Easy street

New parking facilities, street signs simplify campus driving

New parking facilities and street signs will soon make both stopping and going easier for drivers on the WU campus. By the spring of 1986, more than 500 new parking spaces will ease the campus parking situation, and this fall, signs will be erected on campus roads, newly named in honor of former WU chancellors.

A parking deck being built behind the law school will double the parking available in that area. The garage, to be completed in November, will add 200 parking spaces. Other parking spaces being added include 200 spaces in a new parking lot in front of Simon Hall, 50 spaces in an expanded tennis court lot; 50 spaces in the lot just north of Brookings Hall; and 74 spaces north of the new athletic facility. This means somewhere between 500 and 600 new spaces by next year.

Joe Evans, associate vice chancellor for business affairs, says an increase in the cost of parking permits was necessary to insure that only those who belong from the new parking facilities will pay for them. "The cost should not come out of the pockets of those who do not drive," says Evans. A 1985-86 permit costs $50 for students and staff and $95 for faculty parking.

Until now, the streets on campus have had no names other than, for example, "the road that runs from Millbrook to Forsyth, east of Brookings Hall." That road, now Hoyt Drive, was named in honor of WU's first chancellor, Joseph G. Hoyt, chancellor from 1858 to 1862.

Other streets have been named in honor of chancellors William Chauvenet, 1862-69; Winfield S. Chaplin, 1891-1907; Frederic A. Hall, 1917-23; Herbert S. Hadley, 1925-27; George R. Throop, 1928-44; Arthur Holly Compton, 1944-53; Ethan A. Shepley, 1954-61; and Carl Tolman, 1961-62.

The boulevard from Skinker to Brookings Hall is named Brookings Drive in honor of WU benefactor Robert S. Brookings. Two streets have been named in honor of men who served as acting chancellors while the appointed office was vacant. Harry Brookings Wallace was acting chancellor from 1944 to 1945, and Marshall Solomon Snow was acting chancellor twice, 1887-91 and 1907-08.

Ronaldo Jost named first chief of diagnostic radiology division at Mallinckrodt

Ronald G. Evans, M.D., director of Mallinckrodt Institute of Radiology (MIR), has announced the appointment of R. Gilbert Jost, M.D., as chief of the Division of Diagnostic Radiology at the institute, effective Aug. 12, 1985. The first to occupy this position, Jost will coordinate Mallinckrodt's diagnostic services including abdominal, cardiac, chest, computer, musculoskeletal, neuroradiology and pediatric radiology.

On staff at MIR since 1975, Jost is a professor of radiology and head of the diagnostic radiology computer division. He also serves as a staff radiologist in the chest radiology section and at Barnes and Children's hospitals.

Jost is best known for his expertise in the application of computers to radiology and the economic (cost) analysis and utilization of computed tomographic scanners. In 1974, he helped to design at Mallinckrodt the original system used to record and store patient registration and billing information for the radiology department and in the ensuing decade, has developed MIR's radiology computing facilities into the world's largest and most advanced.

At this time, Mallinckrodt has eight central computers and 175 terminals organized in a modular fashion and linked by direct communication lines, Ethernet coaxial cable, and in some regions by broadband coaxial cable. Applications include patient monitoring and scheduling, transcription of MIR's 1,000 radiology reports per day, keeping track of X-ray film folders, and department evaluations and management in every area from patient care, research and teaching programs to the inventory of supplies. Included also is a tele-radiology system which transmits X-ray pictures into numerical form by which they can be stored on disk (in digital form); manipulated for image control and quality enhancement; and transmitted electronically across the hospital, or the country. By next year, at least three new computer controls and more than 100 new terminals will be added at MIR.

Jost's commitment to computer networking at Mallinckrodt helped to lay the groundwork for a $15 million partnership agreement between the Digital Equipment Corporation of Massachusetts and WU. Over the next three years, the two will build a campus-wide network of computing resources capable of high-speed text transmission and advanced picture communication.

Jost graduated magna cum laude and first in his department at Harvard University in 1964. He received his medical degree in 1969 from the Yale University Medical School, where he was editor of the Yale Journal of Biology and Medicine and a fellow in the investigation of medical uses of computers.

Metabolic shock

Behavioral, not physiological, reaction to stress endangers diabetic children

At 13, Michael had enough to handle without worrying about his parents' problems. His body was changing, he had a new interest in girls, he had begun the countdown toward that milestone of adolescence — getting his driver's license.

