Employee United Fund Drive Tops $11,000

For the third straight year, Jewish was the first St. Louis hospital to complete its United Fund campaigning and earn a spot on the coveted fair share honor roll.

A total of 1,085 employees contributed $11,075 to the five-week campaign here which ended October 31.

The final total was 111 per cent of the hospital's quota of $10,000. The majority of contributors, 859 persons, gave through the payroll deduction system.

Mr. Gee, in a statement thanking all employees for their enthusiastic response said, "I am thrilled by your overwhelming support of the hospital's United Fund Campaign."

"Your generosity aids 116 community health and welfare agencies, including the hospital, which will receive approximately $250,000 from the United Fund to help provide free care in the departments of rehabilitation, chronic disease, child and adult psychiatry, medicine, surgery, home care and the Aaron Waldheim clinics.

Under the direction of Mrs. Virginia Reisinger, director of nursing service, 348 members of the nursing department donated $2,545 to the drive. Other departments with 100 per cent employee contributions were:

Aaron Waldheim clinics, accounts payable, secretaries and cashiers, medical records, department of medicine, nursing administration, medical education, nursing residences, ob-gyn research, operating room, personnel, pharmacy, plant operations and maintenance, public relations, purchasing, radiology, rehabilitation, social work and home care, department of surgery and permanent medical staff.

Rollies in all departments

Prior to the campaign, 39 rollies were held in various hospital departments to acquaint employees with facts of the drive. More than 67 team captains, as well as 10 division leaders, supervised the solicitation of all employees.

Chairmen of the 1963 campaign were Miss Roberto, director of Rollies, and Miss Teddy Leistner.

216 Reaps National Hospital News Award

David A. Gee Named Executive Director

David A. Gee became executive director of Jewish Hospital January 1, 1964. His appointment was announced by Joseph F. Ruwitch, hospital president.

Gee, 36, had been acting executive director since the resignation of Dr. David Littauer July 1. Dr. Littauer is now executive director of Cedars-Sinai Hospital in Los Angeles.

With the hospital since 1950, Gee had been associate director since 1955. He served as assistant director from 1955 to 1955, administrative assistant from 1951 to 1953 and administrator resident from 1950 to 1951. He holds a master's degree in hospital administration from Washington University.

Gee is regional secretary of the American Public Health Association and the American Hospital Association's representative to the Joint Committee with the American Occupational Therapy Association. He is a former president of the Missouri Council on Health Careers and is active in the Hospital Association of Metropolitan St. Louis.

He is a Fellow of the American College of Hospital Administrators, American Public Health Association and the Missouri Public Health Association.

Since 1957 Gee has been a lecturer in hospital administration at the Washington University School of Medicine. He is a project director of the Medical Care Research Center, a joint program of the hospital and Washington University, and he is the research associate in the Social Science Institute of Washington University. A native of Cambridge, Mass., Gee graduated from De Pauw University, Greencastle, Indiana, in 1949. He has published 26 articles on various facets of hospital administration.

Gee lives with his wife and four children at 179 River Bend Drive in Chesterfield.

Doctors, Nurses, in Double-Header

A native of Cambridge, Mass., Gee graduated from De Pauw University, Green castle, Indiana, in 1949. He has published 26 articles on various facets of hospital administration.

Gee lives with his wife and four children at 179 River Bend Drive in Chesterfield.

A straight line can be drawn from the United Hospital Thermometer, 216, to St. Louis.

Dr. Burton Shatt and Alvin Goldfarb were chairmen of United Fund campaign among the visiting medical staff, a drive entirely separate from the hospital's.

Some 117 physicians and their private office personnel contributed nearly $5,260.
**Here’s A Cover Girl!**

**Maternity Patient**

**Writs Poem Praising Her Just Desserts**

A matronity patient’s delight with being on an unrestricted diet after the birth of her child was reflected in the following poem in the hospital’s food service department.

**ODE TO A CLEVER CATERING OFFICE:**

For nine months I’ve charted my weight,
For six months I’ve charted my weight,
To the service a hospital can offer, according to the authoritative Hospital Guide. Published by the American Hospital Association, the Guide recently presented national statistics on the services provided by the country’s 7028 hospitals. Here’s how Jewish Hospital stacks up:

- **Only 267 hospitals** in the United States have home care programs. Jewish Hospital can be justifiably proud that its Training Center for Coordinated Home Care and Other Out-of-Hospital Health Services is one of only four in the nation and a model for hospitals everywhere.

- **Rarely one out of six hospitals** provide medical social service, electroencephalograph testing or coaltar therapy—but all these services are offered at Jewish Hospital.

- **Radioactive isopes are used** in just one out of four hospitals and less than one-third have a dental department. Selected by the federal government to demonstrate a hospital-based program of dental care for chronically ill, aged, and handicapped persons, the hospital’s dental department also offers the only rotating dental internship program in Missouri as well as a full-time dental service.

- **Chapel available**

Less than half of the nation’s hospitals have a chapel, out-patient department or physical therapy department. Barely half have either a pharmacy or a pathology laboratory.

- **Occupational therapy here**

About nine per cent, only 654 hospitals, provide occupational therapy service, and only one out of 11 offers in-patient psychiatric care.

- **Eighty-nine per cent of America’s hospitals do not have intern** and only 17 per cent have residents. None 50 young physicians are currently receiving their advanced training here.

- **Only one out of eight hospitals** has a cancer registry program like ours, providing information for medical research. Only one out of eight maintains a professional school of nursing; this year’s freshman class at Jewish Hospital numbered 15, almost the largest in the school’s 61-year history, and brought total enrollment to 207.

**Health Service Hours**

To better serve hospital employees, longer hours have been established for the Employee Health Service. A registered nurse will be on duty from 8 a.m. to 4:30 p.m., Monday through Friday. A physician will be contacted by the nurse when needed.

Previously, the health service was open from 8 a.m. to 2 p.m. Monday through Friday.

**Dr. Samuel Soule and Melvin Rubenstein participated in a panel discussion on**

**The Journal of The American Medical Association**

**Dr. Edward Massie** was elected to membership in the American Society of Oral Surgeons in October in Miami.

**Dr. Calvin H. Weiss** participated in a round-table discussion on “Pitfalls in Oral Diagnoses” at the monthly meeting of the American Society of Oral Surgeons in October in Miami. He also spoke at the American Academy of Dental Medicine and Surgery in October in New York. Weiss lectured on “Pitfalls in Oral Diagnoses” at the monthly meeting of the American Society of Oral Surgeons in October in Miami.

