Family of the ’80s to be explored in sociologist’s talk

Sociologist and Washington University alumna Pepper Schwartz will deliver the Woman’s Club of Washington University Lecture at 11 a.m. Wednesday, Nov. 5, in Graham Chapel. Her lecture, titled “What’s Happening to the Family in the ’80s,” is part of the Assembly Series and is free and open to the public.

Schwartz is an associate professor of sociology at the University of Washington, where she also teaches in psychiatry, behavioral science and women’s studies.

She is an authority on the family, gender and human sexuality and has published several books, articles and reviews on these subjects.

Her most recent book, *American Couples: Money, Work, and Sex* (co-authored with Philip Blumberg), is based on a survey of 12,000 questionnaires and 300 in-depth interviews of American couples. The book examines the changing social reality by including cohabitating, gay and lesbian couples along with legally married couples.

Schwartz served on President Reagan’s Advisory Roundtable on the Family in 1984. She frequently provides expert testimony on court cases involving custody, homosexuality, family patterns and pornography. A consultant to the CBS morning news, Schwartz also served as a consultant to ABC for a documentary on the family, which aired in July 1986.

She graduated magna cum laude and Phi Beta Kappa in sociology from Washington University in 1967 and, in 1969, received her master’s degree in sociology here as a Woodrow Wilson Fellow. She received a master’s in philosophy and a doctorate in sociology from Yale University.

Schwartz serves on the council of the American Sociological Association, Family Section, and has served on the national board of the YWCA, and the Washington state chapter of the ACLU. She was named one of the outstanding young women of the future by Time magazine and the Seat.

Saperstein will examine Jewish responses to peril in Nov. 6 lecture

Rabbis Marc Eli Saperstein, Ph.D., will deliver the Gloria M. Goldstein Professor of Jewish History and Thought Inaugural Lecture at 8 p.m. Thursday, Nov. 6, in Steinberg Hall Auditorium. Saperstein, a former associate professor of Jewish studies at Harvard Divinity School, was appointed to the Goldstein professorship at Washington University in August 1986.

Saperstein’s lecture is titled “Jewish Responses to Peril and Catastrophe.” The lecture, which is free and open to the public, is sponsored by Jewish and Near Eastern Studies, the Department of History and Religious Studies. During the talk, Saperstein will concentrate on the first Crusade and the Holocaust, discussing the options available to Jews facing a threat to survival and the various interpretations following those tragedies.

Saperstein is considered one of the nation’s most distinguished scholars of contemporary Judaic history and affairs. The chair was created by Sam Goldstein, prominent St. Louis civic and business leader, in memory of his wife, Gloria M. Goldstein.

An architect’s sketch shows the $3.5 million Plant Growth Facility with adjacent greenhouse, which is being built as an addition to the biology department’s Life Sciences Building. Pictured to the right of the facility is Rebstock Hall.

**Plant growth**

$3.5 million addition slated for biology department’s Life Sciences Building

The biology department’s Life Sciences Building is slated for a new look — a $3.5 million addition called the Plant Growth Facility with an adjacent greenhouse.

The existing greenhouse at the Life Sciences Building will be re-called the Plant Growth Facility with adjacent greenhouse, which is being built as an addition to the biology department’s Life Sciences Building. Pictured to the right of the facility is Rebstock Hall.

The biology department also occupies Busch and Monsanto laboratories and Rebstock Hall.

The project will include an additional 5,000 square-foot greenhouse facing Forsyth. Inside the structure, there will be five smaller greenhouses separated by glass walls. Preliminary work on the facility began in early October. The greenhouse will be available for planting in August 1987.

The existing greenhouse at the Life Sciences Building will be removed after the new one is in operation. The facility will reduce the number of parking spaces by 25. However, to help relieve the parking space reduction, William L. Flippo, manager of architectural services, says the University plans to build a third-level on the two-level parking deck. The deck is on the north side of campus and stretches from Mudd Hall to the McMillen Laboratory.

The first floor of the plant facility will contain office and storage space and a greenhouse workroom. Laboratories and a plant growth chamber will be housed on the second floor. A laboratory and a mechanical equipment room will occupy the third floor.

