MCMILLAN HOSPITAL AND OSCAR JOHNSON INSTITUTE

The operation of the McMillan Hospital (for Eye, Ear, Nose and Throat) is now limited to its outpatient departments, which function as divisions of the University Clinics. The hospital services in Ophthalmology and Otolaryngology are located in the Barnes and St. Louis Children's Hospitals.

The Oscar Johnson Institute constitutes the research and teaching laboratories of the Departments of Ophthalmology and Otolaryngology. It houses at present also research laboratories used by the departments of Research Pathology, Internal Medicine, Biophysics and Neuropsychiatry.

The Washington University Clinics, although owned by the University, are operated under the supervision of a separate Board of Managers. Formerly called the Dispensary, the present name was adopted in 1932 when the outpatient service was reorganized to serve more efficiently as a means of teaching private and group medical practice. It represents as well a medical service to the community, and affords examples to medical students of their social and community obligations. The number of patient visits to all clinic subdivisions during the past year was 126,085.

Appointment to the staff of the Clinics is indicated under the individual's name in the staff list of the School.

THE ST. LOUIS CITY HOSPITALS

The University nominates to the Hospital Commissioner Visiting Physicians and Surgeons to the City Hospital, the Homer G. Phillips Hospital and the Malcolm A. Bliss Psychiatric Institute. Those holding appointments in the University Staffs of these hospitals are designated in the staff list of the School.

HISTORICAL STATEMENT THE SCHOOL OF MEDICINE¹

The teaching of medicine west of the Mississippi river began in the first half of the 19th century in response to the need of doctors for the rapidly growing populations of the Valley and the West. The first schools were established in existing collegiate institutions, the Roman Catholic St. Louis University, chartered in 1832, and the Protestant Episcopal Kemper College, incorporated in 1837. Courses of instruction were offered by the Medical Department of Kemper College the fall and winter of 1840-41, and by the Medical Department of St. Louis University in 1842-43. From these origins two medical schools were developed, to be known later as the Missouri Medical College and the St. Louis Medical College.

Kemper College was closed in 1845, and in the following year Dr. Joseph Nash McDowell, the founder of its medical department, succeeded in establishing his faculty by legislative act in the State University of Missouri. In 1855 connection with the State University terminated and the Missouri Medical College, an independent school, was incorporated. In the same year, the faculty of the Medical Department of St. Louis University, through the leadership of Dr. Charles Alexander Pope, established the St. Louis Medical College, an institution which maintained independent status until 1891 when it became affiliated with Washington University. The work of McDowell's School was interrupted by the Civil War, but was resumed afterwards in new buildings, and again (1886) affiliated with the University of Missouri for a brief period. Finally, in 1899, in its second period as an independent school, it was united with the St. Louis Medical College in the Washington University Medical Department. The Medical Fund Society, an association of members of the St. Louis Medical faculty, created (1872-75) an endowment fund for the support of teaching.

The Washington University Medical Department was established in 1891 by the affiliation of the St. Louis Medical College with the University. Eight years later, on the union of the Missouri Medical College with the Department, the faculty was enlarged, clinical facilities were increased, additional

space and equipment were obtained, the curriculum was strengthened and greater opportunity for investigation provided. The Missouri Medical College building on Jefferson Avenue was remodeled and converted into the Washington University Hospital for teaching purposes and at this time (1905) the Maternity Department was opened and the Training School for Nurses was begun. The Polyclinic Hospital, with an addition, became the Washington University Dispensary. The Martha Parsons Children's Hospital was affiliated in 1906.

In 1910 the Corporation of the University, with the cooperation of the Medical Faculty, reorganized the School in all departments and appointed new heads of departments and their assistants in anatomy, physiology, biological chemistry, pathology, medicine, surgery, and pediatrics, who devote themselves to teaching and research. Associated with this staff clinical instructors were chosen from the medical profession of St. Louis. These changes were made with the aid of funds donated by philanthropic citizens of St. Louis. The inspiration for this movement came from Robert Somers Brookings, then President of the Corporation, who contributed his fortune toward the realization of his plans. For four years the reorganized school continued to occupy the laboratory and clinic building erected by the Medical Fund Society on Locust Street, and as the University Hospital the building on Jefferson Avenue formerly used by the Missouri Medical College.

In 1914 the Medical School moved to new buildings facing Forest Park on the corner of Kingshighway Boulevard and Euclid Avenue, to form part of a new medical center which comprised also the Robert A. Barnes Hospital, the St. Louis Children's Hospital and the Out-Patient Dispensary (later called the University Clinics).

The next institution to join the group was the St. Louis Maternity Hospital which moved into the present building in 1927. In 1931 the McMillan Eye, Ear, Nose and Throat Hospital, provided by the bequest of Mrs. Eliza McMillan and the Oscar Johnson Institute, the gift of several donors, were erected by the University. The Edward Mallinckrodt Radiological Institute, the gift of Mr. Mallinckrodt and his son, was erected in 1931 and has since provided the X-ray services for the whole group.

Prior to the reorganization of the Medical Department the requirement for admission had been a four year high school course. In 1910 the requirements were raised to one year of collegiate study of specific subjects. In 1912 two college years, and in 1925 three years, were required. Four years of collegiate work leading to the bachelor's degree became, in effect, the requirement for admission in 1931.

LABORATORIES AND CLASS ROOMS

The laboratories and lecture rooms of departments representing the medical sciences are housed in three medical school buildings, commonly referred to as the North, South and Clinic-Pathology Buildings. The North Building contains the Medical Library, the Administrative Offices, the main Auditorium, the laboratories of experimental Surgery and the departments of Anatomy and Histology.

Adjacent to the corridor connecting the North and South Buildings are the Book Store and Cafeteria.

The South Building houses the laboratories of Physiology, Pharmacology and Biological Chemistry. The Clinic-Pathology Building contains the University Clinics, teaching and research laboratories of the department of Internal Medicine and the departments of Bacteriology and of Pathology. The autopsy rooms, mortuary and amphitheater, serving the group of hospitals, occupy an annex to this building.

The Oscar Johnson Institute comprises six floors of laboratories and class rooms devoted primarily to teaching and research in Ophthalmology and Otolaryngology. The Institute houses also research laboratories now used temporarily by the departments of Research Pathology, Internal Medicine, Biophysics and Neuropsychiatry.

CLINICAL FACILITIES

The affiliation of the Barnes Hospital, the St. Louis Children's Hospital, the St. Louis Maternity Hospital, the McMillan Eye, Ear, Nose and Throat Hospital and the Oscar Johnson Institute, with the School of Medicine, and their location together on one plot of ground makes this group of institutions for teaching purposes integral parts of the School of Medicine.

By the terms of the affiliation the Faculty of the School constitutes the professional staffs of these hospitals as well as of the University Clinics, an arrangement that makes for

continuity of medical care and instruction in all divisions. The Clinics serve as outpatient departments of the hospitals, and furnish instruction in the care of ambulatory patients.

About 125,000 visits are made yearly to the University Clinics in all departments. The Barnes Hospital has 450 beds, of which about 180 are in wards used for undergraduate teaching, allocated mainly to the departments of Medicine and Surgery. The St. Louis Children's Hospital has 208 beds and the St. Louis Maternity Hospital 100 beds plus 100 bassinets. Patients on the ophthalmological and otolaryngological services are assigned to the various hospitals.

In addition to the laboratories located in the hospitals for the performance of the simpler diagnostic tests by house officers and students, there are various special laboratories in the Medical School buildings for the more elaborate procedures used in diagnosis. The conduct of these laboratories, as well as the care of patients in the Affiliated Hospitals and in the University Clinics is directed by the several clinical departments.

In all departments of the School there are also special laboratories with facilities for study and research which are made use of in connection with clinical work in the hospitals.

The Mallinckrodt Radiological Institute, built adjacent to and connected on each floor with the Barnes Hospital, is owned by the University and is operated as a department of the Medical School. It provides excellent facilities for X-ray examination and therapy which are utilized by all of the affiliated Hospitals and affords exceptional opportunities for both undergraduate and graduate teaching. By a special endowment the staff of the Radiological Institute is enabled to carry on researches in both clinical and experimental subjects, independently and in collaboration with other departments. The staff includes residencies for the training of graduate physician radiologists.

The patients in certain of the St. Louis City Hospitals are also utilized for both undergraduate and graduate teaching. By arrangement with the Hospital Commissioner, the Medical School nominates the staffs for a unit (one-third) of the City Hospital, a unit (one-half) of the Bliss Psychiatric Institute, and the senior staff (1939-41) of the Homer Phillips Hospital. The facilities of these large and varied hospital services are being increasingly used for teaching and research by organized staffs from all clinical departments of the School.

The Isolation Hospital (for contagious diseases) and the City Sanitarium (for mental diseases) are also used for study and teaching in these subjects.

Through arrangement with its staff, students observe patients in the St. Louis Shriners' Hospital for Crippled Children, which adjoins the Medical School.

The number of patients available in these hospitals provides abundant and varied clinical material under favorable conditions for demonstration, examination and study by the students under immediate supervision of the staff.

LIBRARY

The Library contains (October 1, 1939) 55,140 bound volumes and receives 532 medical periodicals, selected with reference to the needs of students and investigators. There are 740 complete sets of periodicals.

The Library has acquired by gift and by purchase a number of private collections on medical history and on the various branches of clinical medicine. Among these is the collection of manuscripts, letters and other valuable material of the pioneer American physiologist, William Beaumont. A special room, the Beaumont Room, has been set aside for the exhibition of this priceless collection of documents.

The Library is open week days from 8:30 a. m. to 10:00 p. m. During the summer vacation the hours are 9:00 a. m. to 5:00 p. m.

Other libraries in St. Louis containing literature relating to medicine, which are available to students, include the library of Washington University, the Mercantile Library, the St. Louis Public Library, the library of the St. Louis Medical Society and the library of the Missouri Botanical Garden.

LEO LOEB LECTURESHIP

The Mu Chapter of the Phi Beta Pi fraternity has established an annual lectureship in honor of Dr. Leo Loeb, Professor Emeritus of Pathology.

ROBERT J. TERRY LECTURESHIP

The Alumni of the School have established a Robert J. Terry Lectureship Fund for the purpose of fostering greater appreciation of the study of human anatomy in relation to the teaching and practice of medicine.

REQUIREMENTS FOR ADMISSION

The first year class is now limited to eighty-two students. From the much larger number of applicants the faculty committee on admissions tries to select those who on the basis of demonstrated ability and personal qualities appear best fitted to take up the study of medicine. Personality, character and aptitude, health and individual initiative, as evidenced by the opinions of college teachers and others as well as by interviews with applicants, are important qualifications. In considering scholastic records, the quality of the work done is given greater weight than the quantity of credits. Applicants are required to take the aptitude test conducted by the Association of American Medical Colleges.