**Dr. Harper** presented a paper on “Prevention of Ascending Pyelitis by the Inact Ureterovesical Junction” An Experimental Study at the October meeting of the section on urology of the American Urological Association in Colorado Springs.

**Dr. B. Y. Glassberg** participated in two recently-television panel discussions on “Prostitution” and “Marriage, Family and Divorce.”

**Dr. Glassberg** also spoke at the Annual Meeting of the University of Chicago Alumni Club in November on “To Marry or Not to Marry.”

**Dr. Albert B. Eisman, Warren Jacobsohn and Arnold Goldman** with Dr. D. Aach of the U.S. Air Force, presented a paper on “Problems of Trichinosis.”

**Dr. Thomas C. Glassberg** lectured on “Pitfalls in Oral Diagnoses” at the monthly meeting of the American Society of Oral Surgeons in October in Miami.

**Dr. Calvin H. Weiss** participated in a round-table discussion on “Pitfalls in Oral Diagnoses” at the monthly meeting of the American Society of Oral Surgeons in October in Miami.

**Dr. Simon L. Stein** was elected to membership in the American Society of Oral Surgeons in October in Miami.

**Dr. Arthur L. Smiley** spoke on surgical prevention of strokes at Michael Reese Hospital in Chicago in September.

**Dr. David C. Shepherd** was elected chairman of the St. Louis Chapter of the American Academy of Oral Surgery.

**Dr. Dr. Calvin H. Weiss** also participated in a round-table discussion on “Pitfalls in Oral Diagnoses” at the monthly meeting of the American Society of Oral Surgeons in October in Miami.

**Dr. Simon L. Stein** was elected to membership in the American Society of Oral Surgeons in October in Miami.
Dr. Stanford Wessler

**Blood Clots in Legs May Cause Death**

Persons taking prolonged automobile trips should stop frequently, get out of the car, and stretch, advised Dr. Stanford Wessler.

**Visiting Professor of Medicine at Jewish Hospital**

Dr. Wessler is director of the Clinical Research Center at Beth Israel Hospital and an associate professor of medicine at Harvard University School of Medicine.

Dr. Wessler is one of the few investigators in one position for a long period of time as might happen on long automobile trips, who can see the formation of blood clots in the veins of the legs, producing severe disability and even death, Dr. Wessler warned.

**Many causes of clots**

Blood clots may form after such disparate situations as undergoing surgery, giving birth to a child, being immobilized in bed with a body cast, or sticking to a deck chair after vigorous exercising, as well as taking prolonged automobile or plane trips, Dr. Wessler said. "All of these are potentially hazardous situations," he said.

**Determining why clots form in some people and not in others, and treating clots when they do form are among medical problems," Dr. Wessler stated. He often thinks about clots occurring separately by the executive director and the president of the medical staff, it appears monthly.

**Several members may send information** for publication to Lynne Lambreg, editor, at the hospital's public relations department. Each issue is reviewed by an editorial board consisting of Dr. Morris Abrams, representing the voluntary medical staff, Dr. Jack Hanson, full-time medical staff, Maurice L. Hirsch, board of directors, and David A. Gee, administration.

**According to Dr. Norman Organ, medical staff president, this present newsletter will attempt to keep the staff completely aware of changes going on in the hospital. We all sincerely hope that it signifies a combined effort of the board, the administration and the staff to work together for the greatest good of the hospital.**

**X-Ray Tech Students**

Six new students in the hospital's school of radiologic technology are Allen Douglas, Norbert Schuman, Bobby Rimel, Jeanne Navies, Cynthia Serreco and Clifford Seals, Jr.

Their two-year curriculum combines classroom work with practical experience.

---

Eight Named As Visiting Professors

Medical education at Jewish Hospital made major gains with the recent appointment of eight Visiting Professors of Medicine to the hospital's department of medicine, according to Dr. Michael M. Karl, acting director of the department.

**Internationally eminent physicians and educators, the Visiting Professors direct the teaching program of the department of medicine during their stay at the hospital.** According to Dr. Karl, the Visiting Professor Program will broaden the educational experience of interns, residents and visiting medical staff members.

The Visiting Professors are:

- **September:** Drs. David Jipnis and Eric Reis, both associate professors of medicine at Washington University School of Medicine;
- **October:** Dr. Stanford Wessler, director of the Clinical Research Center, Beth Israel Hospital, Boston, and associate professor of medicine, Harvard University School of Medicine;
- **November:** Dr. William Dock, professor of medicine, New York State Medical College;
- **December:** Dr. Eugene D. Robin, professor of medicine, University of Pittsburgh School of Medicine.

---

**Piano Needed**

The hospital's division of child psychiatry would welcome a piano for the use of its young patients.

Persons wishing to donate a piano or funds towards the purchase of one may contact the division office at station 444.

---

New Book Fund For Medical Library

**Gift of the Nathan Hiken Memorial Library Fund**

**SINDEY I. ROTHESCHILD MEDICAL LIBRARY**

Books for the medical library are purchased with a $3000 bequest from the late Nathan Hiken, who died October 17, 1960. He is survived by his wife Sadie.

The bequest is being administered by Dr. Julius Elson, Mr. Hiken's nephew and a member of the hospital's medical staff. Mr. Hiken was one of the founders and the first president of the Jewish Federation of Southern Illinois. He was also president of the Beth Israel Congregation of Belleville, the Belleville Brith Society and the Belleville Retail Merchants Association and was active in other civic and religious organizations.

Persons wishing to add to the Nathan Hiken Memorial Library Fund may contact the hospital's resources and development office.
Volunteers Cited
At Awards Tea For Service to Hospital

Volunteer workers were honored for their service to the hospital at the Auxiliary's Fall dessert tea in October.

Top award winner was Mrs. Alfred Goldman who has worked 15,000 hours since the Auxiliary was formed in 1952. Other winners included Mrs. Harvey Nathanson, 8000 hours; Mrs. Gordon Scherck, 6000 hours; Mrs. Ben Samuels and Mrs. Millard Waldheim, 5000 hours; Mrs. Harry Galkin, Mrs. Charles Jacobi and Mrs. Sam Rich, 3900 hours, and Miss Lea Chuckes.

