Mrs. Goldenberg Named Volunteer Director

Mrs. Sidney Goldenberg has been named Director of Volunteer Services at the Hospital.

In her new capacity Jan Goldenberg will coordinate and supervise the volunteer program in the Hospital to augment the services of the regular Hospital staff. She will serve as liaison between the Auxiliary and the Hospital staff in the Volunteer Program. Her responsibilities include recruitment, orientation and assignment of all volunteers. Approximately 500 volunteers are presently assigned to 40 projects throughout the Hospital.

A long-time member of the Hospital Auxiliary, Mrs. Goldenberg is also a member of the Council of Jewish Women and Hadassah. She has been on the boards of Miriam Lodge and the Miriam School and is currently on the Temple Emanuel board and vice president of the Temple Women's Club.

Mrs. Goldenberg received her bachelor of arts degree and a B.S. degree in elementary education from the University of Minnesota, Duluth.

MAY 16 DEDICATION CEREMONY SET FOR SHOENBERG PAVILION

Barring any last minute construction delays, the nine-story Sydney M. Shoenberg Pavilion will be dedicated on May 16. The coincidental timing links the new building with other important events in the Hospital's 74-year history. On May 16, 1901, a cornerstone ceremony was held to commemorate the construction of the first Jewish Hospital. On May 16, 1972, the Cornerstone Ceremony for the Shoenberg Pavilion was held.

The Pavilion will provide 180 new beds (100 are additional, 80 will replace present beds). It will also provide urgently needed space for a new radiology suite, a new surgical operating suite, additional clinical laboratories and more efficient admitting facilities. For the public's convenience, a new main entrance and a lobby has been constructed between the Pavilion and the parking garage. The double driveway can be entered from Forest Park Boulevard or Parkview Place.

Stanley M. Richman chairs a committee working out details for the Dedication Ceremony which will be in the new front entrance of the Hospital. Following a ribbon cutting ceremony, donors and other invited guests will tour the new building and attend a reception.

Other activities surrounding the actual dedication day are being planned. The Hospital, in conjunction with Washington University School of Medicine, the National Heart and Lung Institute and the Council on Thrombosis of the American Heart Association will sponsor an International Symposium on Heparin May 13-15. Leading Heparin authorities will be featured speakers at this prestigious conference. Co-chairmen are Dr. Stanford Wessler, Physician-in-Chief, Jewish Hospital, and Ralph A. Bradshaw, Ph.D., Associate Professor of Bio-Chemistry, Washington University Medical School.

Following the May 16 Dedication, Dr. Arthur E. Baue, Surgeon-in-Chief of the Hospital, Dr. Jerry Meyers and Dr. Thomas Covey are chairing a two-day post graduate course for local, out-state Missouri and Illinois physicians. The faculty, comprised of specialists on the Jewish Hospital Medical Staff, will discuss "Good Medical Practice 1974".

At the January Board meeting, Dr. Leo A. Sachar, president of the Medical Staff Association, left, presents a tribute in the form of a certificate of appreciation to Edward B. Greensfelder, retiring president of the Hospital.

$1.2 Million In Free Care

Jewish Hospital rendered $1.2 million in free care during 1973. To partially offset these expenses, the Hospital received $188,000 from the Jewish Federation and $114,000 from United Fund. During the year approximately 16,300 patients were admitted; 1,500 babies were born, and there were an estimated 42,000 patient visits to the clinics and emergency room. Approximately 630,000 laboratory tests and 61,000 radiologic procedures were performed.

The Hospital occupancy rate was 91.8 for 1973 as compared with 86.4 in 1972. Occupancy in Medicine increased from 85.8 in 1972 to 94.1 in 1973, while occupancy in Surgery increased to 98.0 in 1973 from 89.3 the previous year.
Liberman New President, Two Elected To Board

At the January meeting of the Hospital Board of Directors Lee M. Liberman, president of Laclede Gas Company, officially assumed his duties as president of Jewish Hospital, succeeding Edward B. Greensfelder who has served in this capacity since 1968.

Other officers re-elected include: vice presidents, Mrs. Morton D. May, Stanley M. Richman, Edwin G. Shifrin and Elliot H. Stein; secretary, Norman Bierman; and assistant treasurer, Elliot H. Stein. Harold Blatt was elected treasurer. Edward B. Greensfelder was elected to Life Membership during the meeting.

Lee Liberman received his chemical engineering degree from Yale University. He joined Laclede Gas as an engineer in 1945 and was named president in 1970. He has maintained an active interest in the community and serves as a director for the Boy Scouts, Downtown St. Louis, the United Fund, Webster College, Junior Achievement, the Arts and Education Council and the Family and Children's Service.

Liberman also serves as director of Laclede Gas, Permaneer Corporation, Boatman’s Bank and the American Gas Association. He and his wife, the former Jeanne Hirsch have three children.

New Board Members

The Board also elected Stanley N. Hollander and Harlan Steinbaum to membership.

Stanley Hollander is president of Hollander and Company, Hollander Distributing, Springfield, Missouri, Merrick Machinery Company and Brian Industrial Truck Company.

Hollander, a graduate of Massachusetts Institute of Technology, is a member of the M.I.T. Club of St. Louis, the Young Presidents Organization and serves on the board of Temple Israel. He is a Mason and a Shriner and has held various positions within the Jewish Federation.

Hollander and his wife, the former Joan Feld, have three children.

Harlan Steinbaum, president, Medicare Division, Pet Incorporated, attended Wharton School of Finance and Commerce and graduated from Tulane University with a degree in business administration. Formerly president of Glaser Drug Company, he was named corporate vice president of Pet Incorporated in 1973.

Steinbaum serves on the boards of St. Louis Blues National Hockey League Team, Affiliated Drug Stores Association of New York, the St. Louis Business Resource Center, Temple Israel and the Jewish Center for Aged. He is also a member of the Young Presidents Organization. Steinbaum and his wife, Jo Ann Glaser Steinbaum, have three children.
The Fight Against Bone Disease

"Osteoporosis in the early post-menopausal and elderly female is probably the most disabling, frequently occurring and socially costly metabolic disease in the country." That's the general consensus of the internationally renown metabolic bone group conducting current investigations at Jewish Hospital.

Headed by Dr. Louis V. Avioli, Shoenberg Professor of Medicine at Washington University and Director of Endocrinology and Metabolism, Jewish Hospital's team of pathologists, internists researchers and orthopedic surgeons are involved in a joint effort dedicated to solving the mysteries of this bone disorder and how it relates to other metabolic disorders of the skeleton.

To date they have accumulated considerable evidence that bone disease which is usually called "osteoporosis" by radiologists, orthopedic surgeons and internists, actually represents a variety of disorders.

These observations have been aided by (1) the introduction of bone densinometric analysis, presently ongoing in the Department of Radiology; (2) the development of simplified bone biopsy procedures which can be performed under local anesthesia; (3) the acquisition of specialized equipment by the pathology laboratory to process these small bone biopsies; and (4) the availability of highly specific vitamin and hormone assays in the endocrine division of Jewish Hospital.

In addition there is presently a coordinated effort in bone research and in the treatment of a variety of skeletal disorders at Jewish Hospital which encompasses the Departments of Radiology and Pathology, and the Endocrine-Metabolic and Nephrology Divisions of the Department of Medicine. This group is coordinated by Dr. Avioli and presently enjoys a well-established reputation in this field on the national and international scene.

Dr. Steven Teitelbaum and Margaret Bates, technologist.