Although it wasn't easy, he was coping well with a disease which had been diagnosed two years ago — diabetes. He was taking his insulin shots at the proper times, testing his blood sugar periodically each day, eating the right foods (usually) and par-ticipating in sports to get the recommended amount of exercise.

But his parents argued when they were together and seemed upset when they were apart. Neither Mom nor Dad seemed to have time for Michael anymore. They didn't ask him about his school activities; they didn't seem to care about him at all.

After several weeks of stress, Michael's blood sugar level rose into the danger zone. Recognizing his vomiting and drowsiness as symptoms of diabetic ketoacidosis (DKA), which can be fatal, his parents rushed him to the hospital.

The popular concept among researchers studying cases like Michael's is that stress has a direct, physiological effect on diabetes, causing adverse metabolic changes.

But a study conducted at WU and presented in June at the annual meeting of the American Diabetes Association suggests that stress itself did not put Michael in the hospital.

More likely, the researchers said, stress caused Michael to pay less attention to his regimen. He skipped insulin shots, ate forbidden foods, reduced his level of exercise, threw his body into metabolic shock and landed in the hospital. His behavioral changes brought doctors, nurses and parents together to administer large doses of the attention he craved.

The unique study led by Alan M. Delamater, assistant professor of psychology at WU, melded his expertise with that of pediatric endocrinolo-
Course helps foreign students adapt to American classrooms

Before Suk Jun Lee, a Korean first-year graduate student, came to WU, he was jittery about meeting American professors because of his “poor” English. Now, thanks to the "English for Science and Technology" (EST) course at WU, Lee says he "speaks English a lot better. The class improved my English as a whole." He spoke English frequently in class. Now I’m less nervous.

The EST class was offered for the first time this spring as part of the English as a Second Language Program. The course is designed to help international students interested in science and technology better understand lectures given by University professors. As part of the course, students receive training in listening comprehension, note-taking skills, and effectively participating in classroom discussion.

The course also features instruction in reading scientific texts, following laboratory demonstrations, and giving oral reports. Although EST is an English course, all skills are taught based on scientific material. The main component of the class is a series of videotaped lectures by WU professors. Topics for the lectures range from the energy crisis to the biological process of reproduction. Staff members from the Language Lab film the lectures during regular classes.

"The most valuable materials that we work with are filmed lectures from University professors," said Ginger Vehaskari, EST instructor. "New foreign students actually see an American lecture. They get a feel for what an American lecture is like; they see how students and professors act.

"These are not simplified lectures for foreign students," continued Vehaskari, who taught English to university students in Finland for 20 years. "These are actual up-to-date lectures for the scientific community.

According to Vehaskari and Kathleen Sanford, graduate English Language Program coordinator, understanding the differences between American and foreign classrooms is essential to an international student’s academic success.

"For example," said Ikeda. "In Japan, when the professor gives a lecture, students rarely ask questions during class. They usually ask questions after class is over — in a one-on-one situation. It's not considered very acceptable to ask questions during class.

The Japanese student who arrives on campus sometimes will find the classroom situation totally alien from what he or she is accustomed to," said Ikeda. "Here students must learn how to successfully cope with these differences.

In addition to different classroom styles, international students must adapt to diversities among their American instructors.

"WU professors come from cities across the United States," explained Vehaskari. "A professor from New York speaks with a different accent than one from the Midwest. And while one student's professor may run across the room during a lecture, another may stand in the same place. American students are familiar with these differences. Many international students are not.

"This fall, "English for Science and Technology" is being taught during the noon hour to attract eigners in the St. Louis area. All En- glish as a Second Language courses are open to community residents through University College. However, the main target of the program is the WU community.

"We discovered there were many people from the engineering and science fields taking the basic English courses," said Ikeda. "They not only needed to learn basic linguistic skills, they needed to learn how to communicate scientific terminology."

"Reflecting on the overall changes to the English as a Second Language Program, Ikeda said, "Basically, we’ve added more sophisticated content to the classes. These are intelligent students. We’re just expediting their assimilation to the University system.

Creative dance classes offered for children

The dance division of the Performing Arts Area will offer creative dance classes for children and young teenagers on Saturdays, Sept. 28 through December.

