Arthur E. Strauss Lecture

DR. E. GREY DIMOND SPEAKS ON CARDIOLOGY

Dr. E. Grey Dimond, former St. Louisan and internationally renowned cardiologist now at Scripps Institute, La Jolla, Calif., spoke on November 30 at The Jewish Hospital of St. Louis.

Dr. Dimond, chief cardiologist at Scripps Institute, delivered the 7th Annual Arthur E. Strauss Lecture entitled, “Usefulness of the Exercise Electro-Cardiogram in the Diagnosis of Coronary Artery Disease.” The speech was open to St. Louis physicians and was held in the Mark C. Steinberg Auditorium.

Dr. Dimond was born in St. Louis, and received his medical degree from the University of Indiana Medical Center where he served a one year internship. He later studied postgraduate cardiology at Harvard University and Massachusetts General Hospital.

As an author, Dr. Dimond has published 136 scientific articles, 16 medical education articles, and written 4 medical books. Recently he co-edited a book, Paul Dudley White: A Portrait, published this year. (In 1956 Dr. Dimond received the Paul Dudley White Traveling Scholarship and Visiting Lectureship for India, Thailand, the Philippine Islands, Taiwan, and Japan.)

He delivered a Fulbright lecture in 1957 in the Netherlands, and was visiting professor at the Institute of Cardiology, London, England in 1959.

A director of the Cardiac-Pulmonary Institute at the Scripps Foundation since 1960, Dr. Dimond is also a member of the Clinic and Research Foundation in La Jolla and at the same time is a lecturer in Medicine at the University of Kansas Medical School. From 1953 to 1963 he was civilian consultant in medicine for the U.S. Bureau of Labor in Washington, D.C. Dr. Dimond is a member of 11 research and medical societies, and has six honorary professorships and memberships in South America and the Far East.

Strauss Lecture

The annual Strauss Lecture has been held in honor of Dr. Arthur E. Strauss’s birthday since 1959. Dr. Strauss, 76, a former president and secretary of the Jewish Hospital medical staff, is now a consultant in medicine and cardiology at Jewish Hospital. Dr. Strauss was director of the hospital’s Department of Medicine. He graduated a Harvard Medical School. Dr. Strauss is also assistant professor of Clinical Medicine Emeritus at Washington University School of Medicine, and formerly chief of the medical clinic and heart clinic there. In 1957 Dr. Strauss received the Distinguished Achievement Award from the St. Louis Heart Association.

The Jewish Hospital of St. Louis has just received two $50,000 pledges for the hospital’s unrestricted endowment fund. The announcement was made jointly at a recent board of directors meeting by Joseph F. Ruwitch, president of the board, and Gordon Scherck, vice-president of the board.

The Ruwitch gift of $50,000 will be known as the “Joseph F. and Elizabeth R. Ruwitch Unrestricted Endowment Fund.” The Scherck gift is to be named the “Scherck Charitable Foundation Unrestricted Endowment Fund.”

These contributions from the Ruwitch and Scherck families were given in recognition of the vital need for unrestricted funds to sustain and expand the present teaching and research programs. Jewish Hospital is a major teaching affiliate of Washington University Medical School. The extensive research program is supported by federal grants and income derived from endowment funds.

During the past year the hospital’s full time staff has increased from 26 to 38 physicians. Medical students rotate on a regular basis through the hospital’s medical and surgical services. There are presently 62 interns and residents taking advanced training in the hospital.

As a metropolitan, non-sectional health care facility, Jewish Hospital admits more than 18,000 in-patients annually, and further serves the St. Louis community by providing ambulatory care facilities for 40,000 out-patients visits.

“In order to continue our standards for patient care, research and education, we must have the necessary funds with which to work. We are hopeful...” (Continued on Page 6, Col. 1)
RABBI LAWRENCE SIEGEL, was recently a guest speaker on KMOX-TV, "Frankly Speaking," a topic concerning broken homes and child-parent relationships.

MISS BARBARA BURNER, C.R.N.A., anesthetology, was recently elected secretary-treasurer of the Missouri Assn. of Nurse Anesthetists at its annual meeting.

MISS LORETTA MARK, C.R.N.A., was elected to the Association's Board of Trustees.

MRS. HELEN A. BROWN, R.N., assistant head nurse in the rehabilitation nursing division, recently attended a four-week course at the Texas Women's University in Houston.

RAYMOND J. HIGHFILL, chief accountant, was recently elected president of the Greater St. Louis Chapter of the American Association of Hospital Accountants. He will assume office for the group of 60 members beginning January, 1966.