Currently Jewish Hospital is one of two or three institutions in the country with the expertise to perform a bone biopsy under local anesthesia. "The normally painful operation of a bone biopsy is now essentially painless, can be done on an outpatient basis and allows the patient to walk home," says Dr. Steven Teitelbaum, associate pathologist.

The bone biopsy is done with a specially designed biopsy needle which takes a core of bone out of the ilium (hip bone). The Jung Sledge Microtome, a new machine in the Pathology Department, can then cut this core into sections of bone thinner than tissue paper. "Using this machine we cut the bone without having to make it soft by removing the mineral," says Dr. Teitelbaum.

These thin slices of bone can then be studied for abnormalities in mineralization of the bone. These techniques enable the physician to diagnose early and unusual forms of bone disease and to follow the effects of therapy.

As a consequence of its interest and work in metabolic bone disease, the Jewish Hospital bone group receives bone specimens for diagnosis from throughout the country.

Dr. Louis V. Avioli, Dr. J. Michael Bone, Dr. Herbert Lubowitz, Director of Nephrology, Dr. Jean Russell, Dr. Steven Teitelbaum and Mrs. Vincenza Boisseau have recently undertaken a research project on the type of bone disease which occurs in patients with renal failure, known as renal osteodystrophy. When this condition is fully developed, patients experience bone pain, break bone more easily and develop spinal deformity.

Unfortunately renal osteodystrophy is one aspect of chronic renal failure which is not corrected by dialysis. In fact, it can become worse despite adequate treatment with the artificial kidney machine.

The group of physicians involved in this project are studying patients on dialysis at Jewish Hospital. A parallel study is also being carried out in experimental animals by Dr. Jean Russell, a biochemist in the endocrine division. The disease is difficult to detect at an early stage, but is nonetheless present in most patients who require dialysis treatment.

"We hope to start treatment when the patient first comes to the Hospital with severe renal failure,"
Dr. Avioli says Dr. Bone. The sophisticated facilities and equipment at Jewish Hospital such as the Jung Sledge Microtome for processing bone biopsies, will greatly facilitate the early detection of this condition and enable the physician both to select the right treatment and also to assess its effectiveness.

A recent discovery at Jewish Hospital involves osteogenesis imperfecta, a congenital bone disease which usually appears in childhood but is also seen in adults. This debilitating disease causes repeated fractures and crippling in these children resulting from deformities of legs, the spine and arms.

"By examining the bones of these children, we have discovered what the structural abnormality of the bone is — it's associated with an abnormality in the bone collagen (fibers)," says Dr. Steven Teitelbaum. "We are now working on identifying the biochemical abnormality which causes the disarranged collagen fibers and how the collagen defect is related to the skeletal pathology in general."

Previous studies by other investigators have suggested that there is increased rate of bone turnover in osteogenesis imperfecta. The Jewish Hospital team of investigators, under the directorship of Dr. Avioli, has been assessing possible clinical benefits from the use of the drug calcitonin. This drug has been successfully used by this team in the past in the treatment of Paget's disease which is also characterized by increased bone turnover.

Preliminary review of the data obtained in ten patients with osteogenesis imperfecta shows improvement in bone density (amount of mineral content in the bone) following treatment with calcitonin.

The use of cortisone and cortisone derivatives has become a mainstay in the treatment of a number of chronic disabling disorders, including rheumatoid arthritis, severe asthma and a variety of other disorders of the immune system. There are currently several million patients in the United States undergoing treatment with cortisone or its derivation for various diseases.

However, although these compounds have proven very useful in treating these disorders, they result in a number of potentially serious side effects, including the production of often severe bone loss with an increased risk of bone fractures. It is not unusual for patients to have a loss of 30-50 per cent of their bone mass after several years of high-dose cortisone treatment.

The bone research team here at Jewish Hospital has also been intensively investigating the cause of cortisone-induced bone loss and has developed what may prove to be an effective treatment for this complication.

Dr. Theodore Hahn, a spokesman for the group, states that based on findings in humans and animals treated with cortisone, it appears that cortisone directly blocks the activity of the bone forming cells and also decreases intestinal absorption of calcium from the diet. The resultant calcium deficiency further reduces bone formation and produces secondary hormonal changes which increase bone breakdown.

The treatment regimen designed by the bone research team employs large controlled doses of vitamin D and calcium supplements to counteract the calcium deficiency and reverse the secondary hormonal changes. Preliminary results from a group of 30 patients treated with this regimen indicate that bone mass can be increased by as much as 25-30 per cent over a six-month period, thereby greatly decreasing the risk of bone fracture in cortisone-treated patients.

Currently the group is studying the effect of more potent vitamin D derivatives in an attempt to find an optimal treatment program that will rapidly reverse most or all of the cortisone-induced bone loss. If their attempts succeed, one of the most crippling side effects of chronic cortisone treatment will become a thing of the past.
Murray Chinsky, M.D., was elected secretary treasurer of the St. Louis University Hospital’s medical and dental staff for a one-year term.

Stephen Lefrak, M.D., spoke on “Influenza and Upper Respiratory Infections” on KMOX radio’s At Your Service program.

Jerome J. Gilden, M.D., spoke on “Immediate Post-Operative Prostheses and Rehabilitation of Amputees,” and “Total Joint Replacement” at a Rehabilitation Nursing Seminar course for R.N.’s and LPN’s at Jewish Hospital. He also attended a symposium on “Current Status of Total Joint Replacement” produced by the American Academy of Orthopedic Surgeons and the University of Miami School of Medicine, and a symposium on “Amputation Surgery Prosthetics, Othotics and Fracture Bracing” at the Tenth Annual Post-Graduate Course sponsored by the University of Miami School of Medicine, the National Academy of Sciences and the Veterans Administration.

Nathan M. Simon, M.D., spoke on “Principles of Individual Counseling” at a training session of the Heart Attack Prevention Project in Baltimore in December.

Sam Frankel, M.D., spoke on “Thyroid Function Tests” at the Fourth Congress of the Association of Clinical Laboratories in Columbia, South America in December. He also participated in a panel discussion on “Current Trends in Clinical Laboratories” with laboratory directors of South America at the same Congress.

Robert M. Senior, M.D., has been selected as the Pulmonary Editor for the Journal of the American Medical Association.

Morton Levy, M.D., has been appointed Associate Medical Director of the Missouri-Illinois Regional Red Cross Blood Program.

Doris C. Gilpin, M.D., has been appointed Associate Director of the Washington University Child Guidance Clinic.

Renate Doehn-Weisman, M.D., attended a Central Association of Obstetrics/Gynecology meeting in Scottsdale, Arizona in October.

John Michael Bone, M.D., presented a paper, “Adverse Effect of Heparin in Glomerulonephritis” to the American Society of Nephrology in Washington, D.C., in November.

Kenneth L. Russ, Ph.D., spoke on “Smoking and Habits” to the Lung Association in November. He also attended a meeting of the Association for Advancement of Behavior Therapy in Miami in December.

Morton Levy, M.D., has been appointed Associate Director of the Missouri-Illinois Regional Red Cross Blood Program.

Renate Dohm-Weisman, M.D., has been appointed to the Advisory Laboratory and Clinical Aspects.

Leonard Newmark, M.D., has written a chapter on “Streptococcal Disease” in a book, Infectious Diseases edited by Joseph Marr, M.D.

Calvin Weiss, D.D.S., Director, Dentistry, has been appointed 1974 chairman of the Committee on Hospital Dentistry of the Greater St. Louis Dental Society.