Kallmann, McKinnell & Wood Architects Inc. of Boston, Mass., is the design consultant for the Plant Growth Facility. The Boston firm also designed the $13.5 million Simon Hall. Gilmore, Mack & Cannon Inc. of St. Louis is the project architect. The general contractor is Kloster Co. Inc. of St. Louis.

Roy Curtis III, Ph.D., George William and Irene Koechig Freiberg Professor of Biology and chairman of the department, says the plant group faculty will use the addition and greenhouse extensively to study plant species ranging from soybeans to tobacco.

“The facility will make it easier for our faculty to do research with plant species because it will provide an isolation chamber to work safely with diseased plants,” says Curtis. “It additionally will allow faculty to work with plant cell and tissue cultures to study plant regeneration. Plant regeneration is the process of growing plants from parts of plants rather than seeds.”

Curtis says the department has added several young faculty members to the plant biology program in the last three years. “As their careers blossom and they receive more research support, we need larger facilities,” he says. “The structure will allow them to further their careers and expand their endeavors.”

High hopes

Freshmen Kenny Fagan (left) and Brooke Bonin leap for a block in recent Bear volleyball action. The Bears have won 14 consecutive matches, and currently own a 38-0 season record. In the NCAA's latest Division III volleyball poll, Washington University was ranked 20th in the country—the first ever such ranking for a Bear volleyball squad. Head coach Teri Clemens and her Bears are hoping for a post-season bid to the NCAA national tournament, where play will begin at four regional sites around the country on Nov. 14 and 15. The Red and Green spiders take the court again Wednesday, Oct. 29, to face NAIA power Calver-Beekman College. The volleyball team has four matches remaining in the regular season.

Landscape architect to explain relationship of cities, nature

Landscape architect Anne Whiston Spirn will speak on "City and Nature: A Poetic Dialogue" at 8 p.m. Monday, Nov. 3, in Steinberg Hall Auditorium. Her lecture is part of the Monday Night Lecture Series sponsored by the School of Architecture. Her lecture is co-sponsored by the American Society of Landscape Architects. The lecture is free and open to the public.

Spirn is chairman of landscape architecture at the University of Pennsylvania and author of The Granite Garden, a study of urban architecture and its application to urban design. She is a consultant to the city of Boston and is currently studying how urban form affects air circulation. Spirn is developing guidelines to promote better ventilation and circulation in the city.

A second project, "Exploiting the Open Space Potential of Urban Vacant Land," is a plan that views urban vacant land as an opportunity to reshape American cities. The study, funded by the National Endowment for the Arts, will be tested in Oakland, Calif.; Denver, Colo.; Dayton and Cincinnati, Ohio; New York's South Bronx; and in Boston. The study promotes 15 uses for vacant land, including recreation, storm drainage, forestry, agriculture and mineral conservation.

For more information about the lecture, call 889-6200.

Students, faculty, alums invited to apply for apprenticeship in Far East

Graduating seniors in all fields, graduate and professional students, recent recipients of advanced degrees, junior faculty and alumni are all eligible to apply for a Henry Luce Foundation professional apprenticeship. Fifteen Luce scholars are selected annually to work in the Far East for one year.

The intent of the Luce Scholars Program is to provide an intensive experience in Asia for an outstanding group of young Americans who would not, without the normal course of their careers, expect to have such exposure. Therefore, any professional field will be considered except Asian studies.

Luce Scholars are placed in in-2 ternships and jobs based on their individual career interests, experience, training and general background. Recent recipients have been attached to an architectural firm in Tokyo, a forestry project in Indonesia, a newspaper in Hong Kong, a training facility for public administration in Malaysia, a program in community medicine in the Philippines, the banking authority in Singapore, and a family planning center in Taipei. At the end of their year in the Far East, the students must present their papers by Friday, Nov. 7. For more information, contact James E. McLeod, Office of the Chancellor, Campus Box 1192, or Sara Epstein, Coordinator, Study Abroad Programs, Campus Box 1117, Washington University, St. Louis, MO 63130.

Chancellor William H. Danforth has announced the appointments of two St. Louis civic leaders to the Board of Trustees: Harvey Saligman, chairman of the board and chief executive officer of Interco Inc., St. Louis, and Paul E. Miller Jr., president, Miller & Son Beauty Supply Co., St. Louis.