A crash program to assist states and local communities in developing certifiable Home Health Services under Medicare was proposed last week in Washington, D.C., at a meeting called by the Medical Care Division of the Department of Health, Education and Welfare.

At the meeting of the seven Regional Home Care Training Centers were Dr. Franz U. Steinberg, Director, and Mrs. Sandra C. Howell, Coordinator of The Jewish Hospital of St. Louis Training Center; and Dr. Aaron Brenbaum, Medical Director of Jewish Hospital's Division of Home Care.

"Local communities are searching for information on how they can prepare for Medicare," said Dr. Steinberg, "and we hope to provide consultation to local communities on personnel and program standards that will be required under the law, jointly with State Health Departments who will be the certifying agencies under Medicare."

Assimilation

Most communities will be able to shift gears quite smoothly to design the necessary minimum program under which persons over 65 will receive covered medical services. The advanced planning that has to be done in some cases involves development of cooperative agreements between agencies for provision of nursing plus other services such as physical therapy, medical social work, etc., to patients in their homes as their physician indicates. In some communities a single institution or agency will be designated to administer Home Health Services while in larger cities, several hospitals and the agencies may be designated.

The Department of Health, Education and Welfare, announced at the meetings that guidelines to that segment of the Medicare law dealing with Home Health Agencies are in preparation and will shortly be publicly released. Regional Training Centers in disaster will assist in setting up their own services.

MRS. SANDRA C. HOWELL, M.P.H., Coordinator of the Training Center for Home Care and Other Out of Hospital Health Services, recently delivered a paper, "Organizing for Quality Under Medicare" at the National League for Nursing of Eastern Illinois.

He married in 1946, then returned to the army as a sergeant in 1949.

His army tour included Alaska, Okinawa, France, San Francisco, Fort Leonard Wood, Germany, Georgia, Ethiopia and Florida.

Mr. Garland's hobbies include hunting, fishing and camping. He, his wife Wanda, and their 12-year-old boy live in the city.

MORE THAN 40 student nurses participated last month in a disaster drill simulating an earthquake. Philip Bassin, assistant director, reported that this was the most successful drill ever conducted from the standpoint of communications and rapid processing of casualties through the triage area.

THREE ATTEND HOME CARE PROGRAM IN CAPITAL

United Fund Goal Reached

The United Fund Goal at The Jewish Hospital has been surpassed; the total received was $12,745. The combined record for both the Jewish Federation and the United Fund campaigns places us at the top in per-capita giving of all hospitals in the city.

MORE THAN 1000 employees and students were feted at the annual holiday party held at Jewish Hospital. The party was held in honor of the fine service provided by the employees throughout the year, according to David A. Gee, executive director. A Mexican theme, complete with decorations, costumes, musical accompaniment with an international cuisine transformed the Cafeteria into an atmosphere to remember. Pictured above (at left) are Ray Highfill and Kenneth C. Garland, greeters; at right above are Miss Judy Roberts, Miss Gayle Barnett and Mrs. Carol Krupishner, enjoying the party. (Lower left) Planning committee members Mrs. Roya Kevorkian and George V. Horne serve food to the guests; and Mrs. Betty Jaspar (center picture) enjoys herself with friends.

New Executive Housekeeper

Kenneth C. Garland, the new executive housekeeper at Jewish Hospital, has had 20 years experience in hospital work, the majority with the United States Army.

A Missourian born in Malden, Mr. Garland was called to active duty in the Navy in 1941-42. His commander sent him to the hospital corps school where he became a pharmacists' mate.

For this beginning in hospital work he did many other hospital jobs in the Navy, then later joined the Army to be retired as a chief ward master, with the rank of master sergeant in 1965. Now, he says, he has no direct patient involvement but his job is to supervise all housekeeping activities including cleaning of floors and walls, linen distribution, arrangement of meeting rooms and supervision of a sewing room which manufactures numerous hospital items.

During his duty with the Navy Army, Mr. Garland spent time in Panama, the South Pacific; then came back in 1945 to Texas and one-half year in the restaurant business in Dallas.

He married in 1946, then returned to the army as a sergeant in 1949.

Mrs. Beulah Sanders, executive housekeeper, has retired from her duties at Jewish Hospital. Mrs. Sanders served as executive housekeeper from October 1954, and is officially a member of the Hospital family until December 31st of this year.