Sol Londe, M.D., co-authored a chapter on “Hypertension and Hypotension” in Current Pediatric Therapy, No. 6.

Alex C. Sonnenwirth, Ph.D., is the editor, and also an author of a chapter, of the recently published book, Bacteremia: Laboratory and Clinical Aspects. Dr. Sonnenwirth also presented two seminars on “Yersinia, Aeromonas and Vibrio” at the Course on Advances in Medical Microbiology at the Bronx-Lebanon Hospital in New York in October.

Ervin Lipschitz, M.D., has been appointed to the Advisory Council on Junior and Community Colleges of the American College Health Association and representative of the Council to the Mental Health Section.

Rose E. Boyarsky, Ph.D., spoke on “Dual Sex Rapid Therapy” to the Quebec Urological Association at Sherbrooke, Canada in October. She also participated in a day-long panel on “Marital Therapy and Sexual Function” at a residents’ meeting at the University of Sherbrooke.

J.G. Probstein, M.D., spoke on “Injuries to Hockey Players During the Game” to the Missouri Chapter, American College of Surgeons at Columbia, Missouri in June.

Stanley B. Lyss, M.D., attended the American Academy of Pediatrics meeting in Chicago in October. He has been named to the Joint Medical Advisory Committee at Washington University Medical School and to the Executive Committee of St. Louis Children’s Hospital Medical Society.

Samuel D. Soule, M.D., Co-Director, Obstetrics/Gynecology, attended and participated in the meeting of the Central Association of Obstetricians and Gynecologists at Scottsdale, Arizona, in October. He presented data concerned with the association of thromboembolic vascular disease and pregnancy.

Dr. Soule also attended the annual meeting of the International Family Planning Research Association, Inc., at LaCosta, California in October.
Amid much excitement and apprehension, the 70th Commencement Exercises of the Hospital's School of Nursing took place January 10, ending a long course of study and training for 90 graduating seniors.

The Thursday evening ceremony at Temple Israel opened with an invocation by Rabbi Alvan D. Rubin. A performance by the student choir followed. David A. Gee, executive vice president, presided, and Anne Marie Becker, R.N., M.S., assistant professor, School of Nursing, St. Louis University, was the featured speaker. Eileen Gerard Grant, a member of the graduating class, was chosen by her classmates to address the senior class.

Lavera Ryder, R.N., Director, School of Nursing, presented members of the 1974 graduating class to Edward B. Greensfelder who awarded the diplomas in his last official act as Hospital president.

Miss Lynn Eggert and Miss Karen Gutting are the 1974 recipients of the two top scholarship awards. Miss Eggert, daughter of Mr. and Mrs. Robert L. Eggert, received The Jewish Hospital Auxiliary Scholarship of $1,000 which is presented annually to the student ranking highest in the graduating class. It is based on scholastic standing in theory and practice, personality and potential for growth and development in nursing.

Miss Gutting was awarded the $500 Hattie Waldheim Scholarship as the student ranking second in the class. She is the daughter of Mr. and Mrs. Alvin Gutting.

Three Franc Honor Awards were also presented. Miss Linda O'Loughlin received a $100 savings bond given annually to the student who ranks first in the class at the completion of the first level courses. She received a Gold Key in recognition of her achievement.

A $25 savings bond was presented to Miss Gail Schenk for outstanding kindness and consideration shown to patients.

Miss Linda Zinser also received a $25 savings bond as the student who showed outstanding interest and participation in student activities.

(Continued on page 8)
Graduate Scholarship Awards

As part of the ceremonies, scholarships were awarded to 10 graduate nurses to help further their nursing education through graduate studies.

The Elsie Probstein Scholarship, given annually by Jacob G. Probstein, M.D. and his children to a graduate nurse to help further her education in surgical nursing, was awarded to Miss Eloise DeLap, coordinator, Level III, at the School of Nursing. She will continue her education toward a master’s degree.

Miss Jane Arthur, staff nurse in the Surgical Intensive Care Unit, received the Lillie E. Green Scholarship, also awarded annually through the efforts of Dr. Probstein.

The Leo C. Fuller Scholarship awarded yearly to a graduate nurse for advanced education in her particular field of nursing, was presented to Mrs. Emogene Alexander, staff nurse, Psychiatric Division.

Miss Janeane Divelbiss, staff nurse in the Medical Intensive Care Unit, was awarded the annual Sam and Jeannette Koplar Scholarship.

The Frieda H. Leonson Scholarship was awarded to Miss Mary Ann Cochran, instructor, School of Nursing. The Leonson Scholarship was established by the late Leon Leonson in honor of his wife.

Eileen Grant, a graduate, was chosen by her peers to address the senior class.

Lynn Eggert
$1,000 Auxiliary Scholarship

Miss Joan Schenck, Instructor, In-Service Education, was awarded the Helen A. Salomon Scholarship.

The Barney Fisher Scholarship Fund, which was established by Mrs. Goldie Fishman in memory of her son, was presented to Mrs. Beverly Ward, Assistant Director of Nursing.

The Clara Monheimer London Scholarship is awarded through the interest of Mrs. Louise Monheimer Aronberg and other trustees. The scholarship makes funds available for a graduate nurse to attend an advanced educational institute each year. Miss

Karen Gutting
$500 Waldheim Scholarship

Elsie Null, R.N., instructor, will attend a six week course at Emory University to become an Enterostomal Therapist.

The Flora Freund Nurses Scholarship was awarded for the first time this year to Miss Dianne Benz, staff nurse. It was made available by S.E. Freund and through the efforts of Dr. J.G. Probstein.

The Medigroup — Bernard Nursing Homes Nursing Scholarship was established in 1973 by Harvey Friedman for advanced training in Rehabilitation Nursing. In October, 1973, Mrs. Frances Crawford, R.N., staff nurse on the
Graduate scholarship award winners include, from left, Mrs. Beverly Ward, Miss Janeane Divelbiss, Miss Jane Arthur, Miss Dianne Benz, Miss Mary Ann Cochran, Miss Eloise DeLap and Mrs. Emogene Alexander.

Rehabilitation Division, attended a three-week course at New York Medical Center Institute of Rehabilitation Medicine.

The Messing Educational Fund, which was established in 1973 by Roswell Messing Jr., provided monies for 19 registered nurses to attend seminars and workshops in 1973.

