Webster graduated from the Washington Union Station. The celebration marked the H. Danforth announced the naming of the honor of retired Anheuser-Busch Cos. Inc. Gallop, senior partner of the St. Louis law firm Gallop, Johnson and Neuman. Execu-
vie, included William M. Van Cleve and W. L. Hadley Griffin. Van Cleve is partner and retired chair of Bryan Cave, a St. Louis law firm, and chair of the Wash-
ington University Board of Trustees. Griffin is former chair of the executive committee at Brown Group Inc. of St. Louis. Dorsey explained: "Anheuser-Busch and its charitable foundations have been extremely generous benefactors of Wash-
ington University over many decades. Anheuser-Busch's most recent gift enables the School of Law to launch a campaign at this time, and Anheuser-Busch Hall will provide the facilities necessary for the school to thrive in the next century. It is especially gratifying that the gift honors an action, loyal and distinguished alumnus, Fred Kuhlmann."

The American Law Schools recently rated Washington Univer-
sity School of Law high in all respects but one — its physical facility. School of Law
Dean Donny D. Ellis Jr. explained: "The School of Law has long outgrown its cur-
rent building. And Mudd Hall, constructed of concrete, cannot be cost-effectively renovated to provide the resources in legal education and technology. Anheuser-
Busch Hall, designed in collaboration with faculty and students, will provide a first-rate environment for modern legal education through the next century. The campaign also will raise funds for endowment and financial aid."

Among students, the need for a new building has been clear for a long time. “The big complaint all students have, including myself, is the lack of space in Mudd Hall,” said Thomas Hunzler, a second-
year law student. “It is a problem for every-
one. There isn’t enough study space in the library or for housing interviews on campus and there is always a problem getting a room for an event or a lecture. From what I have seen of the new building plans, there will definitely be a lot more space and it will be more student friendly.”

Construction of Anheuser-Busch Hall is scheduled to begin in early 1995 on the northwest part of the campus, just west of the school’s current location. McCarthys has been chosen as the construction manager for the new building. Architects are Hartman-Cox. The new building will be college gift architecture designed to blend with existing campus buildings. The five-story, 157,000-square-foot structure will house classrooms, faculty offices, the law library and two courtrooms.

Anheuser-Busch’s previous contribu-
tions to the University include: the Busch Professorship of Medicine; the August A. Busch Jr. Professorship of Neurological Surgery; and the August A. Busch Jr. Chair in Marketing.

Fred Kuhlmann has spent a quarter century with Anheuser-Busch Cos. Inc. Now the national vice chair of the law school campaign, Kuhlmann graduated from the University in 1938 with A.B. and LL.B. degrees. During his years at the school he was editor of the Washington University Law Quarterly. He is a life member of the Eliot Society and has pro-
vided volunteer leadership in a variety of roles including service on the School of Law Task Force and the School of National Council.

Kuhlmann joined Anheuser-Busch in 1967 as general counsel and rose to become executive vice president and vice chair of the board of Anheuser-Busch Cos. Inc. He also was president of the St. Louis National Baseball Club Inc.

He is the recipient of numerous awards in honor of his service, including the Christian Vitis Award from Concordia Seminary, the Distinguished Alumni Award from Washington University School of Law, the Doctorate of Humane Letters Award from the St. Louis Ruebensohn College and he recently was awarded the Wittenberg Award from the Luther Institute. He and his wife, Mildred, have two children and six grandchildren.

For a listing of other leading donors to the campaign, see story on page seven.

Dorsey commented: "Washington University is fortunate to have benefitted over many years from the vision and leader-
ship of friends like these. This campaign is made possible by their generosity and also through the involvement of many of our friends who are giving freely of their time and friends who are giving freely of their time and energy. We are providing a set of additional ques-
tions.

The subject has never been more popu-
lar. Offered courses range from the intro-
duction of ethical reasoning to courses which examines current moral issues ranging from race relations to surrogate motherhood, to "Classical Ethical Theories," which looks at the history of ethical theory from classical Greece to the 19th century. Other courses concentrate on the application of ethics as it relates to bioassisted reproduction and cloning, among others. Most of these courses fill every time they are offered and some, like "STONE Soup" project helps feed homeless

Imagine sleeping in the dirt with no running water available to wash yourself. Or not owning a change of clothes. Or freezing weather, shivering under Tender pieces of cardboard. These scenarios represent only a few of the day-to-day struggles experienced by the homeless. Rabbi Lynn Koshner, assistant director of the St. Louis Hillel Center, presented these images in her sermon at the Hillel Yom Kippur Services. She told stories of homeless people who roamed the streets of downtown Miami, where she worked with a mobile food outreach program.

