**Electrical Work Progressing On Nurses Call System, Air Conditioning, In Present Bldg.**

One or possibly two floors will be able to accommodate room air conditioners by this summer if patients desire them; as electrical workers from the S. C. Sachs Co. began work on the seventh floor in the existing building. Previous to this year, air-conditioners were discouraged in most rooms because of a lack of current.

As writing for the new nurses' call system on the seventh floor begins, the covering and housekeeping department will soon be rehabilitating patients' rooms following the installation work. The electrical phase of the operation will take about a month.

As the seventh floor is completed, work will begin on the sixth floor, then the fifth and will continue on the remainder of the floors. When a floor is completed, work will begin on the next.

The work is part of a $9,000,000 hospital construction expansion project. The seventh floor will involve 23 patient rooms, comprising a bed complement of 22 patient beds. Of the 23 rooms, 22 will be directly involved in the electrical work and rehabilitation. Room 702 will not be affected because at a later date this room will be converted into an elevator shaft.

The room has been divided into six operations. Each sectional operation will require a transfer of patients and one person and a physical transfer from the seventh floor to another floor.

A completely new centralized control system has been installed in both the existing Hospital building and the Norris & Elliott building, as a part of the building program, which will start on Feb. 14 and the seventh floor will be the first area to be affected.

**Open House For Nurses’ Lounge Held March 9**

The new nurses' lounge is now open, said Mrs. Saul A. Dubin, chairman of the nurses’ residence, and it is a real beauty spot of that building.

An official ceremony and open house for all Hospital personnel and staff was held on Saturday, March 3 to 5 p.m. with the presence of a large group of medical and nursing personnel and of the Federation board.

Funds from Gift Gallery have contributed heavily to the furnishing of the lounge. The auxiliary plans to continue renovation of the residence floor-by-floor over a period of five years.

Pink and cocoa form the color scheme of the room, which is furnished in smart black and natural color contemporary furniture. The ceiling of the room was lowered to channel the air-conditioning pipes and to afford indirect lighting. The room has a tile floor covered with white and will include a television set.

Adjacent to the lounge is a brightly lighted room with cream-colored walls, in which the nurses is a newly decorated powder room in keeping with the decor.

The decorating was done by the auxiliary's decorating committee, Mrs. Selz A. Dobbs, chairman, and her co-chairman, Mrs. Harman Katcher, and Mrs. Anne Ventil, the hospital’s executive housekeeper and Miss Wilhelmina Bezd, nurses' residence social director.

**Mimir Hospital Is “Amputee Center”**

MIMIR—Mimir Rehabilitation Hospital at Grosse Pointe (Colony), a division of Jewish Hospital, is now a full-scale “Amputee Center” of the National Research Council. Dr. John W. Dayton, director has announced.

The Hospital was recognized as an “amputee center” following the return from the University of Los Angeles of Robert Hekish, a physical therapist at Mimir. He attended a course of instruction sponsored by the National Research Council’s project on amputees.

Nearly 12,600 copies were mailed out to the Jewish community through the Jewish Federation mailing list. The Federation has received numerous favorable comments on the show.

**“Community Report” Favorably Received**

Last month's issue of 216 was the form of a "Report to the Community" with the current hospital story and the building program held in its entirety for the hospital. It was illustrated with many photographs of nurses and students in the hospital during the year.

As Mrs. Sara Sachan, chairman of the “Report to the Community” Committee, she posed with Bozo, the Clown, like a real trooper at the “Fox Theatre” and all agreed "Better than the Movie."

**2 Well-Known Research Men Retire**

LABORATORIES—Two well-known members of the Hospital laboratory staff retired last January. Dr. Michael Somogyi and Dr. Moyer Fleisher, nationally recognized in their research fields, have assumed aemeritus status which, although in retirement, will allow them to carry on specialized work here.

Dr. Michael Somogyi

Dr. Somogyi, who has devoted his life work to diabetes research and study, and is currently assimilating his collection of papers and data in book form. He hopes to complete this large task over the next two years. Dr. Somogyi, 12 years old, has been associated with the Hospital since the Spring of 1922 when the building was occupied. Born in Hun- gary, he attended the Univer- sity of Budapest Medical School, then the United States in 2008 to be the staff of Columbia University in New York until 1922 when he accepted to work in the Jewish Hospital.