To be eligible for admission to the first year class the following scholastic requirements must be met.

(1) Completion of college courses leading to the Bachelor's degree in Arts or Sciences from an approved university or college.

(2) In exceptional cases applicants without a degree may be accepted, provided they have at least three years of college work with high scholastic standing and are otherwise rated as very well qualified.

In all cases the college work must include the following subjects:

(a) A knowledge of English such as is required of all candidates for the degree by approved colleges. (At least six semester hours).

(b) A reading knowledge of either German or French, such as may ordinarily be acquired in two years of college work. (10 semester hours).

(c) At least two years work in inorganic and organic chemistry, with laboratory work in both. (Total at least 15 semester hours). Elementary quantitative analysis is regarded as almost essential.

(d) A course in general physics, with laboratory work which should be mainly quantitative in character. (8 semester hours).

(e) Courses in zoology. (8 semester hours). A course in embryology is desirable.

It is recommended that students preparing themselves for the study of medicine so arrange their courses as to acquire

a more extensive knowledge of the subjects forming the foundation of the medical sciences than can be obtained in courses which satisfy the minimum requirements. The field covered by the practice of medicine and by the medical sciences is so broad that those whose special interests and capabilities lead them to an intensive study of either chemistry, physics, or biology are sure to find an application for the knowledge and skills they acquire. Those preparing to enter the medical profession should possess besides an adequate foundation in science, a liberal culture such as may be gained from an acquaintance with English literature, from a knowledge of history, the social sciences and the classics. Facility in the clear and accurate use of the English language should be acquired by all.

Applications for admission should be filed at as early a date as possible, and in all cases before March 1 of the year during which admission is sought. Applicants are required to take the aptitude test of the Association of American Medical Colleges, except where specifically excused by the School.

An applicant acceptable to the faculty is required to make a deposit of fifty dollars, which shall be in the hands of the Registrar within ten days after notification of acceptance. This deposit of fifty dollars will be applied toward the first payment of tuition, provided the applicant enters during the term for which the application was accepted. The deposit is not returnable.

If a new student does not register on one of the days set aside for that purpose his place in the class may be given to some other applicant.

Application blanks will be furnished upon request. After supplying all information called for therein, the applicant should return the blanks and, in addition, should request his college to send directly to the Registrar complete official transcripts of high school and college credits. To aid in judging the fitness of an applicant, personal letters to the Dean from the student's science instructors, giving estimates of his ability, character and personality, must be submitted.

ADMISSION TO ADVANCED STANDING

Applications for advanced standing will be considered only insofar as there are vacancies in the classes. Applications should be filed at as early a date as possible, and under any

circumstances before March 1 of the year during which admission is sought. Only those students who have unconditional standing in the medical schools from which they seek to be accredited will be accepted for admission to advanced classes. An applicant acceptable to the faculty is required to make a deposit of fifty dollars, which must be received by the Registrar within ten days after notification of acceptance. This deposit will be applied toward the first payment of tuition, provided the applicant enters during the term for which the application was accepted. The deposit is not returnable.

Applicants for admission to advanced standing (1) must furnish evidence that the requirements for admission to the first year class have been fulfilled; (2) must show that courses equivalent in kind and amount to those given in this School, in the year or years preceding that to which admission is desired, have been satisfactorily completed; and (3) in doubtful cases may be required to pass an examination in any of the subjects for which credit is sought. The applicant must have studied as a matriculated medical student in an acceptable medical school for a period of time at least equal to that already spent by the class to which he seeks admission.

(a) Students who have received from an approved medical school credit for courses equivalent to those of the first year of this School in anatomy, chemistry, and physiology may be admitted to the second year class without examination, but at the discretion of instructors, may be examined in these subjects at the end of the second year. (b) Students who have received from an approved medical school credit in anatomy, chemistry, physiology, bacteriology, clinical chemistry and microscopy, pathology, and pharmacology may be permitted to enter the third year class. At the discretion of instructors, such students may be examined in any of these subjects at the end of the third year. (c) Only rarely are new students accepted for the fourth year class.

Applicants for advanced standing are required to furnish, in addition to the credentials required for admission, credentials from the medical school in which they have studied, enumerating all medical courses pursued and grades obtained, and stating the dates of their registration as matriculated medical students.

ADMISSION OF GRADUATES IN MEDICINE

Those who already hold the M.D. degree are rarely accepted as candidates for that degree, but may be admitted to the School on the following basis: (1) Those regarded as qualified to participate in investigation under the direction of a member of the staff, may, upon the written recommendation of the instructor in charge, endorsed by the head of the department, be accepted by the Faculty as volunteer research assistants and will not be charged fees. (2) Visiting graduates may, with the consent of the heads of the departments concerned, take special work in one or more departments. (3) A limited number of graduate physicians, or others who may be qualified, may be admitted to courses with the undergraduate classes subject to the consent of the instructors and the head of the department. Fees for special courses, individual instruction or material will be determined in each case by the Dean, in conference with the head of the department in which the work is done. (4) Special courses are offered concerning which full information will be given upon request. (See page 83.)

STANDING AND PROMOTION

To enter any course, the student must have fulfilled the prerequisites of that course, as stated in the bulletin.

The standing of students is determined by the average of the grades assigned by the several departments weighted in proportion to the number of hours taken. The passing grade in an individual course is 70 but a weighted average of less than 75 is regarded as unsatisfactory.

Promotion from one class to another is based on a review of the general standing and fitness of the student by Committees on Standing and Promotion, of which there are two, one for the first two years and one for the last two. Each of the departments concerned may be represented on these committees by three members, of which but one is entitled to vote. The decisions of the Committees are guided by rules adopted by the Faculty.

(a) Students who at the end of the first or second year have recorded against them failures in any two of the following subjects, dissection, histology with neurology, physiology, biological chemistry, medicine, pathology or bacteriology, will be required to withdraw from the School; or, under exceptional

conditions, the student may be allowed instead to pursue additional work in the subjects in which he is deficient before being admitted to the next class.

(b) To enter the third year, a student must have received credit for all of the courses named above.

(c) A student who at the end of the third year has failed in any two major courses, will be required to withdraw from the School, or may be required to do additional work as stated above.

(d) For promotion to the fourth year, credit must have been received for all major subjects.

(e) A student who, because of poor quality of work in courses, or for any other reason, is judged by the Committee as unqualified to continue the study of medicine, will be required to withdraw from the School. A weighted average of less than 75 in any one year ordinarily will be regarded as indicative of unsatisfactory work.

The registration of a student may be canceled at any time if in the opinion of the faculty his further attendance is deemed undesirable. A pro rata refund of the tuition will be made in such cases.

REQUIREMENTS FOR DEGREES

DOCTOR OF MEDICINE

Candidates must be more than twenty-one years of age and of good moral character. They must have attended not less than four annual courses of medical instruction as matriculated medical students, at least the last of which has been in this School. They must have taken all obligatory courses offered here, or their equivalent, and have received a satisfactory grade in the work of the entire four years. They must have discharged all indebtedness to the School, and must be present when the degree is conferred.

At the end of the fourth year students who have fulfilled these requirements will be recommended for the degree of Doctor of Medicine.

BACHELOR OF SCIENCE IN MEDICAL SCIENCE

High ranking students may become candidates during the course for the degree of Bachelor of Science in Medical Science, provided the quality of work done in required courses is satisfactory and permits of the necessary additional study. Acceptance as candidates for this degree is granted not earlier

than after completion of the courses of the first year. Requirements for the degree are the satisfactory conduct of an investigation in one of the medical sciences and the preparation of an acceptable thesis, which must be presented to the head of the department concerned by May 1st of the year the degree is to be awarded. Compliance with the requirements for this degree will not usually be attained before the end of the third or fourth year.

HOSPITAL APPOINTMENTS

An internship in an approved hospital for one or more years is recognized as a necessary preparation for the practice of medicine and all members of the graduating class except those preparing for a career in laboratory work are expected to arrange for internships. During the first part of the senior year students confer with the Assistant Dean who advises relative to obtaining suitable hospital appointments.

Internship in the hospitals affiliated with Washington University are available to those having a high record throughout the medical course and possessing satisfactory personal qualifications. They are made by the Intern Committee of the School during the month of December, each year. About forty-four intern appointments are at the disposal of the School.

PRIZES

GEORGE F. GILL PRIZES:

1. One prize of fifty dollars is awarded at the end of the first year to the member of the class who has made the highest grade in anatomical work.
2. One prize of fifty dollars is awarded to a member of the graduating class, of high general standing, who has done especially good work in the Department of Pediatrics.

ALPHA OMEGA ALPHA FRATERNITY PRIZE is awarded at the end of the fourth year to the member of that class who has made the highest average for the entire medical course.

The ALEXANDER BERG PRIZE of one hundred dollars is awarded to a student of high general standing who presents the best results in research in bacteriology.

FELLOWSHIPS, STUDENT ASSISTANTSHIPS,
AND SCHOLARSHIPS

The JACKSON JOHNSON FUND. Under the will of the late Mr. Jackson Johnson the sum of \$250,000 was given to the University, the income to be used "to aid worthy and desirable students in acquiring and completing their medical education." The income of this fund is now being devoted mainly to Honor Scholarships named for the donor.

The purpose of the Jackson Johnson Scholarships is both to encourage and to enable students of exceptional ability and performance, regardless of their financial resources, to enter upon training for careers in medicine and medical sciences. The awards are accordingly restricted to those judged to possess definitely superior talents and qualifications, and are made initially only to applicants accepted for the first year class in the School of Medicine. The award may be continued for each of the later years of the course provided the quality of the student's work justifies it.

The amount of the stipend is not fixed, being determined in each case by the need of the individual for financial aid. Award of a Jackson Johnson Scholarship is regarded as a mark of distinction, and carries certain privileges in the School. When made to students not in urgent need of financial aid, the award carries no stipend or only a nominal stipend. For those recipients whose resources are inadequate for tuition and living expenses, the stipends will be set at amounts that will permit maintenance during the academic year without outside employment for support. Holders of these scholarships are not permitted to engage in outside employment, except with the consent of the Dean. The object is to aid in providing favorable circumstances for the development of the student's talents. Employment having educational value in laboratories of the School, with or without compensation, is occasionally available to holders of scholarships as also to other students. During the year 1939-40 there are nineteen holders of Jackson Johnson Scholarships in the first three classes, the average stipend being \$550. The maximum (including stipends of student-assistantships) is \$900.

Applications for 1940-41 will close on January 1, 1940. Applications for 1941-42 should be submitted, on blanks provided for the purpose, between October 1, 1940 and January 1, 1941.