Saligman started his business career with Queen Casuals Inc. In 1965 he was elected vice president and in 1968 president of that company, prior to its acquisition by Interco Inc. Three years later he became president and chief operating officer. He assumed additional responsibilities as executive officer in 1985 and chairman of the board in 1988.

A native Philadelphian, Saligman graduated from the Philadelphia College of Textiles and Sciences in 1960. His civic activities include his appointment to the board of directors of St. Louis' Jewish Hospital, Mercantile Bancorporation, St. Louis Symphony and Children's Hospital. He also is a commissioner of the Saint Louis Art Museum. He is a member of the Knitted Outerwear Manufacturers Association, Locust Club of Philadelphia, St. Louis Club, St. Louis Junior Board of Vacation Club and Young Presidents Organization.

Miller received a bachelor's degree in commerce from St. Louis University in 1961 and a master's degree in business administration from Washington University in 1968. He formerly was a member of the board of directors of the New Age Federal Savings & Loan Association of St. Louis, Gateway National Bank and Gleece Community Center. Current board memberships include St. Louis Regional Commerce and Growth Association, Gateway Mall Redevelopment Corp., Pride of St. Louis Redevelopment Corp., Landmark Central Bank & Trust Co., St. Louis Council of Boy Scouts of America and Goodwill Industries. He also was associated with the Office of Federal Procurement, St. Louis, from 1974-1975.

Two St. Louis civic leaders appointed University trustees

The Psychological Service Center expands offering

The Psychological Service Center at Washington University has expanded its services and has openings for new clients. Located in Eads Hall, the center is open to individuals of all ages from the St. Louis community.

The center is staffed by faculty and advanced graduate students in the University's clinical psychology doctoral program. The graduate students are supervised by the faculty, licensed, clinical psychologists. The director is Amy D. Bertelson, Ph.D.

Short- or long-term psychotherapy is offered to all clients. In response to demand, group therapy may be designed to treat specific problems, such as weight loss, anxiety and insomnia. Psychological assessment, including intellectual, personality and diagnostic evaluation for children and adults, is offered through the center.

For more information, call the center at 889-6555.

'S80s family'—continued from p. 1

cot at 12:30 p.m. Wednesday, Nov. 5, at the Len Langston Clayton Road. At the event, Schwartz will answer questions about her book American Couples: Money, Work, and Sex.

Adri Starbird, dean emerita of women at Washington University and Gertrude Hartmann will be honored at the luncheon for 60 years of community service.

The luncheon is open to club members and their guests. The cost is $10. For more information, call Patricia Owens at 968-4680.

Paul L. Miller Jr.
Jeffrey L. Marsh, Ph.D., professor of biology, presented three seminars on the history of eugenics in the early 20th century. He also gave two lectures at the University of Pittsburgh Medical School. The first one was titled “The American Eugenics Movement: An Overview, 1900-1910,” and the second one, “The Founding of the Eugenics Record Office.”

Louis H. Ederington, Ph.D., was appointed director of the Institute of Social and Institutional History. He has been elected to a three-year term. He served as a discussant for a panel titled “The Southern Cone.” Several other members of the Latin American Studies committee participated in the meeting, Raymond L. Walker, Ph.D., professor of romance languages and literatures and chairperson of the University’s Latin studies committee, served as discussant for a session titled “Literature and Latin America.” Philippe Bourgois, Ph.D., assistant professor of anthropology, presented a paper titled “Politicized Ethnicity: The Misiktu of Northeastern Nicaragua” at a session on “Peasants in Latin America.” Barry Ames, Ph.D., associate professor of political science, served as a discussant for a panel titled “Democracy and Authoritarianism in Contemporary Latin America.”

Have you done something noteworthy? Have you: Presented a paper? Won an award? Been named to a committee or elected an officer of a professional organization? Or eliminated the need for transfusions or transplants during open heart surgery? Or published a book titled “The Player’s Passion: Managing a Lifetime Derby-Aging.” The award, a check for $500, was presented recently at the National Educational Theatre Conference at New York University. Roach’s book, published by the University of Delaware Press, was selected from among 88 that were read for the 1985 award. The book explores a theory in performance found in classical rhetoric and examines significant writings about emotion in performance. It details how these works reflect scientific concepts of human physiology and its relation to emotion.