The WU football team is inviting incoming area families to join the "Bear Family" program. Started in 1984, the program is designed to provide encouragement and positive support for athletes from outside the St. Louis community.

Families participating in the program are asked to attend "Bear Family" events and with WU's home football games.

WU United Way goal: $130,000

"Abuse — Do Something About It" is this year's United Way theme. The many afflictions affecting society today, particularly those involving our youth — child abuse and domestic violence — are especially painful in that their effects can last a lifetime if not promptly and properly addressed," said Thomas A. Harg, director of Purchasing and General Services and chairman of the WU United Way Campaign.

"Helping our youth is an urgent reason for you to consider supporting this year's United Way drive," he said.

The United Way serves more than 4,900 people through 12 agencies which provide health, social welfare, and community services. One person out of every four living in the St. Louis area looks to a United Way agency for help.

Last year, 934 employees contributed to the United Way, only 20 percent of our full-time employees. The gifts were very generous, totaling a record $125,518. This year, we are hoping to greatly increase our participation — remember, no gift is too small.

Only eight cents out of every dollar contributed is spent on administrative and fund-raising costs. Making the United Way one of the most cost-effective charitable funding organizations in the United States, Ikeda said, "Basic support provided by the families will become eligible to win a turkey, a $10 grocery store gift certificate or a gift certificate for dinner for two at a Kennedys Too Restaurant. A drawing will be held on Wednesday, Nov. 6, to determine the winners.

Football team looks for 'Bear Families'

The WU football team is inviting interested area families to join its "Bear Family" program. Started in 1984, the program is designed to provide encouragement and positive support for athletes from outside the St. Louis community.

Families participating in the program are asked to attend "Bear Family" events and WU's home football games.

"The encouragement and moral support provided by the families serves as an invaluable experience for the athletes," said Fred Remmy, WU head football coach. "Both the athletes and the families benefit from the experience. The growth of our football team makes it necessary to increase the program's membership.

For more information, call Starla Johnston at 889-4666.

The dance division of the Performing Arts Area will offer creative dance classes for children and young teenagers on Saturdays, Sept. 28 through December.

Children ages 6 and 7 will meet from 9 to 10 a.m.; 8- to 11-year-olds from 10 to 11 a.m.; and 12- to 16-year-olds from 11 a.m. to noon. All classes are open to both boys and girls. Classes are held in the dance studio, 206 Mallinckrodt Center.

Instructors are Susan Gash, a dance teacher and choreographer who has performed with the Mid-America Dance Company, and Scott Loeb, a member of the WU dance faculty. Both Gash and Loeb are alumni of WU and perform with the St. Louis Repertory Dancers, a professional company composed of WU dance faculty, guest artists and alumni.

The fee for the 10-session program is $40. A $5 late registration fee is required after Sept. 25.

To register or for more information, call 889-5885.

Larry E. Davis, associate professor of sociological and psychological anthropology, has been selected to participate in Leadership St. Louis, a program dedicated to improving the quality of life in the metropolitan area. Participants are nominated and selected on the basis of leadership in their areas of influence, as well as their demonstrated commitment to the community. The program develops and enhances community leadership by giving participants, through a year of extensive training, expanded knowledge and awareness of the strengths, needs and issues within the St. Louis area. Leadership St. Louis was founded in 1976 by the Danforth Foundation, which funds the program. It is conducted by the Coro Foundation.

Michael Freeman, M.D., clinical associate professor of obstetrics and gynecology, received the first scholar in residence for a law school seminar on "Reproductive Control." The seminar, taught by Susan Appleton, professor of law, focuses on the legal basis of intrauterine contraceptive procedures. Freeman was helpful in providing background for discussion of issues in which medical practices play a prominent role. Diane Mertt, M.D., instructor of obstetrics and gynecology, and Bruce Bryan, M.D., clinical instructor of obstetrics and gynecology, previously had served as scholars in residence for the seminar.

Wilfred R. Konneker, president of Konneker Development Corp., St. Louis, has been elected chairman of WU's Alumni Board of Governors. Other elected new officers are: Robert W. Meyer, executive vice chairman; Darlene Bangert, vice chairman; Alphonso Arentz, director of alumni programs; Jerome F. Brach, vice chairman, Alumni Annual Fund; Paul O. Hagemann, vice chairman; Darlene Strong, chairman; Elizabeth Strong, secretary; Robert C. Williams, professor of history and dean of University College, and Robert G. Wilkerson, senior associate in health services. The alliance recognizes as having the potential to improve the quality of life in the St. Louis area. The program develops and enhances community leadership by giving participants, through a year of extensive training, expanded knowledge and awareness of the strengths, needs and issues within the St. Louis area. Leadership St. Louis was founded in 1976 by the Danforth Foundation, which funds the program. It is conducted by the Coro Foundation.