Mrs. Albert Felberbaum, Mrs. Nathaniel Rothschild, Max Sacks, Nathan Sarasohn, Pessikoff, Chester Radziejewski, Paul Alvin Abramson, Harry Deutch, Herbert Hendin, Jacques Horowitz, Morris Horwitz, Leonard Kaufman, Rodrick Lewin, Harry Hendin, Bernard Mitleider, Sam Portney, David Portnoy, Robert Renaud, James Schwab, Jerome Sichel, Maurice Steinback, Alfred Goldman, who has worked 15,000 hours in the past twelve months, who included volunteers with outstanding records of service.

Honored for 1000 volunteer hours were Mesdames Edward Boonshaft, Joseph Chaston, Esther Cohen, Julius Franklin, Samuel Freund, Wolfe Grand, Jack Grober, Sol Kaiser, Bernard Mitheder, Sam Portney, David Portnoy, Robert Renaud, James Schwab, Jerome Sichel, Maurice Steinback and Julius Werner.

Gold discs were awarded for 500 volunteer hours to Mesdames Aaron Abramoweth, Alvin Abramson, Harry Deutch, Herbert Goodman, Phil Gродsky, Fred Hanley, Harry Hendin, Jacques Horowitz, Morris Hervit, Leonard Kaufman, Rodrick Lewin, Jerome Marx, Harry Pastel, Morris Peskoff, Chester Radziejewski, Paul Rothchild, Max Sacks, Nathan Sarasohn, Gunter Schneiders, Sam Schneider, Freida Silverberg, Esther Stein, Sidney Swain, Jerome Wieselman, Victor Zeve, Miss Matilda Cohn, Mrs. Ruth Elfick and Mrs. Barbara Wexler.

Special mention was made of those volunteers with outstanding records of service in the past twelve months, who included Mrs. Alfred Goldman, 2298 hours; Mrs. Harry Spitzer, 1609 hours; Mrs. Harvey Nathanson, 1106 hours; Mrs. Ben Samuels, 1101 hours; Mrs. Max Lipschitz, 1043 hours; Mrs. Jacques Horowit, 718 hours; Mrs. Julius Franklin, 722 hours; Mrs. Esther Cohen, 606 hours; Mrs. Harry Galkin, 567 hours; Mrs. Leah O'Heckes, 540 hours; Mrs. Robert Renaud, 530 hours; Mrs. Carrye Sang, 329 hours; Mrs. Victor Zeve, 317 hours; Mrs. Gordon Scherck, 485 hours; Mrs. Albert Felberbaum, 477 hours; Mrs. Freida Silverberg, 406 hours; Mrs. Esther Schragar, 453 hours; Mrs. Morris Sachar, 449 hours; Mrs. Edward Boonshaft, 441 hours, and Mrs. Charles Jacobi, 413 hours.

The awards were presented by Mrs. Harold Lewin, volunteer chairman and Mrs. Samuel Freund, co-chairman. Mrs. Mordecai B. Brown is director of auxiliary services.

Coffee Shop Given More Space, Larger Menu, Brighter Color

Speedier service and an expanded menu have been provided by remodeling of the Auxiliary-operated Coffee Shop.

Formerly able to handle 1200 persons daily, the shop now is equipped to accommodate several hundred more.

The entire Coffee Shop area has been brightened by a Williamsburg blue and white color scheme. White tables, blue chairs and booths, white shutters at the windows, a white wrought-iron railing along the cafeteria counter and blue and white tile flooring are the major changes. Seating capacity remains at approximately 125.

The tables and aisles were designed to accommodate persons in wheel chairs and two lounging banquettes were installed around circular posts to provide a place for patrons to sit while waiting for companions.

Tentatively planned is a "coffee break on wheels" which will provide table service of coffee and sweet rolls.

The previously congested kitchen has been enlarged, with more counter space and a new two-section walk-in cooler.

Coffee Shop chairman is Mrs. Eunice Zalk.

Gift Shop Expanded

More than 175 square feet of storage and display space have been added to the Gift Gallery by recent extensive remodeling.

Adjoining the Coffee Shop, the Gift Gallery has the same new Williamsburg blue and white color scheme.

Mrs. Alfred Goldman is chairman of the Gift Gallery.
The Auxiliary Way

New Shops Viewed, Skit Presented, At Open House

The Jewish Hospital Auxiliary held an open house at the hospital in its enlarged and remodeled Coffee Shop, Gift Gallery and its new Clover Garden Flower Shop, December 2.

Members of the medical staff, board of directors, Auxiliary board of directors, and hospital administration were present to inspect the new and improved facilities and to see a musical production, "The Auxiliary Way" telling the 11-year history of the Auxiliary.

Mrs. Arthur Sherman, Auxiliary publicity chairman, co-ordinated the evening's events, with the assistance of Mrs. Eunice Zalk, Coffee Shop chairman, Mrs. Alfred Goldman, Gift Gallery chairman, and Mrs. Richard Ferer, Clover Garden chairman. Mrs. Earl Susman is president of the Auxiliary.

Hostesses for the evening included Mrs. Sidney Shoenberg, Jr. and past Auxiliary presidents Mrs. Alvin Bauman, Mrs. Edward Schweich, Mrs. Benjamin Loeb, Mrs. Robert Aronson, Mrs. Harry Milton, Mrs. Joseph Rawitch, Mrs. Harry W. Loeb, and Mrs. Sander Zwick.

"The Auxiliary Way" was written by Mrs. Arnold Dankner and directed by Mrs. Joseph Frager. Cast members included Mrs. Alex Berg, Mrs. Dankner, Mrs. Frager, Mrs. Edward Golde, Mrs. Stanley Levy, Mrs. Carl Lysy, Mrs. Barry Mandel, Mrs. David Milton, Mrs. Sidney Savan, Mrs. Simon Toder and Mrs. Leah Wolf.

Days of Vine and Roses in Hospital
As Auxiliary Opens Clover Garden

Everything's coming up roses, daisies, potted plants and even artificial flowers in the Auxiliary's recently opened Clover Garden.

Located in the ground floor lobby underneath the main stairwell on the Kingshighway side of the hospital, the shop is approximately eight by ten feet and contains a refrigerated mirror-backed display case for cut flowers.

At the entrance to the shop are small ice-cream tables and chairs where customers may write gift cards. Patrons may phone orders in to the shop at FO 7-8080, Station 243, for immediate delivery to hospital patients. No deliveries will be made out of the hospital.

The 18 volunteers who staff the Clover Garden were trained in flower arranging by a professional designer, Mrs. Thelma Turner, who donated her services.