Robert M. Walker, Ph.D., McDonnell Professor of Physics and director of the McDonnell Center for the Space Sciences, and Ernest Zimmer, Ph.D., director of the Ion Probe Laboratory in the center, attended the Committee on Space Research (COSPAR) Conference in Toulouse, France. Walker gave an invited paper on the analysis of cosmic dust impacts recorded in the thermal blanket returned from the Solar Max Space Mission. Following the COSPAR conference, Walker delivered a series of lectures on interstellar dust at the Enrico Fermi Summer School in Varenna, Italy. Zimmer gave invited talks at the Max-Planck Institutes in Heidelberg and Mainz, West Germany.

Richard J. Walter, Ph.D., professor and chairman of the history department, served as program chairman for the Annual Meeting of the Mid-Atlantic Association of American Studies held Sept. 25-27 at the University. War and peace was the theme of the meeting, which featured more than 100 specialists from around the globe. The meeting was co-sponsored by Washington University and the American Institute of Germanic Studies, of which Walter is a member. Walter also was discussant on a panel titled “The Southern Cone.” Several other members of the Latin studies committee participated in the meeting, Raymond L. Walker, Ph.D., professor of romance languages and literatures, chaired and served as a principal discussant on a panel titled “War and Peace in the Work of Gabriel Garcia Marquez, Margarita Miller and Ben Heller, two graduate students in romance languages, presented papers on the sex trade in German-speaking countries. Lutzeiler’s book was cited “as the best work during the past two years in German literature.”

Jeffrey L. Marsh, M.D., associate professor of plastic and reconstructive surgery at the School of Medicine, has been elected to a three-year term as secretary of the American Cleft Palate Association. At the association’s recent annual meeting, he also presented three papers and co-chairs an ongoing symposium on the long-term results of craniofacial surgery. Marsh and Michael W. Van Nest, M.D., associate professor of radiology, recently published a textbook on use of computer imaging in the diagnosis and correction of facial deformities.

Joseph R. Roach, chairman of the Performing Arts Area, received the Business Week Hewitt Award for outstanding researching in theatre history for his book titled “The Player’s Passion: Managing a Lifetime Derby-Aging.” The award, a check for $500, was presented recently at the National Educational Theatre Conference at New York University. Roach’s book, written in partnership with Cynthia Lindman, a native of Bloomingdale, N.J., was selected from among 88 that were read for the 1985 award. The book explores a theory in performance found in classical rhetoric and examines significant writings about emotion in performance. It details how these works reflect scientific concepts of human physiology and its relation to emotion.

Cynthia Lindman composed this winning design the night before the contest deadline.

NASA picks student’s design as official logo for Venus mission

A graphic design by Cynthia Lindman, a sophomore in the College of Arts and Sciences, was chosen by NASA’s Jet Propulsion Laboratory as the official logo for the space agency’s Magellan Mission to Venus.

Magellan, an unmanned mission to map the surface of Venus, is scheduled for launch in 1989. Lindman’s logo will be used on the mission’s nameplate, Fermdad Magellan, with graphic symbols representing the orbits of Earth, Mercury and Venus around the sun.

Lindman will receive an award during a Nov. 29 ceremony in her honor at the Jet Propulsion Laboratory in Pasadena, Calif., the command center for the Magellan Mission.

Washington University faculty and staff make news around the globe. Following is a digest of media coverage they have received during recent weeks for their scholarly activities, research and general expertise.

Identification of human skeletal remains that were found in a wrecked plane in New Guinea was the subject of the second part of a three-part series in the May 14 New Yorker magazine. A key part in the identification process by the U.S. Army’s Central Identification Laboratory was the estimation of living height of individuals. The article explains how formulas devised by Fred Trotter, Ph.D., professor emerita of anatomy, were used to estimate height of the plane crash victims from lengths of long limb bones.

“Washington University’s Business Dean is taking care of business,” states the headline from the August issue of St. Louis Magazine. The article contains an in-depth interview with Robert L. Virgil, D.B.A., dean of the School of Business and Public Administration.

Who really pays corporate income taxes? A debate that rages on as Congress shifts the $100 billion in tax liabilities from individuals to corporations. The Aug. 5 Philadelphia Inquirer and many other nationally prominent newspapers quoted Chris Varvax, lecturer in economics, in a story dealing with the pros and cons of the new tax reform legislation recently passed by Congress. He told the Senate Finance Committee that focusing on tax reform is not only irrelevant, it’s counterproductive.