Tori Clemens

The WU women's volleyball team returned to practice four weeks ago, finding that several changes had taken place. The number one change was the hiring of a full-time volleyball coach. Steve Kennt, head coach for the past six seasons, stepped down from the position to become the full-time women's basketball coach. Teri Clemens, a name synonymous with volleyball success at the prep level in Missouri, will help be the full-time volleyball coach.

Clemens joined the WU staff this summer after a six-year stint at Incarnate Word Academy in St. Louis. While at Incarnate, Clemens directed three teams to a state championship and compiled a 115-115 record over the six-year period. Clemens would like to reproduce his successes at WU. "We want to present a professional style of volleyball to the Washington University audience immediately," Clemens said.

A lot of positive things have taken place this fall. In addition to becoming familiar with my style of coaching, the team is getting adjusted to a new field, new uniforms, a new offense and a new defense. Everyone involved with the program is excited about the season.

Teri Clemens

Diabetic children—
gists, a social worker and a nurse educator from the University's medical school. Tests were conducted on 31 adolescents from the outpatient clinic of Children's Hospital.

In the controlled clinical setting, three stress tests were administered while the subjects' blood was monitored intravenously. The first test was a math and information quiz, the second was a physical activity, and the third was a discussion about the diabetic regimen. The third test was more neutral discussion between the subjects and child about common activities.

The subjects also were divided into three subgroups, representing good, fair and poor metabolic control, as determined by blood samples before the tests. The researchers wanted to ascertain: 1) the metabolic, hormonal and cardiovascular effects of acute psychological stress in ad- olescents with diabetes and 2) whether patients in poor metabolic control were more physiologically reactive to stress than those in good control.

The surprising results indicate that, under the controlled conditions of study, psychological stress does not cause acute worsening of metabolic control and that physio- logical responses to stress are moderated in well and poorly controlled adoles- cent diabetics. The investigators believe, however, that there is a small group of patients who may show exaggerated stress responses. The characteristics of such a group have not yet been clearly identified.

The next step in the study will be to monitor the patients in their natural environments during and after times of actual stress.

Coach heralds new era for volleyball

The last three weeks have been exciting. Clemens said, "Chris Becker will be our leading blocker and leading attacker, which is quite a hefty responsibility, but we think she can handle the task."

Clemens added: "Several of the teams we play this year will have better players than we do. But I think we're going to surprise a few of those teams with our brand of volleyball. We plan to start this new era of volleyball at Washington University with attitude and a winning season."

Tori Clemens

Woman's Club greets newcomers

Robert C. Williams, professor of his- tory and dean of University College, will speak on "Ladies of the Club and Liberal Learning" at the Sep- tember meeting of the Woman's Club.

The Woman's Club will meet at 7:30 p.m. Thursday, Sept. 26, at Uni- versity House to honor new mem- bers. Elizabeth G. Danforth, wife of Chancellor Danforth and a long-time member of the club, will greet new- comers at the meeting. Chairwomen also will offer information on day- time and evening activities of the club.

For more information, call Mary Lu Johnston at 721-7825.

NOTABLES
**LECTURES**

**Thursday, Sept. 19**
Noon. The Left Forum, "Contemporary Greek Political Economy," Gerald Curren-

swrager, WU assoc. prof. of architecture. Lambert Lounge, Mallinkrodt Center. A fol-

low-up discussion will be held Sept. 26 in Lambert Lounge.
1:10 p.m. George Warren Browne School of Social Work Colloquium, "Women in

Development: Lessons from West Africa and Ethiopia," Sheila Bush, prof. of phi-

losophy and director of women's studies, MU-

edwardsville. Women's Building Lounge.
8 p.m. Dept. of English Colloquium, "In Faust's Den: The Lament of Freud," Benja-

min Taylor, WU instructor in English litera-
ture. Bixby Gallery, Bixby Hall.

