**Dusty detective work**

Sleuth finds records on University’s early years

A bit of dusty detective work by a graduate student has turned up the first known collection of official documents concerning the first three decades of Washington University’s history. The only information scholars previously had about that period were minutes from board meetings and the private papers of William Greenleaf Eliot.

The documents date from 1854 (one year after Washington was incorporated) through 1882. They were the office records of Seth Ranlett, the first treasurer and former provost. They were in the vault measures 7 feet wide, 8 feet high and 9 1/2 feet long.

“Once I saw how many old books there were in the vault, I figured the most efficient response to this trove was to systematically survey the contents of the vault,” says Robertson. “First I tried just climbing up shelves, but when I nearly fell off one of them, I went and borrowed a ladder. “Way up high, right in a corner, wedged on top of the gas and electric wires were these two old tin deed boxes,” says Robertson. “As I pulled them down, they almost fell on me, they were so heavy. I noticed they were thick in dust without a single fingerprint on them. They probably hadn’t been touched for 50 years.”

— James Robertson

“noticed they were thick in dust without a single fingerprint on them. They probably hadn’t been touched for 50 years.”

**Missouri law requires sales tax at bookstore**

Recent legislative action by the Missouri General Assembly and signed into law by Gov. John Ashcroft requires that all customers of the Washington University Bookstore and the Computer Store be charged sales tax for purchases, effective Friday, Aug. 29, 1992. According to Missouri House Bill 1155, a sales tax must be imposed on buying products or services from campus bookstores. The tax, which is 5.725 percent, will be added by the bookstore to the purchase price at the time of sale. University officials estimate the additional tax will increase bookstore prices by 5 to 7 percent and have asked university administrators to make any changes to student fees necessary to offset the additional cost. For more information, call 658-5700.

Washington University opens center to treat severe psoriasis

The Division of Dermatology at the School of Medicine has opened an outpatient facility to treat severe cases of psoriatic disease.

The facility, called the Barnes West Dermatology Center, specializes in an intensive psoriasis therapy that involves applying tar and shining light onto patients’ entire bodies. The treatment center is one of only 30 in the country and the first in the Midwest. It also provides treatment for mild psoriasis and routine dermatology services for other skin problems.

Psoriasis affects about 3 percent of the U.S. population. Roughly 474,000 people in Missouri and Illinois are affected.

Traditionally, severely affected patients receive the tar therapy in a hospital, said Karen Foreman, M.D., director of the dermatology division. But hospital care is costly and inconvenient, whereas outpatient therapy is affordable and much more convenient for patients. “This new center will provide us with a very good alternative to hospital care without compromising effectiveness,” Foreman said.

Psoriasis usually affects people from 20 to 50. The cause is unknown, but most experts suspect it may be linked to genetics and the immune system. Severe cases can be life threatening, stresses Ann Martin, M.D., assistant professor of medicine in the dermatology division. The disease interferes with the skin’s role in controlling body temperature and providing protection from infection and dehydration.

The Barnes West Dermatology Center is located at 1404 N. Market Blvd. Suite 419, Barnes West County Hospital, 434-1991.

Kaplan receives grant to study eye disease

Henry J. Kaplan, M.D., chair of the Departments of Ophthalmology and Visual Sciences, received a $75,000 grant from Research to Prevent Blindness (RPB). The grant supports research into the causes, treatment and prevention of diabetes retinopathy, a disease that results in blindness. Kaplan noted that the organization has awarded more than $23 million in grants since it was founded in 1961.

The unrestricted support from RPB will provide new and established investigators with funds to develop laboratory space and conduct pilot studies, said Kaplan. “The grant is providing us with the critical scientific environment to perform further research on age-related macular degeneration, diabetic retinopathy, and other debilitating eye diseases.”

RPB is the world’s leading voluntary organization supporting eye research. Since it was founded in 1961, the organization has awarded $23 million to 120 medical institutions throughout the United States. Currently, 62 medical schools nationwide receive RPB grants for eye research.