The following is a list of the 1974 graduates:
- Jane Allen, Aledo, Ill.; Marilyn Sue Bass, Belleville, Ill.; Linda Jean Bell, St. Louis; Barbara Riegel Bolazina, St. Louis; Donna Martin Bross, Overland; Leslie Brown, St. Charles; Pascal Burbank, Berkeley; Barbara Burke, St. Louis.
- Laura Cato, Ft. Wayne, Ind.; Diana Coe, Glen Ellyn, Ill.; Janice Conway, St. Louis; Cathleen Cullen, Cool Valley; Denise Brewer Curtis, Ferguson; Mary Beth Daly, Quincy, Ill.; Linda Davis, Florissant; Diana Dezern, St. Louis County.
- Diane Dobkowski, Belleville, Ill.; Gwendolyn Dodson, Joplin, Mo.; Kathleen Drewett, St. Louis; Marcia Newgent Field, Fairview Heights, Ill.; Joelyn Eggert, Florissant; Beverly Fisher, Campbell Hill, Ill.; Mindy Goodrick, Ferguson; Eileen Grant, St. Louis.
- Karen Gutting, St. Louis; Dorothy Haley, St. Louis; Judith Herold
- Hannibal, Mo.; Kathryn Hay, Gillespie, Ill.; Mary Ann Beckmann Heinsz, St. Charles; Marcia Heitgerd, Columbia, Mo.; Nancy Hinch, Ellisville, Mo..
- Judy Sheer Hoff, Belleville, Ill.; Linda Hsin, Chester, Ill.; Sandra Hull, St. Louis; Judith Inselmann, Steeleville, Ill.; Linda Jackson, St. Louis; Beth Johnson, Belleville, Ill.; Jane Kaja, St. Louis; Nancy Wells Keaveny, St. Louis.
- Lydia Kirk, Collinsville, Ill.; Catherine Knight, St. Louis; Angelika Kuehn, Bridgeton; Sherri Latta, Ballwin; Marilyn Loughridge Lewis, Glen Carbon, Ill.; Patricia McCoy, Brentwood; Melanie McMillin, Collinsville, Ill.; Donna Marin, St. Louis.
- Patricia Mayberry, St. Louis; Mary Mikola, St. Louis; Judith Bruemer Miller, St. Louis; Joan Miles, Moro, Ill.; Linda Miller, Creve Coeur; Carol Millikin, Pinckneyville, Ill.; Deborah Morgan, St. Louis; Sharon Mutert, Washington, Mo.; Ruth Neihart, Cape Girardeau, Mo.
- Maureen O’Neill, St. Louis; Nancy Parker, Belleville, Ill.; Donna Thone Payne, St. Louis; Beverly Phillips, Belleville, Ill.; Deborah Randazzo, St. Charles; Nina Renner, Freeburg, Ill.; Ann MacLaren Richardson, Kirkwood; John Ronan, St. Louis.
- Gail Schenk, Crestwood; Mary Schmid, St. Louis; Joyce Schoene, St. Charles; Sharon Selvaggio, Hazelwood; Mary Zaiz Sandell, Florissant; Diane Sinamon, Ballwin; Kathleen Sind, St. Louis.
- Mary Jo Gustafson Spangler, Ellisville, Mo.; Kathleen Stayton, St. Louis; Sandra Ungerer Steiffmann, Union, Mo.; Catherine Sullivan, St. Louis; Susan Taylor, St. Louis; Paulette Thompson, St. Louis; Kathyrn Timmerberg, Brentwood; Roxann Westermann Tuetken, St. Louis.
- Karen Walch, Ferguson; Patricia Walch, Jennings; Debra Wanner, St. Louis; Karen Watkins, St. Louis; Nancy Weber, St. Louis; Catherine Wheeler, St. Ann; Patricia Whitson, Perryville, Mo.; Lawrence Yarber Jr., Smithton, Ill.; Cynthia Zimmerman, Quincy, Ill.; Linda Zinser, St. Louis.
Alexander Leaf, M.D.
Is Strauss Professor

Alexander Leaf, M.D., Jackson Professor of Clinical Medicine at Harvard Medical School and Chief of Medical Services at Massachusetts General Hospital, served as the 15th Arthur E. Strauss Visiting Professor, December 3–5 at the Hospital.

Dr. Leaf lectured on “The Role of Cell Swelling in Ischemic Tissue Damage” and spoke at Medical-Surgical Grand Rounds on “Hyponatremia”. A seminar, “In Search of a Vigorous Old Age” focused on Dr. Leaf’s recent series of observations on longevity.

Dr. Leaf received his M.D. degree with honors from the University of Michigan. After completing an internship at Massachusetts General Hospital, he was a Fellow at the Mayo Clinic and, subsequently, a Howard Hughes Medical Institute Investigator and Research Fellow at the University of Michigan. In 1966 he was appointed to his present position.

Dr. Leaf’s major field of interest throughout the years has been in renal and electrolyte metabolism. He has served on the Boards of numerous biomedical journals and learned societies and is a member of the American Academy of Arts and Sciences and the National Academy of Sciences.

Over 15 years ago friends, patients and colleagues honored Dr. Arthur E. Strauss for his sustained interest in heart disease by establishing the first named visiting professorship at Jewish Hospital. Dr. Strauss, 86, is Assistant Professor of Clinical Medicine, Emeritus at Washington University and serves as consultant in Cardiology and Medicine at the Hospital. This Professorship has provided the Department of Medicine with the opportunity of inviting to St. Louis each year a distinguished clinical scholar in Cardiology.

Vasectomy Clinic – One Year Later

One year ago Jewish Hospital’s Vasectomy Clinic was opened under the direction of Dr. Charles B. Manley, Chief of the Division of Urology. The Clinic, which was previously begun by Dr. Manley at Washington University in 1971, has recently completed its 1,000th procedure.

Dr. Manley notes some interesting observations about those who have utilized this facility within the past year:

- an increase in younger men including a sizable percentage of men under 25
- more single men
- more couples who don’t want any children

- more blue collar workers and men from lower socio-economic groups.

All applicants are screened carefully,” explains Dr. Manley. “We assess the maturity of the decision, and I feel most of these decisions are based on mature, rational thinking.”

A vasectomy is a form of permanent surgical contraception in the male. It’s a relatively minor operation performed as outpatient surgery under a local anesthetic. An essentially painless procedure, the vasectomy is completed in about 20 minutes.

The Hospital’s Vasectomy Clinic is held every Thursday evening with 12 to 15 vasectomies performed during this time.

An initial visit is made to the Clinic for an interview by experienced medical social workers. The actual procedures are done on the second visit by private practicing, fully trained urologists who work for the Clinic.

The Vasectomy Clinic service is available to all people of any income, with the fee based on a sliding scale according to income and number of children. This is one of few such clinics in the entire state.
Neither Snow Nor More Snow...

While the worst snow storm in many years brought St. Louis to a virtual standstill for about 48 hours, Jewish Hospital was buzzing with activity. Snow or no snow, some people just couldn't be kept down.

Employees were fantastic about getting to the Hospital, staying at the Hospital, working double shifts, performing extra duties, filling in for those who just couldn't make it in. Nurses, nurse aides, nurse instructors, nursing students, house staff, administrators and members of the Housekeeping, Food Services, Security and Engineering staffs, the Materials Department, Communications, the Laboratories and the Gift Gallery all performed outstanding jobs in the face of personnel shortages and kept the Hospital running at peak capacity.

Nurses worked double shifts and slept on floors in the nurses' residence; nursing students and employees from all areas pushed, pulled and scraped people in and out of the parking garage; Food Service employees kept the staff well fed and the night grill operator did a terrific job (and business).

In a letter to all employees, David Gee, executive vice president, expressed his appreciation:

During the storm "Jewish Hospital employees as usual rose to the occasion and performed admirably and with a high spirit of cooperation. I wish to extend . . . thanks to all of the employees who came to work, stayed at work and those who valiantly tried to get to work against overwhelming odds. Your devotion to duty is much appreciated."

Edward B. Greensfelder presents Mrs. Alfred Goldman, retiring Gift Gallery chairman, with a bronze plaque which will be placed inside the new Gift Gallery in recognition of her many years' devoted service.

Mrs. Alfred Goldman Resigns Gift Gallery Chairmanship

Mrs. Alfred Goldman has resigned as chairman of the Hospital's Gift Gallery after more than 18 years of dedicated service.