Since there is no nearby flower shop, the new unit should be welcomed by patients, their visitors and friends, Auxiliary president Mrs. Earl Susman said.

A Professionally-Trained Volunteer Arranges a Bouquet in the New Shop, Open Daily.
A REAL DUMMY HELPS TEACH HOUSE OFFICERS CARDIAC RESUSCITATION. NAMED "RESUS-ANNIE", THE LIFE-LIKE MANNEQUIN FOR RESUSCITATION TRAINING INSTANTLY SPINS HER DIALS TO SHOW HOW EFFECTIVELY SHE'S BEING TREATED. HERE DR. WILLIAM DICKLER, DIRECTOR OF ANESTHESIOLOGY, TAUGHT THE TECHNIQUE TO THE HOUSE STAFF.

Dr. Freinkel To Be Visiting Professor Jan. 18-Feb. 1

Dr. Norbert Freinkel, assistant professor of medicine at Harvard Medical School and assistant physician at the Thorndike Memorial Laboratory in Boston, is to serve as Visiting Professor of Medicine at the hospital from January 18 to February 1.

Dr. Freinkel is on the editorial board of the Journal of Clinical Endocrinology and Metabolism. He is a consultant in endocrinology to the U.S. Public Health Service Hospital in Boston and is consultant in endocrinology and metabolism to the U.S. Army's Quartermaster Research and Development Center in Natick, Mass.

A fellow of the American Cancer Society and the National Foundation for Infantile Paralysis, Dr. Freinkel is also an Investigator of the Howard Hughes Medical Institute. He has published more than 85 articles, principally on endocrinology and metabolism.

Dr. Freinkel's memberships include the American Physiological Society, Society for Experimental Biology and Medicine, American Diabetes Association, American Society for Clinical Investigation, American Coiler Association, Endocrine Society, New York Academy of Science and American Federation for Clinical Research. His honorary societies include Alpha Omega Alpha, Sigma Xi and Phi Beta Kappa.

A 1945 graduate of Princeton University, Dr. Freinkel received his M.D. in 1949 from New York University College of Medicine. He was born in 1926 in Mannheim, Germany.

A pert radiology technician has a developing hobby which you have to be kept in the dark to appreciate.

The technician is Mrs. Patricia Poznanski, and her hobby is x-raying flowers to produce a spectacular artistic effect on the developed film.

"Gladiolas, snapdragons, bell-of-Ireland, orchids and ferns produce the most interesting results," Pat said. "Those flowers aren't dense and the details on the petals and stems show up beautifully."

"I wouldn't be interested in chrysanthemums, carnations or roses. They're too compact."

Pat uses a special—and secret—technique for x-raying flowers. She uses film which is more sensitive than that used, for example, to x-ray bones, film which requires more radiation for exposure and more time for developing.

She buys her own film and pursues her unusual hobby when no patients come in while she is on call.

"Once I threw one of my flower shots in with a bunch of negatives the radiologists were viewing" Pat confessed. "The doctors finally arrived at a diagnosis though: fungus disease!"

Pat has worked in the x-ray department since her graduation in 1961 from the hospital's x-ray technology school. She is married to Thomas Posnanski, a research fellow in the hospital's clinical laboratories.

Like other girls, Pat dreams of having someone send her orchids. "It would really be thrilling to x-ray them," she said.

New Lab Textbook

Editors and major contributors to a recently-published two-volume work, Clinical Laboratory Methods and Diagnosis, are Dr. Sam Frankel, director of biochemistry, Dr. Alex Sonnenwirth, director of microbiology, and Dr. Stanley Reitman, a member of the teaching staff of the department of medicine.

The 2092 page textbook took three and one-half years to compile and lists 29 contributors, several from foreign countries. It has more than 3000 references.

It includes discussions of procedures for all types of laboratories and covers such special topics as crime-study lab work and preparations of solutions for preserving museum specimens.

Contents of the book were based on data from a survey of several hundred laboratories throughout the country and an analysis of records of laboratory tests performed at Jewish Hospital.
HOME CARE TRAINING CENTER

3 Seminars This Fall

Three instructional events, conducted by the Medical Care Rehabilitation Department, are planned for the fall.

A symposium on research in long term care was held September 25 to 27; another on the role of the social worker in long term illness on November 6 to 8, and one on the role of the physical therapist in home care and nursing home programs was held December 5 to 7.

At each seminar the program includes formal lectures, panel discussions, practical demonstrations and visits to patients in their homes.

Members of the Training Center and hospital staff speaking at the seminars include: Dr. Franz U. Steinberg, director, department of rehabilitation, and project director of the Training Center; David A. Gee, acting executive director; Dr. L. Jerome Flance, medical director, home care department, and assistant director of the Training Center;

Mary F. McKeever, director, department of social work, and social work associate of the Training Center; Dr. Morris Alex, medical director, home care program, and chairman of the Rehabilitation Committee; Robert L. Tolin, director of health and hospitals, City of St. Louis; Andee A. Stauffer, director of the Training Center; Albert Wessen, co-chairman, Medical Care Research Center, and behavioral sciences associate of the Training Center;

Irwin Albrecht, assistant director; William Yung, administrative assistant, and administrative associate of the Training Center; Robert Hitchcock, coordinator, department of rehabilitation; Helen Tolin, clinical supervisor, physical therapy; Elizabeth S. Law, physical therapy supervisor, occupational therapy; Jewel Cole, occupational therapist; and Jean Jackson, nursing supervisor, department of rehabilitation.

Social Workers Review Role in Home Care

At the seminar on the role of the social worker in long term illness, November 6 to 8, the need for increased understanding and special skills in care of the chronically ill in homes, nursing homes and hospitals was discussed.

Some 75 social workers heard speeches on medical, psychological, social and economic characteristics of the chronically ill, aged and handicapped. Costs of long term care were discussed.

Guest speakers included Dorothy M. Stauffer, director of social work and social work associate, home care program, hospital division, department of health and hospitals, City of St. Louis; Lillian F. Mark, assistant director, social service department, Memorial Hospital for Cancer and Allied Disease, New York; Duran Tague, associate director, department on practice, National Association of Social Workers, New York, and Earleen Jamison, associate director of service, Community Nursing Services, Philadelphia.

