$1 million grant

Bohm gift to Technion, WU promotes better U.S.-Israel business relations

A grant of $1 million to promote better and augmented business relations between the United States and Israel has been given jointly to the American Society for Technion — Israel Institute of Technology and Washington University's School of Business by Lee and Milford Bohm, long-time residents and civic leaders of St. Louis.

The grant, according to Milford Bohm, prominent businessman and philanthropist, will serve to "forge a permanent cooperative relationship between the two universities, enable outstanding Israeli students to pursue business studies here in the U.S., and allow business-oriented American university students and faculty to gain knowledge of and insight into Israel's business environment, universities, industry and general culture." The joint gift was announced by Chancellor William H. Danforth and President Max Reis of Technion in Haifa.

Bohm, founder and chairman of the board emeritus of CPI Corp., a $200 million consumer service company based in St. Louis, and chairman of the board/CEO of Cencit Inc., a high-technology R & D company, said that the $1 million fund established in his and his wife's name would "link Technion and Washington University together on a lasting basis and thus create a climate for rich and enduring cross-fertilization between the United States and Israeli worlds of business and their future leaders."

Bohm stated that Israeli students pursuing the MBA business degree at Washington University would be given a better and fuller grasp of United States business methods and realities, a development that he termed "extremely desirable, since it is a crucial requirement for the growth of Israel's economy."

Bohm emphasized this point by stating his belief that "in the U.S. trade arena, Israelis will have to adapt to American business practices and not vice versa."

As Israel's major provider of scientific and technological manpower and the nation's foremost applied-research center, Technion's graduates now comprise some 70 percent of all the country's working scientists and engineers.

One-third of Israel's total export income currently derives from high-tech products based on scientific know-how and local innovation, and this percentage is expected to increase. In recent years, more than 150 high-tech companies have begun operations in Israel; many, if not most, owe their existence to Technion-trained scientists, Technion-conducted research or actual Technion assistance. More high-technology research and development are carried out at Technion than in all of Israel's other universities combined.

Bohm said "Our choice of Washington University as the recipient of this grant is because this is the leading university in our region and it has one of the leading schools of business in the heartland of America. Under the leadership of Chancellor William H. Danforth and Dean Robert Virgil, we believe that within a decade, this School of Business will be rated with the top five or six schools of business in the nation."

Bohm, who attended the University of Pennsylvania and The Sorbonne, is engaged in numerous top-level business, civic, community and philanthropic activities.

Tuition to increase in 1987-88

For the 1987-88 academic year, fees for tuition, room and board at Washington University will increase to $15,586 — 7.4 percent above the current year. The announcement was made by Chancellor William H. Danforth.

Tuition will be $11,400 in 1987-88, compared with $10,500 this year, an increase of 8.6 percent. Room and board will be $4,186, an increase of 4.3 percent over this year's cost of $3,998.

"To provide our students with an education of the highest possible quality, Washington University must remain an outstanding institution," said Danforth. "Although we regret the need to increase fees, it is the only way we can guarantee faculty and programs of exceptional value. Of course, financial aid will take these increases into account for those students who receive assistance."

In making the announcement, the University noted that inflation in higher education is higher than that in general society. Significant factors are: attracting and retaining talented faculty; books and periodicals for the library; scientific materials; insurance; and energy costs. Each of these areas has seen increases far above the cost-of-living index.

"We have worked hard to hold down our costs and the tuition increases they produce," said James R. Buchholz, vice chancellor for finance and administration. "We know that our administrative expenses are lower than those of most comparable institutions and our fund-raising efforts continue to produce extraordinary results."

However, many of the gifts are restricted, and the result is that gifts and income from our endowment cover only about 24 percent of the costs of operating the University's core academic and administrative functions. We rely on tuition income to cover more than 60 percent of these costs," Buchholz added.

"To assist students in meeting costs, Washington University last year announced that its original Tuition Stabilization Plan had been expanded and renamed the Cost Stabilization Plan. The CSP program freezes tuition, room and board costs not covered by financial aid at rates in effect in the first year of the agreement. The plan allows students and their families to borrow at fixed interest rates, generally near the prime, with repayment over as many as 10 years in monthly installments.

Washington has been a pioneer in innovative ways to assist families in meeting the cost of education, says Dennis J. Martin, director of Financial Aid. "We will do everything possible to assist families in meeting costs, particularly the more than 50 percent of our students who already receive financial aid."