Prior to coming to 216 South Kingshighway, she was in the service of the Jewish Hospital at The Jewish Sanatorium on Fee Fee Road for more than 20 years.

In 1954 Mrs. Sanders was awarded a trophy as Housekeeper of the Year from the National Executive Housekeepers' Assn. in Denver, and also was elected to the association board of directors. Mrs. Sanders was charter president of the St. Louis N.E.H.A.

As executive housekeeper, she instituted an in-service training program for employees. She wrote a 71-page textbook covering all aspects of large-scale housekeeping.
Medical Staff

P. L. FRIEDMAN, M.D., director of the division of anesthesiology, was guest speaker at the Massachusetts Anesthesia Association annual workshop held at Jefferson Barracks. His topic was, "Fluid Replacement During Surgery."

Several members of the house staff recently attended a two-day annual meeting of the Central Society for Clinical Research in Chicago, Illinois. Doctors who made the trip included: BENJE, BOOBSHIFT, BARRY M. COHEN, LEONARD NEWMARK, MORTON A. LEVY and CHARLES WALLACE.

ARTHUR E. STRAUSS, M.D., consultant in medicine cardiology, recently visited the University of Tennessee Medical School where he attended a lecture in honor of his long time friend, Dr. Neaton S. Sorens on his 75th birthday. The visiting lecturer was Maxell Finland, M.D., Chief of the Harvard Service at Boston City Hospital, Boston, Mass.

ALEX C. SONNENWIRTH, Ph.D., director of the division of microbiology, has been elected for a two-year term as National Councilor of the American Society for Microbiology; becoming a member of the governing body of the Society. The Society has over 14,000 members, and is a professional organization of general, agricultural, industrial and medical microbiologists and virologists. Dr. Sonnenwirth has also written a book review by invitation called "Anrareric Bacteriology in Clinical Medicine." It was published in the November issue of the American Society for Microbiology News.

FRANZ U. STEINBERG, M.D., recently spent two days in Cincinnati, Ohio, by invitation of the University of Cincinnati Medical College. He participated in a symposium on spasticity and muscle relaxant drugs, and served as a panel member on Community Health and Neurasthenia.

BEN H. SENTURIA, M.D., director of the department of otorhinolaryngology attended a meeting of the 41st convention of the American Speech and Hearing Association held in Chicago, Illinois. He was a member of a panel on reports from related professions.

At the same meeting, LLOYD L. PRICE, M.D., recently research audiologist and ROBERT GOLDSTEIN, Ph.D., director of audiology and speech pathology at the Hospital, presented a paper, "Average Evoked Resonances in Children." DAVID C. SHEPHERD, Ph.D., formerly director of audiology, and ROBERT GOLDSTEIN, Ph.D., director of audiology and speech pathology presented a paper, "Intranaural Variability in the Amplitudes of Tone." and "Tracings of Normal Hearing Subjects and its Relation to Anxiety."

FRANK B. WILSON, Ph.D., director of speech pathology, was a member of a panel on Evaluation of Language Disorders in Children at the same meeting.

FRANK B. WILSON, Ph.D., director of speech pathology, presented two papers, "Speech and Language Educational Needs and Procedures Used with the Cerebral Palsied Child," and "Differential Diagnosis in Speech and Hearing with the Cerebral Palsied Child." They appeared in the Speech and Language Therapy with the Cerebral Palsied child. The proceedings of the Conference of Speech and Language Therapy with the Cerebral Palsied Child conducted at the Catholic University of America under the auspices of the Director of Workshops, June 11-June 22, 1964. The book was edited by W. T. Daley.

MR. EDWARD F. SCHWELCH, a vice-president of the Board of Directors at the Jewish Hospital of St. Louis, was recently elected to the Northwestern Home for Children Board of Directors, and will be known as the Francel W. Marcus and Elizabeth R. Rothschild Unrestricted Endowment Fund.

PORTRAIT: Simon Pollak, M.D.

Though his career had ended when the first Jewish Hospital opened its doors on Lincoln Boulevard, in 1902, the Bicenten-

torial Celebration has given the Mem- orabilia Committee the mandate to insert the story of a certain Dr. Pollak into the family album. Dr. Pollak was the first physician of Jewish descent in St. Louis to leave an impressive professional and literary legacy. His long and eventful career cannot be retold in one short column.