"The hardest job in my life," Dr. Somogyi related, "was to feed poodle hungarian diabetes patients with insulin. nothing."

He re-entered the United States in 20000 to become to the Washington University Medical School Biochemistry Department where, along with Dr. P. L. and Dr. A. K. Duvey, he developed a method for preparing insulin today, the day is the basis for the commercial production of the drug.

Dr. Somogyi came to Jewish Hospital when the late Aaron Woldman was president and was the first full-time man in the laboratory department. The department at that time had a part-time pathologist and two tech- nicians in bacteriology, one in pathology, and one in chemistry. Except for a period of four years, Dr. Somogyi’s work has been carried on almost single-handed.

He divides his work into two parts.

1. Study of carbohydrate metabolism, normal and abnormal, which led to the study of diabetes.

2. Development of analytical methods which are indispensable in research work. Some of these have become international- ly accepted standard methods.

He said the diabetes research has been the center of his work for the last 20 years. During that time, he estimates he has worked with 6,000 patients and aided in training of the house staff.

In 1953, he received the Erastus Bigelow Award for Clinical Chemistry of the Amer- ican Chemical Society. The award consisted of a medal and payment of $500, which he jokingly admitted went toward the education of his daughters at Oberlin College. He attended the ceremony at Oberlin College where another son also attended.

Dr. Somogyi has six children, four by his previous marriage and lives with his wife in Crestwood.

Dr. Somogyi pointed out that his life has generally gone up to the fact that the current prac- tice of using insulin is engross- ing in that much more insulin is being used that patients need. Ninety-nine per cent of adult diabetics who have no prior treatment, are adminis- tered a regular therapeutic dose and their ability to use normal amounts of carbohydrates is restored, although they may not need insulin, although they are treated with small doses of insulin.

His work has been supported by grants from Morton J. May. The fund itself made possible for Dr. Somogyi to collaborate with several colleagues, Drs. J. G. Prolstein, Jr., M. D. and F. L. and A. K. Duvey, over their clinical research prob- lems.

Dr. Somogyi expressed deep appreciation to the Hospital administration and the board of directors for the arrange- ments which allow him to carry on his work regardless of his requirement.

Dr. Moyer Fleisher

April 1, 1955— Dr. Fleisher came to Jewish Hospital Medical Center, as a research endocrinologist. Prior to his appointment here, Dr. Fleisher was professor of anatomy and research associate at the University of Pennsylvania Medical School.

He was born in Philadelphia and is a graduate of the University of Pennsylvania Medical School. He is 70 years old, married and lives at the Fox Run Park Hotel, walking home each evening.

Following his appointment to Jewish to become head of the anatomic and serological department in the Diabetic Laboratories. He has been studying the possible causes of Hopkins' disease and is cur- rently engaged in the problems of auto-immune formation.

Dr. Fleisher says he is a "theorist being more concerned with basic facts than practical facts." He is a member of a number of professional organ- izations.

He was an assistant experimental pathologist at the Uni- versity of Pennsylvania from 1907 to 1919 and a pathologist at Barnes Hospital from 1919 to 1943. At Barnes he worked with Dr. Leo Loom and he- helped with the pioneer work on transplantation of normal and abnormal organs, also making some of the early observations on insulin in patients with diabetes and insulin injection in patients with diabetes and insulin injection in patients with diabetes.

In World War I, he served in France as a phisi- cian.

Some of his other research work included study in blood circulation and tissue in humans, allergic reactions and chemotherapy in influenza.

He has been in active human research when he completed a form as chairman of the Missouri association for science teaching and active in the People's Art Con- servatory. He has been a member of the Social Planning Council and is a member of the City of New York Department of Health, Education and Welfare.

Robert Stone

Robert Stone was chief of the medical social service department at the Jewish Hospital since the Spring of 1955. He attended the University of Pennsylvania Medical School in Boston. He is 70 years old, married and lives at the Fox Run Park Hotel, walking home each evening.