After moving to St. Louis from Miami, Koshner started a similar food outreach project at the Kol Am Congregation in Ballwin, where she was the rabbi. Now Koshner, a new member of the Washington University community, has spearheaded a student-run food outreach project at Wash-

Lee Robins receives lifetime achievement award 

Lee N. Robins, Ph.D., University Professor of Social Science and professor of social science in the Department of Psychiatry, has been honored by the American Psychiatric Association (APA) Alcohol, Tobacco and Other Drugs (ATOD) Section with the 1994 Lifetime Achievement Award. The award recognizes those who have provided substantial contributions to the field of addiction or ATOD. Robins was presented with the award at the ATOD Section meeting, but it is not awarded every year.

Robins has coordinated several land-mark studies on drug abuse and addiction with extensive work on drug use and alcohol use by Vietnamese veterans and African American men. She is the first to ask questions about drug dependence in an adult population and she continues to play a leading international role in developing research instruments for substance abuse epidemiology.

Robins said she is gratified to be selected as this year's winner. "It is a great honor to be selected for this award by the ATOD Section of the American Public Health Association," she said. "I am especially pleased with the recognition it gives to the important role alcohol use has played in fostering the reduction of smoking in this country, in the scientific evaluation of the risks of the recreational use of other psychoactive substances."

Robins joined the School of Medicine in 1954 as a research assistant in psychiatry. She is the director of the Program in Psychiatric Epidemiology at the School of Medicine and serves on the University's Committee on Social Thought and Analysis. She has written more than 200 articles and books and serves on seven editorial boards.

Lee N. Robins
John W. Olney, M.D., didn't set out to be a scientist. He was a civil servant, working as a fiscal officer for the U.S. Army when he decided to go back to school and study medicine. That decision eventually led to the creation of an entirely new field of scientific research.

Olney, a professor of psychiatry and neuropathology at the School of Medicine, studies glutamate and related compounds, which are excitatory neurotransmitters. Glutamate is a neurotransmitter that carries information from one nerve cell to another. As a neurotransmitter, glutamate performs vital functions in the central nervous system, but it is also highly toxic in certain circumstances.

Olney was the first to propose that when high concentrations of glutamate are released from cells in the brain, the amino acid can kill nerve cells by overstimulating receptors on their external surface. Prior to Olney's work, there wasn't even a word for this process. He coined "excitotoxicity" in the early 1970s.

The excitotoxic mechanism described by Olney now is believed to be responsible for nerve cell degeneration in various acute brain disorders such as stroke, trauma and epilepsy, and also possibly in chronic disorders such as Alzheimer's disease. Huntington's chorea, amyotrophic lateral sclerosis (Lou Gehrig's disease) and Alzheimer's dementia. It has become such a popular area of research that at this year's meeting of the Society for Neuroscience, more than one in five of the scientific presentations dealt with research closely related to excitotoxicity.

"He has done something that very few scientists are able to do," said Samuel B. Guze, M.D., Sporer T. Ulman Professor and head of psychiatry at the School of Medicine. "His work opened up a whole new area of research, and many important advances in neuroscience can be traced directly to John Olney."

Olney's research and his decision to pursue a medical degree can, in turn, be traced directly to a sister who fell ill with multiple sclerosis. "I had been working in France (as a U.S. Army fiscal officer), and I was already 28 years old," Olney explained. "It was a good job, and it allowed me to travel in Europe and enjoy myself, but it wasn't leading to anything."

"My sister, an exceptionally bright and talented individual, was stricken with multiple sclerosis as a teenager. She had repeated attacks of the disease, each attack leaving her with a reduced neurological status," he remembered. "It made me acutely aware that I wasn't doing anything in my life particularly worthwhile, so although I had never previously aspired to be a scientist or doctor, I decided to go back to school and try for medicine."

First, there were science courses. He earned a bachelor's degree, but had not taken many of the undergraduate science courses required in a premedical program. Fortunately, he made good grades and was accepted into medical school at the University of Iowa, where he spent about half of his time conducting research about multiple sclerosis.

"There wasn't any organized research going on at Iowa that was relevant to multiple sclerosis, so in essence I just talked a benevolent professor into letting me work in a corner of his laboratory," Olney recalled. His work was significant enough to get him the Borden Award for undergraduate research. It is still in his office, many years and many awards later.

Olney's initial scholarship was determined to devote his career to research of the brain and the central nervous system, though he was undecided about whether to pursue neurology or psychiatry as his primary focus.

Another sister was key in determining the direction he took. At that time, however, it was considered by his sister's family that psychiatry was a "second-rate" field. Rosemary Kennedy was mentally disabled, and the new Kennedy family was put in the position of having to work for more research in psychiatry. In addition, Olney always had been intrigued with mental phenomena, so he arranged to do a research fellowship in precision in psychology at Washington University.

That decision turned out to be a good one. In those days, psychiatry was the type of biologic research that was prominent in most psychiatry departments, but Washington University's Department of Psychiatry, under the leadership of Eli Robins, M.D., was known for its basic approach to mental illness. As a result, Olney decided to pursue basic research without much interference.

"That's the way the lab always worked," Cohen said. "When I was a student, my mentor wouldn't even give you a thesis project. You had to come up with it on your own. I always felt it was a good way to test the "sheep'' from the "goats."