Recycling a patient’s own blood during open heart surgery reduces or eliminates the need for transfusions from donors, according to Nicholas T. Kouchoukos, M.D., John M. Schoenberg Professor of Cardiovascular Surgery. The story appeared in the New York Post on Sept. 10.
Lectures
Thursday, Oct. 30
12:10 p.m. Gallery Talk, "Mancel Duchamp," Lawrence Steele. WU Steinberg Professor of Art. Upper Gallery and Aud.
4 p.m. Dept. of Earth and Planetary Sciences Seminar, "Desertization in Mali: The Inversion of Bacterial Environments," Patricia A. Jacobberger, of the WU Gallery of Art. Second floor aud., CID.

Friday, Oct. 31
2 p.m. Dept. of Chemical Engineering Seminar, "Production of Lysophosphatidic Acids," William P. Wren, prof. of microbiology. Marvin Auditorium, School of Medicine.
2 p.m. Public Affairs Thursday Series Symposium: South Africa Update, Michael S. Goldstein, WU prof. of political science. 200 C & D Ether.
8 p.m. Goldstein Inaugural Lecture, "Two Genes at the End of the Human Genome," Rabbi Marc Eli Sussman. WU prof. of religious studies. University Center, 300 Cupples.
8 p.m. Dept. of Germanic Languages and Literatures Lecture, "Die Kunsthalle, Kunsthalle, Kunsthalle, Kunsthalle," Michael Stoll, prof. of modern languages. WU auditorium.

Saturday, Nov. 2
6 and 8:30 p.m. WU Association Film Travel Lecture Series, "Travels In France of the Provinces," WU prof. of history. WU auditorium.
10 a.m.-5 p.m. The Autumn’s Whispering: 2-D NMR Data," Brian Reid, WU prof. of physics. WU auditorium.
7:30 p.m. Film "Trans-Euro-Expresst," by Alan Robbe-Grillet. WU distingushed professor of film studies. Brown Hall.
9:30 p.m. Film "L’Homme qui ment," by Alain Robbe-Grillet. WU distingushed professor of film studies. Brown Hall.

Sunday, Nov. 3

Wednesday, Nov. 5

Performances
Saturday, Nov. 1
8 p.m. Edison Theatre Presents Maho Mines in "Cold Harbor," General admission is $15.50. WU students and staff and senior cit. aos. and $8 for students. For more info, call the Edison Theatre box office at 889-6543.

Exhibitions
"Beckett at 80," an exhibit of books and manuscripts drawn from the Samuel Beckett Collection donated to the WU Library through Dec. Special Collections, Olin Library. 8 a.m.-5 p.m. weekdays.
"New York Art Directors 65th Annual Exhibition," Noon to 8 p.m. weekdays. Brown Hall.
"The School of Paris and Modern Art in Europe," Noon to 5 p.m. Gallery of art, 10 a.m.-5 p.m. weekends. For more info, call 889-4523.
"Early Modernist Architecture in St. Louis," William Adair Bermundou, Through Dec. 7. Gallery of art, lower gallery, 10 a.m.-5 p.m. weekdays. For more info, call 889-4523.
"Recent Photographic Acquisitions," Thursday, Oct. 28. Gallery of art, print gallery. 10 a.m.-5 p.m. weekdays, 1-5 p.m. weekends. For more info, call 889-4523.

Films
Thursday, Oct. 30
7 and 9 p.m. WU Filmboard Series, "Duet for Cymbals," S. Brown Hall.
Friday, Oct. 31
7 p.m. and midnight, WU Filmboard Series, "Wolves," S. Brown Hall. (Also Sat., Nov. 1, at 7 p.m. and Sun., Nov. 2, at 4 p.m.) Brown Hall.
7:30 p.m. Film "Trans-Euro-Express," by Alain Robbe-Grillet. WU distinguished professor of film studies. Brown Hall.
9:30 p.m. Film "L’Homme qui ment," by Alain Robbe-Grillet. WU distinguished professor of film studies. Brown Hall.

Saturday, Nov. 2

Wednesday, Nov. 5
7 and 9:15 p.m. WU Filmboard Series, "Top Hat," S. Brown Hall. (Also Tues., Nov. 4, at 7:15 p.m.) Brown Hall.