More Research Needed In Chronic Disease, Health Personnel Told

The symposium on research in long term care, September 25 to 27, was conducted by the Training Center and the Medical Care Research Center, a joint effort of the hospital and Washington University. Approximately 75 public health officials, educators and physicians heard speeches and panel discussion exploring problems and reporting results of investigation in care of the chronically ill.

"Chronic treatment versus home care was debated and economic factors related to treatment of chronic illness were reviewed," Dr. Steinberg asserted.

"Because research involved treatment of chronic problems often are not apparent for months or years, research is needed to determine the most effective ways of keeping chronically ill patients functioning in the community as long as possible," he added.

"Since family relationships, living and working conditions, and emotional problems have an important bearing on the progress of disease, physicians, sociologists, psychologists, biochemists and many others must join together to evaluate the most effective methods of control of long-term disease," he said.

Among the seminar speakers was Dr. Thomas M. McKenrow, professor of social medicine and chairman of the Board of Studies in Medicine at the University of Birmingham, Birmingham, England. His topic was: "Research in Long-Term Care: The English Experience." A member of the Ministry of Health's Standing Medical Advisory Committee, Dr. McKenrow is also a member of the United Nations' Office of Preventive and Social Medicine.

He has been associated for the past three years with the School of Architecture, University College, London, to develop a design for a balanced hospital community.

Many guest speakers

Other guest speakers included Dr. Milton I. Roemer, School of Public Health, University of Washington; Robert W. Kleiner, Ph.D., Washington University; Marvin B. Summan, Ph.D., Western Reserve University; Theodore D. Woolsey, Department of Health, Education and Welfare.

Olin W. Anderson, Ph.D., research director, Health Information Foundation, University of Chicago; Bernard M. Kuttner, Ph.D., Albert Einstein College of Medicine; Dr. Max F. Pepper, Yale University Medical School; Dr. Harold N. Willard, Thayer Hospital, Waterville, Maine; and Charles H. Fragle, Ph.D., Johns Hopkins University.

Speakers from the Medical Care Research Center include: Nicholas J. Demerath, Ph.D., co-chairman; Albert F. Wessen, Ph.D.; Rodney M. Coe, Ph.D., D. Kent Rice, Ph.D., and others.

New Staff Members

Two new members of the hospital administration are Eugene Hanes, coordinator of the Home Care Training Center, and Steven Sandler, administrative coordinator of the Dental Care Demonstration Project.

A sociologist, Hanes will be planning and evaluating Training Center programs. He is former executive director of the International Institute of St. Louis and executive secretary of the Boys' Club of St. Louis.

He received his A.M. in 1961 and A.B. in 1959 from St. Louis University. He is 31 years old and was married November 20.

SANDLER

HANES

Sandler, who graduated from Washington University's School of Engineering in 1961, has worked in the hospital's industrial engineering department as well as in the Medical Care Research Center. He is working towards an M.A. in engineering at Washington U. He is 24 years old and single.

Sandler succeeds Daniel M. Anzel who is studying for his doctorate in public health at U.C.L.A. Anzel was married December 22 to Anne Smith, a research assistant in the hospital's Medical Care Research Center.

Home Care Newsletter

A Home Care Newsletter was launched recently as a part of the Training Center's educational program.

Published monthly, the Newsletter reports home care news to the nation, as well as the hospital. It is the only source of such information, according to Eugene Hanes, Training Center coordinator.

Individuals and organizations wishing to receive the Newsletter may write or call Mr. Hanes at the hospital, station 495.
Visiting Professor
Hospitals Misused, Dr. Dock Charges; Predicts Changes in Insurance Plans
Although November's Visiting Professor of Medicine, Dr. William Dock, has spent most of his life in hospitals, the only time he was ever a patient in a hospital was 52 years ago when he had his appendix removed at St. Luke's here in St. Louis. Dr. Dock said in an interview recorded for radio station KFUCO during his stay here.

"It's not that I've never been sick," Dr. Dock said, "but I don't believe in going to a hospital with a minor illness. I'd much rather stay right at home."

"Past performance" of the hospital, he noted. "Having hospital insurance, most people tend to enter hospitals for the sort of illnesses that are going to be there for a number of days without any insurance, they would not have gone to the hospital at all.

"Hospital insurance costs are rising because more patient days are being used that could be handled at home, and are perhaps the pre-insurance experience," he noted. "It's not the patient's fault entirely; doctors have so many patients that they find it much more practical to look after the sick ones in a hospital than to drive all about town visiting them at home."

More efficiency needed
Dr. Dock predicts considerable changes in the way insurance is handled and in the use of hospital facilities. Insurance, he believes, will be like the $50 deductible commonly purchased for automobiles. "Knowing to have paid the first $50 ourselves makes us a little more cautious about our driving perhaps, and if the same policy applied to hospitalization, we might hesitate a little about going to the hospital," he said.

Hospitals will have to make more efficient use of their facilities to accommodate the rising number of patients, Dr. Dock stated. "More intensive care units are needed," he said. "And more cataract operations can be performed if the hospital operating rooms are used more efficiently."

When many patients can walk about the whole time they're in the hospital, it seems a little foolish to bring the meals to the patients." Computers
Computers will have an important role in medicine of the future but they'll never replace doctors, Dr. Dock believes. "A computer could help the doctor of a patient with a chronic complicated diseases, because it might save him from over-looking or forgetting some rare disease for which effective treatment is available," he said.

But computers can only be of value for chronic complaints where there's time to collect the necessary symptoms, signs or laboratory findings. When you go into the hospital with an acute pain in the belly, you haven't got time for a computer. Most of our illnesses begin as something acute and doctors are needed to handle acute problems.

"There has been less prestige to the medical profession as a whole in recent years."

"We have Nothing More To Say"
Dr. Dock

Hospitals Mourns JFK

The hospital joined the nation in mourning the death of President John F. Kennedy.

The Kingshighway entrance was draped in black crepe on Monday, November 25, and on the same day some 75 patients, visitors, employees and members of the medical staff attended memorial services conducted in the hospital chapel.

Members of the hospital family were invited to give donations to the Auxiliary-sponsored Tribute Fund. Acknowledgement of each donation was sent to the wife of the late President.

Humor Seasons Special Diet Cards

"All I get is tea and broth! Can't I have some decent food for a change?" a patient complained. "My doctor put me on this diet a while ago.

The dieticians couldn't explain her diet was called a "doctor's order," but they did find that explaining the situation made the patient happier.

Realizing that patients complaining about hospital food often make good guesses only being aware they have been restricted to special food, Dr. Axelrod, food service director, designed cheerfully informative messages for patients on each of the hospital's 22 special diets.

