Meet The Trustees

CIVICS, INDUSTRY, 
EDUCATION FOR OLIN

Spencer T. Olin, director of Olin Mathieson Chemical Corporation and a member of the Executive Committee of that corporation, has been a member of the Board of Trustees of Barnes Hospital since 1961.

Born in Alton, Ill., Olin was graduated from Cornell University in 1921 with an ME degree. In 1958, he received an honorary Doctor of Science degree from Southern Illinois University at Carbondale.

Following his graduation from Cornell Olin started his business career with Western Cartridge Company at East Alton, a firm founded by his father in 1852.

In 1945, when Olin Industries, Inc., was formed through a consolidation of Western Cartridge Company, Winchester Repeating Arms Company, Olin Corporation and others, he became first vice president of the corporation. He continued in that position until the merger of Olin Industries, Inc., and Mathieson Chemical Corporation in 1954.

He is also a director of Illinois Bell Telephone Company, Laclede Steel Company, First National Bank & Trust Company of Alton and the Illinois State Bank of East Alton.

His interest in education has been evidenced, not only by his contributions to various educational institutions, but also by (Continued on Page 4)

Dr. Sam L. Clark
Med Society Head

Dr. Sam L. Clark Jr. was elected president of the Washington University Medical Society at a meeting at the David P. Wohl Jr. Memorial Clinic.

He is associate professor of anatomy at the university. The society is composed of all medical faculty members and students.

Dr. Gerald T. Perkoff, associate professor of medicine, was named vice president, and Dr. Adolph Cohen, research assistant professor of anatomy and ophthalmology, was elected secretary.

The Dr. Richard Brookings Medical School prize for meritorious performance by students was awarded to Robert Clark, Peter Schwartz, and William G. Wood. Wood was also the recipient of the Roche award for outstanding scholarship.

Michael Jacobs, son of Mr. (Continued on Page 4)

Barnes Renovates Nursing Area

Extensive renovation has been taking place in the Barnes Hospital School of Nursing residence area in accordance with the hospital's forward look to better educational facilities and improved living and teaching conditions in the complex.

Administrative Engineer James C. Claywell, in charge of the project, said air conditioning and increased lighting has been installed in the Library area of the Nursing Residence and School.

On the ground floor a new storage area has been created and a women's locker room with bath facilities has been installed. A men's locker and bath has been built on the same floor for male students housed elsewhere.

New air conditioned faculty offices have been constructed. In the Nursing Arts Laboratory, air conditioning has been added and the amphitheater seating (Continued on Page 4)

Eleven Move Up

Eleven Barnes employees won promotions last month, four of them in Nursing.

Staff nurses Janice Paris and Marlene Duncan became head nurses while Staff Nurse Marilynn Wolf became an assistant head nurse. Assistant Director of Nursing Cora Glauser became coordinator of Central Service.

In Central Service, Aide Lavant Maupin became evening supervisor and Technician Wanda Rasberry became a chief technician.

Bettye Cooper rose from technician to chief technician. In General Maintenance Jesse Whitfield advanced from apprentice to Journeyman. Clerk Typist Joanne Bailey became a secretary.

Dishroom worker Laura Johnson became night manager in the kitchen. In Laundry, Pickup Man Tommie Gillespie became a washman.

Our sincere congratulations and best wishes for future promotions. (Continued on Page 4)
Who's On Third

A completely updated and revised Patient Information booklet giving new patients the wherefores and whys of hospital routine has been completed by the Public Relations Department of Barnes Hospital.

Such items as visiting hours, available services, reasons for hospital rules, a history of the Medical Center and other information is contained in the attractive blue and white booklet.

The publication, in handy size, is available at the Information Desk and Admitting Desk in the Barnes Lobby. A copy is given to each new patient admitted to the Medical Center.

NEW HONOR; OFFICE FOR DR. MOORE

Dr. Carl V. Moore, vice chancellor for medical affairs for Washington University, was elected a director of the American Cancer Society Oct. 28 in New York.

L. Cook Gable, a vice president of Security Trust Co., St. Louis, was re-elected a director.

Dr. Moore now occupies a new office located in the first floor of the Medical School Building, west of the auditorium.

NEW TAMPA CHIEF

Albert L. Bouleger, associate director of Barnes Hospital since August, 1962, resigned effective Oct. 9 to become director of hospitals for the Hospital and Welfare Board of Hillsborough County at Tampa, Fla.

At Barnes, Bouleger was in charge of Patient Services, which included Nursing Service and Nursing Education.

In his new post, Bouleger is in charge of three hospitals totaling 960 beds. The main hospital in the group is Tampa General Hospital, located on Davis Island in Tampa Bay, and has 620 beds. Tampa General Midtown Annex in Tampa has 259 beds and Hillsborough County Hospital has 69 beds.

A 1953 graduate of the Washington University course in hospital administration, Bouleger served as administrator of Good Samaritan Hospital at Vincennes, Ind., before coming to Barnes. He served his residency at Jefferson Hillman Hospital at Birmingham, Ala.

Bouleger, his wife Joyce, and their children, Susan, Joy and Albert L. Jr. now live on Davis Island.

Until Bouleger is replaced, Miss Jean Martz director of Nursing Service, will have the total administrative responsibility for the Nursing Service. Dr. Crofford O. Vermillion, associate director, and Miss Elizabeth McIntosh, director of Nursing Education, will head up the Nursing Education section.

The one-page daily rundown of top international, national, local, sports and weather news is supplied each noontime, Monday through Friday, to all Barnes patients who receive noontime trays.