New Director, Dept. Of
Bacteriology Appointed

LABORATORIES — Alexander C. Sonnenwirth, M.S., has been appointed as Director of the Department of Bacteriology and Serology, effective as of last January 1st, it has been announced.

Mr. Sonnenwirth, 31 years old, was born in Romania. He received his college training at Phillips University, Marburg, Germany, gaining his A.B. degree at the University of Nebraska in 1949. He was a Research Fellow at Purdue University, where he gained his M.S. degree in 1950, and is currently a candidate for the Ph.D. degree at Washington University in the Department of Bacteriology. He started at Jewish Hospital in October, 1953, as associate bacteriologist. He is a member of the Society of American Bacteriologists.

His work includes research on streptococci and certain anaerobes and their possible relationship with rheumatic fever. His current interest is centered on infections caused by these organisms normally found in man. These bacteria are strict anaerobes, i.e., they can be grown only in an oxygen free environment. Very little is known about these organisms, since special equipment is needed for their isolation. The anaerobic laboratory was set up (picted in last November’s issue) in Sonnenwirth, working with Dr. T. Rosenbush of Washington University. This equipment and methods of study will greatly facilitate the detection of certain infective antigens.

Mr. Sonnenwirth came to the United States on a Foreign Student Fellowship in 1948. He is married and resides at 6350 Gates Avenue.

Dr. J. J. Strauss, Director of the Department of Bacteriology and Serology of the Division of Laboratories at the Institute of Michael Reese Hospital, announces that Stanley Sonnenwirth M. S. (right). With him is Dr. Lang.

Dr. Sonnenwirth is the recipient of a grant from the Dazian Foundation for Medicine, which is located in New York City and has an annual grant of $3,500 from the Dazian Foundation, in recognition of his research work on infections caused by organisms that are i.e., they can be grown only in an oxygen-free environment. Dr. Strauss is President of the Division of Laboratories of the Institute of Michael Reese hospital.

Dr. Sonnenwirth is an American of German birth, who received his college training at Phillips University, Marburg, Germany, gaining his A.B. degree at the University of Nebraska in 1949. He was a Research Fellow at Purdue University, where he gained his M.S. degree in 1950, and is now a candidate for the Ph.D. degree at Washington University in the Department of Bacteriology.

He has done research work at Washington University, and at both the Barnes and Proszkin and Karsner Hospitals. He is a member of the American Chemical Society and Sigma Xi honorary scientific fraternity. He has been married 11 years, resides in Philadelphia, and has two children.

Dr. Frankel has carried on research on bovine hemoglobin in the Medical College of Pennsylvania Laboratory. His previous research has dealt with genetic metabolism in epidermis plus the central nervous system.

Special Funds Aid Work at Miriam JEWISH HOSPITAL

SPECIAL FUND gifts amounted to almost $3,000, netting about $2,000 after expenses. A sum of $1,400 was given to the Dr. Sale Library Fund, which is used for purchase of books for library's use. The Dr. Sale Library Fund is used to purchase books for library work. The Dr. Sale Library Fund is used to provide for library work.

Charm School Proves Charming, Instructive

The Nurses’ Charm School, sponsored by the Women’s Auxiliary, proved successfully charming and instructive. With weekly sessions ranging from dancing instructions to beauty aids, J. H. nurses are now accentuating their charms, putting their lessons to good use. Photos on this page were taken while various participants were undergoing treatment. The event was under the chairmanship of Mrs. Ervina Bry and Mrs. Leo Fuller.

The opportunity, to hear yourself as others hear you is provided the student nurses in the “Communication” phase of the Charm Course. Miss Marilyn Hughes, pre-clinical student, at right above, is receiving last minute instructions from Miss Frances Hop (left) co-ordinator of the course, before having her voice tape-recorded. After analysis by the instructor, each student will be reviewed, even at the very last minute, what to expect from your tickets to the theatre, symphony, baseball game or the special events that you are unprepared for.