Loans from the Jackson Johnson Fund are available to stu-

dents in the upper three classes of the School who are in urgent need of financial aid. The loans are granted by the Chancellor on the recommendation of the Dean.

A SURGICAL FELLOWSHIP is awarded on recommendation by the Department of Surgery for special neurological work. The stipend is \$1,200 per year. Candidates must be graduates in medicine, and those who have had one year's internship are preferred.

A MEMORIAL FELLOWSHIP with a stipend of \$500 is supported by a gift from an anonymous donor in memory of his brother. It is awarded for one year to a graduate of the School, preferably a woman, for post-graduate study in anaesthesia, radiology, pathology, clinical pathology, immunology, public health or related fields.

The GEORGE F. GILL SCHOLARSHIP, instituted in memory of the late Dr. George F. Gill, Clinical Professor of Pediatrics, entitles the holder to remission of the tuition fee to the amount of \$100.

THE ALUMNI SCHOLARSHIP AWARD of \$100 to be applied on the payment of the tuition fee is given for excellence in work during the preceding scholastic year on the recommendation of the Committee on Loans and Scholarships and the President of the Medical Alumni Association.

The DR. JOHN B. SHAPLEIGH SCHOLARSHIP. From a bequest of the late Dr. John B. Shapleigh, supplemented by contributions by the late Mrs. Shapleigh and Miss Margaret Shapleigh, a fund has been established the income of which is used to pay the tuition of students in need of assistance. The awards are made by the Chancellor on the recommendation of the Dean.

The ELIZA McMILLAN STUDENT AID FUND. From the bequest of the late Mrs. Eliza McMillan, the annual income on \$7,000 provides a scholarship for a deserving woman student in the School of Medicine. The awards are made by the Chancellor.

The T. GRISWOLD COMSTOCK SCHOLARSHIPS. Through the bequest of the late Mrs. Marilla E. Comstock, the annual income from \$12,000 is used for two scholarships for students who otherwise would be unable to obtain a medical education and who desire and intend to follow the practice of medicine and surgery. Awards are made by the Chancellor.

THE JOSEPH H. ROBLEE SCHOLARSHIPS. Provided through the gift of Mrs. Florence A. Roblee (Mrs. Joseph H. Roblee),

the income from the Joseph H. Roblee Scholarship Endowment Fund of \$12,000 maintains two scholarships annually. They are awarded by the Chancellor to qualified, worthy and deserving students in any division of the University.

THE ROBERT ALLEN ROBLEE SCHOLARSHIPS. Through the gift of Mrs. Florence A. Roblee (Mrs. Joseph H. Roblee) the income from the Robert Allen Roblee Scholarship Endowment Fund of \$15,000 provides one or more scholarships for qualified, worthy, and deserving students. The awards are made by the Chancellor.

ANDREW RANKIN FLEMING AND SUSIE FLEMING FUND. Through the bequest of the late Mrs. Susie Fleming, \$150.00 from the income of this Fund is available annually for scholarships for worthy and needy students in the School of Medicine. Awards are made by the Chancellor.

STUDENT ASSISTANTSHIPS are available in a number of departments in the School. Information concerning these may be obtained from the heads of the departments concerned.

Applications for all fellowships, scholarships and assistantships may be made to the Dean.

REGISTRATION

Registration for the first half year, 1940-41, is scheduled for Tuesday, September 24, and Wednesday, September 25, 1940; for the second half year, Monday, February 3, 1941. Hours for registration are 9 to 11:30 and 2 to 5 daily.

Previously matriculated students who fail to register on any of the days set aside for that purpose will be charged a fee of \$3.00.

FEEES AND EXPENSES

The University reserves the right to change the fees herein stated at any time without notice. Whenever a change is made, it will become effective with the next installment due for payment by the student.

All fees and charges are payable in advance at the office of the Treasurer in Robert S. Brookings Hall, or at the office of the Registrar of the School of Medicine. No rebate of the tuition fee will be made for absence, whether such absence occurs at the beginning, middle, or end of the semester, except in cases of prolonged illness, certified to by a physician. In

such cases a partial refund may be made, which will not exceed one-half of the unexpired balance of the tuition for the term.

Checks should be made payable to Washington University.

MATRICULATION FEE. A matriculation fee of \$5.00 is required of all students upon initial registration.

TUITION FEE. For undergraduate students registered in the School before September, 1938 the tuition fee is \$400.00. For those matriculating after September 1, 1938 the tuition fee is \$500.00, payable in two equal installments, at the beginning of the first and second semesters.

Students taking less than full work are charged \$62.50 for the first one hundred hours or less of work. Students taking more than one hundred hours of work pay \$50.00 for each additional hundred hours.

BREAKAGE DEPOSIT. Each student is required to deposit \$10.00 annually to cover breakage in the School of Medicine, clinics and hospitals. Any balance of this deposit will be returned at the end of each year. At any time the amount of breakage exceeds the amount of deposit an additional deposit will be called for.

UNIVERSITY HEALTH SERVICE. A fee of \$8.00 annually is charged each student for medical health service. This fee covers a complete medical and dental examination of the student on admission to the School and the services of a physician available daily for medical consultation throughout the year.

STUDENT ACTIVITIES. A fee of \$10.20 a year, payable in two installments (one at the beginning of each semester) is charged all undergraduate students in the University for the support of athletics and several other student activities. This fee is under the control of the Board of Student Finances and provides admission to all athletic events and participation in certain other student activities. For students in the Medical School having a Bachelor's degree payment of this fee is optional.

DIPLOMA FEE. The diploma fee for the degree of Doctor of Medicine is \$5.00 and for the degree of Bachelor of Science in Medical Science is \$3.00. These fees are payable before Commencement.

MICROSCOPES AND DIAGNOSTIC INSTRUMENTS

Each student entering the Freshman class is required to possess a standard microscope equipped with a substage light.

All students are required to provide themselves with stethoscopes, ophthalmoscopes, otoscopes, hemocytometers, percussion hammers, tape measures, flashlights, head mirrors and skin pencils as the need for them arises.

Supplies and books may be purchased at the book store located in the Medical School.

ESTIMATE OF EXPENSES

An estimate of the average annual expenses of a student in the School of Medicine, excluding the cost of clothes, laundry, microscope, and incidentals, is given below. The amounts will vary considerably, according to the individual.

Tuition	\$500.00
Breakage Deposit	10.00
Matriculation Fee (payable once)	5.00
Health Service Fee	8.00
Books and Instruments	\$ 50.00 to 100.00
Room and Board (from \$6.00 to \$15.00 a week)	210.00 to 500.00
Total	\$783.00 to \$1,123.00

MEN'S DORMITORY OF THE SCHOOL OF MEDICINE

A dormitory building containing rooms for about fifty students is situated in close proximity to the School. A tennis court is located in the rear of the building. Each occupant must furnish his own sheets, pillow cases, counterpanes and blankets; otherwise the rooms are furnished.

The rental of a room is \$90.00 for the academic year, payable in two installments in advance, at registration for the first and second semesters. Reservations are accepted only for the full academic year. Application for reservation should be made to the Registrar and must be accompanied by a reservation fee of \$10.00. This fee will be returned should the room not be assigned. If a room is assigned, the fee will be held by the University as a bond against possible damage to the room or furniture. Subject to such claim it will be refunded at the end of the academic year.

GENERAL PLAN OF INSTRUCTION

Instruction in the School of Medicine is given to candidates for the degree of Doctor of Medicine, to graduate physicians, and to students in the School of Graduate Studies who may or may not be candidates for higher degrees. Courses which are open to students in the University, not candidates for the degree of Doctor of Medicine, are listed in the announcements of the College of Liberal Arts and of the School of Graduate Studies.

The course of study required of candidates for the degree of Doctor of Medicine is designed for students who have already received certain preliminary training. As stated in detail on p. 42, the student on entering the School must have a knowledge of chemistry, physics, zoölogy, English and either German or French.

The medical curriculum, covering four years of 33 weeks each can be divided into two distinct periods.

The first period includes the first and second years. During this time the student studies the fundamental sciences of anatomy, biological chemistry, physiology, bacteriology, pathology and pharmacology. For this first period, the interest is concentrated primarily on the scientific basis of medicine, and every effort is made to train the faculty of critical and independent observation. Anatomy and biological chemistry are studied during the first year. In the second half of this year, the study of physiology begins. During the first third of the second year physiology and bacteriology are completed; and during the remainder of the year the major portions of the courses in pharmacology and pathology are given, and physical diagnosis, medical observation, clinical chemistry and microscopy, and surgical technic are introduced, in preparation for the clinical work of the second period of training. In preparation for more adequate instruction in Neuropsychiatry the study of medical psychology is begun in the first year and a closer correlation of neuroanatomy and neurophysiology is made with the clinical problems of psychosomatic medicine.

The second period, extending through the last two years, is devoted primarily to clinical work. The student receives practical instruction in the clinics and in the hospital wards of medicine, surgery, obstetrics and pediatrics and of the medical and surgical specialties. During his assignment to the wards of the hospitals the student at first is given practice and in-

struction in history taking, physical examination and elementary diagnosis and may then spend his entire day in the wards with duties differing little from those of a junior intern. The work in the clinics with ambulant patients occupies from six to eight hours per week for a year or more. Here the students under supervision act as physicians and as surgical dressers. During this period courses are given in neurological pathology, surgical and gynecological pathology and in operative surgery on animals. Special emphasis is placed upon diagnosis of disease and treatment of patients. There are few purely didactic lectures. Instruction is given in clinics and at the bedside.

The scheduled courses, required of all students, occupy about thirty hours a week during thirty-three weeks in each school year. As far as possible the schedules are arranged so as to leave free several half days each week. Those students who can profitably do so are encouraged to carry during their free time, and also during the summer, additional work in the subjects of their greatest interest. During any stage of his training the student may avail himself of the opportunity to develop his special interest in any one of the fundamental sciences or clinical subjects for which he has the prerequisites.

Optional courses are offered in all departments and supply a wide variety of subjects from which to choose. In general these courses are not assigned places in the schedule, and rarely is the number of hours specified; it is expected that such details will be arranged individually through consultation between the student and the instructor in charge.

With the approval of the head of the department concerned, a limited number of well qualified students may be allowed to complete their clinical clerkships during the summer months.

COURSES OF INSTRUCTION

ANATOMY

(The Department of Anatomy includes Gross Anatomy, Cytology and Neurology.)

PROFESSORS TERRY, COWDRY.

ASSOCIATE PROFESSORS TROTTER, SCOTT, O'LEARY.

ASSISTANT PROFESSORS WILLIAMS, SEIB, CHARLES.

INSTRUCTOR BARTLETT.

ASSISTANT LANIER.