The findings left Olney with a dilemma. It was known that glutamate was present in large amounts throughout the central nervous system. Why would glutamate injected under the skin kill neurons, whereas naturally present in the brain not kill neurons?

Further research led him to conclude that glutamate is only toxic when it is outside of cells. He reasoned that normally glutamate is contained within cells and is released only in response to neuronal activity. When taken back up into the cell, "in my own words," Olney recalled, "I speculated that under abnormal conditions such as stroke, glutamate release becomes excessive and its uptake defective so that glutamate might accumulate outside of cells and kill them by excessively stimulating their external membrane receptors. Needless to say, I was happily surprised a decade later when Steven Rothman, M.D., director of pediatric neurology at Washington University, and a group of Danish investigators independently generated evidence that this is what actually happens in stroke, a very common and lethal brain disorder."

His discoveries about the excitotoxic potential of glutamate did not at first ignite the scientific community. "It was essentially a negative reception," Olney said. "In some cases it was a good suggestion that a natural substance in the brain could excite nerve cells to death." Olney laughed at the memory because the neuroscience community now widely accepts excitotoxicity as one of the hottest areas in neuroscience. Another part of his glutamate work, however, has met a mixed reception.

Two decades ago Olney demonstrated that feeding a single oral dose of monosodium glutamate (MSG) to mice or monkeys resulted in elevated levels of glutamate in the blood high enough to cause damage to the hypothalamus of the brain. "Over the years, it has been found that humans are at greater risk than mice or monkeys," Olney said. "Because ingestion of glutamate causes much higher blood glutamate concentrations in humans than in mice or monkeys."

"In young animals, glutamate levels do not have to rise very high to cause damage because the so-called "blood-brain barrier" is less developed and because certain glutamate receptor systems are not yet fully developed in the brain.

"In addition, although definitive studies of appropriate design have not been conducted on immature humans, visible evidence suggests that glutamate may cause substantially higher blood glutamate levels in immature humans than it does in adult humans," Olney explained.

These observations have led Olney to testify several times before U.S. Senate and Food and Drug Administration (FDA) hearings where he has become a well-known food safety advocate. For more than 20 years, he has been pushing for more stringent regulation of the use of glutamate in foods.

"The food industry feels it is necessary for the marketing of their foods that they add large amounts of glutamate for favoring purposes. It's very difficult to influence the thinking and get them to stop the practice or even to modify it," Olney said.

But, that's exactly what he's done. In a major victory, Olney convinced makers of baby foods to remove MSG from their products, but he said more needs to be done. "I don't feel that this is finished business. MSG and other glutamate products are still added in large amounts to foods that are fed to small children, and they may cause substantially higher blood glutamate levels in immature humans than it does in adult humans," Olney explained.

Exhibitions
Biannual Faculty Exhibition. Features about 80 works by art and architecture faculty. Also, a selection of prints from art glass to architectural drawings. Featured artist is Gene Hensel, prof. of art and director of the advertising program. Through Dec. 18. Gallery, upper floor, Steinberg Hall. Hours: 10 a.m.-5 p.m. weekdays, 1-5 p.m. weekends. 935-5490.

"Facing Pages" Commemorates the 20th Century. A literary manuscript collection, an archival treasure of 20th-century literary manuscripts, correspondence and printed works of some of the most eminent writers of modern times, including Dept. of English faculty. Through Jan. 31. Special Collections, level five, Old Library. Hours: 8:30 a.m. to 5 p.m. weekdays. 935-5490.

Films
Thursday, Dec. 1
7 p.m. and 9 p.m. Film Series Classic. "You Were Never Lovelier" (1942, T.W.) Room 325 Mallinckrodt Center. (Refreshments included.) 935-5858.

Friday, Dec. 2
7 and 9:30 p.m. Film Series Feature.
"A Muppet Christmas Carol" (1992). (Also Dec. 3, same time, and Dec. 4 at 9:30 p.m.) Room 100 Brown Hall. Cost: $3.

Tuesday, Dec. 6
7:30 p.m. Japanese Film Series. "Shaping of the Modern American City," a documentary. (With English subtitles.) Room 303 Mallinckrodt Center. 935-6808.

Lectures
Thursday, Dec. 1

12:30 p.m. Laff Forum presentation. "Class Warfare in the Heartland," Dan Lanese,\\n music, program includes the prologue and an evening of contemporary dance choreography, directed by Fred Binkholder, features J. S. Bach's "Invention No. 4." "Christmas Time Is Here" performed by Franz Schubert and "Caro mio ben," with soloist Aris Koxian, performer in music. Steinberg Hall Chapel. Cost: $4.50. For more info, call 935-5212.

Monday, Dec. 5
4 p.m. Molecular microbiology seminar. "Pyocyanin Gene Expression During Growth in Human Carcinogenic Cell Lines," Daniel Clark, research assoc. prof., Dept. of Molecular Microbiology. Room 322 Reehorst Hall. 935-7569.

