Although university campuses are generally safer environments than their surrounding communities, campus safety has become a major national issue, as addressed in the just-released report of the University's ad hoc Committee on Campus Safety and Security. Among its primary recommendations, the committee's 14-page report suggests upgrading the blue light emergency phone system, including the installation of additional phones, developing an exterior lighting plan that reflects security needs, appointing a standing committee on security that comprises administrators, faculty and students, establishing a more sophisticated security system in the residence halls and Millbrook Apartments, creating a detailed campus safety brochure for all University audiences this fall, improving training for police officers and dispatchers, extending shuttle routes, and encouraging better communication between the campus police and the University community.

"Safety and security are the responsibility of every member of the University community," the report says. "We must be responsible for ourselves, and for each other. It is also true that the University has a responsibility to do what it can to maintain a safe and secure environment. We want members of the community to feel free to take an active part in campus events and to benefit from campus life." James W. Davis, Ph.D., professor of political science, served as chair of the ad hoc committee. The other members were: undergraduates Christopher Conser, Raymond Staples and Jennifer Willis, as well as Justin Carroll, associate dean for student services, Tony Nowak, director of residential life, Susan Rava, Ph.D., senior lecturer in French, and Gloria White, vice chancellor for human resources and affirmative action officer; Provost Edward S. Macias, Ph.D., appointed the committee in November 1991 after a number of students were assaulted on campus last October. "I am very appreciative of the committee's fine work," says Macias. "The committee has made helpful suggestions. We want to find ways to implement the most important recommendations." He says a group of administrators has already met to begin accomplishing that goal.

Senior plan one last week of fun

The Class of 1992 is planning one last week of fun before confronting the reality of making career decisions. Commencement Week, a series of events from May 9-15.

"All of us have a responsibility to quote because "very few passages can say it so well," notes Raymond F. Staples, senior class president. "We have a reponsibility to say it and do it, " notes Raymond F. Staples, senior class president. "All of us have a responsibility to make the world a little better." A variety of activities are planned to encourage seniors to participate in their last undergraduate days at Washington. Included on the schedule is a walk along the Meramec River, a senior "trip along the Meramec River, a senior undergraduate days at Washington."

A.E. Hotchner, a Washington University alumnus who wrote the biography of Ernest Hemingway, Papa Hemingway. The book, which chronicles A.E. Hotchner, a Washington University alumnus who wrote the biography of Ernest Hemingway, Papa Hemingway. The book, which chronicles the experiences of a medical research laboratory, was published in 1996. He was chairman of the institute's medical research departments from 1974 to 1976 and chairman of the experimental pathology department from 1963. He now serves as director emeritus and as an institute member and has been a director of the Scripps Clinic and Research Foundation since 1974. He is an adjunct professor in the pathology department at the University of California, San Diego, as well. Dixon received his undergraduate and medical degrees at the University of Minnesota. He received a bachelor of science degree, with a concentration in medicine, in 1931; a bachelor's degree in medicine in 1935; and a medical degree in December 1945. A.E. Raymond Arvidson, Ph.D., chair and professor of psychology, chaired a committee, convened a session at the 23rd Lunar and Planetary Science Conference in Houston, Texas. Eleven members of earth and planetary sciences and 12 members of the Department of Physics participated. The committee, which was chaired sessions, was: Bruce Fegley, Ph.D., associate professor, Noam Korotev, Ph.D., research associate professor, all of earth and planetary sciences.

Jaron L. Blocher, junior in the Department of Civil Engineering, has received the Junior Class Award for Academic Excellence. The award was presented at the Engineers' Ball at Banquet held at the Engineer's Club of St. Louis.

Sol L. Garfield, Ph.D., professor emeritus of psychology, has contributed the lead article in a special commemorative section of the Journal of Consulting and Clinical Psychology. The article was reprinted by the editor to help commemorate the centennial of the American Psychological Association.

Raymond L. Hilgert, D.B.A., professor of management and industrial relations in the John M. Olin School of Business, delivered two papers and participated as a discussant panel at the annual meeting of the Midwest Business Administration Association held in Chicago. The articles were titled "Does a Course in Business Ethics and Management Advance Antitrust or Lasting Value?" and "What Happened to the Human in Human Resources?" He was a guest panelist of the topic "Ethical Issues in Case Research."

Campus security construction begins and parking patterns change. Burned out lights and damaged fixtures should be promptly replaced or repaired.

Standing committee on security: Currently, the delivery of security services is complicated, because responsibilities are "scattered" among different departments and municipalities. A standing committee would help procedures involving security services, identifying problems, acting upon them, and following up on their implementation. The committee could issue an annual report. Additionally, a senior university administrator would have broad responsibility for ensuring effective coordination of services.

Improving police training. All 17 assistant directors of officers on the Hilltop Campus are graduates of police training programs. A continued training is needed. The report says the campus police should make training a high priority. The campus police should make training a high priority. The campus police should make training a high priority. The campus police should make training a high priority. The campus police should make training a high priority.

The "Place of Law in Islamic Societies" conference scheduled for the University of Pittsburgh's Semester-at-Sea Program; Pars College in Tehran, the American Center in Kabad; and Webster (St. Louis) and San Diego state universities.

Women's Studies committee coordinator named Helen Power, Ph.D., acting coordinator of the Women's Studies Program at Washington University, has been named coordinator, effective fall 1992, according to Martin H. Israel, Ph.D., dean of the Faculty of Arts and Sciences. Power also served as acting coordinator from January through May of 1988.

The "Place of Law in Islamic Societies: Historical Perspectives" will be the focus of an upcoming conference sponsored by the Center for the Study of Islamic Societies and Cultures at Washington University. The conference, scheduled for May 6-9, will focus on Islamic law from 1500 to 1900 and the role law has played in Islamic societies. Peter Heath, Ph.D., interim director of the center and assistant professor of Middle Eastern languages and cultures, will serve as chairman.

The workshop is part of the center's ongoing links with the Women's Studies program, funded by the American Council on Education Fellowship Program in the Humanities.

Seven scholars from across the country and Europe will present papers on a variety of topics, including the history of gender roles in Islamic and Arabic society and the function of women in Muslim society. For more information, call 353-5160.

Kingshighway viaduct closed University employees on their way to work Thursday morning were guided to the Kingshighway viaduct at Manchester Avenue was closed. It will remain closed until the overpass, one of the three million six-lane bridge is constructed. The overpass is at the intersection of northbound Kingshighway traffic will go northeaster to Vandeventer, north on Vandeventer to Kingshighway; southbound traffic will go west to Kingshighway, St. Louis, and turn up Towson Avenue. Facing west in the bus lane.