**Friday, Sept. 20**
4 p.m. Dept. of Music Colloquium, "Opera and His Opera," John Eaton, opera composer.
Blewett B-8. The program will include a video cassette of Eaton's recently premiered Shakes-

pearean opera "The Tempest."
Sunday, Sept. 22
4 p.m. The Bookmark Society Literary Series poetry reading by Howard Nemerov.
Edison Theatre. Admission is $5 to general public. Free to students and society members.

**Wednesday, Sept. 25**
4 p.m. Dept. of Chemistry Seminar, "Interconverting of Uminated Hydroxobenzoin Epoxyphile Tungstenocene Complexes," N. John Cooper, prof. of chemistry, Harvard U. 311 McMillen.

**Thursday, Sept. 26**
4 p.m. Dept. of Chemistry Seminar, "Syn-

thetic Models of Enzyme Structure and Func-
tion." Andrew Hamilton, prof. of chemistry, Princeton U. 311 McMillen
4 p.m. Dept. of Philosophy Colloquium, "The Philosophy of Culture, the 18th Century and Kant," Albert William Levi, David May Distinguished University Professor Emeritus in the Humanities. Burt Lounge, Duncker Hall.

**MUSIC**
Saturday, Sept. 21
8 p.m. Dept. of Music Graduate Piano Recital with Terry Marvin. Graham Chapel.

**PERFORMANCES**
Friday, Sept. 20
8 p.m. Braslavich Tomich and Leslie Fried-

man, in dance concert at Edison Theatre. (Also Sat., Sept. 21, same time, Edison.) Admis-
sion is $8 for general public, $7 for WU fac-

ulty and staff; and $5 for students. For tickets, call 889-6543.

Saturday, Sept. 21
1:5 p.m. Auditions for Performing Arts Area production of Oscar Wilde's "Salome" at Edison Theatre. (Also Sat., Sept. 22, noon-3 p.m., Edison.) Call 889-5885.

**EXHIBITIONS**
"Howard Nemerov: Remembering the Way," Olin Library Special Collections, level 5. 8:30 a.m.-5 p.m. weekdays. Through Sept. 26.
"Visual Dedication to Azania (South Af-

rica)," an exhibition of works of Nelson Bos-
ton. Philip Hampton, Cathy Jones, Lamber A. Garwood and James E. Tatum. Through Sept. 29. Bixby Gallery, Bixby Hall. 10 a.m.-4 p.m. weekdays. 1:5 p.m. weekends.

**FILMS**
Thursday, Sept. 19
and 9:30 p.m. WU Filmboard Series, "The Last Metro." $2. Brown Hall.
Friday, Sept. 20
7:15 p.m. and midnight. WU Filmboard Series Double Feature, "Beverly Hills Cop" at 7:15 p.m. and midnight, and "Trading Places" at 9:30 p.m. $3. Brown Hall. (Also Sat., Sept. 21, same time, and Sun., Sept. 22, "Beverly Hills Cop" at 7 p.m. and "Trading Places" at 9:15 p.m. Brown.)
Monday, Sept. 23
7 and 9 p.m., WU Filmboard Series, "High Sierra." $2. Brown Hall. (Also Thurs., Sept. 26, same time, Brown.)
Wednesday, Sept. 25
7 and 9 p.m. WU Filmboard Series, "Tet-

geru Monogatari." $2. Brown Hall. (Also Thurs., Sept. 26, same time, Brown.)
Friday, Sept. 27
7 and 9:30 p.m. WU Filmboard Series, "The Breakfast Club." $2. Brown Hall. (Also Sat., Sept. 28, same time, and Sun., Sept. 29, at 7 p.m., Brown.)
Midnight, WU Filmboard Series, "MTA-'85." $2. Brown Hall. (Also Sat., Sept. 28, same time, and Sun., Sept. 29, at 9:30 p.m., Brown.)

**SPORTS**
Friday, Sept. 20
7:30 p.m. Soccer, WU vs. Blackburn College. Francis Field.
Saturday, Sept. 21
1:30 p.m. Football, WU vs. Rose-Hulman Ins-

stitute. Francis Field.
Sunday, Sept. 22
1:30 p.m. Soccer, WU vs. DePaul U. Francis Field.