4 p.m. Psychology colloquium. Title to be announced. Dept. of Psychology, West 4th and 8th Sts. 362-6940.

Tuesday, Dec. 6

2:30 p.m. Mechanical engineering seminar. "Escape and Overturning: Simple Models With Complicated Transient Behavior," Lawrence N. Virgin, Warren Associate Professor of Engineering, Duke U., Durham, N.C. Room 100 Cupples II Hall. 935-4025.

Friday, Dec. 9

Music
Thursday, Dec. 1
8 p.m. Vocal jazz ensemble concert. Program directed by Fred Binkholder, features students and solo jazz. "Invention No. 4." "Christmas Time Is Here" performed by Franz Schubert and "Caro mio ben," with soloist Aris Koxian, performer in music. Steinberg Hall Chapel. Cost: $4.50. For more info, call 935-5212.

Saturday, Dec. 11

WASHINGTON UNIVERSITY DRUG AND ALCOHOL POLICY

A federal mandate requires that the following Drug and Alcohol Policy be distributed to all Washington University employees and students. Please post or file accordingly.

I. Introduction

The president's National Drug Control Strategy, issued in September 1989 proposed that Congress pass legislation to require schools, colleges and universities to implement and enforce drug prevention programs and policies as a condition of eligibility to receive federal financial assistance, including student financial aid. On December 12, 1989, the president signed the Drug-Free Schools and Communities Act Amendments of 1989, Public Law 101-226. That law also requires institutions receiving federal financial assistance to prevent the illegal use of alcohol by students and employees.

The law requires that, as a condition of receiving federal funds, Washington University must certify that it has adopted and implemented a program to prohibit the unlawful possession, use or distribution of illicit drugs and alcohol by students and employees on its property or as part of any of its activities. Accordingly, Washington University has instituted this policy, which became effective on and after October 1, 1990.

II. Policy Statement

It is the goal of Washington University to protect the public health and environment of members of the University by promoting a drug-free environment.

In accordance with the mandate of the federal legislation, the manufacture, distribution, possession or use of illicit drugs, and the unlawful possession, use or distribution of alcohol on Washington University property or as part of any of its activities is prohibited.

Violations of the policy will be handled according to existing policies and procedures covering the conduct of administrators, faculty, students, and staff.

A. Standards of Conduct — Illicit Drugs: The unlawful manufacture, possession, distribution or use of illicit drugs on Washington University property or as part of any of its activities by University students, employees or their guests is prohibited.

B. Standards of Conduct — Alcohol: Federal legislation prohibits the unlawful possession, use or distribution of alcohol. Therefore, the possession and use of alcohol by non-intoxicated persons twenty-one (21) years of age or older is, according to Missouri law, lawful. University policies limit the lawful use of alcohol to appropriate occasions. Undergraduate students should contact the Office of Student Affairs for standards governing student parties and student use and possession of alcohol. Graduate students should contact their Dean's office. Contact the Office of Human Resources on either campus for specific standards governing non-academic employees.

III. Legal Sanctions

A. Drugs: The manufacture, possession, sale, distribution and use of illicit drugs is prohibited by city and county ordinance, state law and federal statute. Punishments range from fines of $50 to life imprisonment. The statutes and ordinances define the drugs deemed "illicit." Attached, as Appendix A, is a summary of federal sanctions. Chapter 195 of the Revised Statutes of Missouri addresses illicit drugs. Section 195.214 of the Missouri statutes specifically prohibits the distribution of any controlled substance on University property. Persons convicted of this offense can be sentenced to imprisonment for not less than ten (10) years. To review specific provisions of applicable ordinances and statutes, contact the Office of the General Counsel (935-5152).

B. Alcohol: Missouri's Liquor Control Law makes it illegal for a person under the age of twenty-one years to purchase, attempt to purchase, or possess any intoxicating liquor. Section 311.325 RSMo. Violation of this provision can subject one to a fine between $50 and $1000 and/or imprisonment for a maximum term of one year. County and municipality ordinances contain similar prohibitions and sanctions. To review specific provisions of applicable ordinances and statutes, contact the Office of the General Counsel (935-5152).
IV. Health Risks
A. Drugs: Severe health risks, including death, are associated with the use of illicit drugs. Some are stated in Appendix B. For further information, contact the Center for Chemical Abuse Prevention Education (CAPE) (726-4140) or the University Health Services (Hilltop Campus — 935-6666) (Medical Campus — 362-3523).

B. Alcohol: Abuse of alcohol can produce severe health risks, including death. Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increase the incidence of a variety of aggressive acts, including spouse and child abuse. Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described.

Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life-threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, also can lead to permanent damage to vital organs such as the brain and the liver.

Women who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics. For further information, contact the Center for Chemical Abuse Prevention Education (CAPE) (726-4140) or the University Health Services (Hilltop Campus — 935-6666) (Medical Campus — 362-3523).