Lee and Milford Bohm, long-time residents and civic leaders of St. Louis, have established a $1 million grant to be given jointly to Technion — Israel Institute of Technology and Washington University.
Brokaw named assistant dean

A. Van L. Brokaw has been appointed assistant dean of the School of Arts and Sciences for Admissions Strategy and Planning. The appointment, effective Feb. 9, 1987, was announced by Richard N. Rosett, vice chancellor and dean of the Faculty of Arts and Sciences.

Brokaw will be responsible for providing counsel to the Admissions Office in implementing strategy. He will report to Rosett.

Brokaw has been an executive with Ralston Purina for the past 20 years and has been responsible for the growth of several of that corporation's major brands and new businesses. In recent years he has overseen positions there that have directed the International Division and director of strategic planning and new business development for the Grocery Products Division.

Rosett said, "Brokaw has achieved exceptional results in a broad range of very competitive positions there that have director-level responsibilities in the international division and director of strategic planning and new business development for the Grocery Products Division."

Two of his most recent books are Islam in Asia: Religion, Politics and Society (Adam and Blackwell), 1985, and The Politics of Islamic Fundamentalism, 1984, both of which have been published in Arabic translation.

Esposito, who studied at St. Anthony College, St. John's University, the University of Pennsylvania, the Middle East Center for Arab Studies (Shenam, Lebanon) and Temple University, is a member of the executive board of the Middle East Studies Association and the American Council for the Study of Islamic Societies. He has conducted research in Southeast Asia, the Middle East and South Asia and is a member of the National Council of Churches Task Force on Muslim-Christian Relations. His latest book is a study of the Islamic Society of North America, sponsored by the Islamic Society, Student Union and the Assembly Series.

Multi-image photo exhibit to open

Bart Parker, the Louis D. Beaumont Visiting Professor in the School of Fine Arts at Washington University, will exhibit his multi-image photographs March 5 to April 8 in University City. The opening reception for the exhibit is 7 to 9 p.m. Tuesday, March 5, in the gallery of the new Center of Contemporary Arts (COCA), 524 Trinity Ave.

Parker, who is visiting the campus from approximately 20 to 50; and the number of undergraduate majors in economics jumped from approximately 20 to 50.

He continued teaching and doing research in the areas of natural resources, economic development, government and business, and communications. He has written numerous articles and papers and his publications include Scarcity and Growth, Atomic Energy in the U.S. Economy and Energy Uses and Supplies. He was named professor emeritus in 1981.

Before coming to Washington, Dr. Barnett was a professor and chairman of economics at Wayne State University in Detroit. Prior to that he was director of Economic Growth Studies for Resources for the Future; head of the Washington, D.C., Economics Staff of the RAND Corp.; and technical adviser to the U.S. Interior Department.

Dr. Barnett received a bachelor's degree from the University of Arkansas in 1939 and a master's degree from the University of California at Berkeley in 1941. He holds a master's degree (1948) and a doctorate (1952) from Harvard University.

Bohm campaign—continued from p. 1

philanthropic activities. Among many other achievements, he is chairman, Sweigert Sutton, City Venture Neighborhood Development Corp. for the City of St. Louis; director, RCGA, St. Louis; director, Mark Twain State Bank, founding chairman, Council of Life Members, Jewish Federation of St. Louis, executive vice president, American Technion Society; and chairman, CPI Philanthropic Fund.

His wife, Lee, has been an active and dedicated community volunteer for nearly three decades: a past president of the Jewish Federation of St. Louis; past president of the Jewish Family and Children's Service; and chairwoman of the local Soviet Retirement Committee. She is chairwoman of the Vanguard Division of the Sephardic Jewish Federation's 1987 campaign.

Since 1940, American Society for Technion has carried out public information, educational and fund-raising activities on behalf of Technion. Comprised of 11 regional offices, 65 chapters and a Women's Division throughout the United States, the society has thus far provided more than $150 million for Technion's classrooms, labs, libraries, dormitories, scholarships, research programs and operating expenses.

Memorial set for Harold J. Barnett

A memorial service for Harold J. Barnett, Ph.D., professor emeritus of economics at Washington University, will be held at 3:30 p.m. Monday, April 12, in St. Louis. Dr. Barnett died of cancer Wednesday, Feb. 11, at his home in Clayton. He was 70.

The service will be held at Washington University in the Kirkwood Chapel of the St. Louis campus. A reception will follow in the Student Center, Washington University.

Dr. Barnett is survived by his wife, Mildred; two sons, Peter I., New York City, and Alex M. Barnett of St. Louis; a daughter, Katherine A. Barnett Schlichting of Pittsburgh; and two grandchildren.

from the University of California at Berkeley in 1941. He holds a master's degree (1948) and a doctorate (1952) from Harvard University.