In the preceding issue, we en- countered a new doctor, Dr. Pollak, a medical student, on the same agenda for contemplation, and in a flash-back we became acquainted with a young man born in 1814 in a small town in Bohemia. He had studied medicine and finished an obstetrical internship in Vienna. In preparation for his emigration to America, he visited the major medical centers of Europe. As a consequence of his prolonged education, his sources dwindled to a letter of credit in the amount of $350, and $30 in cash. After a few weeks stormy sailing during which he was prevented from steerage passage and got help, he was about to land.

When the battered sailing ves- sel, "George Washington," limped into New York Bay on July 4th, 1838, she had been out of Ham- burg 51 days, and had her pro- visions exhausted. The 51-day trip was everything but a speed record.

Dr. Pollak began his life in America with a few books under his arm and $30 in his pocket. The New Yorkers seemed to have been keeping in fairly good health, and were not looking for a young doctor with a fragmentary knowledge of their language. Therefore, he considered it a bit of good luck when a German druggist offered him free shelter in return for medical advice to the druggist's wife. Dr. Pollak saw the opportunity to join the country's leading medical so- ciety of the time, and became a member. The society had just won the/so-called "Dutch" (Deutsch) fermentation. As a consequence of his emigration to America, he had studied medicine and finished his medical education in Vienna. He then traveled to America, where he practiced medicine for several years before settling in New Orleans. During his stay in New Orleans, he wrote three books:

- "Speech and Language Educational Needs and Procedures Used with the Cerebral Palsied Child," a 476-page volume published in 1960, which is considered one of the most important works in the field of speech and language pathology.
- "Differential Diagnosis in Speech and Hearing with the Cerebral Palsied Child," a 384-page volume published in 1963, which has become a standard reference for professionals in the field.
- "Intranaural Variability in the Amplitudes of Tone," a 288-page volume published in 1965, which presents the results of a study on the variability of auditory thresholds.

Dr. Pollak's contributions to the field of medicine and speech therapy have been widely recognized, and he has received numerous awards and honors throughout his career. He is remembered as a dedicated and accomplished physician, whose legacy continues to inspire and influence the field of medicine today.
CONTRIBUTIONS RECEIVED ARE USED FOR RESEARCH, APPLIANCES FOR CLINIC PATIENTS, NEW EQUIPMENT, AND OTHER WORTHY Undertakings, SPONSORED BY THE JEWISH HOSPITAL AUXILIARY.

THE FOLLOWING ARE CONTRIBUTIONS RECEIVED DURING PERIOD OCTOBER 1, 1965 TO NOVEMBER 1, 1965: ANY CONTRIBUTIONS RECEIVED AFTER NOVEMBER 1 WILL BE LISTED IN THE NEXT 216.

CONTRIBUTIONS TO THIS FUND MAY BE MADE BY SENDING CHECKS, PAYABLE TO THE JEWISH HOSPITAL TRIBUTE FUND, TO MRS. HENRY H. STERN, 6310 WATER MAN AVENUE, ST. LOUIS 30, OF MRS. JOSEPH F. RUITZ, 102 LAKE FOREST, ST. LOUIS 17.

JUNE BENDER GOODMAN FUND

THE WILLIAM and Jerome Molasky Memorial Heart Fund was established by Mrs. William Molasky, Mrs. Jerome Molasky and her daughter, Mrs. Robert Birnbaum, and the Alan Molasky family, after initial contributions had been received from a great number of friends in the St. Louis area. Two large patient rooms were named in recognition of the $25,000 endowment fund to be used for cardiac patient care and research. The Molasky family includes (left to right) Robert Bernstein, Allan Molasky, Maril. Elie Molasky, Mark Molasky, Mrs. William Molasky, Mrs. Alan Molasky, Robert Birnbaum, and Mrs. Jerome Molasky.
A new eternal light will grace the Hospital chapel as a gift from Mrs. Louise Aronberg, only daughter of Louis M. and Clara Monheimer. As a result of Mrs. Aronberg’s gift in memory of her parents, their names will be placed on the “Friends of the Chapel” plaque to be at the entrance of the Chapel.

The Monheimer family has supported research in pancreatitis for many years at Jewish Hospital. Mr. Monheimer was a former vice-president of the May Department Stores Company. Following his death, his widow Mrs. Clara Monheimer London established and continued to support work research through the Monheimer fund. This study of pancreatitis is co-sponsored by the May Foundation.

In addition to her recent contribution to the chapel, Mrs. Aronberg annually contributes to the Hospital through the Monheimer Memorial Fund. Mrs. Aronberg is the mother of three girls: Barbara, Betty and Laurie.