RESEARCH ASSOCIATE MACCARDLE.

STUDENT ASSISTANT FRANKLIN.

The Department of Anatomy provides courses adapted to the medical curriculum and offers facilities also for advanced study and research.

The courses for medical students are based upon laboratory study, supplemented by series of correlated lectures, demonstrations and recitations. Students are encouraged to learn anatomy at first hand from the living subject, from experimental evidence and from prepared material in the laboratories. Visits to clinical conferences, occasional attendance at autopsies, clinical lectures introduced into the anatomical lecture program are ways and means employed in the teaching plan. Because the several courses (gross anatomy, histology, neuroanatomy) are fundamental and, together with the other courses of the first year, introduce the beginner into the study of medicine, much thought has been given to their planning, and every effort is made to train the student in scientific method, for independence in work, and toward the development of high ideals of purpose and accomplishment.

Opportunity to pursue advanced study and investigation is provided for qualified students and graduates. Facilities for experimental work, especially in the fields of cytology and neuroanatomy, are excellent. Statistical studies of human anatomy, and research in physical anthropology, are provided for by extensive documented material.

FIRST YEAR

1. HUMAN DISSECTION. The course offers opportunity for the systematic study of the gross structure of the human body. Dissection 12 hours a week in the first trimester; 9 hours in the second and third. Lectures twice a week throughout the year. 395 hours.

(Drs. Terry, Trotter, Williams, Seib, Charles)

2. **HISTOLOGY.** A laboratory course occupying five mornings a week during the first trimester. There are two lectures a week and many informal discussions in the laboratories. 201 hours. (Drs. Cowdry, Scott, O'Leary)

3. **NEUROLOGY.** A laboratory course occupying six mornings a week during the first half of the second trimester. Three weekly lectures are devoted to topics not easily accessible to the student. 100 hours. (Drs. O'Leary, Cowdry, Scott)

THIRD YEAR

4. **ANATOMICAL DEMONSTRATIONS.** This course provides a review of regions and structures at the time when students are entering upon their clinical work. Demonstrations two hours a week during the second trimester. 22 hours. (Drs. Charles, Bartlett)

ELECTIVE COURSES

5. *Topographical Anatomy.* Laboratory study of topographical anatomy may be undertaken at any time during the year. Sections, museum preparations, and models are used as material for study. Hours to be arranged.

6. *Dissection.* A six-weeks' summer course in Anatomy is offered for students and physicians desiring to review the subject. Any of the following parts may be elected for study: head and neck, thorax and upper limb, abdomen and pelvis, lower limb. A fee will be charged for the course.

7. *Advanced Study and Research in Gross Anatomy and Physical Anthropology.* Opportunity is offered undergraduates and graduates in medicine for advanced laboratory study of selected topics. Hours to be arranged.

8. *Advanced Work in Histology, Cytology, Embryology, and Neurology.* A study of the literature on certain selected problems, and laboratory work, including the preparation of material for microscopic study. Hours to be arranged.

9. *Research.* Properly qualified students will be given opportunity to carry on investigations in the fields of histology, cytology, embryology, and neurology.

10. *Graduate Courses in Anatomy.* See Bulletin of The School of Graduate Studies.

BIOLOGICAL CHEMISTRY

PROFESSOR SHAFFER.

ASSISTANT PROFESSORS ETHEL RONZONI BISHOP, URBAN.

INSTRUCTORS FREIBERG, PREISLER, GREAVES.

FIRST YEAR

3. **BIOLOGICAL CHEMISTRY.** Lectures, recitations, conferences and laboratory work covering those portions of the subject which are of especial importance to the student of medicine. Second semester, lectures and recitations five hours, and laboratory eleven hours a week. Lectures and recitations 81 hours, laboratory 183 hours.

(Drs. Shaffer, Ronzoni Bishop, Urban, Preisler, Greaves)

ELECTIVE COURSES

4. *Advanced Work.* Courses of laboratory work and selected reading, under guidance of a member of the staff, will be arranged to suit individual needs.

5. *Research.* The facilities of the department are available to students qualified to undertake investigation.

6. *Journal Club.* Conducted jointly by the Departments of Physiology, Pharmacology, and Biological Chemistry. Open to students who have credit in physiology or biological chemistry. Once a week throughout the year.

PHYSIOLOGY

PROFESSOR ERLANGER.

ASSOCIATE PROFESSORS H. LESTER WHITE, GILSON.

INSTRUCTORS PEUGNET, EDGAR A. BLAIR.

FIRST AND SECOND YEARS

2. **PHYSIOLOGY.** Lectures covering systematically the field of human physiology with experience in the laboratory, designed primarily to meet the needs of medical students. The laboratory experiments are selected with the double object of supplying a basis for the understanding of the more important physical methods employed in physiology and in clinical medicine and of elucidating certain fundamental physiological principles. As far as practicable the student serves as the subject in these experiments. Open to students who have completed or have begun the study of anatomy and biological chemistry.

(a) Lectures and recitations. Second semester of the first year and first trimester of the second year. 110 hours.

(b) Laboratory. First trimester of the second year. 138 hours.

(Drs. Erlanger, White, Gilson, Peugnet, Blair)

ELECTIVE COURSES

4. *Demonstration Methods.* This course is designed primarily for students preparing to teach physiology, and who may desire a wider experience in experimental physiology than can be gained in Course 2. It consists mainly of experiments demonstrated in Course 2. The time and the amount of work are not limited, except that assistance must be arranged for by definite engagements.

5. *Research.* The facilities of the laboratory will be offered to qualified students for the investigation of their own problems or of problems which the department is prepared to suggest.

6. *Journal Club.* The Journal Club, conducted conjointly by the Departments of Biological Chemistry, Pharmacology, and Physiology, discusses papers of physiological interest appearing in the current journals. This course is open to properly prepared students only. Once a week throughout the year.

BACTERIOLOGY AND IMMUNOLOGY

PROFESSOR BRONFENBRENNER.

ASSISTANT PROFESSORS VARNEY, HERSHEY.

INSTRUCTORS TSUCHIYA, MORRIS, HARFORD, STRITAR, SULKIN.

ASSISTANT GRONAU.

STUDENT ASSISTANTS STILLERMAN, LOVE.

SECOND YEAR

1. BACTERIOLOGY. Lectures and Laboratory. A brief survey of General Bacteriology with a view of acquainting the students with the role of bacteria in the economy of nature and with methods of pure culture study. Special emphasis is placed on such aspects in the mutual relation between the bacteria and their environment which would bring out those basic characteristics of metabolic requirements and activities of bacteria which on the one hand may serve to identify the individual species and on the other to explain some of the effects of bacterial invasion. After a brief consideration of the mechanisms governing the mutually limiting relation of the resistance of the host and the invasiveness of the parasite, a number of more important communicable diseases, caused by viruses, bacteria, fungi, protozoa and metazoa, are studied individually with respect to epidemiology, means of laboratory diagnosis, specific therapy and prophylaxis, and general mea-

tures of control. Fifteen hours a week during the first trimester. 168 hours.

(Drs. Bronfenbrenner, Gronau, Harford, Hershey,
Morris, Stritar, Sulkin, Tsuchiya, Varney)

2. INFECTION AND IMMUNITY. Consideration of the theories concerning the mechanism of immunologic reactions, both those occurring in vivo as well as those utilized for serologic procedures of diagnosis in vitro. Antigens, specific prophylaxis. Antibodies, their nature, significance in resistance to infection and as indices of past exposure. Serum therapy. Hypersensitiveness. One lecture and three hours of laboratory work each week during the second trimester. 44 hours.

(Drs. Bronfenbrenner, Gronau, Harford, Hershey,
Morris, Stritar, Sulkin, Tsuchiya, Varney)

ELECTIVE COURSE

Research. The facilities of the laboratory are open to those properly qualified for research in Bacteriology and Immunology.
(Dr. Bronfenbrenner and Staff)

PUBLIC HEALTH

PROFESSOR BRONFENBRENNER.

ASSISTANT PROFESSOR VARNEY.

INSTRUCTOR TSUCHIYA.

LECTURERS BREDECK, WILLETT, MEYER, PHILLIPS, BOARD, DYKTOR.

THIRD YEAR

1. PUBLIC HEALTH. Consideration of methods, regulatory and educational procedures leading to prevention of diseases and health hazards and promotion of physical and mental well-being of the community. Heredity and eugenics, prenatal care, infant and child hygiene, school hygiene, mental hygiene, industrial hygiene. Sanitation. Epidemiology and control of communicable and other preventable diseases. Vital statistics. Public Health Administration. Special health problems. 44 lectures.

(Dr. Bronfenbrenner and Staff of Extramural Lecturers)

ELECTIVE COURSE

Public Health Field Work. This is corollary to the basic course as given to third year medical students. The course consists of field trips and illustrated lectures covering public health, industrial, administrative, and other establishments

whose activities are of interest to physicians and public health workers, and of a health survey. The class meets on Friday afternoons during the first and second trimesters.

(Drs. Bredeck, Meyer, Varney, Mr. Dyktor)

PATHOLOGY

EDWARD MALLINCKRODT PROFESSOR ROBERT A. MOORE.

ASSISTANT PROFESSOR MARGARET G. SMITH.

INSTRUCTORS WHEELER, ALLEN, LENNETTE,¹ MANTZ, W. O. RUSSELL, HELWIG.

LECTURER POTE.

ASSISTANTS PETKEVICH,² SLUSSER, W. G. BROWN, AHRENS, REAMES.
RESEARCH ASSISTANT MILLER.

The Department of Pathology occupies the entire third floor of the Clinic Building. The post-mortem rooms and amphitheatre are in a separate unit connecting with the first and second floor of the Clinic Building. There is a well arranged museum on the fourth floor and adequate facilities for experimental studies on the fifth floor.

Members of the department serve as pathologists to the Barnes Hospital, the St. Louis Children's Hospital, the St. Louis Maternity Hospital and the St. Louis County Hospital. Systematic records of over eight thousand cases, including protocols and microscopic slides, are available for study.

Clinico-pathological conferences conducted with the departments of Medicine, Surgery and Pediatrics are open to interested physicians and students.

SECOND YEAR

1. PATHOLOGY. General and special pathology are covered by lectures, gross and microscopic demonstrations and laboratory work. In general pathology, degenerations, inflammations, infectious diseases and tumors are considered. The diseases of each organ system are studied during the time devoted to special pathology. Small groups are given instruction in post-mortem technique and in experimental pathology. Twelve hours a week in the second trimester and sixteen hours a week in the third trimester. 308 hours. (Drs. Moore,

Smith, Helwig, Wheeler, Russell, Mantz and Staff)

THIRD YEAR

2. GROSS PATHOLOGY. Small groups of students present the specimens from recent post-mortems to the entire class. The

¹ Resigned August 1, 1939.