Keck Foundation supports planetary geodynamics program

The W.M. Keck Foundation in Los Angeles, Calif., has announced a $300,000 grant to Washington University, Chairwoman and Director of the Foundation, Mary J. Danforth, announced.

The grant will be used to purchase equipment for a planetary geodynamics program in the Department of Earth and Planetary Sciences. Planetary geodynamics is the study of tectonics, volcanism and interior dynamics. The project will be directed by Raymond E. Arvidson, Ph.D., director of the Department.

“Washington University is committed to space and planetary sciences,” Danforth said. “The support of the Keck Foundation would be of enormous benefit to the university in its efforts to attract and retain outstanding students and faculty in these fields.”

University collaborates to develop treatments for cardiovascular and inflammatory diseases

The School of Medicine will receive $5 million over four years under a collaborative agreement with Sphinx Pharmaceuticals Corp. to develop new treatments for cardiovascular and inflammatory diseases.

The collaboration will support research focused on developing therapeutic drugs to control enzymes called phospholipases A2 (PLA2), thought to play a key role in heart attack, stroke, atherosclerosis, arthritis, asthma and other diseases. Richard Gross, M.D., Ph.D., professor of medicine, and of molecular biology and pharmacology, will lead the project.

PLA2 enzymes cause the release of arachidonic acid, which is converted into several extremely potent regulators of biochemical reactions that affect a wide range of essential functions throughout the body. In heart cells, these regulators cause the tissue damage and irregular heart rhythm that accompany heart attacks. They also are believed to contribute to inflammation in several tissues.

One goal of Gross’ research is to find inhibitors for PLA2 that can stop arachidonic acid release and avoid the “downstream” problems it causes. “What we are aiming for is a drug that operates at the beginning of this cascade to treat a number of problems with a single agent,” Gross said.

Study evaluates performance of elderly drivers

School of Medicine researchers have received a three-year, $390,000 grant from the National Highway Traffic Safety Administration to study changes in time and age and alcoholism’s effects on driving ability. The study’s principal investigator, John Morris, M.D., associate professor of neurology, and co-principal investigator, Linda Hunt, instructor of occupational therapy, say their research will help determine when patients with Alzheimer’s disease may no longer be able to drive safely.

“Driving is an activity that is very important to people who have Alzheimer’s disease,” said Morris. “By studying how Alzheimer’s patients drive, we hope to determine when their disease has progressed to the point at which they are no longer capable of safely driving.”

The study will be conducted at the University’s Alzheimer’s Disease Research Center. Skills such as maintaining vigilance, visual scanning and multitasking that are essential for multiple activities will be measured. For more information call 362-2683.
McLeod devoted to the undergraduate experience

James E. McLeod is serious about humor. "Humor should always be with us," says the new dean of the College of Arts and Sciences. "I am drawn to my colleagues who appreciate a good joke. I do not consider myself a good practitioner. I appreciate it. Humor adds a dimension of pleasure to the boring. It teaches us things we are not able to see with the naked eye."

An appreciation of humor also helps McLeod remain calm while accomplishing a weighty task — oversight of the entire undergraduate program in arts and sciences. McLeod's responsibilities, which began July 1, include managing the advising system, ensuring the faculty that graduating students have met degree requirements, and working with a faculty/student committee to develop suggestions concerning curriculum. He additionally serves as the principal liaison between the Faculty of Arts and Sciences and key individuals responsible for undergraduate education in Washington's other schools. He also serves ex officio on several important committees of the faculty.