**MISCELLANY**
Thursday, Sept. 19
10 a.m.-3 p.m. IKEE Video Conference, "Fiber Optics-Technology and Applications." Loogia (01). For more info. and pre-registra-
cion, call the electrical engineering dept. at 889-4150.
Saturday, Sept. 21
9 a.m.-noon, Graduate Record Exam test preparation workshop in the Learning Center. Room 312, Women's Bldg. Materials cost $10. To register, call 889-5939 or 889-9970.
Monday, Sept. 23
3 p.m. Auditions for Speed and Comprehension, a six-week course will be offered by the Learn-
ing Center (Room 312, Women's Bldg.), beginning Sept. 23. Classes meet twice weekly for one hour each: Monday and Wednesday, 10-11:30 a.m.; Tuesday and Thursday, 2:30-3:45 p.m.; and Monday and Wednesday and Friday, noon-1 p.m. Materials cost $12. To register, call 889-5939 or 889-9970.
Tuesday, Sept. 24
6:45 p.m. B'nai B'rith Hillel Foundation Tradi-

tional Yom Kippur Services at Edison Theatre. (Also Wed., Sept. 25, at 9 a.m., Edison.)
7 p.m. B'nai B'rith Hillel Foundation Lib-

eral Yom Kippur Services at Hillel House, 6500 Forsyth. (Also Wed., Sept. 25, 10 a.m., Hillel House.)

"New Faculty Exhibit" featuring Dawn Marie Guernsey and Eric Nordquist. Through Sept. 29. Bixby Gallery, Bixby Hall. 10 a.m.-4 p.m. weekdays; 1-5 p.m. weekends.
"The Prints of Barnett Newman." Through Oct. 15. Gallery of Art, lower lobby. Admission is $9 for general public; $7 for WU faculty, staff and senior citizens; and $5 for students. For tickets, call 889-6543.
"Mark Twain Exhibit," featuring manus-

cripts, letters and first editions of Mark Twain drawn from the library's collection. Sept. 23-Oct. 31. Olin Library, Special Collections, 5th level. 8:30 a.m.-5 p.m. weekdays.

**Dedication to Azania:** James E. Tatum's "Beji," 1983, handmade earthenware, 32" tall, is exhibited in "A Visual Dedication to Azania (South Africa)," through Sept. 29 at Bixby Gallery in Bixby Hall. Tatum, a ceramicist and painter, is assistant professor of art at Lincoln Uni-

versity in Jefferson City, Mo. Azania is a modern coinage used by black nationalists to refer to South Africa. According to Lameris Geneser, the show's curator, "The exhibition is not de-

signed to dictate to the audience or to convey a propagandistic approach about the political

struggle in Azania, but to convey through aesthetic expression the complexity and universality of human struggle."

Edison Theatre will present "Home-

coming Dance," a special evening of

entertainment by performance artist

Branslav Tomich and dancer Leslie Fried-

man at 8 p.m. Friday and Satur-

day, Sept. 20 and 21. The two will

perform their solo acts on a double

bill, co-sponsored by Edison Theatre and Dance Saint Louis.

Tomich, who is a comedian, 

choreographer, actor and dancer, re-

fers to himself as a "performance

artist" to emphasize that his perform-

ances include more than just dance. 

"These Foolish Things," which he will

perform at Edison Theatre, is half-dance and half-como-

ic monologue. He also will perform from "Bagnell Dam to Your Pleasure Systems," a character piece that sat-

irizes evangelists of the electronic media.

Though Leslie Friedman has a
doctorate in history from Stanford University and has taught at Vassar College and at Case Western Reserve, she decided to give up academia in the 1970s to pursue a dance career.

She has studied dance at the Martha Graham and Alvin Alley schools.

Both Tomich and Friedman have roots in the Midwest. Tomich, who now lives in New York City, is a WU graduate. Friedman, who lives in the San Francisco Bay Area, is a native of Cleveland. Both artists' parents live in St. Louis.

Tickets are $9 to the general public; $7 to senior citizens and WU faculty and staff, and $5 for students. For tickets, call the box office at 889-6543.

**Calendar Deadline**
The deadline to submit items for the Oct. 10-19 calendar of the Washington University Record is Sept. 26. Items must be typed and state time, date, place, nature of event, sponsor and admission cost. Incomplete items will not be printed. If available, include speaker's name and identification and the title of the event, also include your name and telephone number. Address items to King McElroy, calendar editor, Box 1070.

**CALENDAR**
Sept. 19-28