V. Available Drug or Alcohol Counseling, Treatments or Rehabilitation or Re-entry Programs
A. The Center for Chemical Abuse Prevention Education (CAPE) provides the Washington University community with alcohol and other drug information, education, brief assessment and referral. Outside treatment options include self-help groups, long- and short-term outpatient programs, individual and group programs, and residential short- and long-term treatment programs. CAPE also provides assistance with re-entry into the University community following completion of an outside treatment program. All services are free and confidential. Call 726-4140 for an appointment or more information.

B. Other University resources include the University Health Services (Hilltop Campus — 935-6666) (Medical Campus — 362-3523), the Psychological Service Center (935-6555) and the Department of Psychiatry (362-7002).

C. Numerous non-University programs exist in the St. Louis metropolitan area. Many programs advertise extensively in local media. Consultation with one's personal physician is advised prior to self referral to such non-University programs. For further information regarding referral to such programs, contact CAPE, University Health Services or your private physician.

VI. Disciplinary Sanctions
Different disciplinary procedures are applicable to faculty, staff and students. Violations of the standards of conduct will be dealt with on a case by case basis with the imposition of discipline being appropriate to the severity of the violation. For each group comprising the University community, there are certain common sanctions that could be applied in an appropriate case. These common sanctions include letters of reprimand, probation and severance of ties with the University, through expulsion or termination. Normally, opportunity for referral to an appropriate rehabilitation program occurs and is usually associated with a first offense. Referral for prosecution will undoubtedly occur only for the most serious violations.

A. Faculty: Faculty discipline is normally administered, in the informal manner, by the faculty member's department head, dean or by the provost. Faculty members can be terminated for cause only after a hearing conducted before a panel of faculty peers.

B. Staff: The non-academic staff is subject to disciplinary procedures administered by the staff member's department in consultation with the human resources offices on the Hilltop and Medical campuses. The normal range of personnel actions could occur. Staff members are entitled to hearing and redress by a panel of peers.

C. Students: The University Judicial Code governs students' conduct and establishes procedures for adjudicating complaints against students. Expulsion is the most severe sanction possible. In addition, residence halls (including fraternity houses) can impose discipline upon residents. The University may terminate the residence hall contracts of students violating its standards.

Washington University Record / Dec. 1, 1994 5

Miscellany

Thursday, Dec. 1
5:30 p.m. Alpha Chi Omega gathering. The Sigma Sigma alumni chapter invites you to bring your alums, grads, and staff to attend. Unrequired; for more info., call Deb at 821-5031 or Charlotte at 962-2189.

Friday, Dec. 2
6:45 a.m. Office of Continuing Medical Education seminar: "Twelfth World Congress of Endourology and SWL and Tenth Education seminar.

Tuesday, Dec. 5
4 p.m. Reading and booksigning. Eddy Harris, author of "Merriweather's Own Book Ward," will read from his work in progress. Sponsored by the African and Afro-American Studies Program. Harst Lounge, Room 201 Ducker Hall.

Wednesday, Dec. 6
5:15 p.m. University College information session. Presents information on University College's new Master of Arts degree program in American culture studies being introduced this spring semester. January 13, 5:00 p.m. for more info. and to register, call 935-6700.

Friday, Dec. 9

Saturday, Dec. 10
8 a.m.-12:15 p.m. Office of Continuing Medical Education seminar: "Evaluation and Management of Cardiovascular Disease in the Elderly." Ritz Carlton Hotel, 100 Canonade Plaza, Clayton. For schedule, registration cost, and info., call 362-6895.

Calendar guidelines

Events sponsored by the University — its departments, divisions, organizations, and its recognized student organizations — are published in the Calendar. All events are free and open to the public, unless otherwise noted.

Calendar submissions should state time, date, place, sponsor, title of event, name of speaker(s) and affiliation, and admission cost. Quality promotional photographs with descriptions are welcomed. Send photos to Judy Rahlbad at Box 1070 or via fax: 935-4259. Submission forms are available by calling 935-4926.

The deadline for all entries is noon Tuesday one week before the period. Late entries will not be printed. The Record is printed every Thursday during the school year, except holidays, and monthly during the summer. If you are uncertain about a deadline, holiday schedule, or any other information, please call 935-4926.

Women's Volleyball

Last Week: NCAA Quarterfinal: Washington 3 (15, 15, 15), University of California-San Diego 1.
This Week: Friday-Saturday, Dec. 2-3, at Women's Bldg.; Women's Invitational, Field House, Oskaloosa, Iowa.
Season Record: 40-2 (12-0 UAA Champion)

Women's Basketball

Last Week: Washington 70, Millsaps 59; Washington 59, Arkansas 48
This Week: 7:30 p.m. Tuesday, Nov. 29, vs. Illinois College, Field House; 7:30 p.m. Friday, Dec. 2, vs. William Penn College, Old Quad; 7:30 p.m. Saturday, Dec. 3, vs. Central College, Osceola, Iowa
Season Record: 3-1

Women's Swimming/Diving

Last Week: Men: Washington 115, University of Missouri-St. Louis 87; Washington 156, Aurora 70; Women: Grinnell 122, Washington 99
This Week: Friday-Saturday, Dec. 2-3, at DePauw-Wabash Invitational; Greencastle, Ind.
Season Record: Men: 5-1; Women: 3-2

Men and Women's Cross Country

Placing 31st in the field of 164 runners, sophomore Jerylin Jordan, Kaneohe, Hawaii, became the first female cross country runner in Washington University history to earn All-America honors. Jordan, competing at the NCAA Division III Championshp held at Michigan State University, circled the five-kilometer course in 18:45 to claim one of the 35 All-America berths.