As dean, McLeod wants students to be more involved in the "intellectual life of the University. We acknowledge that our undergraduates are already deeply involved in the life of the institution. They participate in performances and work study programs. They serve as tutors, peer counselors and resident advisers. We need to seek ways to involve them even more, whether through research projects, seminars, lectures or colloquia. Becoming engaged with the intellectual work of an institution is important. Learning is not a spectator sport." McLeod said he believes undergraduate life "is the common ground for most of us at Washington University. Those of us who work closely with undergraduates should try to work together more. The Committee to Prepare for the 21st Century has made recommendations that give greater focus to cooperation across administrative and disciplinary lines. The extent to which we can work together for our undergraduates will be one measure of our effectiveness."

McLeod's career at Washington spans more than 17 years. He came to the University in 1974 as an assistant professor of German. He also was assistant dean of the Graduate School of Arts and Sciences from 1974 to 1977, assistant to Chancellor William H. Danforth from 1977 to 1987, and director of the African and Afro-American Studies Program from 1987 until his appointment this year as dean. He has served in the administrative positions while continuing his teaching responsibilities.

Throughout his career, McLeod has made a number of contributions to improving undergraduate life. "I am convinced that no one has done more to enrich the undergraduate experience at Washington University during the last 15 years than Jim," says Robert L. Virgil, D.B.A., executive vice chancellor for university relations and dean of the John M. Olin School of Business. "Whenever there is a committee or study group formed on something bearing on the undergraduate experience, Jim is asked to serve on it because his wisdom and insight are so very special and valuable. Jim is a humanist of the first order who is one of the supreme citizens of Washington University."

Detailing the range of McLeod's contributions to Washington University is not an easy task. McLeod, who received a Founders Day Distinguished Faculty Award last year, loves teaching young people to speak another language. He views the classroom as an opportunity to introduce students to another culture. "Language is deeply embedded in culture. It is especially gratifying to work with students and have them articulate what they are thinking in a language that is not their native tongue. I get a charge out of that."

In addition to his teaching responsibilities, McLeod has supported teaching assistants and high school German teachers for 12 years by organizing a teaching workshop for them. Whether helping a student interpret a German text or directing the course of undergraduate education, McLeod cares about students and is sensitive to their vulnerabilities in and out of the classroom. "I tell my students, "you are going to have to feel you can make a fool of yourself in class. Risk sounding silly in order to learn. If not, you will hold back and not express yourself!""

Feeling comfortable enough to take risks is important in administrative positions as well, he says. "You've got to trust that your colleagues will permit you to try something different. You must trust also that if you blow it, they will let you know it — and help you get back on track."

No matter what the task, McLeod's devotion to Washington and higher education is omnipresent. "I am very happy being at the university. It's a great place. Talented and interesting people are everywhere. They are curious, searching for answers, struggling with issues. You never get bored."

Carolyn J. Sanford
Lectures

Thursday, Aug. 27
2:45 p.m. Division of Biology and Biomedical Sciences Thesis Defense, "Systematics and Evolution of Monticola Subgenus Monticola (Pitrullacinae)," Donna Irene Ford, graduate student, WU Dept. of Biology. Room 322 Reebstock.

Friday, Aug. 28
2 p.m. Division of Biology and Biomedical Sciences Thesis Defense, "Genetic Analysis of Sindbis Virus mP3," Mark LaStarza, graduate student, WU Dept. of Molecular Microbiology and Room 779 McDonnell Medical Science Bldgs.

Monday, Aug. 31
Noon. Division of Biology and Biomedical Sciences Seminar, "Juggling Families and Careers," Elaine Kruel, chair, WU Committee on Childcare Maternity Leave. Room 321 Medical School Library.

Wednesday, Sept. 2
11 a.m. Assembly Series Lecture, "How to Get a Job Like Mine," Kurt Vonnegut Jr., author, Slaughterhouse Five Graham Chapel.

Thursday, Sept. 3
10 a.m. Division of Biology and Biomedical Sciences Colloquium Series, "Developmental Hybridization Cloning and Subsequent Characterization of Two GDNs Which May Regulate the Growth and/or Differentiation of Intestinal Epithelial Cells," Burton Wise, graduate student, WU Dept. of Molecular Biology and Pharmacology. Room 423 McDonnell Bldg.