Thursday, Oct. 31
7 and 9:30 p.m. WU Filmboard Series, "L’Immortelle," S. Brown Hall. (Also Thurs., Nov. 6, at 7:30 p.m.) Brown Hall.
7:30 p.m. Film "L’Homme qui ment," with a 30-minute filmed commentary by Alain Robbe-Grillet. WU distinguished professor of film studies. Brown Hall.
9:30 p.m. Film "L’Homme qui ment," with a 30-minute filmed commentary by Alain Robbe-Grillet. WU distinguished professor of film studies. Brown Hall.

Friday, Nov. 7
7 and 9:30 p.m. WU Filmboard Series, "Brazill," S. Brown Hall. (Also Sat., Nov. 8, and Sun., Nov. 9, at 7 p.m.) Brown Hall.
7:30 p.m. Film "L’Homme qui ment," with a 30-minute filmed commentary by Alain Robbe-Grillet. WU distinguished professor of film studies. Brown Hall.
9:30 p.m. Film "L’Homme qui ment," with a 30-minute filmed commentary by Alain Robbe-Grillet. WU distinguished professor of film studies. Brown Hall.

Saturday, Nov. 1
Noon, Men’s and Women’s Cross Country, WU Field House.

Wednesday, Nov. 5
7 p.m. Volleyball, WU vs. Greenville College.

Saturday, Nov. 7
7 p.m. Men’s and Women’s Swimming, WU vs. Millikin U., Rockford College and Butler U.

Sports
Saturday, Nov. 1
Noon, Men’s and Women’s Cross Country, WU Field House.

Wednesday, Nov. 5
11 a.m. Men’s and Women’s Swimming, WU Field House.

Miscellaneous
Saturday, Nov. 10
8 a.m. to 10 a.m. Race and Two-Mile Fun Run for Charity at Francis Field. Co-sponsored by the Phi Beta Kappa, Phi Delta Theta, Alpha Chi Rho, Delta Tau Delta, Phi Kappa Phi and Sigma Nu. Call Mrs. William Owens, 968-4680.

Wednesday, Nov. 5
12:30 p.m. Woman’s Club Luncheon at the Junior League, 8250 Clayton Road. Address: 100 Club, of women at emeritus at Washington University, and Gertrude Himmelfarb, both 60-year members of the club, will be honored. The luncheon is held in conjunction with the Aids for the Deaf," Jan Weisenberger, asst. re-

Calendar Deadline
The deadline to submit items for the Nov. 15-22 calendar is Wednesday, Oct. 28. Only items in Record No. 6 are to be included. Items must be typed and state time, date, place, nature of event, sponsor and admission cost. Incomplete items will not be printed. If available, include speaker’s name and affiliation, telephone number, address, time and telephone number. Address items to King McElroy, calendar editor. Box 1070.

Services expanded for information desk in Mallinkrodt
To better serve the Washington University community, the Office of Student Activities has expanded services at The Desk, the campus information center in Mallinkrodt Center.

The desk, which is staffed by trained students, now provides information about campus events 24 hours a day via a recorded message. Each evening when The Desk closes, you may call the center at 889-5998 and receive event information for that evening and the following morning.

The desk is staffed from 9 a.m. to 8 p.m. Monday through Thursday, 9 a.m. to 6 p.m. on Friday, and 10 a.m. to 5 p.m. Saturdays and Sundays. A free phone is available near the center for on and off-campus calls.

The student activities office also is soliciting information on events open to the campus community and general public.

Plant growth
continued from p. 1
"We are delighted with the design of the addition," says Tom H. Sim-

rors, administrator for the biology department. "We think it will be a huge improvement for the life sciences building. After the new greenhouse is constructed and the current one is remodeled the facade of Reebst Rockshall be exposed. It’s a very pretty piece of stonework. Our new greenhouse will be a lot more beautiful.

With its limestone and granite makeup, the new greenhouse facility is similar to Simon Hall and will blend in well with the campus, notes Joe F. Evans, associate vice chancellor for business affairs.

With its limestone and granite makeup, the new greenhouse facility is similar to Simon Hall and will blend in well with the campus, notes Joe F. Evans, associate vice chancellor for business affairs.