² Resigned November 1, 1939.

clinical features of the cases are discussed and theoretical considerations are reviewed. Two hours a week in the first trimester. 22 hours. (Dr. Moore)

3. NEUROPATHOLOGY. Lectures, demonstration and laboratory work consider the more common diseases of the nervous system. The subject matter is correlated with the lectures in Neurology 3a. One hour lecture and one hour laboratory a week in the first trimester. 22 hours. (Dr. Russell)

THIRD AND FOURTH YEARS

4. CLINICAL AND PATHOLOGICAL CONFERENCE. The clinical history and treatment of patients who have died are discussed before the class by the physicians and surgeons of the departments concerned. These conferences afford the students an opportunity to interpret the clinical observations in the light of the post-mortem findings. One hour a week during five trimesters. 55 hours. (Drs. Moore, Smith, Helwig)

ELECTIVE COURSES

5. *Research*. The laboratory offers facilities for research in pathology. Specialists and students with adequate training who desire to extend their knowledge of pathology will be admitted. (Drs. Moore, Smith)

6. *Journal Club*. The current journals concerned with morphological and experimental pathology and oncology are reviewed by the members of the staff. Properly prepared students may attend or participate. Once a week throughout the year.

THE EDWARD MALLINCKRODT DEPARTMENT OF PHARMACOLOGY

PROFESSOR CARL F. CORI.
ASSOCIATE PROFESSOR HELEN TREDWAY GRAHAM.
RESEARCH ASSOCIATE GERTY T. CORI.
INSTRUCTOR A. DEM. WELCH.
ASSISTANT KOHL.
RESEARCH ASSISTANTS SCHMIDT, COLOWICK.

SECOND AND THIRD YEARS

1. PHARMACOLOGY. (a) Lectures, recitations and demonstrations covering the general field of pharmacology, including toxicology, chemotherapy and prescription writing. Four hours a week during the second trimester of the second year and two hours a week during the second trimester of the third year. 66 hours.

(b) **LABORATORY COURSE.** A course arranged to demonstrate the chemical properties and pharmacological action of the more important drugs, and at the same time to familiarize the student with methods and processes used in experimental pharmacology. Six hours a week during the second trimester of the second year. 66 hours.

(a) or (b) may be taken alone by special students. Prerequisite, anatomy, biological chemistry and physiology.

(Drs. Cori, Graham, Welch)

ELECTIVE COURSES

2. *Advanced Work.* This is arranged to suit individual needs. Opportunity is offered for the extensive study of any special group of drugs desired. In addition students may elect work in toxicology. Hours and details of the work to be arranged.

3. *Research.* The facilities of the laboratory are available to those who wish to carry on original investigation, on problems of their own or on those the department is prepared to suggest.

4. *Journal Club.* Conducted jointly by the Departments of Physiology, Biological Chemistry and Pharmacology. A discussion of papers appearing in the current journals. Open to students who have credit in physiology or biological chemistry. Once a week throughout the year.

¹ Effective December 1, 1939.

Instruction in medicine commences with the second trimester of the second year and continues throughout the third and fourth years of the curriculum. The teaching of the second year has two main objectives—first, the correlation of the basic sciences with the clinical aspects of disease, and secondly, training in the technical methods of history taking, physical diagnosis and clinical microscopy. By the beginning of the third year the student is prepared for supervised clinical study of individual patients in the wards of Barnes Hospital. Simultaneously he receives formal instruction in the natural history of disease and in medical therapeutics. In the final year each student acts for two months as clinical clerk in the medical clinics, and for two months in the wards of Barnes Hospital and the St. Louis City Hospital.

SECOND YEAR

1. ELEMENTARY MEDICINE.

(a) Introductory Clinic. Observation and interpretation of the symptoms and signs of disease, with special reference to pathological anatomy and physiology. Approximately one-sixth of the course is devoted to the discussion of psychobiology. Two hours each week during the second and third trimesters. 44 hours. (Drs. Barr, Whitehorn, MacBryde)

(b) Physical Diagnosis. Lectures, demonstrations and practical exercises in the technique of physical diagnosis. Instruction and practice in history taking. Four hours each week during the second trimester. Three hours each week during the third trimester. 77 hours. (Dr. Myers and Assistants)

(c) Clinical Chemistry and Microscopy. Lectures and laboratory course in methods of microscopic and chemical diagnosis. Eight hours each week during the third trimester. 88 hours. (Dr. Carl Moore and Assistants)

THIRD YEAR

2. CLINICAL STUDY UNDER SUPERVISION OF PATIENTS IN THE WARDS OF BARNES HOSPITAL. To each student one case is assigned each week for complete study and written report. The work is supervised by preceptors each of whom has responsibility for one-fourth of the group. Frequent informal conferences are held. Two hours five days each week for one trimester. 110 hours.

(Drs. B. Taussig, Bromberg, Drake, Seddon, Wilson)

3. THERAPEUTICS. General survey of methods and principal agencies employed in the medical treatment of disease. One hour each week during the second trimester. 11 hours.

(Dr. Barr)

4. DIETETICS. Lectures and recitations on the principles and practice of dietetics. One hour each week during the second and third trimesters. 22 hours.

(Dr. Olmsted)

5. MEDICINE RECITATION. General survey of the natural history and special treatment of disease, with assigned reading in a textbook of medicine. Two hours each week throughout the year. 66 hours.

(Drs. Grant, Goldman)

7. (a) MEDICAL CLINICS. 33 hours. (See under Fourth Year).

FOURTH YEAR

6. MEDICINE.

(a) Clinical Clerkship in Barnes Hospital. With the exception of the hour for noon clinics, the entire day is spent in the wards. Cases are assigned for complete study and report. Ward rounds and frequent informal conferences are held. 144 hours.

(Drs. Barr, Alexander and Staff)

(b) Clinical Clerkship in City Hospital. Mornings are devoted to the study and review of patients in the medical wards. Ward rounds and conferences are held. 72 hours.

(Drs. Findley, Jensen and Staff)

(c) Clinical Clerkship in the University Clinics. Students act as physicians in the Medical Clinic under the supervision of consultants.

(Drs. Alexander, Bulger,

Cook, Day, Fischel, Gottlieb, Jean, Kountz, Rusk, Sale)

7. MEDICAL CLINICS.

(a) Cases which have been investigated by students working in the wards are presented before the third and fourth year classes. Once each week throughout the year. 33 hours.

(Drs. Barr, Alexander, Albert Taussig)

(b) The diagnosis and treatment of certain medical specialties are discussed. These include diseases of metabolism and of the heart, lungs and gastrointestinal tract. Once each week throughout the year. 33 hours.

(Drs. Larimore,

Luten, Olmsted, Goldman, Carl Moore, Myers)

8. CLINICAL AND PATHOLOGICAL CONFERENCE. (See Pathology 4).

ELECTIVE COURSES

9. *Diagnosis and Treatment of Venereal Diseases.* Clinical Clerkship in the Night Venereal Division of the University Clinics. (Drs. Lawrence, Aitken and Staff)

10. *Diagnosis and Treatment of Diseases of Gastrointestinal Tract.* Clinical Clerkship in the Gastrointestinal Division of the University Clinics. (Dr. Kenamore)

11. *Diagnosis and Treatment of Diseases of the Heart.* Clinical Clerkship in the Cardiac Division of the University Clinics. (Drs. Strauss, Liggett)

12. *Medical Diagnosis.* Clinical Clerkship in the Afternoon Medical Division of the University Clinics. (Dr. Seibel)

13. *Applied Immunology.* Open to a limited number of students. Hours by arrangement. (Dr. Alexander)

14. *Hematology.* In a series of eleven lectures, the field of clinical hematology is surveyed. Special attention is given to differential diagnosis and to consideration of the mechanisms by which the specific blood syndromes are produced. An attempt is made to provide more intimate acquaintance with certain of the special technics frequently used: supra-vital staining, bone marrow examinations, oxidase stain, platelet and reticulocyte methods, hematocrit, etc. Clinical material will be demonstrated whenever possible. ASSISTANT KENDALL.

RESEARCH FELLOWS BUCHMUELLER, NADELL.

STUDENT ASSISTANTS REESE, MCQUEEN.

Instruction in the Department of Neuropsychiatry is given in all four years of the medical course. Lectures during the first semester are aimed at developing a basic appreciation of the emotional aspects of medical practice and study through a consideration of historical data and a critical examination of various concepts of human nature. Other lectures and demonstrations in the first and second years are designed to correlate clinical neurology with neuroanatomy and neurophysiology, laying special emphasis upon the integration of

organic functions through neural mechanisms and the encephalization and corticalization of personality functions.

In the second year, in correlation with medical and surgical instruction in physical examination and history-taking, elementary instruction is given in the technique and rationale of neurological and psychiatric examination, including anxieties and interpersonal relationships as medical data, with special emphasis upon the influence of personal life experience in determining or modifying reactions to disease.

In the third year lectures and readings in psychopathology and psychotherapy are intended to deepen and clarify the students' understanding of psychobiological phenomena, including neuroses, psychoses and psychosomatic relationships. Instruction in sections is centered primarily on the psychiatric interview as a basic method of study and therapy. Representative syndromes are studied in clinics and in case records. Most of the psychiatric instruction of the fourth year is given in clinical clerkships and group conferences.

Instruction in neurology in the third year is divided into three parts. 1. A systematic presentation in lectures and demonstrations of affections of the nervous system classified on the basis of etiology. This is combined with the course in neuropathology with lectures and laboratory exercises based on the study of gross and microscopical preparations. 2. Lectures with demonstrations on the semeiology of affections of the nervous system. 3. Bed-side instruction in the technique and interpretation of the neurological examination. In the fourth year the commoner neurological diseases are presented at the noon clinics and weekly ward rounds for the medical group. Emphasis is laid on the biology of the disease and on the rationale of therapy. In the University Clinics and at the Neurological Wards of City Hospital the students participate under supervision in the diagnosis and treatment of assigned patients.

FIRST YEAR

1. NEUROPSYCHIATRY.

INTRODUCTION TO MEDICAL PSYCHOLOGY. Lectures, discussion and reading concerning attitudes and emotional reactions affecting the study and practice of medicine at present and in the past. Critical discussions of present schools of psychological thought. One hour a week for twelve weeks. 12 hours.

