The Division of Public Health Sciences congratuates faculty member Melody Goodman, PhD, on her appointment as chair of the American Public Health Association's Statistics Section. This section, formed in 1908 and one of the oldest in APHA history, identifies issues, develops strategies and promotes activities in the area of statistics. On her goals for this appointment, Dr. Goodman says: "I look forward to working with our section members and APHA leadership as we begin to address the organization's central challenge to become the healthiest nation in one generation. This work will be accomplished using three key strategies: 1) strengthen public health practice; 2) align organizational capacity and infrastructure; and 3) build a public health movement. Over 12,000 public health professionals convened in New Orleans to discuss Healthography; how where you live affects your health. I can't wait for our annual meeting in 2015 where we will discuss the need for health in all policies."

The Master of Population Health Sciences (MPHS) degree program will be accepting applications for the 2015-2016 academic year starting on January 9, 2015. This clinical outcomes research training program, open to clinicians and clinical doctorates as well as medical students, can be completed in as few as 10 months or 2 to 3 years part time. Registration is also still open for Spring 2015 courses; read the full list of available courses online. Most courses begin
The **Winter/Spring 2015 schedule for the Epidemiology and Clinical Outcomes Research Seminar Series** is now online. Note that the seminar scheduled for today, December 11, has been canceled. The series returns on January 8, 2015, with a talk from Amit Amin, MD, MSc, assistant professor of medicine, Cardiovascular Division, Washington University School of Medicine.