Printed on colored 4" x 7" cards, the messages such as those pictured here are delivered to patients with their first meal.

A dietitian visits each patient shortly afterwards, to explain what foods are included in the special diet and to try to fit the limited menu to individual preferences.

Of the cards not shown, one for a bland diet for persons with ulcers states, "The lack of any seasoning in your food will require you to give up the idea of imagination on your part, DREAM A LITTLE—We'll do the rest."

One with a drawing of a toasty grizzly asks patients to "Please bear with us!" Another featuring a clock and describing a diet requiring feedings every two hours reads, "This time it's not our fault."

An energetic rooster announces an egg diet, asking, "Not worth crowing about?"

A rabbit pops out of a hat to announce, "This is from your doctor's bag of tricks."

To compensate for the restrictions on food, one card offers patients that any kind of fruit, even if out of season, and another provides solace, commenting, "This diet is not very tasty perhaps, but very good for you."

"Patients really relish the special diet cards," Axelrod said. "They savour the messages, which add spice to otherwise distasteful news."
Isometric Exercise

Isometric exercise—that is, exercise without moving muscles—which has been championed by many athletes and coaches, has certain uses in medicine, reported Dr. Franz U. Steinberg, director of the hospital's division of rehabilitation and chronic disease.

This type of exercise is of special value in improving muscle strength in patients whose joints should not be moved," Dr. Steinberg said, "Such patients include arthritis where moving joints is too painful, recent amputees, or those who for other medical reasons are on strict bed rest.

Isometric exercise is based on the principle that a muscle which is forced to work beyond its usual intensity will grow and develop. It involves attempting to push or lift immovable objects or simply to hold them.

Maximum muscle tension is maintained for six to ten seconds, and, according to Robert Hickok, rehab coordinator, 15 such exercise bouts daily for several weeks will improve significantly the strength of any given muscle.

The biggest selling point of isometric exercise is that it's done without elaborate equipment, Hickok pointed out. A person can exercise by attempting to push a wall or lift a door by its handle. In a hospital setting, weights and other special devices are used so that the amount of muscle tension can be measured.

Isometric exercise would be a sound venture for anyone who wanted to improve his muscle strength, because in normal everyday living we get little opportunity to work out an organized exercise routine," Hickok said.

Both Dr. Steinberg and Hickok felt that isometric exercises and other isometric exercises such as push-ups and running were about equal in muscle building potential.

Any form of muscular activity is good," Hickok said. "The efficiency of exercise is determined only by the zealousness of application. Many people work hard at exercise for a few days but then get lazy," he lamented.

Hearing Defects Studied With Brain Waves

Hearing deficiencies are often discovered when children are only a few months old. Until recently there were no reliable ways to test the hearing of babies and toddlers who can't explain what and if they hear as can older children and adults.

With special electrical equipment, testing methods have been devised which don't require the child to take an active part at all; in fact, the child sleeps during the entire painless test which measures his hearing and indicates possible causes of hearing impairments.

These new methods, which were studied in Jewish Hospital's division of audiology and speech pathology, were discussed by Dr. Robert Goldstein, division director, at the national meeting of the American Speech and Hearing Association in Chicago in November. Research on the tests was conducted at the hospital by Dr. Goldstein and Dr. David Kendall, now associate professor of special education at the University of British Columbia.

"The younger the child whose hearing deficiencies are correctly assessed, the sooner he can be started on the proper rehabilitative and educative track, and the more likely he is to be better prepared for a happier, more productive life," Dr. Goldstein said.

"Parents often notice defects in their child's hearing earlier than defects in other functions as breathing and pulse rates. This procedure worked well with older children and adults but not with younger children whose nervous systems are too poorly developed to provide consistent reactions.

Brain waves analyzed

Reliable responses to sound were seen to show up in the brain waves patterns of sleeping children. The researchers found, furthermore, that certain patterns were related to the probable cause of the hearing difficulty. For example, children with brain damage had patterns different from children with damaged auditory nerves.

"We plan to re-test these children at various stages of their development," Dr. Goldstein said. "Eventually, on the basis of a later test-record from a 25-year-old who can also tell us what he hears, we may be able to look at a similar year-old and say that the infant has the same kind of hearing defect."

"Learning how the brain reacts to sound has implications way beyond hearing," Dr. Goldstein pointed out. "Finding out how different portions of the brain respond to sound and what the nature of the response is, may provide methods for diagnosing disorders of any of the senses, he said.

Results of the hearing research at the hospital were published in the November 1963, issue of the Journal of Speech and Hearing Disorders under the title "Electroencephalographic Auditory in Young Children."
114 Teenagers Serve As Jr. Volunteers

One hundred and fourteen teenagers received awards August 22 for more than 50 hours of voluntary service to the Hospital.

Presentations were made to 10 boys and 101 girls by Mrs. Mordecai B. Brown, director of auxiliary services, at a noon luncheon in the hospital's Steinberg Auditorium.

Heading the list of teenage volunteers was Susan Seelig, who has accumulated 523 hours of work since June, 1960. Other candy-striper receiving special mention for their total hours of service include: Jane Shuman, 490 hours since April, 1961; Lynne Marshak, 462 hours since March, 1962; Risa Moll, 424 hours since November, 1960. Ilene Elias, 398 hours since September, 1962.

Christine Bagg, Cheryl Goldberg; Robin Kopelow, Merline Lacy; Vivian Tait and Marsha Weil were honored for between 250 and 299 hours of service.

Awards for 200 to 249 total hours were presented to Brenda Brown, Michele Darvis, Sherman Novoson, Elizabeth Petrie, Marcia Levinstein, Jane Livingston, Barbara Balloni, Roberta Becker, Marcia Levine, Barbara Barrett, Susanne Bayer, Robert Bleitner, Rosellen Blumoff, Deborah Chait, Robert Chod, Sandra Cohen, Sarellen Cristal, Carol Easches, Frances Hamburg, Gay Handelman, Vir- gini Hillemeier, Nona Joseph, Gay Kraz- over, Linda Kranzberg, Sheri Liebert, Janice Mannschaed, Noel Messing, Han- nah Middleman, Carol Michler, Joy Mor- ris, Sherman Novoson, Elisabeth Pieti, Elaine Schermer, Cindy Siegel, Stephanie Solar, Judith Ulker, Sheppie White and Samuel Ziskind.