Garland E. Allen, Ph.D., professor of biology, has been appointed a visiting lecturer for the History of Science, Society for the History of Science, Visitors Lecturers give talks at host institutions on a topic related to their own research, but each semester takes on the various roles that history (and philosophy) of science can play in academia today. Under the auspices of this program, he will visit Western Oregon State University in January; Lambeth College, London; the University of Alaska, College, Michigan, in September; and the University of Massachusetts at Boston. He plans to visit those institutions in October. In March, Allen will present a seminar at Cornell University on the role of agriculture in the historical development of American eugenics. In May, he will present an invited paper on the relationship between genetics, eugenics and agriculture at the University of Massachusetts at Amherst, as part of the series "Aspects of the History of Science and Technology in France, 1900-1960" at Paris.

Karen L. Brock, Ph.D., adjunct as- sistant professor of art history, pre- sented a paper titled "Editor, Artist, and Audience: the Narrative in Japanese "Visits to the Village" Narratives" at the 75th Annual Meeting of the College Art Association in Boston. She also was named a Japan Foundation Professional Fellowship to continue her research on medieval Japanese painting in Kyoto this spring.

John E. Gilster, D.D.S., professor of pediatric dentistry, recently received the Gold Medal Award from the Greater St. Louis Dental Society for his service to dentistry and to the society. The citation read "He has devolved his life to almost every facet of dentistry and has served the den- tal community beyond any reasona- ble expectation." The award is given annually to a member of the society who has distinguished himself/herself through outstanding service to the profession. It is the highest honor the dental society gives a dentist. Gilster was featured in the Jan. 21 issue of the St. Louis Post-Dispatch.

Paul Jackson, a starting forward on the men's basketball team at Wash- ington, has been named to the GTE District XII All-District team, an- nounced by the College Sports In- formation Directors of America. A systems science and mathematics ma- jor in the School of Engineering, Jackson was one of three front-court players named to the college division (NCAA Division II, III and NAIA) team. He has a cumulative grade point average of 3.87. Jackson is playing an integral part in Wash- ington's basketball success this year, averaging 12.5 points per game, 6.1 rebounds per game and a team-high 2.3 assists per game. A two-year- starter, Jackson also will be one of 24 college division front- court players on the GTE Academic All-America National ballot. A first- second- and honorable mention title will be announced on March 2.

Linda Muchisky, operations man- ager of ambulatory services in the Department of Surgery, has been admitted to membership in the American College of Healthcare Ex- ecutives. She completed the college approved her admission and formal conferral of the membership will take place at the 53rd Convocation ceremony on July 26 in Atlanta, Ga.

Annette R. Pedersen, J.D., assistant dean for administration at the law school, recently lectured on "Con- ducting A Law Firm Employment Inter- view" in managerial skills classes at the Graduate School of Management, Kent State University in Kent, Ohio.

Peter H. Raven, Ph.D., director of the Missouri Botanical Garden and Engelmann Professor of Botany, pre- sented the keynote address Feb. 14 at the annual meeting of the American Association for Advancement of Science in St. Louis. In his speech, "Killing Our World," fo- cused on the global consequences of the population explosion, poverty, starvation, malnutrition, and the de- struction and contamination of the world's natural resources. Five other Washington faculty and administra- tors gave presentations at the meet- ing: Donald W. Phillips, Ph.D., chair and George William and Irene Koechig Freberg Professor of Biologi- cal Sciences, spoke on a paper on "Ethical Issues and Use of Microorganisms"; Jonathan I. Katz, Ph.D., professor of physics, "Is Nuclear Winter Real and Rele- vant?"; Edward L. MacCordy, associa- te vice chancellor for research, "The Institution's Proprietary Arrange- ments on Universities"; Charles E. McAninch, S.C., director of the Insti- tute for Biomolecular Computing, "Computers in Brain Research. Where Are the Frontiers?"; and Michel M. Ter-Pogossian, Ph.D., professor of radiology, "Recent De- velopments in Medical Imaging."

Grizas-Catalin Roman, Ph.D., asso- ciate professor of computer science, participated in a panel discussion on the "Relation Between Data En- gineering and Software Engineering." The other panelists were B. Boehm of TRW Systems Inc., Professor C.V. Ramamoorthy of the University of California at Berkeley and Professor S.S. Yao of Northwestern University. The panel discussion was part of the Third International Conference on Data Engineering, held Feb. 3-5 in Los Angeles. Roman also chaired a session on temporal databases.