Miss Marilyn Hughes, a member of the Hospital’s anesthesiology dept. and student Bea Mannon, school graduate member of the Hospital’s anesthesiology dept. and student Bea Mannon.

Throat-Share The Fun Tickets Needed

It isn’t too late for one more good resolution for the New Year. It’s the resolution to volunteer some of your time to the volunteers of Mr. and Mrs. Willard Levy, chairman.

For a volunteer who’s almost impossible to catch, Mrs. Leney Levantak, chairman of the volunteer committee for Home Care, announced that volunteers are needed to take patients for short “airings,” volunteers are needed to read to patients, write letters for them, show movies, play simple games and aid in other simple recreational activities. No volunteers are sent to homes where there are communication disabilities.

If you have a record player in your home, you could bring your favorite records to Genome Care-shuns!

You can help to fulfill the dream of a nightcap. In red, white and blue, for the American Nurse, it will be $2.95. Other committee members, who want to become members of the American Nurse, are Mrs. Robert Aronson, Mrs. Leonard Barad, Mrs. Herman Lesser, Mrs. Aaron Reiches, Mrs. George Wennerman, Mrs. Sid Senturia, chairman, and Mrs. M. Koss and her daughter, Lauren; Mrs. Robert Aronson, Mrs. Harry Frading, Jr., Mrs. Arthur Shapie.

The idea of the new resolution is to be a gift to the Sick.

PATIENTS at Miriam Rehabilitation Center, Webster Groves, a division of Jewish Hospital, work at rehabilitating themselves, as the above photos show, and they have a good time doing it, too. Following rehabilitation work, many return to an active, almost normal way of life. The above photos show some of the useful apparatus which therapists at Miriam utilize to bring back life in limbs. Patient Edwin B. Collins uses a triceps loom (left photo) to strengthen elbow muscles. In center photo, Miss Florence Kenyon, occupational therapist of the Miriam staff, aids Robert Safford, left, and Louis Brodsky, both patients, in shop work. They are making toys to be given away. Rolling (right photo) works his arms on pulley while in wheel chair. A metal table with heavy resistance cabinet enables exercise to be given to all muscles. Also shown in photo is heavy resistance vest developed at Miriam. (Staff photos, Bob Flach).

Study On Utilization Of Nursing Personnel

NURSING SERVICE — A "Study of Better Utilization of Nursing Department Personnel" is continuing here at the Hospital.

The study is under the chairmanship of board member Oscar Brand with Dr. David Littauer, executive director, as vice chairman. Kenneth P. Cohen, administrative assistant for purchasing and Management Engineering, is group leader.

Other persons who comprise the scoring committee are Miss Edna E. Peterson, R.N., Director of Nursing and Nursing Service; Mrs. Harry Franc Jr., Chairman of the Jewish Hospital Committee for Nursing Service & Education; Dr. William H. Meyerhardt; David A. Gee, assistant director; Charles K. Andrew of the firm of Norton & Elliott, management engineers; Gerald Nadler, Ph. D., of the Washington University School of Nursing & Nursing Service; and Miss Imogene Laswell, personnel director.

Explaining the program at an opening meeting, Mr. Brand commented: "As you all know, this institution is in the midst of an expansion program which includes many changes. One new building under construction, our new equipment and furnishing program, our educational program, our greater activity into research, the approaching physical merger of the Jewish Sanatorium and the Jewish Rehabilitation Hospital — plus many other new activities, have and will continue to present new problems as well as to bring out more clearly some of the old." "Dr. David Littauer, our Executive Director, has stressed in the Board of Directors the need for careful review and study of all phases of operations in various departments, with the goal being better service, greater efficiency and better utilization of all personnel. As a result, the firm of Norton & Elliott, management engineers, was employed by the Administration to study some of our departments. Substantial improvements have been indicated in departments studied, mostly recently.

"A few months ago, Dr. Littauer called the attention of the Board to a study made at Harper Hospital in Detroit of its Nursing Program necessitated by an acute shortage of nurses. This study resulted in alleviation of the problem and in greatly improved patient care."