New Eternal Light for Chapel
Volunteers Meet Need In Central Supply

Some folks ask the cherry-\-coated volunteer, "What do you work?" When their response is, "Central Supply," the return usually is, "Well, what do you do?"-roll or fold bandages to keep busy?" The days of old (long before the volunteer program was instituted at the Hospital) when rolling bandages for patients in order to pass the time by. Modern machinery can do these tasks on a fast production line at a limited cost. There is more important work to be done in Central Supply, work that cannot be bought from the hospital supply house in the particular way the Hospital needs it.

Central Supply, directed by Mrs. Nadean Wright, is the hub of the main wheel that provides the Hospital with many supplies. Without Central Supply, the patient could only be fed from the kitchen, receive house-keeping services and a portion of his medications and a few special tests. The special trays made by the Central Supply personnel are vital in the operating rooms, delivery rooms and in the patients' bedsides.

Work in Central Supply is fascinating for a better hospital, there is no room for striking union members here. Their contact is direct to patients and personnel in the form of goods: gauze bandages, rubber bands used as small sterile rubber bands, sponges carefully folded by hand; tiny shirts and blankets folded and packed in kits for the nursery. All these and more are carefully hand-prepared for the preparation process.

There are many hospital rules but the workers in Central Supply add more in this sterile preparation area: their heads are to be covered at all times; they may not eat, smoke or drink so that no foreign particles may fall into or on to the supplies.

Items such as the heart-lung machine, respirators and others have hand-powered operating devices on them. Emergency hand-powered resuscitators are also available on all nursing divisions.

is not always possible to rely on certain pieces of essential equipment in the event of a power failure.

Items such as the heart-lung machine, respirators and others have hand-powered operating devices on them. Emergency hand-powered resuscitators are also available on all nursing divisions.

Four Volunteers work early in the morning in the Central Supply department. Seated (from left to right) are Mrs. Henry Rubin, Miss Myrna Shifrin, president of the Auxiliary, and Mrs. John Abramson, co-chairman of the volunteers committee.

Emergency Power

(Continued from Page 1)

Emergency generator, a number of large, trickle-charged battery powered light units were available in several areas of the Hospital. These have now been put into a standby mobile reserve. There are eight of these units, and they can be taken to any part of the Hospital requiring light in an emergency. These units will provide good lighting for approximately a four-hour period, and will give adequate light for a full eight-hour period. All nursing stations, in addition, are equipped with large battery-operated flashlights. Standard flashlights are also available in numerous areas of the Hospital. A standard inventory of 300 flashlight batteries is maintained. A further light source consists of 60 Kerosene lanterns in the basement which are available in numerous areas of the Hospital. Standard flashlights are also available in several areas of the Hospital.

Hospitals have grown dependent upon electric power, and it

is not always possible to rely on certain pieces of essential equipment in the event of a power failure.

Items such as the heart-lung machine, respirators and others have hand-powered operating devices on them. Emergency hand-powered resuscitators are also available on all nursing divisions.

Five Artists Donate To The Hospital

Mrs. Wolff asked for advice from some of her friends who had also shown in the Missouri show, where one out of ten entries is accepted. She found four contrasting and complementing works to be hung in the room. Mrs. Stella Pearlmutter gave the painting, "An Afternoon in the Park," a "charming oil with colors so fresh, clear and realistic that it is a delight to look upon." Mrs. Wolff said, The canvas includes six nannies, several policemen, two gentlemen, four ladies and nine children, (some with hoops) playing in the English park scene. It was painted for the west wall.

Mrs. Dorothy Dubinsky gave an abstract painting for the south wall that is hung next to a rhododendron donated by the Auxiliary. Mrs. Dubinsky's painting includes orange, grey, blacks, and various shades of green colors.

Three works have been hung on the east wall, and Mrs. Helen Schwartz's "Primordial Demography" (1961) gives the impression of a cool forest. It is a print of green and blue adding serenity to the scene, framed in gold on a white background. One patient said, I could look at this all day and still enjoy it.

Mrs. Myrtle Konshin's larger abstract, "Autumn Landscape," with its bright fall colors is fall personified. It is greatly admired by many of the patients who know her, as well as those who do not. She has shown her work in Madrid as well as St. Louis.

Mrs. Beatrice S. Wolff, chair-\-man of the renewal project was given the job six months ago. The pale green walls in the 15 by 18 foot room presented a thought problem, the business-like furniture (several chairs and two large round tables) added to it: sculpture? paintings? wood-carvings?