INTEGRATIVE NEUROANATOMY AND NEUROPHYSIOLOGY. A series of lectures, demonstrations and clinics concerning integrated functions of the organism, given as part of Anatomy 3 and Physiology 2. The purpose of this series is to correlate laboratory investigations of the nervous system with clinical problems. Approximate 8 hours in first and second years.
(Drs. Jacobsen, Whitehorn, Rioch and Assistants)

SECOND YEAR

2. PSYCHIATRY. PSYCHOBIOLOGY. [Part of Medicine 1(a).] Discussion of the influence of personality functions in modifying the personal and organic reactions to illness. The interview as a method of combined study and treatment of patients' personal problems and anxieties. Interpersonal relationships as medical data. 12 hours.
(Dr. Whitehorn)

2. NEUROLOGY. NEUROLOGICAL EXAMINATION IN PHYSICAL DIAGNOSIS. [Part of Medicine 1(b).] Lectures, demonstrations and exercises in the neurological examination of the patient.
(Drs. Jones and Rioch in conjunction with Dr. Barr and Assistants)

THIRD YEAR

3. PSYCHIATRY.

(a) PSYCHOPATHOLOGY AND PSYCHOTHERAPY. Lectures, reading and discussion concerning psychiatric principles involved in the interviewing of patients, and in the formulation of patients' needs and therapeutic programs. Two hours a week for one trimester. 22 hours.

(Drs. Whitehorn, Deutsch, Emery)

(b) PSYCHIATRIC INTERVIEWING. Psychobiologically oriented study and treatment of ambulatory patients, as demonstrated and discussed in the Neuropsychiatric Clinic of the University Clinics. Two hours a week for one trimester. 22 hours.
(Drs. Satterfield, Varney, Whitehorn, Deutsch)

(c) CLINICAL DEMONSTRATION. Presentation and discussion of psychotic patients at the Bliss Institute and City Sanitarium. Two hours a week for one trimester. 22 hours.

(Dr. Jones)

3. NEUROLOGY.

(a) CLINICAL NEUROLOGY. Lectures, with demonstrations, on diseases affecting the nervous system. The first half of

the course is given in conjunction with Neuropathology 3(b) and emphasis is laid on the biology of the disease and the rationale of therapy. The last half of the course is devoted to the semeiology of affections of the nervous system. One hour a week, first and second trimesters. 22 hours.

(Drs. Rioch, Jacobsen)

(b) NEUROPATHOLOGY. (See Pathology 3 for description.) This course is given in conjunction with the course in Clinical Neurology 3(a). Two hours a week, first trimester. 22 hours.

(Drs. Russell, R. A. Moore, Tureen, Rioch and Assistants)

(c) CLINICAL DEMONSTRATIONS [Part of Medicine 2.] Neurological cases on the wards of the Barnes Hospital are studied. The object of these exercises is to teach the technique and interpretation of the neurological physical examination. One hour a week, one trimester. 11 hours. (Dr. Jones)

FOURTH YEAR

4. PSYCHIATRY.

(a) PSYCHIATRICAL CLINIC. An exercise every other week throughout the year, alternating with the Neurological Clinic [Neurology 4(a)]. The more important psychiatric reaction types are presented and discussed with illustrative cases from the Barnes Hospital wards or the University Clinics. One hour every two weeks throughout the year. 17 hours.

(Drs. Whitehorn, Deutsch, Jacobsen)

(b) CLINICAL CLERKSHIP IN THE UNIVERSITY CLINICS. [Part of Medicine 6(c).] The students participate in the study and treatment of assigned cases under the supervision of consultants.

(Drs. Whitehorn, Schwab, Varney, Maughs, Kubitschek)

(c) CLINICAL CLERKSHIP IN THE BLISS PSYCHIATRIC INSTITUTE. [Part of Medicine 6(b).] One-quarter of the medical group at the City Hospital spends a week from 9 to 12 in the mornings, and late afternoons on the wards at the Bliss Institute. The students participate in the diagnosis and treatment of assigned cases under supervision. Ward rounds and discussions are held. Three hours or more a day for one week. 18 hours.

(Drs. Whitehorn, Bell, Carr, Fingert)

4. PSYCHOSOMATIC MEDICINE. [Part of Medicine 6(a).] Practical participation in the clinical study and discussion of

emotional factors in organic disease. Barnes Hospital Wards. One and one-half hours a week for one month. 6 hours.

(Dr. Deutsch)

4. NEUROLOGY.

(a) NEUROLOGICAL CLINIC. An exercise every other week throughout the year, alternating with the Psychiatric Clinic [Psychiatry 4(a)]. The more important neurological diseases and syndromes are presented and discussed with illustrative cases from the Barnes Hospital wards and University Clinics. In the discussion attention is directed to the present status of laboratory as well as clinical investigation bearing on the condition under consideration. One hour every two weeks throughout the year. 16 hours. (Drs. Rioch, Schwab)

(b) CLINICAL CLERKSHIP IN THE UNIVERSITY CLINICS. [Part of Medicine 6(c).] Students participate in the study and treatment of ambulatory neurological cases under the supervision of consultants.

(Drs. Schwab, Tureen, Carr, Gitt, Jones)

(c) CLINICAL CLERKSHIP IN NEUROLOGICAL WARDS, CITY HOSPITAL. [Part of Surgery 4(a).] One-quarter of the surgical group at the City Hospital spends a week from 10 to 12 in the mornings, and late afternoons on the neurological wards. The students take histories and make physical examinations on cases illustrating the commoner neurological diseases and syndromes. Ward rounds and conferences are held on these cases.

(Drs. Rioch, Tureen, Gitt)

(d) WARD ROUNDS. Once a week ward rounds are conducted on neurological cases in the Barnes Hospital wards and in the City Hospital with the medical group at the respective institution. One hour a week for one quarter. 8 hours.

(Drs. Schwab, Carr, Rioch)

ELECTIVE COURSES

5. *Correlation of Medical and Neurological Problems with Clinical Demonstrations and Case Reports.* One hour per week during one quarter of the fourth year. 8 hours. (Dr. Carr)

6. *Clinical Demonstrations and Discussions of Neurological Diseases and Syndromes.* Patients on the Neuropsychiatric Ward of the Homer G. Phillips Hospital are studied and the problems of diagnosis and therapy discussed. Two hours a week for one month (January or February). 8 hours.

(Dr. Jones)

7. *Research in Neurology, Neuropathology, Psychology and Psychiatry.* Facilities are available for qualified students to undertake original research in the laboratories of the department or in the clinics or wards.

8. *Staff Conferences.* A psychiatric staff conference is held weekly at the Barnes Hospital and every other week at the Bliss Institute. Neurological staff conferences are similarly held, the psychiatric and neurological conferences alternating on successive weeks at the Bliss Institute. Interested students are invited to attend these conferences.

INTRODUCTORY NOTE

The instruction in the Department of Surgery begins with an introduction to surgical principles at the end of the second year. In the junior year the students take their work in the outpatient department. This is arranged in such a manner that the students spend two mornings a week at the outpatient department of the St. Louis City Hospital, where they see many fractures and other acute traumatic cases. In addition to other courses a systematic survey of the general field of surgery is given in a conference and recitation course in which the class is divided into two sections in order to provide a more personal contact of the instructor with the students. The other courses in the junior year require no special comment. The principal teaching of clinical surgery is conducted in the senior year by means of ward clerkships. A large number of patients is provided for this work through the use of the wards of the Barnes and the St. Louis Children's Hospitals which immediately adjoin each other. The wards of St. Louis City Hospital are also used for this purpose. The senior surgical group spends one-half of its time at the Barnes and St. Louis Children's Hospitals and one-half at the City Hospital. The St. Louis Shriners' Hospital for Crippled Children is used for special lectures and demonstrations in the field of orthopedic surgery. During the time that each student serves as a ward clerk he will have between 30 and 40 cases of immediate concern to him. Daily ward conferences and the various dry clinics give opportunities for the students to become familiar not only with their own cases but with many

other cases as well. Special instruction in history writing, in examination of the patient and in various diagnostic and therapeutic techniques is given to small groups by the resident and assistant residents. These small groups are in the nature of tutorial classes. The students are also offered the privilege of attending all operations and usually they may participate as assistants in the operations on their own cases. During the period of ward clerkship each student will have for personal study a few cases representing the various specialities of surgery but the principal concentration of instruction is on the general surgical cases, particularly those of a sort which will be encountered by the general practitioner.

SECOND YEAR

1. INTRODUCTION TO SURGERY. A laboratory, demonstration and lecture course in which are studied certain fundamental processes of physiology and pathology as applied to surgery. The course includes the demonstration of patients illustrating various points under discussion. Five hours weekly during the third trimester. 55 hours. (Dr. Heinbecker)

THIRD YEAR

2. SURGERY. The course is subdivided as follows:

(a) SURGICAL OUTCLINIC. For one trimester a third of the class serve as dressers in the Surgical Division of the University Clinics. Cases are examined by the students and demonstrated to them. Special attention is devoted to follow-up cases. Under the supervision of assistants, the students take histories and apply dressings and bandages. 99 hours.

(Drs. Elman, Womack, Heinbecker, Rainey, Walton,
H. S. Brookes, Pruett, Schmidtke)

(b) SURGICAL RECITATIONS. A weekly discussion during the first and second trimesters on assigned surgical reading. The principles of surgery and many of the more common surgical conditions are considered. Standard textbooks and selected articles from the recent literature are freely consulted. The class is divided into two sections for this course. 22 hours.

(Drs. Elman, Heinbecker)

(c) FRACTURES. Demonstrations, conferences and lectures on the more common fractures. This systematic presentation of the subject is preliminary to the extensive clinical experience in fractures offered to the senior students at the City Hospital. One hour weekly during the third trimester. 11 hours. (Drs. Key, Copher)

(d) OPERATIVE SURGERY. A three-hour exercise given weekly during the third trimester. The course is given in two sections, each section working one-half a trimester. Actual case histories are discussed, and the operations indicated from these discussions are performed on animals by the students. The surgical technique is as rigid as in the operating room, and it is required that the operations shall be performed without pain to the animals. 16 hours. (Drs. Walton, Blades)

(e) SURGICAL CLINIC. A weekly clinic throughout three trimesters. See course 4 (b). 33 hours. (Dr. Graham)

(f) SURGICAL CONFERENCE. The pathology, diagnosis and treatment of surgical conditions, illustrated by patients, are discussed. A weekly exercise during three trimesters. 33 hours. (Dr. Sachs)

(g) GENITOURINARY SURGERY. Lectures and recitations in genitourinary surgery. Third trimester. 11 hours. (Dr. Rose)

3. SURGICAL PATHOLOGY. Weekly exercises of two hours for three trimesters, at which time the early pathological changes are considered from the standpoint of their clinical manifestations. Pathological material from the museum and operating room is studied both in the gross and microscopically. 66 hours. (Drs. Womack, Walton, Bricker)

FOURTH YEAR

4. SURGERY. The course is subdivided as follows:

(a) SURGICAL WARDS. For one quarter the student serves as assistant in the surgical wards. Half of the surgical group is at the St. Louis City Hospital for a period of four weeks while the other half is at the Barnes and the St. Louis Children's Hospitals. The group at the City Hospital spends its mornings in the wards of the hospital. The group at the Barnes and the St. Louis Children's Hospitals spends all of every day in the wards of those hospitals. Conferences on selected patients are held from 9 to 10 a. m. General and special surgical cases are discussed by members of the staff. The students take the case histories and make physical examinations and the usual laboratory examinations. They assist at some of the operations and do some of the surgical dressings. Those who are especially interested may apply and receive instruction in practical anesthesia. The students also

attend autopsies performed on the cases studied by them and are required to be present at the weekly pathological conference at which these cases are discussed. (See Pathology 4). 216 hours.