Applications sought for study in Germany

The German Academic Exchange Program, DAAD Direktstipendium, has announced the opening of its competition for 1993-1994 travel and tuition awards to study abroad.

Awards are made each year under an exchange program between DAAD and Washington University. They provide for a stipend, round-trip air travel to Germany, and tuition and fees waived at the host German university. The award also provides a small additional allowance for books, possible language study at a Goethe Institute, and other incidentals.

All applicants for the award must be U.S. citizens and younger than 32 years old. Applicants must be graduating seniors, graduate students or doctoral candidates who have a well-defined research project and adequate knowledge of the German language. Preference will be given to candidates who have been invited by a faculty member at a German university to study or do research in a particular department or laboratory. The application deadline for 1993-1994 awards is Sept. 25, 1992.

Application forms may be obtained from Michele Shoresman, Office of International Studies, Room 201, Stix House. For more information, call 935-5958.

Exhibitions

"Display of 19th- and 20th-Century American and European Artworks From the Permanent Collections," Open through Aug. 31. Gallery of Art, upper and lower galleries, Steinberg Hall. Hours: 10 a.m.-5:50 p.m. weekdays, closed Mondays; 1-5 p.m., Saturdays. Free. For more info., call 935-5490.

"The 21st General Hospital Goes to War: Honoring the 50th Anniversary of the WUMS Hospital in World War II." Through Sept. 7. Glazer Gallery, School of Medicine Library. Seventh Floor. Hours: 8 a.m.-10 p.m. weekdays; 1:30-5 p.m. weekends. Free. For more info., call 362-5439.

"New Faculty Exhibit." Through Sept. 13. Bixby Gallery, Bixby Hall. Hours: 10 a.m.-4 p.m. weekdays; 1-5 p.m. weekends.

Calendar guidelines

Events sponsored by the University — in its departments, schools, centers, organizations and its recognized student organizations — are published in the Calendar. All events are free and open to the public, unless otherwise noted.

Calendar submissions state their time, date, place, sponsor, title of event, name of speaker(s) and admission, and admission cost. Quality promotional photographs with descriptions are welcome. Send items to Melissa Kelene at Box 1070 (or via fax: 935-4259). Submission forms are available by calling 935-8388.

The deadline for all entries is noon Tuesday one week prior to publication. Late entries will not be printed. The Record is printed every Thursday during the school year, except holidays, and monthly during the summer. The Record does not guarantee about a certain publication date, holiday schedule, or any other information, please call 935-8335.

Miscellany

Wednesday, Sept. 2
7 p.m. Performing Arts Dept. auditions for full productions of "The Art of Success," "As You Like It," "Ghosts & "Hippocities." (Continues through Sept. 3, same time.) Edison Theatre. For more info., call 935-1858.

Exhibitions

"Display of 19th- and 20th-Century American and European Artworks From the Permanent Collections," Open through Aug. 31. Gallery of Art, upper and lower galleries, Steinberg Hall. Hours: 10 a.m.-5:50 p.m. weekdays, closed Mondays; 1-5 p.m., Saturdays. Free. For more info., call 935-5490.

Edison’s 20th season brings four new events to town

Edison Theatre will celebrate its 20th anniversary season with a series of popular favorites and exciting new events. New events include four St. Louis premiers: Bill Irwin, the inevitable comic genius; composer Freeman Dyson; and Shakespearean action man Simon Hall.

The National Theatre of the Deaf (NTD) returns to Edison Theatre Sept. 25 and 26 in a brand new production of "The Memory Palace of Antonio Sacre," a history of the American sign language. The original play titled "Ophelia" was written expressly for the deaf by English winning playwright Jean Move. Ophelia will appear at the opening of the season.

The world-renowned Mummenschanz will perform Sept. 30 for their only professional appearance in the St. Louis area.