The Board of Directors recognizes that patient care at Jewish Hospital ranks among the highest. However, after consultation with Miss Peterson who warmly welcomed such a study at this Hospital, the Board decided to proceed with a similar program here.

"Miss Peterson is anxious for the inauguration of this program. Her vast experience and knowledge of nursing leads her to believe that some interesting improvements may develop with the application of the techniques of Management Engineering."

DIRECTOR OF NURSING — Miss Edna E. Peterson, has just completed a five year term of service as President of Third District, Missouri State Nurses' Association. Miss Peterson (left) congratulates the newly elected President, Miss Adelle Brielmaier, Director of Home Nursing, St. Louis Chapter, American Red Cross, at the conclusion of the annual meeting held at the Congress Hotel. Miss Peterson was elected to the Board of Directors of the Association for a two-year term.

NURSING — A Refresher Course open to all graduates of the School of Nursing, has been initiated. This session was devoted to an orientation of Dr. David Lattimer. He explained the organization of the Jewish Hospital Medical Center group with current and future nurses. Dr. Harry L. Evans, Jr., Chairman of the School of Nursing and Nursing Service, Committee and the Auxiliary in Hospital projects. The session was held at the Jewish General Hospital and Nurses' Residence.

During a period of approximatel y 12 weeks, this course is designed to review members of the School of Nursing, at the current practices at Jewish Hospital and also acquaint them with the latest trends and procedures in Nursing. The weekly lectures and seminars, will be conducted by specialists in the particular fields of under discussion. Future sessions will include pathophysiology; Head Nurses, who will introduce and explain the functions of their departments. A lecture on Rehabilitation and the role of the nurse in the hospital, will be presented by Dr. John Dony, of the U.S. Hospital. This field will be followed by an information session, where nurses can purchase new and other medications.

This Refresher Course is being designed to enable all graduates of the School of Nursing, to be informed on the progress and achievements of their Hospital and School. The participation of graduates is urged as the course has been planned with their needs in mind.

The Advanced Nursing Class comprised of Senior students in the spring of 1955, took a field trip to Koch Hospital on August 7, 1955. This was a trip of a tour of the hospital and an opportunity to obtain first hand knowledge of the current methods of treatment and techniques.

Returning from a recent trip to Manila, Arkansas, Miss Marilyn Chambers, a graduate of the Jewish Hospital School of Nursing, brought back news of the current developments in the country. Seems some of her classmates are really enjoying the trip. Miss Francislan was the guest of honor at a reception given by her old school. The course has been a Public Health Nursing for the past 11 years and is currently involved in an extensive program of public health nursing. The program involves the training of new nurses and the supervision of the work of existing nurses.

BASKETBALL TEAM of Jewish Hospital School of Nursing, is one of the finest teams in the country. The team is composed of 16 members, who have been selected from a pool of over 50 candidates. The team is now working on a schedule of games, which will be announced shortly.

One of the most popular events of the year is the annual banquet and dance which is held on May 7, 1955. The event is open to all nurses and their friends, and is sponsored by the Jewish Hospital Nurses' Association. The dance will be held at the Jewish General Hospital and will feature live music and refreshments.

Jewish Hospital School of Nursing Alumnae Association, news of the current activities of the alumnae and their friends, and information about the current activities of the School of Nursing.
Elected to New Board Positions

**New Officers of the Jewish Sanatorium Women's Auxiliary Staff**
- Mrs. Jack Molasky (center president), Mrs. Sol H. Segal, a vice-president. (Staff photo)

**SANATORIUM** — Installation of directors of the women's auxiliary of the Jewish sanatorium was held on Jan. 12 in the nurses' residence with Mr. Frank Steinberg, medical director of the sanatorium, as guest speaker. Installing officer was Mrs. Theodore Lending, hospital president and founder of the auxiliary.

**SANATORIUM — During** 1954, the Jewish Sanatorium Division continues to expand its program of comprehensive care for the chronically ill. The nursing department was completely overhauled and is now under the supervision of a graduate nurse. Two additional practical nurses were added.