(Barnes Hospital, Dr. Graham and Staff;
Children's Hospital, Dr. Elman; City Hospital, Drs.
Heinbecker, Elman, Womack, Rowlette, Walton)

(b) **SURGICAL CLINIC.** A weekly exercise throughout four quarters. Patients presenting the more usual general surgical conditions are presented and their diagnostic and therapeutic problems are discussed. Students of the third year also attend this clinic. 32 hours.

(Dr. Graham)

5. **ORTHOPEDIC OUTCLINIC.** Each student attends daily for two weeks. 24 hours.

(Drs. Key, Stone, T. P. Brookes,
Jostes, Thieme)

6. **GENITOURINARY OUTCLINIC.** Each student attends daily for two weeks. 24 hours.

(Drs. Deakin, Patton, Wilson,
Althaus, Feller, Kopp, Cutler)

ELECTIVE COURSES

7. *Neurological Surgery.* Eight lectures in the first quarter of the fourth year. The lectures comprise a review of the anatomy and physiology of the nervous system as applied to neurosurgery and a discussion of the principal conditions encountered in neurological surgery.

(Drs. Sachs, Furlow)

10. *Postoperative Care.* Eight lectures and demonstrations in the fourth quarter of the fourth year. Both the normal and complicated postoperative developments are discussed.

(Dr. Allen)

11. *Research in Surgery.* Specially qualified students are encouraged to undertake research in problems bearing on surgery in the laboratories of the department.

12. *Staff Meeting.* Approved students may attend, without credit, the weekly staff meeting, at which topics of interest, recent surgical pathological material, and current surgical literature are discussed.

13. *Tumor Clinic.* Approved students may attend, without credit, the weekly staff tumor clinic in the Barnes Hospital.

(Drs. Copher, Womack)

14. *Surgical Pathology.* Approved senior students may elect to take additional work in surgical pathology. The credit received depends upon the amount of time and the quality of the work done.

(Dr. Womack)

RADIOLOGY

PROFESSOR SHERWOOD MOORE.
CONSULTING PHYSICIST HUGHES.
ASSOCIATE PROFESSOR LARIMORE.
PHYSICIST THORNTON.
ASSISTANT PROFESSOR WENDELL SCOTT.
INSTRUCTORS ZINK, ARNESON.
ASSISTANT PHYSICIST LANGSDORF.
ASSISTANTS BURTON, THOMAS RUSSELL.

Instruction in the applications of radiology in the diagnosis and treatment of disease is given very largely in collaboration with the several clinical departments.

THIRD YEAR

ELEMENTS OF RADIOLOGY. Two lectures to one-third the class at a time as a part of Med. 2. (Dr. Scott)

TISSUE CHANGES DUE TO RADIATION. One lecture to the class in surgical pathology (Surg. 3) and one lecture to the class in obstetrical and gynecological histology and pathology (Ob. and Gyn. 1b). (Dr. Arneson)

FOURTH YEAR

DIAGNOSIS (CHIEFLY RADIOLOGICAL) AND TREATMENT OF DISEASES OF THE GASTROINTESTINAL TRACT. Eleven lectures in connection with Med. 7b. (Dr. Larimore)

RADIOLOGICAL TREATMENT OF CANCER OF THE UTERUS. One lecture in course 2(d) in the department of Obstetrics and Gynecology. (Dr. Arneson)

ELECTIVE COURSE

Principles of Roentgenology. A course of lectures and demonstrations for fourth year students. Three one hour periods a week for four weeks. 12 hours.

(Drs. Moore, Scott, Zink)

OPHTHALMOLOGY

PROFESSORS LAWRENCE T. POST, SHAHAN, WIENER.
ASSOCIATE PROFESSORS WILLIAM F. HARDY, JULIANELLE, WOODRUFF, M. HAYWARD POST.
ASSISTANT PROFESSORS JACOBS, SCHWARTZ, LAMB, B. Y. ALVIS.
INSTRUCTORS POOS, JAMES, HILDRETH, BEISBARTH, LANGE, CRAWFORD, SANDERS, CALHOUN, WORKMAN.
LECTURER MASON.
ASSISTANTS E. B. ALVIS, ROSENBAUM, JAMES H. BRYAN, HOW, HANSER, ELLIS, MEISENBACH.

SECOND YEAR

OPHTHALMOSCOPY. Lectures and demonstrations are given as a part of the course in Physical Diagnosis. 6 hours. (See Medicine 1b).

(Drs. Lawrence Post, M. H. Post, Beisbarth)

THIRD YEAR

1. OPHTHALMOLOGY. One lecture a week is given in the third trimester. 11 hours. (Dr. Wiener)

FOURTH YEAR

2. CLINICAL OPHTHALMOLOGY. Instruction in diagnosis and treatment of eye diseases is given to small sections of the class. Ten hours a week for 4 weeks. 40 hours.

(Drs. Lawrence Post, M. H. Post, Jacobs, Schwartz,
E. B. Alvis, Beisbarth, Lange, Sanders)

OTOLARYNGOLOGY

PROFESSOR EMERITUS L. W. DEAN.

PROFESSORS BUNCH, PROETZ.

ASSOCIATE PROFESSOR LYMAN.

ASSISTANT PROFESSORS ARBUCKLE, ALDEN, KELLEY, HANSEL, HOURN, McMAHON, BIRSNER, COSTEN, WOLFF.

INSTRUCTORS CONE, VOTAW, GLICK, BOEMER.

ASSISTANTS HANSON, FREIMUTH, GAGE, POTTER, SCHERRER, STUTZMAN, GUERDAN HARDY, LINTON, L. W. DEAN, JR., SMIT, SENTURIA, WILLIAM T. K. BRYAN.

RESEARCH FELLOW LING.¹

THIRD YEAR

1. LARYNGOLOGY AND RHINOLOGY. Twenty-two lecture hours given during the third trimester. 22 hours.

(Drs. Dean, Goldstein, Bunch, Proetz, Lyman, Arbuckle,
McMahon, Hansel, Kelley, Alden, Birsner, Costen)

FOURTH YEAR

2. OTOLARYNGOLOGY. Clinical instruction is given to small sections of the class. Eight hours a week for 4 weeks. 32 hours.

(Drs. Dean, Bunch, Proetz, Lyman, Kelley, Votaw,
Boemer, Gage, Hardy, Smit, Scherrer)

OBSTETRICS AND GYNECOLOGY

PROFESSORS OTTO H. SCHWARZ, WILLARD M. ALLEN,² FREDERICK J. TAUSSIG, ROYSTON, NEWELL.

ASSOCIATE PROFESSOR T. KENNETH BROWN.

ASSISTANT PROFESSORS McNALLEY, O'KEEFE, PADDOCK, KREBS, ROBERT J. CROSSEN.

INSTRUCTORS SCHLOSSSTEIN, DRABKIN, WEGNER, HOBBS, LIESE, DUDLEY R. SMITH, SOULE, ARNESON, ROBLEE, MORRIN.

ASSISTANTS CANEPA, MYRON W. DAVIS, ARZT, SCRIVNER, O'NEILL, FRANCES H. STEWART, KLEINE, PATTON, WULFF, MAX, WASSERMAN, GIBSON, BORTNICK, HUBERT L. ALLEN, MORRISON, LAZAR, HAUPTMAN, HAYWARD, SIEBER, HUTTO.³

¹ Effective October 25, 1939.

² Effective January 1, 1940.

³ Effective October 1, 1939.

THIRD YEAR

During the third year there are four courses given in obstetrics and gynecology. The introductory lecture course in obstetrics is based upon assigned reading in a prescribed textbook. The entire subject of obstetrics is covered in this course. In the course of obstetrical and gynecological pathology, the normal anatomy, histology and physiology of the female generative organs are reviewed and all important pathological lesions are presented both grossly and microscopically. The work is carried out in the form of lectures, demonstrations of gross specimens and microscopic pathology. A complete series of photomicrographs in the form of lantern slides supplements the teaching of this course. Obstetrical and gynecological diagnosis is given in the afternoon course in the Clinics. The students are instructed in the methods of making complete obstetrical and gynecological examinations. Lectures in gynecology, similar to those in obstetrics, are supplemented by assigned reading in a prescribed textbook.

1. OBSTETRICS AND GYNECOLOGY.

(a) OBSTETRIC RECITATIONS AND DEMONSTRATIONS. One hour a week throughout the year. 33 hours.

(Drs. Schwarz, W. M. Allen)

(b) OBSTETRICAL AND GYNECOLOGICAL HISTOLOGY AND PATHOLOGY. Four hours a week (in sections of one-third of the class). 44 hours.

(Dr. Hobbs)

(c) CLINICAL LECTURES ON SELECTED GYNECOLOGICAL SUBJECTS. One hour a week during the second trimester. 11 hours.

(Drs. Schwarz, W. M. Allen)

(d) GYNECOLOGICAL AND OBSTETRICAL DIAGNOSIS (CLINIC). One sub-section (one-sixth of the class) works in the gynecological clinic. At the same time the other sub-section (one-sixth of the class) works in the pre-natal clinic. Two hours a week for eleven weeks (in sections of one-third of the class). 22 hours.

(Drs. Brown, Krebs, Smith, Wegner, Davis, Hobbs, Liese, Soule, Scrivner, Wulff, Gibson)

(e) CLINICAL AND PATHOLOGICAL CONFERENCES. (See Pathology 4).

FOURTH YEAR

During the fourth year the students are assigned to obstetrics and gynecology for four and two weeks, respectively. The work in obstetrics consists of clinical clerkships in the St.