On Oct. 21 Shirley Tilghman, Howard A. Price Professor of Molecular Biology at Princeton University, will deliver the Pennsylvania Lecture.

Edison will present its fourth "Ovation" for young people, dedicated for the young and the young at heart. These heartwarming events are intended for audience members six and older.

The Little Theatre of the Deaf, NTD's companion company for young people, also will return to help inaugurate the 20th anniversary season on Sept. 26. These extraordinary actors make lions roar, butterflies hum, and the sun rise—all in the palms of their hands. "The Wonderful O" is a charming tale by James Thurber about an evil sea captain who banishes the letter "o" from the alphabet.

Hold on to your hats when Vaudeville Goes to Edison on Oct. 11. This zany duo will present its very own "Brief History of the Universe." Black holes, meteor showers, and Einsteinian relativity are explained with rubber chickens, glowing balls and ostrich feathers.

Turlock Island String Quartet will present a special program Jan. 16, titled "All About Jazz," for its "Ovations for young people" series. The ensemble will demonstrate improvisation by taking popular children's songs and transforming them into jazz style.

Performing Arts has role in rebuilding Shakespeare's theatre

M
ember of Washington University's Performing Arts Department rubbed elbows with royalty this summer. Two students and two professors represented the University at a grand ceremony to celebrate the unveiling of an authentic replica of Shakespeare's Globe Theatre in London.

The ceremony, which was attended by His Royal Highness Prince Edward, honored 23 institutions that have supported efforts to rebuild the Globe Theatre. Washington University was the first American university to join "Globelink," a network of international colleges and universities that work to raise money and awareness of Shakespeare's theatre project.

The University representatives were Henry I. Schvey, Ph.D., chair of the Performing Arts Department; Jeffery Matthews, artist-in-residence; Beatrice Ellis, a 1992 graduate of the drama department; and Jonath Disend, a junior drama major.

The idea to rebuild the theatre is a brainchild of American actor and film director Sam Wanamaker, who established the Shakespeare Globe Foundation in 1970. His goal was to rebuild the 1,500-seat theatre as an authentic venue for Shakespeare, and to encourage performers from all over the world to hone their skills on Shakespeare's stage.

The original Globe was built in 1599 by William Shakespeare, a fellow of the University of London and a member of Shakespeare himself. During a performance of Henry VIII in 1613, a cannon sent sparks on to the roof, starting a fire that destroyed the Globe in 1614. The rebuilt Globe is scheduled for completion in 1994 on the site of Shakespeare's supposed birthplace, April 23.

The structure, located within 100 yards of the original theatre in the heart of the Thames River, is built of oak, as was the original; and uses 16th-century joinery techniques. Each bay is 41 feet high, 8 inches wide at the front, and 15 feet 8 inches wide at the back. The completed area will have 20 bays with 14 tiers of seating in each bay.

Wanamaker addressed the assembled crowd, as did Dame Wendy Hilliger, the distinguished stage and screen actress whose career has spanned some 60 years. Sir Oliver Wright, a former Tobias Lewin Professor of Drama at Washington University, presided over the ceremony.

The Globe is a permanent, self-sustaining venue, and is designed to offer repertory programming as well as the opportunity for educational and academic activities.

Dusty detective work - from page 3

The papers are in surprisingly good shape, Prietto says. They hadn't been handled for about 100 years. "Ranlett essentially created the first official University administrative file," notes Prietto. "Prior to this discovery, we had no official documents from this period. It is a wonderful addition to our archives, because we can now trace the University's early history using the original sources, rather than relying on transcriptions that may be inaccurate or paraphrased."