Receiving awards for 150 to 199 hours of service were Jane Abrams, Nettie Anderson, Janet Deddens, Nikki Dino, Lesle Disman, Cheryl Klaushe, Harriet Krevin, Marcia Levinstein, Jane Livingston, Bar- bara Lucas, Kathy Marerek, Susan Offer- hach, Myra Rosenthal and Alice Sentina.

Those honored for 100 to 149 hours worked include Barbara Barrett, Susanne Bayer, Robert Bleitner, Rosellen Blumoff, Deborah Chait, Robert Chod, Sandra Cohen, Sarellen Cristal, Carol Easches, Wendy Flusser, Mary Freeman, Donald Galt, Carol Goldstein, Cathy Goldstein, Frances Hamburg, Gay Handelman, Vir- ginia Hillemeier, Nona Joseph, Gay Kraz- over, Linda Kranzberg, Sheri Liebert, Janice Mannschaed, Noel Messing, Han- nah Middleman, Carol Michler, Joy Mor- ris, Sherman Novoson, Elisabeth Pieti, Elaine Schermer, Cindy Siegel, Stephanie Solar, Judith Ulker, Sheppie White and Samuel Ziskind.

Awards for 50 to 99 total hours were presented to Sandra Ahearn, Ernst An- drew, Barbara Balloni, Roberta Becke- mayer, Linda Beck, Rebecca, Betsy Berry, Audrey Brown, Jackie Brown, Polly Brown, Mary Chancelor, Judy Ernst, Sue Ann Fargay, Sharon Garrett, Linda Glad- stone, Karen Goldman, Sharon Gomberg, Sharon Goutart, Patrice Harting, Marilyn Hechter, Janet Hochman, Judith Hoffman, Pamela Hezen, Nancy Kaufar, Barbara Kremer, Peggy Lacombe, Carolyn Meyer, Peggy Nakos, Nancy Kel- lours, Nettie Klein, Barbara Lackey, Betsy Porsche, Prudy Prager, Robin Price, Jane Rosen- haus, Margaret Rothenberg, Virginia Roth- berg, Beth Rubenstein, Jeff Schlesinger, Rachel Soffer, James Spiegel, Stephanie Stein, Madalaya Weissman and Ellen Yawitz.

Pittsburgh Physician Is Visiting Professor

Dr. Eugene Debe Robin, professor of medicine at the University of Pittsburgh School of Medicine, served as Visiting Pro- fessor of Medicine at the hospital from December 2 to 15.

Dr. Robin is former instructor in med- icine at Harvard Medical School and jun- tor associate in medicine at Boston's Peter Bent Brigham Hospital. His special interest is clinical pathology.

A 1959 graduate of the University of Chicago, Dr. Robin received his M.D. from George Washington University in 1954. Dr. Robin is a member of the American Physiological Society, the American Soci- ety for Clinical Investigation, the Amer- ican Federation for Clinical Research, the American Heart Association, the Thoracic Society and the American College of Phys- icians.

Chanukah Events Held

For the sixth successive year, a Chanu- kah party was held for hospital patients in memory of the birthday of Samuel M. Koplar, a St. Louis paint manufacturer who died March 6, 1948. Funds were pro- vided by his widow, Mrs. Samuel M. Kop- lar, and their daughters, Mrs. Earle Rosen and Mrs. Ralph Cohen.

More than 60 patients attended the party December 13 in Steinberg Auditorium of the hospital.

Hospital chaplain Rabbi Lawrence Siegel re- cted the history of the Chanukah fes- tival and Cantor Jacob Remer of B'Nai Amoona Congregation sang Chanukah songs.

The "Young At Heart" choral group, whose 16 members are residents of the Jewish Center for the Aged and whose average age is 81, entertained with Eng- lish, Yiddish and Hebrew songs. Mrs. Ida Stack is choir director; Mrs. Rose Calod- ney is accompanist.

Refreshments were served and gifts were distributed to all long-term patients, in- cluding those unable to attend the party. Mrs Sally Pugh, recreation director of the hospital, arranged the event with the assistance of Mrs. Paul Kranzberg, patient party chairman of the hospital auxiliary.

On each day of the eight-day holiday, candles were kindled in ceremonies in the hospital's first-floor lobby.

Two Employee Deaths

Hospital employees regretfully noted the deaths of Edna Boyd, operating room scheduling secretary, and William Morris, a cook.

Mrs. Boyd, who worked at the hos- pital since 1957, died November 8 from leukemia. She is survived by her husband and son.

Mr. Morris, a hospital employee since 1960, died November 23 following a heart attack. He is survived by his wife and two children.

Hospital Chaplains Serve 3 Major Faiths

Recognizing that providing for a pa- tient's spiritual needs is an important part of complete care, the hospital maintains an active service program for persons of the three major religious faiths. A non-sectar- ian institution, Jewish Hospital serves about an equal number of Jews, Protestants and Catholics.

When a patient is first admitted to the hospital, he is asked if he would like his clergyman notified that he is a patient here. Postcards to clergy men are sent daily by the admitting office.

This office also prepares a list of the persons admitted each day, along with their church affiliation, if any. The list is forwarded to the nursing service office which keeps it in a notebook for clergy- men to consult to see if any members of their congregation are in the hospital.

For patients who have no clergyman or who are unable to reach one, Jewish, Protestant and Catholic chaplains are available 24 hours a day.

The Jewish chaplain, Rabbi Lawrence Siegel, was appointed by the Jewish Fed- eration of St. Louis; the Protestant chap- lain, the Rev. Daniel Simundson, by the Metropolitan Church Federation of Greater St. Louis; and the Catholic chaplains, members of the Holy Family Fathers, by the Archdiocese of St. Louis.

Religious services for patients, their fam- ies and visitors, and hospital staff mem- bers are held on Saturday mornings and on major Jewish holidays in the hospital's chapel. The chapel is open to everyone at all times.
Dr. J. G. Probstin Receives $65,000 For Nursing Research at Hospital

A bequest of $65,000 for medical and surgical research at the hospital was provided for Dr. Jacob G. Probst in the estate of the late Menko E. and Eilifie E. (Mrs.) Probstin, it was announced today.

Dr. Probstin, a senior surgeon here, plans to conduct further research in pancreas and to establish a scholarship at the School of Nursing for graduate education in nursing, to be known as the Lillian E. Green Scholarship.

