 Central Institute for the Deaf

“The Assessment and Teaching of Aphasic Children”

a summer course offered by

CENTRAL INSTITUTE FOR THE DEAF

affiliated with Washington University

St. Louis, Missouri

June 23 through August 1, 1958

Description of the course

Emphasis will be given to the techniques developed and used at Central Institute for the teaching of speech and language to aphasic children and to children with severe linguistic deficiencies not primarily the result of hearing loss or mental retardation. There will be lectures, demonstrations and opportunities to observe and participate in the assessment and teaching of children at the Institute.

Three demonstration classes (6 children each) will be in session throughout the entire course. The children attending the demonstration classes will be selected to represent the various types and manifestations of aphasia, age groups, and levels of progress. These children will be available individually and as class-groups for demonstration, observation, and supervised practice teaching.

There will also be new cases available for the demonstration of complete initial assessment and evaluation. These initial evaluations will include auditory and psychological tests and assessment of speech and language. Among the specific procedures which will be considered in relation to the testing of young children with linguistic disorders will be the F.R.G., E.D.R. (PGSR), conventional audiometry, mental and school achievement tests.

The course will meet from 8:00 a.m. to 12:00 noon Monday through Friday with lectures in the air-conditioned auditorium of the Clinic and Research building at Central Institute.

Fees and academic credit

Six credits from the graduate school of Arts and Sciences of Washington University will be given. The fee for the course is \$175.00, which includes \$20.00 tuition per credit, a \$5.00 registration fee, and a \$50.00 fee for the laboratory school. There are a limited number of scholarships available, which include tuition and the laboratory fee.

The Institute is accredited to accept veterans of World War II and the Korean War.

Enrollment

Enrollment will be limited to those approved by the instructors. Applications are encouraged from teachers of exceptional children, particularly teachers of the deaf and hard of hearing; teachers of the physically handicapped; teachers of the mentally retarded and speech therapists. The general requirement for enrollment is a degree, plus preparation in one or more of the above mentioned areas of special education.

Persons interested in enrolling for this course are urged to apply as soon as possible since enrollment must be limited.

The administrative office reserves the right to dismiss a student who fails to show professional promise or who is guilty of infraction of rules or regulations.

Demonstration teaching for college class groups at the Institute.

Living accommodations

Students may make their own arrangements for living, or rooms will be available at the Institute for the fee of \$30.00 for the six weeks. This fee includes furnished linens, facilities for hand laundry, study and lounge quarters.

Reasonably priced meals are available within easy walking distance of the Institute at several restaurants, including the cafeteria of the Washington University Medical School.

The names of hotels and apartment hotels in the vicinity of the Institute will be furnished upon request.

Library facilities

The Institute houses in the Clinic and Research building one of the most outstanding libraries in the nation devoted to speech and hearing and related fields. In this same building are the significant Max A. Goldstein collections that include specimens showing the evolution of the non-electrical hearing aid and early editions of books dealing with speech and hearing. The air-conditioned auditorium will be available as a reading room for students using the library.

Also available within two blocks of the Institute are the libraries of the Dental and Medical Schools of Washington University.

Recreation

The City of St. Louis affords excellent opportunities for recreation and cultural activities. The location of the Institute across from Forest Park places facilities for walking, boating, tennis, golf, and riding at the easy disposal of the student. The park also contains an outstanding zoo and an excellent art museum.

Special summer attractions include outdoor symphony concerts at Washington University, the renowned outdoor St. Louis Municipal Opera in Forest Park, and major league baseball.
