Dr. Lowenstein Named Chief Of Out-Patient Surgery

Paul S. Lowenstein, M.D., has become a member of the full-time staff of the Department of Surgery at Jewish Hospital.

Beginning July 1, Dr. Lowenstein is on the full-time surgical staff of the emergency room, covering the surgical aspect of patient care. He is on duty five days a week, from 8 a.m. to 2 p.m., and will maintain an office in the surgical suite. His position includes duties involving surgical emergencies, supervision of the surgical outpatient clinic, and teaching the house staff.

Dr. Lowenstein was in private practice in St. Louis for forty-five years, and closed the doors of his office at 497 North Kingshighway on June 1 of this year.

"It thought it a very good time to discontinue private practice, and I am looking forward to being of service on the full-time staff of Jewish Hospital," Dr. Lowenstein said.

Dr. Lowenstein has been known to have said he loves every brick in Jewish Hospital. He is one of the oldest living interns of the hospital, and a feature article was published on his 50th anniversary in the April, 1966, issue of "JH". At that time, Dr. Lowenstein cited the many changes of the hospital since he came in 1916 as a rotating intern. He was one of two interns working in the then 100-bed Jewish Hospital, located on Delmar Boulevard.

"The one constancy in the program at Jewish Hospital has been the provision of a postgraduate course second to none in the community," Dr. Lowenstein said.

The tendency to have attending men staff the emergency room in various hospitals throughout the country has become more prevalent. Dr. Lowenstein cited two advantages to this: to give the utmost in supervisory care for surgical emergency cases, and to allow more time for the surgical house staff on their hospital assignments.

Dr. Lowenstein came to Jewish Hospital as assistant surgeon in 1922, and has remained in the department where his present status is consultant in surgery. His interest in vascular surgery developed through the years, and for some time he was in charge of the vascular clinic.

Through the more than fifty years that Dr. Lowenstein has been a member of the hospital staff, he has been known to patients and personnel alike for his devotion and service to the Hospital.

Yalem Research Building Goes Up

The Yalem Research Building was published on his 50th anniversary in the April, 1966, issue of "JH". At that time, Dr. Lowenstein cited the many changes of the hospital since he came in 1916 as a rotating intern. He was one of two interns working in the then 100-bed Jewish Hospital, located on Delmar Boulevard.

"The one constancy in the program at Jewish Hospital has been the provision of a postgraduate course second to none in the community," Dr. Lowenstein said.

The tendency to have attending men staff the emergency room in various hospitals throughout the country has become more prevalent. Dr. Lowenstein cited two advantages to this: to give the utmost in supervisory care for surgical emergency cases, and to allow more time for the surgical house staff on their hospital assignments.

Dr. Lowenstein came to Jewish Hospital as assistant surgeon in 1922, and has remained in the department where his present status is consultant in surgery. His interest in vascular surgery developed through the years, and for some time he was in charge of the vascular clinic.

Through the more than fifty years that Dr. Lowenstein has been a member of the hospital staff, he has been known to patients and personnel alike for his devotion and service to the Hospital.
Mrs. Susan Englund, R.N., has been appointed Home Care Nurse Coordinator.

Robert Hickok, R.P.T., attended the National Physical Therapy Conference in Miami. He presented a paper, "Impact of Associate Degree Program on Professional Practice of Physical Therapy." He attended the conference as a member of the national board of directors.

Miss Marsha DeMere has joined the Hospital staff as patient relations representative. She will work with patients in X-ray and admitting.

Miss Marsha DeMere has joined the Hospital staff as patient relations representative. She will assist Mrs. Frances Stovall, patient relations representative, in visiting the patients daily. Miss DeMere will also distribute brochures to patients and visitors in the Hospital.

Mrs. Nancy Varley, assistant supervisor, physical therapy, attended an educational institute sponsored by the APT-VRA (American Physical Therapists-Vocational Rehabilitation Agency) in Lincoln, Nebraska. Miss Geraldine Brosnan has joined the physical therapy staff as a therapist. She is formerly of Cleveland, Ohio.

Robert Lively, data processing center, has been promoted from charging operator to programmer.

Leonard Petrosky, clinical lab, has been appointed coordinator of night and week-end laboratory services.

Mrs. Nadean Wright, supervisor of Central Supply has an- 

duced the Hospital in August. She replaces Har- 

y of Central Supply has an-

 coordinator of public relations.