Audiology Moves

The division of audiology has moved to the ground floor from new quarters in the north end of the hospital basement. Finishing touches are still being applied to the new facilities which include extensively equipped speech and hearing testing areas and additional office space. The division's telephone numbers remain as stations 279, 292 and 485.

Tickets, Please!

Should last-minute hardships force cancellation of your entertainment plans, you may welcome the chance to use your tickets. Persons wishing to donate tickets may call the hospital's personnel office, FO 7-4800, Stx. 350, Monday through Friday before 5 p.m. After 5 p.m. or on Saturdays or Sundays, call the hospital switchboard.

Nursing Supervisors Program Changed

Assigning nursing supervisors to specific areas will lead to more efficient nursing service administration, according to Miss Edna E. Peterson, director of nursing. Area supervisors are responsible for employment, orientation and evaluation of personnel, problem-solving, patient contact and supply of nursing care in their units. Head nurses and assistant head nurses report directly to the area supervisor.

The list of graduates includes: Sandra Jean Bell, Barbara Berry, Doris Bryant, Ruth Ann Buchmann, Mrs. Martha Ann Garney Patterson, Patricia Ann Gage.

Miss Margaret Gene Lindsey, a freshman, received a silver key and the Franc Award, a $100 U.S. Savings Bond, as the highest-ranking first year student. Honorable mention for excellent scholarship during the first year went to Misses Mary Ann Wolf, Lynanne Hastings, Jeanne Taylor and Patricia Laminburg.

Emmalee Garbee Retires After 39 Years Here;
Headed School of X-Ray Technology

"Why write a story about me?" asked Emma Garbee when her name was mentioned in local newspapers. "I'm just an ordinary sight-seer," she said. "I've never seen anything extraordinary before." But the fact that drinking life's cup to the very last drop requires a certain approach, Miss Garbee's interests extended far beyond her job as director of the school of x-ray technology. She's a gourmet cook, enthusiastic gardener, professional painter, amateur poet and competent spokesperson. She knits, emboiders, crochets, has traveled extensively and has scale of collectors. She also is a skilled interior decorator.

For these reasons, Miss Garbee was the subject of a feature story in the St. Louis Globe-Democrat. "This hospital has been a wonderful place to work," she told the Globe reporter. "I'm crazy about the doctors; they've been wonderful." Recalling for the Globler her early days at the hospital, Miss Garbee said, "The machinery wasn't shockproof when I started. There were live wires hanging all over the place and fire flew through the air. I well remember standing in a dark room with blue flame crackling all around. And we did get shocked, don't think we didn't. It's a pleasure to teach now that you know that your students won't get electrocuted."

Devoted to students
Miss Garbee's culinary skills are such that people longing for her Christmas cookies in July. Invitations to dinner at her apartment in the nurses' residence were much cherished. An avid recipe collector, Miss Garbee once authored a cookbook, although it remains unpublished. Always active, Miss Garbee is said to have a strong backhand in tennis and to play straight down the fairways in golf. She enjoys fishing and often goes to southern Missouri on fishing trips.

Miss Garbee has carefully tended the garden behind the nurses' residence, making it a showplace for years. "The weeds are taking it over now, I'm afraid," she said. "The heat this summer just ruined everything." She is looking forward to living in her retirement at her sister's home in Springfield, Mo., where "there's an acre of flowers." Her light verse has enlivened birthday parties and other celebrations in the radio department through the years. Miss Garbee views retirement as "having a smile."

"As a hobby" Miss Garbee took five years of portrait painting classes in Washington University's evening school; now she concentrates mostly on still lifes in oils. Her light verse has enlivened birthday parties and other celebrations in the radio department through the years. Miss Garbee views retirement as "having a smile."

Prospective Interns
Learn About Hospital

The number of applicants for internships at Jewish Hospital is much greater this year than at this time last year, Dr. Burton Shatz of the House Staff and Education Committee, reported. Applications have been received from students at New York State, Chicago, Illinois and other institutions, as well as Washington, St. Louis, and Missouri Universities.

Prospective interns are encouraged to visit the hospital and confer with staff members. Twenty-eight seniors are becoming familiar with hospital routines by working either night externs or clerks. Dr. Shatz said. The externs, from both Washington and St. Louis University medical schools, hold year-round jobs assisting interns and residents on such clinical services as medicine, surgery, obstetrics and gynecology, and adult psychiatry. The clerks, all seniors at the Washington University, take six-week courses here for credit in medicine and surgery. During the year, clerks bring even more seniors into contact with the hospital teaching staff, Dr. Shatz pointed out.

About seventy-five per cent of the hospital's clerks hold faculty appointments at one or the other of the two local medical schools and are available to answer student questions about the hospital, Dr. Shatz said.

Dr. Michael Karl Named Acting Director
Of Hospital's Department of Medicine

Dr. Michael Karl has been named acting director of the department of medicine. He succeeds Dr. Albert B. Eisenstein who resigned September 1 to devote more time to teaching and research.

Dr. Karl is a 1936 graduate of the University of Wisconsin. He received his M.D. from the University of Louisville in 1938. He interned at St. Louis City Hospital from 1938 to 1939, and in the next year began a residency in pathology at City Hospital and held a fellowship in cardiology at Washington University. He served a year as resident in internal medicine at City Hospital from 1940 to 1942. He served as a captain in the U.S. Army from 1942 to 1946.

Dr. Karl is an assistant professor of clinical medicine at the Washington University medical school.

Like other hospitals, Jewish is often invited to send representatives to various schools to talk to students. This year medical staff members have made trips to the state universities of Arkansas, Missouri, Kansas, Illinois, Florida, Tennessee, and the University of Louisville.

The hospital distributes an educational catalog to medical school seniors in Missouri, medical school deans, and others requesting it. The Women's Auxiliary financially supports the catalog as well as other activities for prospective interns. The hospital offers 17 medical and 2 dental internships and participates in the National Intern Matching Plan (NIMP), which serves as a clearing house. Both hospitals and medical students are matched through this central agency according to their preference for each other.

Dr. Mendelsohn Heads Ambulatory Care

Dr. Robert S. Mendelsohn has been named director of ambulatory care services at the hospital. His responsibilities, which began December 1, include the outpatient clinic, emergency room, employee health service and student nurse health service.

Dr. Mendelsohn succeeds Dr. Ray Greenbaum, who died in 1960. The professional program of the department has been handled by Drs. Sidney Jick and Dan B. Moore since Dr. Greenbaum's death.
