which was used in support of seven of the first eight patients.

Dr. Probstein has served as trustee for administrative services; Mrs. Josephine Kaiser, R.N., is the assistant director of Nursing.

Nursing Department Title Reorganization

Miss Margaret Loh, R.N., director of Nursing, has announced the appointment of Mrs. Virginia Haynes as assistant director of medical nursing.

New titles for other members of the department have been announced.

Mrs. Virginia Reiisinger, R.N., is assistant director of nursing for administrative services; Mrs. Hazel Burford, R.N., is assistant director of nursing for long term care.

Mrs. Josephine Kaiser, R.N., is the assistant director of In-Service education and recruitment, and Miss Laverda Ryder is assistant director of nursing and director of the School of Nursing.

Retirement Plan

(Continued from Page 1)

employee dies before receiving 60 monthly payments, the balance of the 60 payments will go to a designated beneficiary.

Retirement benefits are based upon the employee's earnings and the number of years employed. Employees will receive credit for each full year of continuous service from their date of eligibility to July 1, 1968, plus credit for future continuous service. An authorized leave of absence will not break the continuity of employment.

The normal retirement age is 65. However, employees may retire as early as 55, provided they have completed fifteen years of employment. Benefits are reduced if early retirement is elected.

Retirement may be postponed with the consent of the Hospital. Benefits do not accrue after age 65 and payments are deferred until the date of actual retirement. The benefits from the Hospital retirement plan are, of course, in addition to Social Security benefits.

Additional details of the plan will be published in a booklet soon to be distributed to employees.