"It's a wonderful coup to have found this material," says Robertson. "But the great virtue is not only that they have been found and can be tapped into, but that whenever Professor Morrow's history is completed, we will then have a framework to hang these documents on, so each individual letter becomes greater than the sum of the parts." -Debby Aronson

Parking changes - from page 1

chase green permits. These permits must be purchased by Aug. 28. After that date, the permits will be sold to the 50 individuals who were selected as alternates. Anyone with questions about remaining green permits should call the Transportation Department at 935-5601, Monday on Aug. 28.

Parking permits may be purchased from 9 a.m. to 4 p.m. (including the lunch hour) at the Transportation Department office, located in the Women's Building basement. After Aug. 28, the department will resume its normal hours, 9 a.m. to noon and 1 to 4 p.m. Monday through Friday.

New parking garage — A total of 500 new parking spaces will be available later this academic year after a four-level parking garage is built on the Hilltop Campus. The garage will be connected to the lot behind the Sedel O. Mudl Law Building. Construction is scheduled to begin soon.

The new parking garage will be located west of the Maintenance Center, north of the Mudl Law Building and east of the Millbrook Square Apartments. The existing two-level garage behind the building holds 400 cars. Traffic flow will be improved for drivers exiting the garages onto Millbrook Boulevard.

Gus the Bus — To accommodate individuals who don't own cars but want to shop at the Galleria or Union Station, beginning Aug. 31, Forby Boulevard also will be the site of Gus the Bus. The Bi-State bus, which runs from the Galleria to Union Station, will stop on Forby in front of Mallinckrodt Center. The bus will run east and west every 20 minutes from 8 a.m. to 5 p.m. Monday through Friday.

For route, schedule and fare information, call Bi-State at 231-2240. For campus parking information, call the Transportation Department at 935-5601. For information about the Forby Boulevard meters, call the Clayton Traffic Bureau at 746-0442.
In Citizenship in the Early Modern Tradition: Plato to Rousseau, Peter Riesenberg, Ph.D., professor of history, surveys Western ideas of citizenship from Greek antiquity to the French Revolution. Riesenberg demonstrates the persistence of important civic ideals and institutions over the course of 2,500 years, and shows how these ideals and institutions have shaped modern democratic societies in which most people lived prior to the Industrial Revolution. The book draws on a variety of sources, including medieval manuscripts and legal records from the University of North Carolina Press.

When the U.S. Supreme Court changes a legal decision and shifts the ideological balance of the court, the court observers traditionally have said the shift has more to do with partisan changes on the bench than with legal arguments presented to the court. This issue of Legal Change: Abortion and the Death Penalty, John C. Bernard, professor of political science, and Eleni Bastea, Ph.D., assistant professor of political science, reach a different conclusion. They argue that the way litigants frame legal arguments is equally important in bringing about judicial change.

The book, which is co-authored by Joseph F.3. Kobyyla, Ph.D., associate professor of political science at Southern Methodist University, examines two legal decisions and their ideological implications, and follows their rise through the Supreme Court. In arguing that the strength of legal arguments has at least as much impact on court decisions as the judicial political beliefs, the book looks at ways litigators first propel certain issues onto the court's agenda and then try to persuade a majority of the justices to affect legal change. (The University of North Carolina Press)

New health services director appointed

Laura Reiman, M.D., recently has been appointed to the newly created post of assistant to the dean of the St. Louis campus. Most recently, Reiman was a physician on staff at the emergency room at Missouri Baptist Medical Center.

"I am pleased that Dr. Reiman has joined us," said Richard M. Driscoll, Jr., M.D., who well served that position," remarked John W. Eaves, M.D., who well served that position."

For The Record contains news about a wide variety of faculty and staff activities.

Of note

The U.S. Public Health Service Agency for Health Care Policy and Research has awarded Harry L. S. Knopf, M.D., associate professor of clinical ophthalmology, a certificate of appreciation for his work at the St. Louis Eye Clinic. The certificate was awarded for work as a panel member to the Clinical Practice Guideline Panel for "Management of Functional Impairment Due to Cataract in the Adult." The guideline took two years of work by a panel of experts and involved a cooperative effort of ophthalmologists, optometrists, nurses, anesthesiologists, nurses and other health care professionals. The guideline is due to be published this year.