Miriam Goldman, who has accumulated over 37,000 hours of volunteer service, began her volunteer career in the Gift Gallery in 1955 and became chairman in 1959. She has been the dynamic force behind the phenomenal growth of that area through the years from one small room into the thriving business it is today.

Countless times Miriam Goldman spent seven days a week devoting her usual long hours to taking care of business. In addition to general management of the 'store' and a complete knowledge of inventory, her work encompassed window displays and much of the buying.

In honor of Mrs. Goldman's outstanding record of volunteer service and her exceptional achievements within the Gift Gallery, the Auxiliary board, Gift Gallery volunteers and other friends and associates held a reception for her in January at the home of Mrs. M. Erwin Bry Jr.

She received a gift from the Auxiliary and Edward B. Greensfelder, Hospital president, presented a plaque which will be hung inside the new Gift Gallery quarters in the Shoenberg Pavilion. The inscription reads:

Miriam L. Goldman Gift Gallery Chairman 1959-1973

The Jewish Hospital Board of Directors and Auxiliary gratefully recognize her many years of outstanding dedication and service to the Hospital and the community.

Mrs. Ben Samuels and Mrs. Paul Lux have succeeded Mrs. Goldman as co-chairmen of the Gift Gallery.
OTOLARYNGOLOGY- A Community Service

The quiet of the Shoenberg Research Building at 4949 Forest Park is deceiving for there's a hub of activity going on within its walls as the Department of Otolaryngology and its related Divisions of Audiology and Speech Pathology carry on the specialized study of ear, nose and throat problems.

"We are striving to make comprehensive services for hearing problems available to the community," says Dr. Sam E. Kinney, Director of Otolaryngology.

With all the related facilities located in one area, a patient can be seen by an audiologist, a speech pathologist or an otologist using the most sophisticated equipment to study and treat all problems of communication—hearing, speech and medical problems concerning the function of the ear, nose and throat.

The Department of Otolaryngology is headed by two physicians, Dr. Kinney and Dr. Ben Senturia, Director Emeritus, two full-time audiologists and two full-time and one part-time speech pathologist. A full-time chief resident, who is part of the Washington University Department of Otolaryngology program, is responsible for running a general ear, nose and throat clinic and performs ear, nose and throat surgery at Jewish Hospital. Dr. Kinney is a staff member of the department at Washington University and is primarily responsible for instruction on the temporal bone dissection for the resident staff. He was named director at Jewish Hospital in 1972, succeeding Dr. Ben H. Senturia who had been director since 1953.

Audiologists and otologists work together to diagnose types of auditory problems. Facilities are equipped to make total audiological evaluations which determine at what level the hearing mechanism is functioning. Then audiologists provide information to the otologists which aid them in deciding whether or not the patient needs surgery.

"Even though the patient may not be a candidate for surgery, there's a great deal that can be done to rehabilitate his communicative skills," says Dr. Kinney.

A well-rounded program of rehabilitation for persons with a hearing deficiency may include speech reading, auditory training, speech conservation and improvement, instruction in the use of a hearing aid and guidance in social adjustment.

The use of a hearing aid is an alternative to a problem which cannot be corrected through surgery. The hearing evaluations done in the Division of Audiology use various types and intensities of hearing aids. The audiologist cautions the patient to select a dealer on a trial basis.

The Division of Audiology also gives courses in lip reading which have aroused much interest in the community. Emphasis is on keys to learning, such as visual observances and interpretation of body movements accompanying speech.

In addition the Department is involved in the field of neurotology. Dr. Kinney has a particular interest in vestibular problems (balance and dizziness). Vestibular evaluations are made through testing the balance center with sophisticated electronic recording equipment.

"The patient with a balance problem needs to see an otologist who can evaluate any type of disease process that may be corrected by medical or surgical treatment," stresses Dr. Kinney. The otologist can counsel the patient as to the need for treatment or the need for aural rehabilitation including the use of a hearing aid.

Surgery of the ear is basically microsurgery using an operating microscope which can magnify 6 to 16 times normal size. Surgery is confined to the external ear canal, the ear drum and the middle ear which includes the three bones of hearing. One of these, the stapes, is the smallest bone in the body, about the size of the head of a carpet tack.

"We have not yet developed surgery for the inner ear for a nerve type of hearing loss, but surgery can correct inner ear balance problems. Microsurgery is also used to correct some balance problems originating in the inner ear, but only a certain number of hearing problems can be corrected by surgery."

Like so many other areas at Jewish Hospital today, Otolaryngology is oriented toward dynamic kinds of clinical services. In November and December otologists saw more than 100 children from 25 Head Start Centers throughout the area. When necessary they were reviewed by an audiologist as well.

The Cleft Palate Clinic, which meets twice a month, is attended by a team composed of an orthodontist, prosthodontist, plastic surgeon, dentist, otolaryngologist, speech pathologist and audiologist to help children with this birth defect.
Dr. Sam E. Kinney, Director of the Department of Otolaryngology, uses a tuning fork for one of a comprehensive range of tests used to detect hearing problems.

An audiometer is used to measure the acuity and range of hearing and may be used for an individual test or in screening large groups of people.

Otologists checked 200 little ears as children from 25 Head Start Centers visited our Department of Otolaryngology for hearing evaluations.
Hospital Shares In Kidney Funds

Jewish Hospital is one of eight Missouri hospitals sharing in the final distribution of the $800,000 state appropriation to fight chronic kidney disease.

Dr. Herbert Lubowitz, director of the Nephrology Division, received a $36,500 award which is to be used to benefit patients whose lives depend on the costly aid of artificial kidney machines. The Missouri Regional Medical Program administers these funds which are used to defray costs not covered by the Social Security Act.

The Jewish Hospital Hemodialysis Program emphasizes the training of patients to use artificial kidney machines in their own homes rather than requiring them to travel considerable distances to treatment centers where costs are much higher.

R.N.'s Complete Internship Course

Five graduate nurses have recently completed the Hospital's 24-week Nurse Internship Program which aids new nurses in the transition from students to full-time, practicing R.N.'s.

The In-Service Education Division introduced this program to provide clinical experience for the graduate nurse to develop her skills and performance of nursing care procedures. The course also gives these nurses an opportunity to develop their leadership qualities while they perform as team leaders.

During this internship period, the graduate nurse gains experience in making patients' assessments, assignments and nursing care plans. Through the program nurse interns become acquainted with the roles of all levels of nursing personnel. In addition, experience on evening and night shifts familiarizes these new R.N.'s with nursing care needs of patients 24 hours a day.

From left, Dr. Arthur E. Baue, Surgeon-in-Chief, Dr. Ira J. Kodner, chief resident, Dr. Nyhus, Max Myer Visiting Professor, and Dr. Charles Parks, chief resident.

Dr. Nyhus Is First Max Myer Professor

When the Max Myer, M.D., Fund for Surgical Education was established one year ago its purpose was to aid in the development of new approaches to education for surgeons within this Hospital. Of particular importance was a program for one or two days which would bring together surgeons, educators, students, house staff and others to consider advances in education and programs for their benefit, to be called the Max Myer Conference on Surgical Education.

In mid-December, Lloyd M. Nyhus, M.D., had the distinction of being the first Max Myer Visiting Professor. An internationally recognized surgeon, Dr. Nyhus is Warren H. Cole Professor and Head of the Department of Surgery at the Abraham Lincoln School of Medicine, University of Illinois.

Dr. Nyhus presented lectures on "Frontiers in Duodenal Ulcer Surgery" and "The Groin Hernia — Anatomical and Operative Considerations". He also attended conferences and grand rounds with members of the Hospital staff.