The Jewish Hospital

HOSPITAL POTPOURRI

MRS. EDITH DAWSON, In-Service, explains the fundamentals of bed- 

making to a group of this year's Candy Strippers. This year's Candy Strippers and 9 Teenagers hope to surpass last year's 14,916 hours of service to Jewish Hospital.

THE JEWISH HOSPITAL STUDENT NURSE VOLLEYBALL TEAM won the 3rd District Volleyball Championship recently. Pictured with the team is their coach. (Black row, left to right) M. C. Cook, coach, Mary C. Schieren, five years. His wife, Esthel, is assistant manager of the Coffee Shop. She has been with the Hospital three years.

A SHINY NEW FLAG POLE has been raised on the corner of Kingshighway and Forest Park. PBX operator, Mrs. Tillie H. Doelger, suggested the idea. Helping her raise the flag is Philip Bassin, associate director.

A RECORD-BREAKING 1500 patient kits were filled recently at the Hospital by Intergroup Youth of the National Conference of Christians and Jews. The enthusiastic and spontaneous response of this volunteer group helped fill more kits than any other group in the past.

A $50.00 Savings Bond is presented to Miss Rita Zella, R.N., by Miss Margaret Law, R.N., director of nursing, for recruiting a registered nurse who has completed 6 months duty at Jewish Hospital. Miss Barbara Gauthier, R.N., (right) joined the Hospital October 4, 1966.

STAFF REPORT

Security Has Top Priority

Jewish Hospital is a city within a city. With 2000 employees, students and patients, it is larger than hundreds of towns in Missouri and Illinois.

Besides having city-size power, water, gas, and telephone systems, the Hospital also has its own security system. Uniformed guards from Shane and Associates patrol the halls and offices, ascertaining that patient and employee alike are safe from hazard.

One of the most familiar guards at the Hospital is John B. Dunlap. He is known by first name to nearly everyone because he has been assigned to this location for five years.

Mr. Dunlap is licensed by the Metropolitan Police Department to carry a service revolver on duty. There is close cooperation between the Shane guards and the police department.

For example, if a known police suspect is seen near the Hospital building, pictures are distributed to all nursing stations with warnings to be on the alert for this person.

The guards also carry master-keys to all the Hospital offices and lockers. If an emergency arrives during which a doctor or official needs to gain access to a place in the building, the guard assists these authorized people.

Of course, they also help employees who have gone off from home without their locker keys.

Another very important duty rendered by the guards is an escort service. Guards always accompany those carrying patient valuables or money to the safe.

When the evening shift is leaving, guards accompany any female employee to her automobile.

For special protection of the student nurses, a female Shane guard is stationed in the Missouri Shoenberg Memorial Nurses Residence.

During the evening, one of the guards goes on "Duty Clock Rounds." He routinely checks each office and door, making sure lights are out and no equipment is in an unsafe place.

The guard also keeps a lookout for possible electrical hazards and flood conditions.

Mr. Dunlap assists the public in many ways as all police officers do. He provides information and aids those who have misplaced things.

Recently, a lady stopped to use a telephone and left her purse with $45.00 in the booth. Mr. Dunlap said, "We called her home to say we had found it and I think she was on her way over to pick it up before I hung up the receiver."

The guards have numbers assigned to them on the Hospital flashing call system. They keep close watch on this signal to be available for any emergency.

One of the most exciting events that Mr. Dunlap can recall is one evening when an ambulance rushed up to the emergency entrance with an expectant mother. The lady delivered on the way to the Hospital, and she delivered another child while on the stretcher in the driveway. She was safely escorted to her room on the maternity floor, and her twins taken to the nursery.
Medical Staff

William H. Sheffield, M.D., attended a meeting of the Illinois Cytopathology Society in Chicago. He also attended a cytology information conference for general practitioners at Homer G. Phillips Hospital.

Gunter Schmidt, D.D.S., presented a Table Clinic on "Oral Cytology" at a recent meeting of the south district of the Greater St. Louis Dental Society.

Norman Tobias, M.D., presented a paper, "Psychoses and Dermatosis to the North American Clinical Dermatological Society in San Francisco, California.

William E. Stehlin, M.D., recently presented papers to medical groups. The first, "Hemodynamics and Intimal Thickening" was presented at a meeting of The American Society of Pathologists and Bacteriologists at Washington, D.C. The other, "Experimental Ateriovenous Anomalies" was presented to the American Society of Experimental Pathology in Chicago.

Carl V. Moore, M.D., head of the department of internal medicine, Washington University School of Medicine, was recently been elected a fellow in the American Academy of Arts and Sciences.