Christine Prentice, a senior in the Liberal Arts College at the University of St. Louis, received her medical degree from the University of Chicago. Most recently she has been named the director of the Women's Health Center in St. Louis. Her interest in women's health, coupled with her well qualified for the position.

In health care administration, makes her well qualified for the position. Most recently she has been named the director of the Women's Health Center in St. Louis. Her interest in women's health, coupled with her well qualified for the position.

Speaking of

Shirley Baker, dean of University Libraries, has participated in two panel discussions, the most recent being "The Reformation Between Church and Library," at the Catholic Library Association's annual meeting held in St. Louis. Baker also was in a panel discussion on "The Sweet Deceit of Literature" at the Data Research Users Conference, held in St. Louis.

Eleni Bastea, Ph.D., assistant professor of architecture, presented two lectures at the College of Architecture and the Department of Classics at Cornell University. These lectures were titled "A History of Western Architecture: Traditions of Tradition: National Ideology and Greek Vernacular Architecture," and "The Reformation Between Church and Library." The two lectures were given in the Data Research Users Conference, held in St. Louis.

Andrew D. Dimarogonas, Ph.D., professor of mechanical engineering, was the keynote speaker of "Robotometrics '92," the International Conference on Robot Technology in Venice, Italy. The title of the keynote address was "A Brief History of the Development of Robotic Dynamics." He also presented two technical papers titled "Smart Rotor" and "A Fuzzy-input, Artificial Neural Network System for Diagnosis and Prognosis of Turbine Machinery." The conference was sponsored by the American Society for Mechanical Engineering.

Gerald Eary, Ph.D., professor of English, presented three lectures at the 1992 Conference in Rotating Machinery Dynamics, held in Venice, Italy. The title of the keynote address was "A Brief History of the Development of Robotic Dynamics." He also presented two technical papers titled "Smart Rotor" and "A Fuzzy-input, Artificial Neural Network System for Diagnosis and Prognosis of Turbine Machinery." The conference was sponsored by the American Society for Mechanical Engineering.

Monson appointed national humanities fellow

Craig Monson, Ph.D., professor of music, has been appointed a fellow of the National Humanities Center for the academic year 1992-93. The National Humanities Center, located in the Research Triangle Park of North Carolina, is a privately incorporated institute for advanced study in history, literature, philosophy and other areas of the liberal arts. Fellowships allow the scholars to spend a year in residence at the center. During that time, they pursue research and writing on individual projects and also exchange ideas in seminars, lectures and conferences.

Monson specializes in early modern Europe and Italy. His recent work has focused on the study of the music of the Baroque in Italy and the place of music in the lives of women living within them. Some of his recent research is included in a collection of essays, titled The Crucified Women: Women, Religion and the Arts in Early Modern Italy, which he recently edited. The work will be published this year.

During his year at the National Humanities Center, Monson will continue examining music and literature in the Italian cultures of the 17th and 18th centuries. His work will also reveal an unexpected depth, variety and richness of life among women in these closed communities.

During the conference, Vietti was presented with the Franklin's National Science Foundation Award in honor of her distinguished leadership and contributions to the fields of oceanography and marine biology.

Mary J. Wendenbaum, Ph.D., Edward Mallinckrodt Distinguished University Professor and director of the Center for the Study of American Business, was a talk for the Distinguished Lecture Series at Duke University on "Small Wars, Big Defense." He gave a presentation that posed a variety of questions about the American defense and the Global Marketplace. He also participated in a conference at Harvard University with a presentation on "The Defense Industrial Base."
The following is a list of positions available on the Hilltop Campus. Information regarding space is correct, but positions may be obtained in the Office of Human Resources, at the Engineering Computing, One Brookings Hall, Room 126, or by calling 935-5990.