Carl P. Wellman, Ph.D., professor of philosophy, presented a com- mentary to a paper by R. Lca Brilmayer of the Yale Law School on Feb. 15 at the Conference on Procedural Due Process: Liberty and Justice, held at the University of Florida, Gainesville. Wellman also has been appointed the 15th Annual Philosopher-In-Resi- dence at Oklahoma State University. He presented a paper, titled "Pro- longing Life/Delaying the Inevitable," at a public lecture at the university and gave a paper on "Life Rights" to the Department of Philos- ophy at Oklahoma State.

Mock trial triumph

Law team wins regional contest; vies for national title in Texas

Repeating last year's triumph, a Washington University law school team has won first place in the re- cent Missouri Mock Trial competition. In March, the three-student team will compete in the National Mock Trial Tournament at the University of St. Louis. Third-year students Gina M. Massey of St. Peterburg, Fla., and Arc L. Amap of St. Louis and second-year student Alexander B. Iden of Berrville, Va., will vie for the 1987 national title.

This year's winning regional team won first place out of 16 teams competing for the title at the Univer- sity of Iowa in Iowa City. The law school has progressed to the national competition for the last seven years. In 1983 and 1986, Washington teams captured first place at the national competition.

For the second consecutive year, Washington was also the only school in the Midwest competition to have two teams in the semifinals. The distinction is a first in the com- petition's history. The Washington teams were judged on their handling of a simulated bank robbery case where state and federal judges presided.

The third-year students who ad- vanced to the semifinals are: Ellen Berdy of River Edge, N.J.; Harris K. West, of Providence, R.I., and Christine M. Ramawoski of St. Louis.

E. Thomas Sullivan, J.D., pro- fessor of law, is faculty coach for the team. Sullivan coached the 1986 re- gional and national mock trial win- ners as well. "The teams were very strong throughout the competition," he says. "I expect the team to do well in the national competi- tion."

In January, the law school held an intramural client counseling com- petition at the University and the St. Louis County Courthouse. Approximately 150 students participated in that competition and about 150 legal and counseling professionals evalu- ated the students' work. Kenneth M. Chackes, J.D., associate profes- sor of law, is faculty adviser and head coach for the client counseling competition.

The intramural winners in the category for first-year law students are: Charles G. Huber of Omaha, Neb.; Christophe R. Hiedan of Waterloo, Iowa; Stephanie B. Fries of Evanston, Ill.; Julie A. Garrett of Omaha, Neb.; Gwynne L. Beaty of Portsmouth, R.I.; and Margaret L Van Dijk of Ashland, Ore.

In another competition round, Chackes chose Cantor and Tone to compete in the March client counse- ling regional competition in Lin- coln, Neb. Chackes also chose variant. The winning regional team will compete in the national and in- ternational client counseling com- petitions in Toronto, Canada.

Last year's client counseling team captured first place in regional, national and international competition. It was the first time a Wash- ington client counseling team competed for the national title and the first time an international championship was held. Chackes also coached the successful 1986 client counseling winners.

Have you done something noteworthy? Are the new toothbrushes really special? According to Thomas Schiff, D.M.D., associate professor of diag- nostic services and pathology at the School of Dental Medicine, the best toothbrush is one with soft, polished bristles of whatever type feels most comfortable in your hand. His com- ments appeared in a Feb. 9 article about dental care in the Boston Globe.

Exercise, when paired with the recommended 1,200 mg per day of calcium, can help prevent osteo- porosis after menopause. This is ac- cording to Stanley J. Birge Jr., M.D., associate professor of medicine, in an article from the February issue of Health Magazine.

Contact lens users beware. A form of conjunctivitis (giant papillary con- junctivitis or GPC) — once quite rare — is becoming more prevalent as an allergic eye disorder among the 23 million Americans who wear contact lenses. "We advise all contact-lens wearers to follow your doctor's directions for cleaning lenses," says Joyce Ann Scherer, research assistant in ophthalmology in the January is- sue of the American Journal of Nursing.
Thursday, Feb. 26
4 p.m. Dept. of Chemistry Seminar, "Adulterate Phase Factors of Molecular Quantum Mechanics," C. Alden Mead, prof. of chemistry, U. of Missouri-McKendree.
4 p.m. Dept. of Philosophy Colloquium, "Narrative Explanations: The Case of History," Paul Roth, assoc. prof. of philosophy, University of Missouri at St. Louis. Hurst Lounge, Duncan Hall.

Friday, Feb. 27
2 p.m. Dept. of Chemical Engineering Seminar, "The Kinetics of Hybridized Gas-Oil Mixtures," Steven Harvey, prof. of chemical engineering, U. of California-Berkeley. 101 Lopata.