Kenneth D. Serkes, M.D., assistant director of surgery, has accepted the position of Associate Professor of Surgery at the Temple University School of Medicine; and has been appointed to the Division of Surgery, Albert Einstein Medical Center in Philadelphia.

Robert Goldstein, Ph.D., was given honors of the Association by the Speech and Hearing Association of Greater St. Louis.

Harry Czatry, M.D., recently attended the National Urology Convention in New York City.

Godofredo Herzog, M.D., attended a meeting of the American Fertility Society and the American College of Obstetrics and Gynecology in Washington, D.C.

Sidney Goldenberg, M.D., is co-author of a section on diabetic vascular disease in Dr. V. Cowdroy's book, Ateriovenous, which was published this spring.

Herman Turner, D.D.S., was elected the Missouri delegate to the American Society of Oral Surgeons meeting scheduled for October, 1967, in Atlantic City, New Jersey.

Melvin L. Goldman, M.D., has been named president-elect of the Washington University Medical Alumni Association. Dr. C. Read Bole, St. Louis pediatrician, will serve as president of the 4,000-member organization for the coming year.

William M. Landau, M.D., and Edward H. Reinhard, M.D., were recently named to the Washington University School of Medicine Faculty Council Executive Committee.

Frank B. Wilson, Ph.D., director of speech pathology, was elected an associate member of the Ear, Nose and Throat Club of St. Louis.

Robert Goldstein, Ph.D., conducted an In-Service Training Program at the Cincinnati Speech and Hearing Center in Cincinnati, Ohio. His topic was Audiologic Assessment of Children.

Sam Frankel, Ph.D., and Jean Cines, assistant supervisor, clinical labs, conducted a workshop at the University of South Dakota Medical School on Eusymology.

Bozena Kallus, M.T., A. C. Sonnenwirth, Ph.D., Ben Senturia, M.D., Robert Goldstein, Ph.D., Cineas, assistant supervisor, clinical labs, conducted a workshop at the University of South Dakota Medical School on Eusymology.

Melvin L. Goldman, M.D., has been appointed a fellow in Thoracic and Cardiovascular Surgery, Department of Surgery, Washington University School of Medicine. He has also received a grant from the Department of Health, Education for a Senior Clinical Trainee for Advanced Surgery.

Alex C. Sonnenwirth, Ph.D., director, division of microbiology, conducted a seminar at Washington University: "Bacteriodes and Clinical Microbiology" at the Bacteriodes Symposium, National Meeting of the American Society for Microbiology in New York. At the same meeting, Dr. Sonnenwirth presented another paper written in collaboration with Miss Barbara Kavitz: "Coolidgeuiella tarsa as an Reticuloendothelial Agent in Meningitis." A third paper, written by Charles C. Carr, M.T., A. C. Sonnenwirth, Ph.D. and Ben Senturia, M.D., "Pseudomonas Aeruginosa Antibodies and External Otitis" was delivered at the same meeting by Dr. Sonnenwirth.

In September, 1966, the Jewish Hospital opened its door to a Cleft-Palate rehabilitation program. This multi-discipline approach to the care of a child born with a cleft of the lip or palate is different from any of the many professional services. To give extended care, experts in the field of plastic surgery, Pediatric Dentistry, Orthodontists, Prosthodontists, Speech Pathology, Audiology, Social Services, Social Work, Therapy, and Pediatrics are necessary.

The program is located in the Shoeweber Research Building at 4949 Forest Park. Patients from all walks of life are eligible for this program. Patients are referred by physicians from the community, and treated on a local basis, being paid for by state or local funds.

People of any age are accepted for care in the cleft-palate rehabilitation program. Newborn infants with clefts of the palate are seen at the time of birth when the decision for surgery is made if necessary. Adults referred to the program receive reconstruction procedures designed to fit their own particular needs.

The first visit is referred to the clinic he undergoes intensive diagnostic procedures. Interviews with the patient and his relatives are made to obtain an accurate family history as well as to determine previous therapy. Photographs, as well as x-rays of the face, and the jaws and mouth, are taken. A study of the patient's speech and Psychological IQ tests are also part of the diagnostic work-up. The screening procedure takes the first half of a therapeutic day. The second half of the day involves screening by all specialists involved as indicated by the patient's condition. With the completion of the diagnostic tests, the cleft palate team then discusses in detail all ramifications of the patient's care as well as what is necessary with his family. When the final decision is made, the patient is advised of his course of treatment, whether it is surgery, speech therapy, orthodontia, prosthodontia, or simply planning for long term follow-up care. All diagnostic and therapeutic procedures are carried out at this time as most convenient for the patient. The whole program is supervised by the clinic. If necessary, at times, dental or speech work can be carried in the patient's home town, as well as in other medical and paramedical organizations in the city of St. Louis.

