REHABILITATION DIVISION DEDICATED

Formal dedication of the new Rehabilitation Division of the Hospital took place on Sunday, May 18.

Mrs. Lester Munchweiler, Chairman of the Miriam Hospital Committee, presided at the services. Remarks on "Plans for the Future" were given by Dr. David Littauer, Executive Director, following which Mrs. Reuben Zimmerman, retiring president of Miriam Lodge No. 17, United Order of True Sisters, formally presented the Division to Mr. John M. Shoenberg, President of the Hospital. Rabbi Bernard Lipnick, President of the Rabbinical Association of St. Louis, delivered the dedicatory benediction.

Past chairmen of the Miriam Committee were honored for their service. These included Mrs. Gustave L. Stern, Mrs. Milton Greenfield, Mrs. Bernard Littman, Mrs. Herman C. Seldin, Mrs. Erwin Bry, Mrs. Elmer D. Abramson, and Mrs. Maurice Mendle. New president of the organization is Mrs. Sidney Rifkind.

Prior to 1951, the current rehabilitation activity was carried out by the Miriam Rosa Bry Convalescent-Rehabilitation Hospital, located in Webster Groves and sponsored by Miriam Lodge No. 17, United Order of True Sisters. The Lodge membership of over 900 will continue to support and serve the physically handicapped in the new organization framework of the Jewish Hospital medical center.

JH SCORES $2,612 AND 17% INCREASE IN FEDERATION DRIVE

Once again proving their vital interest in the success of the Jewish Welfare Fund Campaign, 809 JH employees this year pledged a total of $2,612 to the drive. This represents an increase of $390.00 over last year's contribution, and 88% participation by full-and part-time employees.

The 1958 drive was very capably directed by Mrs. Sophia Rosenkranz, Director of Volunteer Services, whose well-planned campaign was largely responsible for this year's successful results.

The Jewish Federation of St. Louis each year contributes approximately $360,000 to the Jewish Hospital—for maintenance of an educational program for interns, residents, and fellows; for deficit-financing of in-patient and out-patient programs; for that portion of the Chronic Disease Division budget not covered by the United Fund; and in complete support of the Home Care Program conducted by the Hospital.

Other local agencies receiving support from the Jewish Federation include the Board of Jewish Education, Jewish Child Welfare Association (Refugee Division), Jewish Community Centers Association (Armed Services Committee County Program), Jewish Community Relations Council, Jewish Employment and Vocational Service (Refugee Division), and Jewish Family Service Agency (Refugee Division).

NEW RESEARCH INSTITUTE SECTION CREATED; MEDICAL SOCIOLOGIST APPOINTED

With the appointment of Albert Wes- sen, Ph.D., as Medical Sociologist, studies under way in the newly constituted Medical Care Administration Section of the Research Institute will soon be greatly augmented, it was an- nounced by Dr. David Littauer, Direc- tor of the new Section and Executive Director of JH.

(The Research Institute, with its additional four sections of Medicine, Pathology and Laboratories, Surgery, and the Institute of Experimental Pathology, is the entity in and through which all of the Hospital's basic, clinical, and administrative medical re- search is carried out.)

Dr. Wessen holds a B.A., and an M.A. and Ph.D. in Sociology from Yale University. He served with the U. S. Army from 1943 to 1946, and has held several teaching appointments in Soci- ology, the latest at the University of Vermont College of Medicine as As- sistant Professor of Medical Sociology. He is a native of Topeka, Kansas, and is a Phi Beta Kappa. On his arrival, Dr. Wessen will hold a joint appoint- ment with JH and the Social Science In- stitute of Washington University, where he will be a Research Associate.

Dr. Littauer stated that the new Section will engage in studies in programs of medical care and in administrative organization and operation related to such programs, using the general hospital as a base of operations and a frame of reference. "Included within its scope," he said, "might be studies of social or administrative organization of health services.

‘Hospitals are becoming extremely complex organizations and are in danger of losing sight of human values, attitudes, and communications. They are patient care, business, social, educa- tional, and research institutions. All of these functions must be put in their proper perspective in relation to each other. The medical sociologist with his background in the behavioral sciences will help us do this.'"