Saturday, Feb. 28
Monday, March 2
8 p.m. School of Architecture Lecture Series, "Mies and the Figurative Arts," Franz Schulze, Holkember Professor of Art, Lake Forest College. Steinberg Aud.

Tuesday, March 3

Wednesday, March 4
4 p.m. Dept. of Physics Colloquium, "Why Was the Universe So Hot?" W. M. S. Brown, research associate. U. of Florida. 204 Crow.
6 p.m. Human Resources Management Organization Speakers Series, "Recruiting on Campus: A Perspective From the Workplace," Amanda Shapiro, personnel associate at C.V. Mosby. 113 Simon.
Thursday, March 5
4 p.m. Public Affairs Thursday Series, "Editing an Editorial Page," James W. Davis, WU. prof. of political science and former editorial page editor of the St. Louis Globe-Democrat. 501 C & D.
Friday, March 6
6 and 8:30 p.m. WU Association Film Travel Lecture Series, "QE2 Sails New Zealand and Australia." Doug Jones, filmmaker. Graham Chapel. For ticket information, call 889-5122.
Friday, March 6
8 p.m. Musicians of Swaney Alley Concert, sponsored by music dept. The Sheldon, 3648 Washington Ave. General admission is $10; Guitar Society members, senior citizens and students, $6.
Saturday, March 7
8 p.m. WU Wind Ensemble Concert. The Land Down Under: The Sydney Opera House in Australia is one of the sights captured by film producer Doug Jones during his cruise aboard the Queen Elizabeth 2. The Washington University Association travel lecture series presents "QE2 Sails New Zealand and Australia" at 6 and 8:30 p.m. Friday, March 6, in Graham Chapel. For ticket information, call 889-5122.

Friday, March 6
7 p.m. Tax Workshop for Non-immigrant Visa Holders, sponsored by the International Office. An informativeive workshop will present the workshop. Six International House, 6470 Forsythe Blvd.
9 p.m. "Bucket Night at the Rat," sponsored by Thurstone. the junior men's honorary society. Thurstone Carnival buckets will be available.
Saturday, Feb. 28
7 p.m. Woman's Club of Washington University sponsors a square dance buffet in the Women's Bldg. Lounge. Open to the university community. Tickets are $16 for adults and $4 for children ages 5 at the door. For more info., call Arnette Gehagan, 567-1132, or Anna Mae Ballard, 863-5273.

16th-century music ensemble presents Elizabethan tunes

The Musicians of Swaney Alley, a 16th-century early music ensemble, will present 'Of Byrdes, Battles, Beauties and Bees: Music of Shakespearean England.'

The concert, co-sponsored by the Louis collar, the University of Missouri-Columbia, and the Washington University music department, will take place at 8 p.m. Friday, March 6, at The Sheldon, 3648 Washington Ave.

A free shuttle service to and from the concert will be provided for the Washington University community. The shuttle schedule is: leaves 7:10 p.m., Wool Center (lower-level parking lot); 7:15 p.m., Mallinckrodt Center; 7:30 p.m. medical school (loading dock on SCOT Ave.); and 7:45 p.m. at The Sheldon. The return shuttle will depart at 10:15 p.m., making the same stops.

Members of The Musicians of Swaney Alley will give an encore-demonstration at the concert which is free and open to the public, from 4:30 p.m. March 6 in Blewett Hall, Room 8.

Headed by virtuoso lutenist Paul O'Dette, The Musicians of Swaney Alley have received enthusiastic acclaim in the United States and Europe for their "joi de vivre, sharp rhythmic sense and technical perfection." Following their St. Louis appearance in 1984, the St. Louis Post-Dispatch said, "The group is nothing but a joy or ac- demic about their playing . . . (they) know how to invest 16th-century music with life."

The program will include popular Elizabethan tunes, music for voice and viols, virtuoso lute music, consort music, and lute solos and duets by composers John Dowland, William Byrd, John Johnson, Thomas Robinson and Richard Allison.

Ticket prices for the concert are $10 to the general public and $6 for students, senior citizens and Guitar Society members and are available at Ticketmaster locations by dialing Dialix (421-1400), or at the door. For information, call 725-0739.

Calendar Deadline

The deadline to submit items for the March 19-28 calendar of the Washington University Democrat is March 15. Items must be typed and include date, place, nature of event, sponsor and admission cost. Incomplete items will not be published. If available, include speaker's name and identification and the title of the event. Also include your name and telephone number. Address items to King McElroy, calendar editor, Box 1070.