A member of numerous honorary and professional societies, Dr. Nyhus has presented lectures throughout the world. He is editor-in-chief of Review of Surgery and serves on the editorial boards of American Surgeon, Journal of Surgical Oncology and the Scandinavian Journal of Gastroenterology. He has published over 200 journal articles and book chapters, six books, four movies and 14 scientific exhibits on surgical subjects.

Psychology Sponsors Discussions On Treatment

The Division of Psychology, Department of Psychiatry, will sponsor a series of presentations and discussions of selected treatment and research modalities utilized by Clinical Psychologists. The seminars will be held each Thursday from January 31 to April 17, from 10 till 11:30 a.m. in the Psychiatry Library on the sixth floor. Seminars are open to professionals and graduate students in psychology and related disciplines.

Topics to be covered are psychological services for rehabilitation patients, ethical and legal issues in private and agency practice, treatment of families, group therapy, therapy with children, problems in the treatment of borderline patients, school consultation, research in essential hypertension, research in psychotherapy, problems in teaching and supervision and current models of training and practice.

Clinical psychologists presenting in the seminar will be from the full-time and attending staffs of Jewish Hospital. Psychology interns and practicum students at the Hospital will also present in the seminar. A complete schedule may be obtained from Dr. Norman J. Matulef, Chief Psychologist and Director of Psychology Training.
Therapy Through Recreation

Jerry is a paraplegic. He is paralyzed from the waist down due to a spinal cord injury. As an inpatient his day consists of meals, physical and occupational therapy and watching television from the bed in his room.

That would be the extent of his activity were it not for the ongoing Recreational Therapy Program at Jewish Hospital for patients in the Department of Rehabilitation Medicine.

Through this program Jerry and other patients like him can look forward to a weekly movie, various outings which include sporting events and theatrical productions, a friendly game of pool or an ice cream get-together. All these activities allow these patients some degree of social interaction so necessary to normal daily living.

The Recreational Therapy Program follows a regular weekly schedule including entertainment on the patient floor, pool, table games, a movie outside the Hospital, wheelchair basketball, an out trip and a movie within the Hospital. On the second Wednesday of each month the musicians' union sends a band to entertain inpatients and the Hospital is in the process of installing a shuffleboard court for in-Hospital activity. Therapists gear all therapeutic activities specifically to the patients, offering choices of particular interest to them.

This program is maintained entirely through donations and needs the support of the community to continue to function effectively. Recreational Therapy has previously received its primary support from the Ben A’Kiba Aid Society which has generously donated the Ben A’Kiba Lounge, a television, stereo, movie projector, pool table and ping pong table in addition to funds for other recreational activities. Many out-of-Hospital events have been possible solely through the donation of complimentary tickets from various people and businesses throughout the community.

The problem now is transportation to these functions outside the Hospital. The Recreational Therapy division is in need of a transport van to accommodate patients in wheelchairs. The van currently being used is inadequate for the division’s needs as patients above normal height are not able to sit without slumping and there is difficulty keeping the windows rolled up. It can only accommodate four patients. Many patients decline to make trips because the van is so uncomfortable.

The type of van needed must be specially equipped for the patients with a hydraulic lift, safety equipment and hand rails, and should be able to accommodate eight to ten wheelchairs. The cost is approximately $7,000.

Patients attend these events as part of their total rehabilitation program. Such activities are invaluable in helping them strive toward regaining their independence and learning how to function as handicapped persons in normal social situations.

The program, which is part of the Department of Rehabilitation Medicine, Franz U. Steinberg, M.D., Director, is under the direction of Mrs. Beth Wolf, Coordinator, Occupational and Recreational Therapy, assisted by Ed Hogan, recreational therapist.
Associates Plan New Direction

Plans for the Associates of Jewish Hospital in 1974 involve a change in direction for this educational organization which interprets to the community programs of patient care, medical education and research.

Dr. M. Norman Orgel, president, has announced that no major program meetings will be scheduled before the Annual Spring Meeting due to the energy crisis. Instead, "we will divert a substantial portion of the annual membership dues to the purchase of a gift for the Hospital which will be used for the benefit of patients," says Dr. Orgel.

The vigorous activities of the Associates' Speakers Bureau, however, will continue as a valuable service in interpreting modern medical advancements to the community.

Through the Speakers Bureau the Associates provide guest speakers at the request of any community organization. Physicians, administrators, paramedical specialists and directors are available to lecture and participate in panel discussions on a wide range of health care and medical topics. Last year a team composed of representatives from administration, surgery, medicine and nursing brought an open format program — Jewish Hospital At Your Service — to various groups throughout the St. Louis community.

Speaker arrangements can be made through the Associates secretary, Carol Kralik, Station 606.

Grant Funds Hypertension Study

The Fannie E. Rippel Foundation of Morristown, New Jersey, has announced a grant of $10,000 to the Hospital to help finance a research program concerned with lowering blood pressure through bio-feedback techniques.

The study, "Essential Hypertension: A Behavioral Approach", is being conducted by Kenneth L. Russ, Ph.D., Assistant Director Psychology Training, Department of Psychiatry.

Essential hypertension, or high blood pressure, to which no known organic cause can be traced, can result in medical problems as severe as heart failure, kidney disease or stroke. To date, several studies attempting to treat this condition through psychological approaches have shown some promise, but the results of such approaches have not always been as effective as hoped. Furthermore, such approaches have not always made the most use of psychological theory, nor has their effectiveness been demonstrated experimentally. The current study is designed to utilize psychological approaches in such a way as to maximize possible results, to demonstrate such results experimentally and to provide long term follow-up.

Volunteers with essential hypertension, referred by doctors at the Hospital, take personality tests and are randomly assigned to several experimental groups. Patients in two groups are given information about their blood pressures and rewarded for reducing blood pressures; in another group, patients are trained to lower their muscle tension by being given continuous information, or bio-feedback, about their muscle tension levels. Home practice is also encouraged and appropriate control groups are employed.

Following reduction of blood pressure to maximum possible levels, personality tests are readministered and follow up checks made at three-month intervals. Statistical tests determine whether these psychological procedures produce meaningful and lasting changes and whether changes in personality are associated with treatment effects.

The Rippel Foundation grant will provide funds for purchase of equipment and supplies and for partial support of a research assistant.

An additional $4,106 has been obtained to complete the financing of this research study.

Federation Rally Starts Campaign

Jewish Hospital's Fair Share Club was initiated last spring as an alternative to the two fund-raising drives which have traditionally been held within the Hospital. The club was organized with the hope of eliminating these drives, making it easier on the employee to contribute to charitable and educational causes which benefit from both the Jewish Federation and the United Fund.

To date the more than 650 Fair Share Club members have pledged over $19,000 to the United Fund and Jewish Federation.

For those employees who are not members of the Fair Share Club a rally to kick off the Jewish Federation annual drive was held February 1 in Steinberg Amphitheater. Featured speakers included Don Gartner, associate director, Jewish Federation, and Arthur Goldberg, executive director, Jewish Family and Children's Service.

In Memoriam...

Friends and colleagues mourned the death of Dr. Alfred Goldman, a heart and lung specialist who had practiced medicine in St. Louis for more than 50 years. Dr. Goldman, who died November 25, was a long-time staff member of Jewish Hospital and was also on the staffs of Barnes and St. John's Mercy hospitals.