The regular medical staff consists of the Medical Director, a visiting physician, a resident physician, a visiting surgeon, and a visiting dentist. Constantly supervised by the hospital have given them advice and help in many cases. Two dentists, the clinic, and the ward facilities of the Jewish Hospital have been used extensively.

The social service program has been expanded. The work now spans two full days every week at the Jewish Sanatorium. She regularly confers with the patients and residents on a consultation basis on problem cases.

An active educational and occupational therapy program is in progress and has done much to raise the morale of the patients. One cooperation of the Women's Auxiliary has been of great value in this, as in many other projects. A part-time social therapist will be added to our staff in 1955.

Active discharge planning for patients continues and has released many beds for those who need the most care. The cooperation of the Women's Auxiliary has been of great value in this, as in many other projects. A part-time social therapist will be added to our staff in 1955.

**WelcomeNewEmployees!**

The file was closed on the 1954 Employee Holiday Party which was attended by almost everyone. An overview of the party was over and the employees had time to visit. The employees were to send in their names to the auxiliary party committee. The party was a success, everyone had fun. However, it would not have been possible without the hard work, cooperation and devotion of time and money by the employees and friends of the hospital.

NURSING—Forty-eight first-term nurses received their caps at the 25th capping ceremony of the Jewish Hospital School of Nursing on Feb. 17. Miss Edna E. Peterson, Director of Nursing Service, announced.

The first class of the school received their caps in 1937 and for a period of years students were enrolled twice a year.

Miss Edna E. Peterson, Director of Nursing Service on Feb. 17, Miss of the Jewish Hospital School at the 75th capping ceremony term nurses received their caps of Nurses' Capping Ceremony last month. Miss Edna E. Peterson, Director of Nursing Service, presents cap to student Prisella Hiken. Story below. (Staff photo).

**48 Students Capped**

- GIFTS FOR CHILDREN

**Beautifully Gift Wrapped and Delivered Without Charge**

Hostess Gifts ... New Spring Accessories ... Travel Gifts ... Lingerie ... Unusual Gifts for Men ... and a host of other bright new ideas.

Come in on Mondays and browse around!

**J. H. One Of First To Recognize Blue Cross Of Chicago**

Jewish Hospital has become one of the first hospitals in St. Louis to make arrangements with the Chicago Blue Cross Plan for Hospital Care for providing the full service benefits of that Plan to its members when patients are in this Hospital.

This new arrangement became effective on January 1 and will make it possible for members of the Chicago Blue Cross Plan to receive full benefits, just as though they were entering a member hospital in Illinois. Payment for care of Chicago Plan members will be made directly to Jewish Hospital without the necessity for going through the St. Louis Blue Cross Plan or the Inter-Plan Service Benefit Bank, as is now the case.

Well over 100,000 of the Chicago Plan's members live in Southern Illinois and a large number of them avail themselves of the services of doctors on the staff of the Jewish Hospital. These arrangements will therefore be helpful to many of our patients from Southern Illinois.

Grant of $12,000 To Dr. Sherry

**MEDICAL SERVICES — Dr. Sol Sherry, Director of the Department of Internal Medicine has been awarded a grant of $12,000 by the Research Division of the American Cyanamid Co. to support a research project on Enzyme Studies.**

The work will be conducted at Jewish Hospital under the direction of Dr. Sherry.

**Expression Of Thanks**

Rose Tepper (Cashier's Office) wishes to thank her many friends at the Hospital for their kind expressions of sympathy in her recent bereavement.

**Gift Gallery Party**

PARTY at Gift Gallery in celebration of the second complete year of its service to the Hospital. Coffee and birthday cake was enjoyed by most of the Hospital staff including the newboys. From left: Mrs. Sol Deutsch, Gift Gallery Auxiliary volunteer; Miss Ruth Freund, visitor; Miss Lillian Schwartz, secretary; Mrs. Maury Cooper, Gift Gallery staff; Dave Gee, assistant executive director; Bill Crull, newspaper boy; Mrs. Sam Rich, Gift Gallery staff; Paul Wozniak, assistant director in charge of Fiscal Services; Dr. Ram A. Rouhi, laboratory staff. (Staff photo).