Football

Following a record-setting career, senior linebacker Chris Murray, Peoria Heights, Ill., was named the University Athlete. Association (ILUAA) Defensive Player of the Year. The All-America candidate holds every Washington career, single-season and single-game record for total tackles and unassisted tackles. Other players recognized for all the UAA first team include: tailback Todd Hannum, Maryville, Tenn.; linebacker Jeremy Bellinghausen, Colorado Springs, Colo.; running back Jereon Back, Aurora, Ill.; defensive back Chris Nalley, Ferris, Texas; and punter Josh Hahn, Menlo, Calif.

Sratirical opera described as a witty mélange of the comic and serious

The Washington University Opera, under the direction of Jolly Stewart, will present the Prologue and selected scenes from Richard Strauss' opera "Ariadne auf Naxos" at 8 p.m. Dec. 9 and 10 in Umrhall Lounge. The concert is free and open to the public.

In this satirical opera, Strauss and his librettist Hugo von Hofmannsthal combine operatic figures with stock characters from both the commedia dell'arte, an improvised kind of popular comedy in Italian theatres in the 16th-18th centuries, and Molieres plays to create a witty mélange of comic and serious opera.

The wealthy Viennese nobleman in the story declares that the evening's theatrical presentations must stop promptly at a given hour so that his guests can enjoy fireworks. Absurdity reigns when he decrees that both the opera seria and the farce already planned as after-dinner entertainment must now be played on stage simultaneously.

"So many people I know ask me what it's like to be backstage before or during an opera," said Jolly Stewart. "What goes on, how does it all work? This is Strauss and Hofmannsthal's version of the answers to these questions."

Elizabeth Peterson sings the part of the composer while the coquettish Zerbinetta of the burlesque will be sung by Jeanne Lambert, Kristyane Cheatham and Gary Schruffner appear as Ariadne and Bacchus. Peterson will receive a master's degree in vocal performance in December. Cheatham received a master's degree in vocal performance last May. Lambert and Schruffner are pursuing master's degrees in vocal performance.

The role of the pompous Major DOMO will be played by Harold Blumenfeld, professor emeritus of music at Washington University and the composer of "Breakfast Waltzes," a one-act comedy that was given its world premiere last spring by the Washington University Opera. Additional graduate and undergraduate students in the Department of Music's opera program will complete the cast.

For more information, call the Department of Music at 935-5581.

Performing arts, music auditions scheduled

The Performing Arts Department will hold auditions Dec. 5-7 for a wide range of acting roles in four theater productions scheduled for the spring semester. The productions include "Blood Wedding," a classic tale of love, honor and revenge (Feb. 17-26) in the Drama Studio; "The Illusion," a contemporary version of a 17th-century French comedy (March 21-25) in the Missouri Theater; and two one-act plays, "Artist Descending a Staircase" and "The Ohio State Murders" (April 27-30) in the Drama Studio. Auditions are open to all Washington University students, faculty and staff. Sign-up sheets will be posted at the Performing Arts Department office, Room 314 Mallinckrodt Center. For information, call 935-5585.

The Washington University Wind Ensemble will hold auditions for next semester from 1 to 3:30 p.m. on Jan. 13 in Tietjens Rehearsal Hall. Openings exist for trumpet, alto, baritone saxophone and percussion players.

For more information, call the Department of Music at 935-5581.
Students help homeless who *fall through the cracks* — from page 1

Gary Boas of the Catholic Student Center are the group's advisers, along with David E. Pollio, Ph.D., an assistant professor of social work whose research interests include homelessness. The project is sponsored by Hillel, Catholic Student Center and the George Warren Brown School of Social Work.

The "STONE" in the title stands for Students Together Offering Nourishment and Enthusiasm. The group's name was based on an old tale about three soldiers who teach French villagers a lesson about community. When the villagers hide their meager food from the soldiers, the soldiers' way to help them is to make soup out of the entire village from three stones. They do indeed make the soup, but not without help from the villagers, whom they eventually persuade to add food to the mixture. In the end, everyone enjoys a festive dinner together.

As part of the "STONE Soup" project, students cook dinner for the homeless each Sunday from 4 to 6 p.m. at the Catholic Student Center, 6352 Forsyth Blvd. St. Louis area businesses, as well as the Marriott Food Service on campus and individual volunteers donate the ingredients and food, which includes a nutritious hot stew, bread, pastries, a beverage and sometimes fresh fruit.