He was a professor emeritus of the Washington University School of Medicine and for more than 40 years was a consultant for the American Medical Center at Denver. In 1967 he was honored for this work at the annual A.M.C. ball.

Dr. Goldman received his M.D. degree and his M.S. degree in medicine from Washington University School of Medicine. He had been affiliated with Jewish Hospital since 1925.

Dr. Goldman is survived by his wife, Miriam, three sons and two brothers.

A fund has been established at the Hospital in memory of Dr. Goldman. Contributions can be made through the Tribute Fund.
Contribution Purchases Video Tape Unit For Psychiatry

A contribution of $1,450 from the Deercreek Foundation has enabled the Department of Psychiatry to purchase a video tape recording and playback unit which has been a useful and valuable contribution to the Department's teaching and research program.

Initially the tape unit made it possible for the Department of Psychiatry to carry out a research program in conjunction with the St. Louis Heart Association. The device was used to record approximately 20 hour-and-a-half meetings of groups of men who are trying to give up smoking and make changes in their food habits in order to prevent heart attack and coronary artery disease.

This huge amount of video tape material was then edited and shortened to make three 20-minute training films which were used in a training session in Baltimore, Maryland, for all 20 centers across the country who are participating in the same heart attack prevention program.

The machine will continue to be used in training students within the Department of Psychiatry and also with further research projects involving psychiatric patients.

**CO₂ Powered Splint Replaces Hand Function**

Occupational Therapy and the Department of Rehabilitation Medicine are currently using a CO₂ powered splint to replace hand function in a high level quadraplegic. For the patient who has no function of his wrist or fingers, the splint replaces these motions allowing the patient to pick up and hold objects. It is essentially useful in giving him the ability to hold utensils and eat without assistance. The powered orthosis consists of a 16 ounce CO₂ tank which pushes CO₂ into a rubber tube enclosed in a nylon sheath. The rubber expands when filled with gas and the sheath's length contracts so that the ends are pulled together. When the gas is expelled from the artificial muscle, it relaxes. The splint itself holds the joints of the index and long fingers slightly bent with the thumb abducted in front of the palm. As the artificial muscle contracts it pulls the pads of the fingers against the thumb. The splint thus provides a useful pinch for a totally paralyzed hand. The splint is used for writing, turning book pages, typing, etc., as well as for eating.
Dr. Calvin H. Weiss, Director of the Hospital’s Dental Department, prepares to take a Panorex x-ray. By revolving, the machine can photograph the entire mouth at once.

Dental intern Rick Bernstein, D.D.S., assisted by Jane Sherman, is part of a 21-member dental staff who represent all the specialties of dentistry.
What exactly is the purpose of a Dental Department within the Hospital complex?

According to Calvin Weiss, D.D.S., Director of Dentistry at the Hospital, “Dental care is a part of total health care, and as such, these services belong in the Hospital to accommodate overwhelming demand for complex oral health care.

“Dental patients today, for various reasons, are turning to the hospital for special dental services that can be provided best in the controlled, protective and sophisticated hospital environment."

Through patient care, teaching and research the Hospital’s Department of Dentistry fulfills the basic objectives of a teaching general hospital. In addition, Jewish Hospital has been named a member of the Council of Hospitals of the American Association of Dental Schools.

For the past 20 years, not only has Jewish Hospital provided a comprehensive dental care facility for the community, but in doing so, has also provided invaluable learning experiences for the house staff.

The Dental program has three interns, which makes Jewish the only private general teaching hospital in Missouri that has an American Dental Association approved rotating dental internship program. And applications have already started flowing in for the internship period beginning in July. In December Jewish Hospital was one of the first area hospitals approved for a general practice residency.

The 21 dental staff members represent all the specialties of dentistry, with a dental program for in and outpatients composed of operative dentistry, prosthodontia, periodontia, oral surgery, pedodontia, orthodontia, endodontia and a program of dental care for retarded children.

... Jewish Hospital is the only hospital which gives 24-hour emergency dental care service.

... The Hospital Dental Department provides care to patients at the United Cerebral Palsy Association, and those who cannot be treated in those facilities are referred to Jewish Hospital for treatment under general anesthesia.

... Jewish Hospital, the first to establish a dental program for the retarded and handicapped, is still deeply involved in this growing area of need. Approximately two to three cases a week are treated under general anesthesia in the operating room. Through the Hospital’s active interest and involvement in this area, funds have been contributed from private foundations and sources and placed in a restricted fund for dental care for the handicapped.

... Jewish Hospital provides dental care to the Jewish Center for Aged in which interns participate.

... Dental students from Washington University participate in extern teaching programs at Jewish Hospital under the direction of members of the dental staff.

... Approximately 18 dental cases per month are scheduled in the operating rooms. The number of emergency room visits to the Dental Department has risen noticeably during the past few years totalling an unprecedented 1,900 visits for the past year.

... The Dental Department provides oral surgery and exodontia for patients of St. Louis County Hospital as part of the training program of dental interns.

Primary objectives of a hospital dental service should be: Emergency and consultation service; routine dental care; dental care for medical risk patients who require the hospital environment, and special dental services for exceptional patients who require the unique facilities, talent and team approach available only in the hospital setting.

Says Dr. Weiss, “Jewish Hospital’s Dental Department not only meets these primary objectives, but offers a very broad spectrum in hospital dentistry and has for many years due to the cooperation and interest of our hospital family and the devotion of our dental staff.”
Amy Morrison, R.N., cardiovascular clinical specialist at the Hospital, has had her thesis on “The Effect of Teaching on Patient Morbidity and Mortality” published by the St. Louis University Press.

Barbara Janes, Director of Development and Community Relations, was elected a Regional Vice President for the National Association for Hospital Development at the organization’s annual conference in Washington, D.C. Mrs. Janes has also been appointed program coordinator for the Development Section of the Mid West Health Congress. The meeting will be held in Kansas City in June.

Mrs. Nadean Wright, R.N., Director of the Materials Department, is president-elect of the American Society Hospital Central Service of the American Hospital Association. She was elected at the group’s annual meeting in Louisville where she also presented three speeches.

David A. Gee, Executive Vice President, was one of three from the St. Louis area elected to the Missouri Hospital Association Board of Trustees. Mr. Gee was also elected to a three year term on the Administrative Board of the Council of Teaching Hospitals.

Jason P. Blake, Associate Executive Director, spoke to students from the Logos School on career opportunities in paramedical specialties.

Captain Lester Roundtree, administrative resident at Scott Air Force Base in Belleville, will serve three months of his 9-month residency at Jewish Hospital to observe civilian hospital administration.

Captain Roundtree has a B.S. degree in biology from the University of New Hampshire. Previously he was instructor in Health Administration at the Air Force School of Health Care Sciences at Sheppard Air Force Base, Wichita Falls, Texas.

This residency tenure constitutes the field exercise experience he will need to complete his masters degree in Health Care Administration at Washington University School of Medicine.

Captain Roundtree will be promoted to Major in the fall.

Three Jewish Hospital employees have successfully completed a two-semester Central Service Technician course at Forest Park Junior College. Monique Cote, Sylvia Adams and Nell Williams were part of the Seventh Central Service Technician class to be graduated January 7. Harold Scheff Jr., assistant executive director, gave the graduation address.

Three Complete Technician Course

Three Jewish Hospital employees have successfully completed a two-semester Central Service Technician course at Forest Park Junior College. Monique Cote, Sylvia Adams and Nell Williams were part of the Seventh Central Service Technician class to be graduated January 7. Harold Scheff Jr., assistant executive director, gave the graduation address.