MORTON J. MAY, who gave the first research grant to the Hospital, congratulates Charles H. Yalem at the groundbreaking ceremony.

**Yalem Groundbreaking Ceremony**

The following remarks are excerpts from the address by Charles H. Yalem for the groundbreaking ceremony dinner of the Yalem Research Building, held on December 15, 1965, at the Jewish Hospital of St. Louis.

"I am deeply grateful for the privilege of participating with you on this occasion which marks the groundbreaking ceremony for the new medical research center at the Jewish Hospital of St. Louis.

"I feel that all of us here tonight, and the entire community as well, owe a debt of gratitude to the many dedicated persons who have played an important role in bringing about this moment of fulfillment.

"There are many who can take pride in witnessing the beginning of the construction of the new research center, a center which most assuredly will play a tremendous role in future medical research here in St. Louis. Today, research at the Jewish Hospital is being carried out by 92 full-time personnel who are constantly probing for new knowledge in medicine and surgery, and fields related to them.

"In the new building, additional research and educational programs will be implemented. The nine-story building will be dedicated to education as well as medical research.

"When completed (in approximately a year and a half) the structure will house a total of 220 physicians, educators and research people who will devote their time to new discoveries and developments to help man's centuries-old battle against disease and human suffering.

"This research building will become a symbol of change from a local community hospital to a major medical research and teaching center. It will also reflect Jewish Hospital's affiliation with the Washington University School of Medicine as a major teaching affiliate, as part of an over-all complex where medical students as well as physicians will receive added training.

"I look forward to the great research and training activities which will take place here, not only as an investment in the future health needs of America (and perhaps the entire world), but as activities which will permit us to bring the latest and finest treatment techniques to the 30,000 patients treated here annually.

"We must have a sense of responsibility toward others and the community in which we live. We must constantly strive to do something in this world for those less fortunate than ourselves.

"I share with you tonight my pride and gratification in witnessing the start of the construction of this new project. I am doubly proud that the new building will be known as the Yalem Research Center. I speak for myself and all of the members of my family in saying that we are deeply moved and honored, for there can be no greater satisfaction than having a building named in one's honor that will forever be devoted to the cause of life and health, and the needs of humanity.

"I want you to know that I have been filled with new inspiration to continue my efforts to achieve further goals for humanitarian institutions. You have given me renewed faith, courage and enthusiasm to carry on my endeavors, and to devote myself to new causes for the betterment of mankind."
Dr. London: Sports Enthusiast

Dr. Stanley L. London has been a sports enthusiast since he was quite young. Today he is an assistant attending surgeon at the hospital, and still is an enthusiastic participator as well as spectator. He is a champion handball player, and has been the Hawks’ surgeon since the team moved to St. Louis.

When he became ineligible for major sports in school, Dr. London turned to handball for his recreation. He now can be found working out from two to three times per week.

Handball is a sport that Dr. London chose because it provided the outlet he desired with good exercise in a short time span. He hopes to continue playing as long as he is physically capable.

Al Goldstein, his partner, and he work out more frequently before a tournament. Dr. London and Mr. Goldstein recently won the National Invitational Handball Tournament held in Kansas City for the fourth time.

Singles Champion

Last summer, Dr. London won the State Singles Class A from 40 other handball players at the St. Louis Fire Department Annual Four-Wall Tournament. He and Mr. Goldstein also won the doubles tournament there. Their other victories include Memphis, Omaha, Texas, Cincinnati and St. Louis at invitational tournaments. In the National Open, the team has come as close as 2nd.

When Dr. London was a medical student at Washington University, he was honored by his teammates as well as most campus organizations with a Stan London award. He was given a medical kit at the end of his three years. He was elected team captain 13 times. Dr. London played baseball and basketball his first three years in medical school and coached these two sports during his senior year. He frequently practiced exercises and outdoor games during medical school.

Before playing at Washington University, Dr. London played at DePauw University. He made several Missouri Valley All-Star and All-American teams.

Dr. London declined professional basketball and baseball offers at the end of his active career in those sports in order to continue his medical pursuits. He was born in Springfield, Illinois, and came to St. Louis in 1943. He and his wife Jacqueline recently celebrated their 14th wedding anniversary. Their three children, Jimmy, 12, Cynthia, 9, and David, 5, are also avid Hawk basketball fans.

Dr. London and Dr. I. C. Middelman, surgeon for the baseball Cardinals, have been partners in the practice of general surgery for more than 10 years. The partnership has a sports overtones, and the treatment of athletic injuries is an integral part of their practice.