The students distribute the meals at two downtown locations. "STONE Soup" is located at 16th and Chestnut streets, and is located at Kiener Plaza, which is located at 16th and Chatham streets, and a park at 14th and Locust. Any leftover food is donated to the Peter and Paul Community Service men's shelter in Soulard. Organizers said the response so far has been overwhelming, and Lubelchek at 726-6177.

Students help homeless who *fall through the cracks* — from page 1

"More volunteers are needed to conduct such tasks as cooking dinner at the center, serving the food, or working on the committees. Although "STONE Soup" is primarily having food collected, organizers stress that anyone willing to help is welcome, particularly during the holiday and summer breaks, when most students return home."

Along with soliciting food donations, project organizers also are seeking hygiene supplies such as toothpaste, toothbrushes, and winter clothing, which they plan to distribute to the homeless during the meals.

Many of the homeless at the two sites are men. Group leaders are focusing on securing such items as men's socks, shirts, underwear, coats, sweaters, and hats. Bins to donate clothing are located in residence hall laundry rooms. The volunteers also need blankets, pots and pans to prepare the food and a way to distribute it.

The group also needs money donations. Checks should be made payable to Hillel with "STONE Soup" on the memo line. Individuals may mail checks to "STONE Soup," 6300 Forsyth Blvd., St. Louis, Mo. 63105.

To raise money for the project, the group will sponsor a holiday card sale for the Christmas and Hanukkah season. Group participants plan to make the cards from sheets of parchment. All proceeds from the cards, which will cost $5, will go toward helping the homeless.

By working on a common goal with various individuals, Lubelchek and Garrity believe "STONE Soup" will unite the University's diverse student organizations. The university is affiliated with churches and are closed on Sundays, noted Koshner. The shelters usually serve limited food and no hot meals on Sundays, she said. Additionally, as Koshner pointed out during her Yom Kippur sermon, most St. Louis shelters cannot accommodate husbands and wives together or boys over 11. Furthermore, for various reasons, some homeless people elect not to stay in shelters. "There are way too many homeless people," said Lubelchek. "People who choose not to stay in shelters fall through the cracks."

Besides the homeless, the project strives to help fed individuals who once lived on the streets and are now struggling financially to survive. These people often must make difficult decisions between what they are having enough money to rent a room they share with others, noted Koshner.

So far, approximately 150 people have signed up to volunteer for "STONE Soup," an ongoing project that, with the exception of Christmas Day, continues through the holidays as well as summer break. The group is divided into six committees: food, supplies, cooking, publicity, scheduling, and captains. Each committee is led by two co-chairs.

Campus Watch

The following criminal incidents were reported to the Auburn Police Department Nov. 14-20. Readers with information that could assist in the investigation of these incidents are urged to call 935-3333. This feature is provided as a public service to promote safety awareness on campus.

Due to a break in Record publication over Thanksgiving, this list includes police reports spanning Nov. 14-20.

**Nov. 14**

10:40 a.m. — A computer belonging to the Department of English was reported stolen from Room 212 Duncker Hall sometime between 3 p.m. Nov. 13 and 10:40 a.m. Nov. 14.

2 p.m. — A visitor's purse was reported stolen from the women's locker room in the Athletic Complex at 1:30 p.m.

**Nov. 17**

11:30 a.m. — License plate decals were reported stolen from a student's vehicle parked in the upper circle drive in front of Buehls Hall.

3:29 p.m. — A student's bicycle was reported stolen from Sigma Alpha Epsilon sometime between 3 p.m. Nov. 14 and 5 p.m. Nov. 17.

**Nov. 19**

4:45 a.m. — A faculty member's purse was reported stolen from Room 139 Mudd Hall sometime between noon and 5:30 p.m. Nov. 18.

**Nov. 20**

2:09 p.m. — Jewelry belonging to a student was reported stolen from an unlocked locker in the Whittier House sometime between 9 and 10:30 p.m. Nov. 4.

2:41 p.m. — A staff member's camera and radios were reported stolen from Room 14 University House sometime between noon and 9 a.m. Nov. 19.

5:55 p.m. — A visitor's purse was reported stolen from Room 300 Bowers Hall sometime between 4:15 and 5:30 p.m.

**Nov. 21**

12:03 p.m. — A student's wallet was reported stolen from a practice room on the second floor of Talbot Hall sometime between 1 and 2 p.m. Nov. 18.

12:47 p.m. — A "Dog in law" sign and pole belonging to the Department of Facilities Plan and Building Operations was reported stolen from the side of Duncker Hall between 4 p.m. Nov. 18 and 9 a.m. Nov. 21.

**Nov. 22**

9:13 a.m. — Five radios and charging units were reported stolen from the maintenance shop in the lower level of Hunt Residence Hall sometime between 4 p.m. Nov. 21 and 8:30 a.m. Nov. 22.