Nadean E. Wright, R.N., Director of the Department of Materials, established this program at Jewish Hospital in 1969 and taught it at the Hospital for three years. In 1972 Mrs. Wright moved the course to the junior college where she continues to serve as instructor. Students receive six community college credits for the 32-week course.

Only two other Central Service Technician programs similar to this are offered in the entire country.
Many donors have chosen to support the Hospital through the fund program. At year-end, the following new funds were established:

The Dorothy and Paxton Catlin Heart Research Fund was designated as a surgical endowment by Mrs. William Errant as a tribute to the memory of her parents.

The Ralph Hirsch Memorial Fund for Cancer Research has been named as a surgical endowment by Mrs. Hirsch and family. Mr. Hirsch, secretary of P.N. Hirsch and Company, died of cancer December 16.

Dr. Lawrence M. Aronberg, staff urologist, has established an endowment in his name, the income of which will provide two Aronberg Awards for Achievement in Urology to be presented annually to a urology house officer and a general surgery house officer making the greatest contribution during rotation on the urology service.

The Ronald and Sharon Blase Memorial Fund was established by their families and friends following the tragic automobile accident which took their lives. Sharon was assistant head nurse on Division 51. The non-endowed fund will be designated for some area of nursing.

The Jack Aaron Lyss Memorial Cancer Fund was named as a tribute to his memory by Mrs. Lyss. This non-endowed fund will be used at the discretion of Dr. Arthur E. Baue, Surgeon-in-Chief.

The Medigroup-Bernard Nursing Homes Scholarship was granted by Harvey A. Friedman. The award is to enable a staff nurse to attend a rehabilitation nursing seminar.

The Mary McKeever Memorial Fund has been designated by Mary’s sister for use in the Social Service Department. The following is a portion of a letter received from Nell McKeever describing the purpose of the fund:

“. . . it should be used to make life a little easier for patients who have small but essential needs. As I think back on the times I spent with Mary in her office, I am reminded how sensitive she was in knowing when a patient needed help and how one thoughtful act made the difference to a tired and lonely patient. Some of these included a taxi ride home for a patient after a long and strenuous day in the clinic, a hot meal for a patient who had no family waiting at home, special food treats for women with children who were living on limited incomes, an electric heater for someone who was always cold, a bus ticket in order that a relative could visit a patient and the provision of a place to stay near the hospital for friends and relatives of patients who could not afford hotel rooms.

It seems to me that social workers have the unique privilege of knowing what small acts of kindness will help relieve the pressures brought on by illness.”

Anyone wishing to make a contribution to the above funds can do so by directing gifts to The Jewish Hospital Tribute Fund.
BEQUESTS

The Hospital has received notification of several recent bequests which includes the following:

The Ruth E. Biller Trust Agreement and Will named Jewish Hospital to receive half of the residuary trust and estate which will be approximately $300,000. Mrs. Biller, who resided at the Frontenac Apartments, designated the gift as the Ruth E. Biller Endowment.

The Evelyn Lowenberg estate included a gift of $10,000 to the Hospital. The bequest will be recognized by naming a patient room in the new Sydney M. Shoenberg Pavilion.

A bequest of $3,000 from the estate of J.L. London was designated as a scholarship endowment for the School of Nursing.

Mrs. Louise M. Geiger, a former employee, bequeathed $500 to the Edna Peterson Scholarship Fund.

Mrs. Rose Engel and David A. Gee stand outside the room named in honor of Mrs. Engel by her children, Mr. and Mrs. Roswell Messing Jr.

GIFTS

The Ira and Herbert Simon Research Fund received generous year-end gifts totaling $20,000 from Julian Simon, Mrs. Ira Simon and Mrs. Herbert Simon. An additional gift of $20,000 was made by Julian Simon and Mrs. Herbert Simon to name two patient rooms in the Sydney M. Shoenberg Pavilion.

The Arthur B. Baer Charitable Trust recently made a final distribution and included a gift of approximately $6,000 to Jewish Hospital.

Mr. and Mrs. Arthur Scharff donated more than $2,000 to update the Echoencephalograph which they purchased for the Hospital five years ago. The unit utilizes ultra sound waves in diagnosing abnormalities in the brain without pain or discomfort to the patient.

Mr. and Mrs. Roswell Messing Jr. made a special gift to the Otolaryngology Fund which was established in their name last year. The fund is under the direction of Dr. Ben Senturia.

Henry H. Stern made a generous year-end gift to the Evelyn B. Stern Nursing Scholarship established in 1970 in memory of his wife. This provides assistance to students in the School of Nursing.

The John R. Goodall Trust and the W.R. Persons Foundation made generous year-end gifts to the Hospital.

Mrs. Barney Moss and her children have purchased two wheelchairs for the Emergency Room as a tribute to the memory of Barney Moss.
Contributions To Jewish Hospital Funds

Contributions received are used for research, appliances for clinic patients, new equipment, and other worthy undertakings, sponsored by the Jewish Hospital Auxiliary.

The regular listing of memorial and honorial contributions were received after September 15 through November 2, 1973. Any contributions received after November 2, 1973, will be listed in the next issue of 216. Special Gifts are listed through December 31.

Contributions to this fund may be made by sending checks, payable to The Jewish Hospital Tribute Fund, c/o Mrs. Norman W. Drey, Mrs. Harry W. Loeb, 216 South Kingshighway, St. Louis, Missouri 63110.

### Special Gifts Box
September 15, 1973 through December 31, 1973

#### IN HONOR
- Edna Malen
  - Geigher Pipe Supply Company
  - (Edna Malen Scholarship Fund)
- Moog Family
- RK&A Jones, Inc.

#### DONATIONS
- Ben A’Kiba Aid Society
- Ben A’Kiba Recreation Center
- Mr. M. Peter Fischer
- Obstetrical Division
- J.D. Goldman
- Alvin D. and Blanche L. Goldman
  - Recreational Therapy Fund
- Mrs. Owens M. Gray
  - Dental Care for Handicapped
- Hospital Saturday and Sunday Association
  - Endowment Fund
- Dr. Alex H. Kaplan
  - Psychiatric Fund
- Mr. and Mrs. Charles Kilgen
  - Ear, Nose and Throat Fund
- Merck and Company, Inc.
- Department of Medicine Visiting Professor Fund
- Jacob B. Orenstein Estate
  - Tribute Fund
- Mr. and Mrs. Louis R. Putzel
- Helen R. and Henry V. Putzel Scholarship Fund
- World Tire Corporation
- Bernie A. Ross Cardiovascular Research Fund

#### IN MEMORY

Sharon Blase
- Mr. and Mrs. Walter Ehlen
- Mr. Robert J. Ehlen
- Mr. and Mrs. Donald Ehlen
  - (Sharon Blase Memorial Fund)
- Dr. Leon Foster
- Dr. Arthur Bortnick
  - (Leon Foster Fund)
- Dr. Carl J. Heifetz
- Dr. and Mrs. Stanley A. Burris
- Dr. and Mrs. I. Jerome Flance
- Dr. Phillip B. Foreman
- Dr. and Mrs. Leon Fox
- Mr. Walgard Gaus
- The Catherine Manley Gaylord Foundation
- Dr. and Mrs. Max Heeb
- Mr. and Mrs. Gary Heifetz
- Mr. and Mrs. Israel Heifetz
- Mrs. Marjorie Lesser
  - John Lesser
