Addressing Barriers to Sustained Monitoring

Washington University School of Medicine-St. Louis, MO
Amila Tutundzic, RRT, Jeanne Velders, JD, CIP and Abby Keeley, MS, CIP

QA/QI Goals

- To maintain a systematic, data-guided auditing process to implement real-time improvements in our HRPO review procedures.
- Identifying performance trends based on regulatory or policy issues
- Maintaining a continuous, uninterrupted auditing process by onboarding a full-time Quality Assurance Specialist, in return alleviating additional burden on other staff

Background

- Monitoring staff performance is a necessity, but creating a sustainable monitoring program can be a challenge.
- Prior efforts to maintain a QA/QI program were unsuccessful due to staff limitations. Previously, various senior staff members would do monitoring on top of their day-to-day work activities, with monitoring never being able to take precedence.
- Previously, completed monitoring feedback was stalled due to an overly complex approval process that involved individual team managers, in addition to quality assurance staff.

Program Development

- Revamped QA/QI program implemented after hiring a QA Specialist in late 2021
- The Director, Associate Director of Compliance and Education, and the QA Specialist helped create a program that focuses less on individual errors and more on issue based trends identified during monitoring
- Restructuring of the approval and feedback process allowed for more harmonious discussion and re-education process (if needed)

Three Key Changes in Sustaining the Program

Hiring a Full-Time QA Specialist

- Individual responsible solely for continuous monitoring across all HRPO staff members and policies/procedures
- Eliminated the “competing demands” problem that existed when various staff members had to allocate extra time for monitoring

Shifting Monitoring to Issue Based

- Previously, each staff member had a set number of submissions monitored
- Current program was reframed to focus on issues such as “Research with Children” or “Investigational Device Determinations.”
- The reframing ensured areas of greater regulatory risk are monitored at an appropriate frequency with a sufficiently sized sample

Restructuring the Feedback and Approval Process

- Previously, finalizing the monitoring report suffered from “too many cooks in the kitchen”. Team managers were present when feedback was provided to staff. This made staff feel “called out”.
- Now, when possible feedback and re-education is delivered on a team level, or if necessary, individual staff members are counseled by the Associate Director.
- Separating direct managers from this process increases staff engagement and alleviates tension.

Next Steps: Current Effort for Improvement

- While we have been successful at implementing sustained monitoring, our next goal was auditing in a more timely manner, providing staff with real-time feedback
- In 2024, we are piloting a change in structure for monitoring that prepares the monitoring schedule for the entire year, allowing the QA Specialist to continuously “roll” into the next audit.
- Previously, monitoring was on a quarterly basis, where now audits are happening on bi-weekly, monthly, quarterly, and annual basis-choosing studies approved as recent as the day before the audit.
- Additionally, with this new schedule, we are projected to conduct double the amount of audits than the previous year.

HRPO Internal Audit Schedule			2024											
*Example Schedule Only			Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Number of Audits to be Conducted in this Month			5	5	5	4	5	4	4	5	4	4	4	6
Audit Type	Frequency of Audit	Detail of Audit												
PI Grant Consistency	Annual	5% sample/yr.												
SWAT	Bi-Weekly	Sample Varies-2x/m												
Continuing Reviews	Monthly	Last week of every month												
Meeting Minutes	Quarterly	2 wks in mid Quarter												
ICFs	Quarterly	End of Quarter												
HIPAA	Annual													
Funding	Semi-Annually	Jan/July (R-6M)												
Exempt	Annual	Apr (R-6M)												
NHSR	Annual	Oct (R-6M)												
IRB Reporting	Annual	Jan (R-1Y)												
IRB Suspensions	Annual	Jan (R-1Y)												
Vuln. Populations	Annual	May (R-1Y)												
Medical Devices	Annual	Aug (R-1Y)												
Drug Studies	Annual	Nov (R-1Y)												
Modifications	Monthly	Last week of every month												

*This is subject to change as audits can be added due to new developments