Louis Maternity Hospital and the St. Louis City Hospital. During this time students are assigned to cases and are responsible for the records and laboratory work which each case requires. At least twelve obstetrical cases are required for each student. In addition, students are urged to volunteer for obstetrical work during the summer vacation between the third and fourth years, as the required number of cases cannot be obtained during the four weeks period. The service furnishes about 1600 cases annually, 1200 in the St. Louis Maternity Hospital and about 400 on the outclinic service. In addition, the St. Louis City Hospital furnishes about 1200 cases a year. On the gynecological service in Barnes Hospital, the students act as clinical clerks, attending two gynecological diagnostic clinics and two operative gynecological clinics each week. In the afternoon they are assigned to the gynecological division of the University Clinics, under constant supervision of instructors. The clinics on selected obstetrical and gynecological topics are given as a review of the more important phases of obstetrics and gynecology.

2. OBSTETRICS AND GYNECOLOGY.

(a) ATTENDANCE ON OBSTETRICAL CASES.

(Drs. Schwarz, Brown, Wegner, Hobbs, Soule)

(b) CLINICS ON SELECTED OBSTETRICAL AND GYNECOLOGICAL TOPICS. One hour a week during the first, second and third quarters. 24 hours.

(Drs. Schwarz, W. M. Allen, Royston, Newell)

(c) OBSTETRICAL WARD WORK. Sections composed of one-eighth of the class, for a period of four weeks.

(Drs. Schwarz, Royston, McNalley, Paddock,
Brown, Wegner)

(d) GYNECOLOGICAL WARD AND CLINIC WORK. Sections composed of one-sixteenth of the class work in the Gynecological Division of the Barnes Hospital and the Clinic for a period of two weeks.

(Drs. Schwarz, Taussig, Newell,
Royston, McNalley, O'Keefe, Paddock, Hobbs)

ELECTIVE COURSES

(a) *Obstetrical Clinic*. An elective course in which a small section of the class receives practical instruction in the prenatal clinic eight hours a week for four weeks. 32 hours. Other hours by arrangement. This work can also be taken in the summer months.

(Dr. D. R. Smith and Staff)

(b) Positions are available for students who wish to give their entire elective time to research work in obstetrics and gynecology. Each student selected for this work will be under the direct supervision of a member of the department.

THE EDWARD MALLINCKRODT DEPARTMENT OF PEDIATRICS

PROFESSORS HARTMANN, COOKE, VEEDER.

ASSOCIATE PROFESSORS THEODORE C. HEMPELMANN, McCULLOCH.

INSTRUCTORS BLEYER, PARK J. WHITE, ZENTAY, KUBITSCHKE, RUPE, BAIN, PERLEY, LAWRENCE GOLDMAN, ROHLFING, MAX DEUTCH, F. A. JACOBS, STANLEY HARRISON, JAUDON, LONDE, BLATTNER.

ASSISTANTS LONSWAY, BAUER, AFF, JONES, WACHTER, SAUNDERS, KLOK, SCHWARTZ, SCHWARTZMAN.

RESEARCH FELLOWS RUHOFF, BARNETT, ANDERSON, WAGENFUEHR.

DENTISTS MARTIN, HARRIS.

STUDENT ASSISTANT ERGANIAN.

The instruction during the third year is designed to introduce the subject of pediatrics to the student by a systematic course of lectures emphasizing particularly normal growth and development, infant nutrition and feeding, acute infectious diseases, and serious disturbances in water and mineral metabolism, and also to acquaint him with normal physical findings in infants and children, and methods of physical diagnosis.

During the fourth year the emphasis is placed on the physical findings of disease and the student is brought into close contact with the patient in the wards of the St. Louis Children's Hospital, and by frequent clinical conferences of the staffs.

THIRD YEAR

1. PEDIATRICS. Physical diagnosis as applied to infants and children. Bedside instruction to small groups of students in the wards of the St. Louis Children's Hospital. Two hours a week for one trimester. 22 hours. (Dr. McCulloch)

2. PEDIATRICS. A systematic lecture course in general pediatrics, including occasional clinical demonstrations. Two hours a week for three trimesters. 66 hours.

(Drs. Hartmann, Cooke)

FOURTH YEAR

3. PEDIATRIC WARD ROUNDS. Examination and discussion of selected cases in the wards of the St. Louis Children's Hospital and the St. Louis Isolation Hospital. Daily for four weeks for one-eighth of the class. 24 hours.

(Drs. Cooke, Bleyer, Goldman, Bain, Jaudon, Zentay)

4. **PEDIATRIC CLINIC.** Weekly amphitheatre demonstrations and discussions of selected cases from the hospital, for the whole class. 32 hours.

(Drs. Hartmann, Cooke, Veeder, McCulloch)

5. **CLINICAL AND PATHOLOGICAL CONFERENCES.** See Pathology 4. Approximately one-third of the course is devoted to pediatric cases.

6. **CLINICAL CLERKSHIPS.** For two hours each morning for two weeks, for one hour in the afternoon and for emergencies in the evening one-sixteenth of the class works in the wards of the hospital or attends special clinical or pathological conferences and demonstrations. For two hours four afternoons a week for two weeks the group works in the pediatric outpatient department, taking histories and making examinations of assigned cases under supervision of the staff physicians.

(Drs. Hartmann, Cooke, Blattner and Staff)

ELECTIVE COURSES

7. *Research.* Properly qualified students may engage in clinical or laboratory research under the direction of the pediatric staff. Hours by arrangement.

8. *Advanced Work.* The facilities of the department are available to qualified students who desire to do additional or advanced work in the St. Louis Children's Hospital, St. Louis Isolation Hospital, Child Guidance Clinic, the Pediatric Clinic or in the laboratories of the department. Hours to be arranged.

MILITARY SCIENCE AND TACTICS

ELI E. BROWN, M.D., Lieutenant Colonel, M. C., U. S. A.

Assistant Professor of Military Science and Tactics

A Medical Unit of the Reserve Officers' Training Corps is maintained. An officer of the Medical Corps of the Regular Army is detailed to the School as instructor. Classes are a part of the regular schedule. The work is divided as follows:

(1) Basic Course—first and second years.

(2) Advanced Course—third and fourth years.

(a) Summer Training Camp—six weeks.

Enrollment in both the Basic and Advanced Courses is optional and does not obligate the student to any military duty except to complete the section of the course undertaken.

The Summer Camp is part of the Advanced Course. It may be attended after the second or the third year.

Satisfactory completion of the Basic Course is required for enrollment in the Advanced Course. Certain credits may be allowed for work done in R. O. T. C. Units elsewhere.

Students enrolled in the Advanced Course receive "Commutation of Subsistence," at the rate prescribed by law, throughout the full two year period except during the camp period when they are housed, clothed, fed and receive the pay of the lowest grade of the Army.

Upon completion of the course the student will be presented, at graduation, with his choice of a commission as a First Lieutenant, Medical Section, Officers' Reserve Corps, or with a certificate of eligibility for such commission.

MISCELLANEOUS COURSES

MEDICAL JURISPRUDENCE. A course given in the third year embracing medical evidence and testimony; expert testimony; dying declarations; rights of medical witnesses; establishing identity from living and dead bodies; sudden death from natural causes and by violence; criminal acts determined by medical knowledge; the legal relation of physician to patients and the public; insanity, and malpractice. 11 hours.

(Mr. Crowdus)

STOMATOLOGY. Lectures and demonstrations. The relation between stomatology and the other branches of medicine is considered. Third trimester, third year. 11 hours.

(Dr. Virgil Loeb)

PHYSICAL THERAPEUTICS. Lectures and demonstrations of corrective physical exercise, massage, hydrotherapy, electrotherapy and heliotherapy. 8 hours.

(Dr. Ewerhardt)

PROFESSIONAL CONDUCT AND MEDICAL ECONOMICS. An elective course in which the following subjects are discussed: the young physician and his problems; group medicine and specialization; ethical relations between physicians; organized medicine; birth control; quackery, fads, and cults; medical finance; industrial and contract practice; "systems" of practice in other countries; health insurance plans. 8 hours.

(Dr. Park J. White)

POST-GRADUATE COURSES

Courses in the following subjects are offered to a limited number of qualified graduates in medicine:

OBSTETRICS AND GYNECOLOGY

A four-weeks' course in obstetrics and diagnostic gynecology is offered once each year, beginning in May. The course is designed for those doing general practice, and its object is to provide a thorough grounding in the modern practice of obstetrics and gynecology. For those desiring to enter upon the practice of obstetrics and gynecology as a specialty, the course will furnish a sound basis for further work in this field.

OPHTHALMOLOGY

An eight-months' course in ophthalmology is offered each year beginning in October. The purpose of the course is to provide a good foundation in ophthalmology on which the student can build further, preferably by ophthalmic internships or by study while engaging in practice. Approximately one-fifth of the time is spent in the study of the fundamental sciences as they pertain to ophthalmology.

OTOLARYNGOLOGY

An eight-months' course in otolaryngology is offered each year beginning in September.

The purpose of the course is to prepare the student for a residency in otolaryngology or for work with a preceptor. The curriculum is not arranged with the thought of making him a finished otolaryngologist. It is prepared so as to build a firm foundation for his development as a clinician. The instruction is not confined to the basic sciences. Those subjects are included in the curriculum which will best prepare him for his work as an interne.

The theory and practice of otolaryngology are studied; operative surgery and bronchoscopy are taught in the dead house and on animals. Particular attention is given to the methods of examination of patients and to diagnosis. The problems of defects and the management of the deaf child are emphasized.

PEDIATRICS

A four-weeks' course in pediatrics is offered once each year, beginning in September. The object of the course is to give

practitioners a thorough grounding in the modern practice of pediatrics. The course is suitable for those doing general practice and for those specializing in pediatrics. For those desiring to enter the practice of pediatrics as a specialty, the course is designed to furnish a basis for further work.

ANATOMY

Dissection. A six-weeks' summer course in anatomy is offered for physicians desiring to review the subject. Any of the following parts may be elected for study: head and neck, thorax and upper limb, abdomen and pelvis, lower limb.

Pamphlets giving further information about these courses may be obtained on application to the Registrar of the School.

PUBLICATIONS OF WASHINGTON UNIVERSITY

Series II. THE CATALOGUES. This series includes the Catalogues of the College of Liberal Arts, the School of Engineering, the School of Architecture, the School of Business and Public Administration, the School of Graduate Studies, the School of Law, the School of Medicine, the School of Dentistry, the School of Nursing, the School of Fine Arts, the University College, and the Summer School.

Series IV. WASHINGTON UNIVERSITY STUDIES. From July, 1913, to April, 1926, the Washington University Studies were published as a quarterly periodical, two numbers of which were devoted to the humanistic and two to the scientific fields. They now appear at indefinite intervals as monographs in the three following classes: Language and Literature, Science and Technology, Social and Philosophical Sciences.

Series V. WASHINGTON UNIVERSITY DOCTORAL DISSERTATIONS. This series contains dissertations accepted in partial fulfillment of the requirements for the degree of Doctor of Philosophy.