1:11 p.m. — A student's wallet was reported stolen from a room in Shapley Residence Hall sometime between 6 p.m. Nov. 20 and 5:30 p.m. Nov. 22.

**Nov. 23**

1:42 p.m. — A faculty member's wallet was reported stolen from Room 218 Simon Hall sometime between 12:30 and 1 p.m.

**Nov. 24**

12:37 a.m. — A student's bicycle and four speakers were reported stolen from Theta Xi Hall sometime between 3:10 and 4 a.m. Nov. 25 and 12:25 a.m. Nov. 26.

**Nov. 25**

12:06 p.m. — University police detained a impersonator just north of Plevna Row. An arrest was made on Nov. 25.

1:30 p.m. — A student's wallet and receipt were reported stolen from the maintenance shop in the lower level of Hunt Residence Hall sometime between 12:30 and 1 p.m.

**Nov. 26**

12:37 a.m. — A student's bicycle and four speakers were reported stolen from Theta Xi Hall sometime between 3:10 and 4 a.m. Nov. 25 and 12:25 a.m. Nov. 26.

1:30 p.m. — A student's wallet and receipt were reported stolen from the maintenance shop in the lower level of Hunt Residence Hall sometime between 12:30 and 1 p.m.

2:06 a.m. — Jewelry belonging to a student was reported stolen from an unlocked locker in the Whittemore House sometime between 9 and 10:30 p.m. Nov. 4.

2:41 p.m. — A staff member's camera and radios were reported stolen from Room 14 University House sometime between noon and 9 a.m. Nov. 19.

5:55 p.m. — A visitor's purse was reported stolen from Room 300 Bowers Hall sometime between 4:15 and 5:30 p.m.

2:09 p.m. — Jewelry belonging to a student was reported stolen from an unlocked locker in the Whittier House sometime between 9 and 10:30 p.m. Nov. 4.

2:41 p.m. — A staff member's camera and radios were reported stolen from Room 14 University House sometime between noon and 9 a.m. Nov. 19.

5:55 p.m. — A visitor's purse was reported stolen from Room 300 Bowers Hall sometime between 4:15 and 5:30 p.m.

2:09 p.m. — Jewelry belonging to a student was reported stolen from an unlocked locker in the Whittier House sometime between 9 and 10:30 p.m. Nov. 4.

2:41 p.m. — A staff member's camera and radios were reported stolen from Room 14 University House sometime between noon and 9 a.m. Nov. 19.

5:55 p.m. — A visitor's purse was reported stolen from Room 300 Bowers Hall sometime between 4:15 and 5:30 p.m.

2:09 p.m. — Jewelry belonging to a student was reported stolen from an unlocked locker in the Whittier House sometime between 9 and 10:30 p.m. Nov. 4.

2:41 p.m. — A staff member's camera and radios were reported stolen from Room 14 University House sometime between noon and 9 a.m. Nov. 19.

5:55 p.m. — A visitor's purse was reported stolen from Room 300 Bowers Hall sometime between 4:15 and 5:30 p.m.

2:09 p.m. — Jewelry belonging to a student was reported stolen from an unlocked locker in the Whittier House sometime between 9 and 10:30 p.m. Nov. 4.

2:41 p.m. — A staff member's camera and radios were reported stolen from Room 14 University House sometime between noon and 9 a.m. Nov. 19.

5:55 p.m. — A visitor's purse was reported stolen from Room 300 Bowers Hall sometime between 4:15 and 5:30 p.m.

2:09 p.m. — Jewelry belonging to a student was reported stolen from an unlocked locker in the Whittier House sometime between 9 and 10:30 p.m. Nov. 4.

Your copy must be submitted on time to be included. For additional information, call Sanford at 935-5293.

Generous contributors boost law school campaign

Listed below are some of the people and organizations, in addition to Anheuser-Busch and Fred Kuhlmann, whose generous contributions already have made a difference in the School of Law's "Building for a New Century" campaign.

The Hon. Marion T. Bennett, J.D., '38, is a senior circuit judge, U.S. Court of Appeals for the Federal Circuit, Washington, D.C. He is a longstanding supporter of the law school and as a partner and former chair of the Bryan Cave Law firm. He serves as a member of the law school's National Council and as executive vice chair of the campaign.

Thomas C. Hulverton, J.D., '59, is a partner of The Hulverton Law Firm. He serves as chair of the law school's scholarship committee and is a member of the National Council for the law school.

**Students enjoy debating today's pressing ethical issues**

"Present Moral Problems," as they have been labeled, provide an opportunity for students to engage in critical thinking and ethical reasoning. These issues are relevant to our daily lives and can be applied to various fields, including business, law, and social sciences. By discussing these topics, students can develop a deeper understanding of ethical dilemmas and learn how to apply ethical principles to real-world situations. This not only enhances their critical thinking skills but also prepares them for careers in fields that require ethical decision-making. Through group discussions and debates, students can learn to express their ideas, listen to others, and engage in respectful dialogue, all of which are valuable skills in any profession.