The news, in capsule form, is supplied to patients through the cooperation of the Public Relations Department, the Director's Office, the Print Shop and the Dietary Department.

The source of the daily news comes to Barnes patients through the courtesy and special permission of the St. Louis Globe-Democrat.

BOULENGER RESIGNS; NEW TAMPA CHIEF

NEWS, SPORTS WITH FOOD; NEW SERVICE

The supply of late news patients in the Barnes Hospital areas of the Medical Center was started Nov. 2 by the Public Relations Department.

Vermillion, associate director, and Miss Elizabeth McIntosh, director of Nursing Education, will head up the Nursing Education section.

Recreational and Occupational Therapy—formerly under Bouleger's administrative jurisdiction—will become the responsibility of Joseph T. Greco. The Optical Shop responsibility has been transferred to Donald J. Horn.
Chaplain's Corner
By George A. Bowles

Freedom is a precious commodity that we like to possess. We take great pride in the fact that we feel we can be numbered among those who are proud owners of this treasured element in the framework of our national life.

It is a thrill to be able to sit down with friends who do not share the same interpretations of our needs and hopes, and then part with better understandings of the way they think and act.

We are still friends.

In fact, we may be even better friends by reason of the sharing we have done together. Our beliefs and viewpoints do not have to be changed as a result of discussion; they may even be sharpened by the process.

Freedom is a part of our American Heritage. It has been bought at prices that at times have been rather high, and the complaints of the purchasers have not been voiced in tones as loud as most of us might have made them. Our pioneer forefathers were convinced that about all else depended upon the right a man has to decide.

Win, lose or draw, a baseball autographed by the New York Yankee team is prized by McMillan patient Randy Rice who was a Yankee fan. Elizabeth Miner of the Forest Park Hotel staff presented baseballs autographed by both teams to young patients of McMillan before the series. Randy was a Yankee fan, as evidenced by the satisfied smile on his face.

Conn Gives First Olmstead Lecture

Dr. Jerome W. Conn, professor of medicine at the University of Michigan Medical Center, delivered the first W. H. Olmsted Annual Honorary Barnes Hospital Lecture Nov. 11.

The lecture will be given Wednesday evening at Clpton Amphitheatre in Wohl Clinics Building at the Medical Center. The annual lectures will honor Dr. Olmsted, second medical resident at the hospital; first to be in charge of the Chemical Laboratory; the first to direct a series of lectures on insulin at occasion of his retirement from private practice. He now devotes full time—with a volunteer basis to directing the St. Louis Diabetes Association.

The fellow who gave up smoking for chewing toothpicks died of Dutch Elm disease.

Dr. Jerome W. Conn

Barnes, and a co-founder and first president of the Barnes Hospital Society.

Dr. Conn will speak on "Diabetes Mellitus and Its Precursor State." He is professor of Internal Medicine and director of the Department of Endocrinology and Metabolism and the Metabolic Research Laboratory at the University of Michigan Medical School at Ann Arbor.

The first lecture coincides with the opening of the 16th annual Diabetes Detection Campaign in St. Louis.

Dr. Olmsted is executive director of the St. Louis Diabetes Association, which sponsors the community-wide free testing program for diabetes. Early detection is the key to the successful treatment and control of diabetes. Dr. Olmsted pioneered in the development of mass testing techniques for the disease.

He has received the Banting Medal, the highest honor conferred by the American Diabetes Association, in 1956 in recognition for his contributions in the field of diabetes detection.

The annual lectures are endowed by patients, friends and colleagues of Dr. Olmsted and the
Hot Fire, Cool Head: Saved Lives

Fire can strike without warning.
So it is wise to take precautions to prevent their starting.
Two steps are necessary in fire prevention: 1. Look for trouble before fire strikes. 2. Eliminate careless habits that lead to fires.

Basic chemistry tells us it takes a combination of three ingredients to start a fire—(heat), fuel and oxygen. And all three must be present at the same time in order for fire to result.

To prevent fires, we must discover fire hazards, correct them and make certain they stay corrected. So don't toss a lighted cigarette or match carelessly away. Don't use electrical cords or appliances in poor condition. Don't let rubbish pile up.

But, should a fire occur, the best rule to follow is to think fast, clearly and act instantly.

Find out where the fire extinguishers are located and how to use them. Know locations of fire escapes and fire exits. In case of fire, remain calm and do not shout "FIRE."

Go to the nearest telephone and dial Barnes Telephone Operator. Give location of fire and your name clearly. Do not call the fire department. Give the type of fire; mattress, explosion, oil or other. Give the extent of the fire. Whether it is contained in a wastebasket, one room, is it threatening many rooms or the entire division.

Confine the fire to the immediate area in which it starts or to the smallest area possible. Close all doors or windows. Use the fire fighting equipment that is immediately available.

Fire drills are an important part of our Fire Safety Program here at Barnes.

They are scheduled once each week.

Find out when the next fire drill will occur in your department.

E. J. Thurman
Safety and Security Coordinator

Barnes Hospital Director Harry E. Panhorst presents a Certificate of Appreciation to Mrs. Ethel McCullough upon her retirement after 21 years service to Barnes.

Two Physicians Join BH Staff

Two physicians have joined the Barnes Hospital Attending Staff.

Drs. Russell Little and C. Kirk Osterland joined the staff as attending physicians.

Going on leave of absence effective Sept. 1 were two consultants in Pediatrics. They are Drs. Stanley Harrison and Herman W. Reas.

Dr. James Nelson has gone off staff. He was an assistant pathologist.