Chairman of the cleft palate rehabilitation program of the Jewish Hospital is Dr. Marcy Goldstein, a Plastic Surgeon. Other members of the team include:

- Frank B. Wilson, Ph.D., Speech Pathologist who directs the Speech and Hearing Center of the Greater St. Louis area.
- Dr. Daniel O'Brien, Prosthodontist; William Branhorst, Orthodontist; and Dr. Calvis, an Endocrinologist, who provides care in these fields.
- In associate capacity are Dr. Nathan Simon and Dr. Alex Kaplan of the Department of Psychiatry; and Dr. Ben Senturia, director of the Department of Otolaryngology, who consults on all cases. Mr. David Levine is coordinator of the program.

The program has been in existence almost one year and is rapidly growing. As expansion of the program continues, other facilities will be incorporated, and the number of professionals on the team will increase. As the group expands, therapeutic work will be carried on at various centers. It is hoped by the team that the cleft palate rehabilitation program will become an integral part of the medical community of St. Louis.

More than 60 research projects and investigations are underway at Jewish Hospital. Included in the research are major studies in blood clotting, venous disease, transplantation and renal organs.

When research is to be done involving new techniques or drugs, the welfare of those involved in the research must be ascertained. The patient who wishes to participate in the research is obtained in advance of any test or procedure in clinical research. The potential benefit as well as the possible risk factor are described in detail to the patient prior to his obtaining consent. Consent forms are reviewed by the Research Committee approved by the Committee for the Review of Institutional Clinical Research Involving Human Beings.

Members of the committee are:
- Dr. David S. Soule, senior obstetrician-gynecologist, who consults with Dr. Godofredo Herzog, Dr. Ivan Myers, Miss Barbara Moore, R.N.; and Mrs. Ghana Fischer, research assistant.

Patients are interviewed at the time of the first post-partum visit to the Clinics. After physical and laboratory examinations, those selected for the study receive an injection of the estrogen-progesterone solution at monthly intervals, according to a prescribed schedule.

This injectable hormone preparation is composed of the same kinds of female sex hormones as are in the birth control pill. The difference is that a solution is injected once a month, instead of a pill being taken daily. The same oral contraceptive effect takes place in both techniques.

Observations in the study bear out the findings of other investigation that many of the undesirable side effects noted with oral contraceptives are absent with the injectable method.

Nausea, weight gain, breast tenderness and other of the psycho- hormone symptoms are minimal in the injectable series. However, "break-through" bleeding and the inconvenience of regularly reporting for injection cause about a 30% drop-out.

In the more than 1500 women under observation in the Aaron Waldheim Clinics, there has been no reported pregnancies. Several women who have discontinued treatment for one reason or another have gotten pregnant without difficulty.

An in-depth study of data accumulated in this project is being analyzed to draw psychologic and statistical conclusions. Several papers will be offered to scientific societies, elaborating the con- jungures and conclusions deduced from these observations.
The 1967-1968 Jewish Hospital House Staff began working July 1. Included in the group are 20 residents having served here before, and 26 interns and residents with the Hospital for the first time. This list also includes three doctors working at the Hospital on fellowship programs. Research fellows Stanley Birge, M.D., and Eric Eekel, M.D. will be pictured in the next "216".

Triplet: Born Here

The shock of multiple births can be averted today and made a pleasant surprise through Radiology.

Mr. and Mrs. Michael Kodner, 14 Morwood Lane, found out last April that they were going to become parents of triplets.

After visiting the obstetrician, Mrs. Kodner was advised by him to have an x-ray made.

The technician told her as she was prepared for the test: "Funny, but in the 23 years I've been here, I've never been the one who has performed an x-ray examination and found triplets... twins yes, but when we had triplets here about 7 months ago, I was out to lunch when the radiologic examination was done."

Mrs. Kodner's smiling response to this was, "Why are you telling me all this?"

"It's always been a fond dream of mine to be able to discover a multiple birth," the technician said.

Mrs. Kodner did not suspect anything unusual about her size, and the technician's comment did not really affect her until she arrived at her doctor's office after the x-ray.

He asked her if she were prepared for something unusually exciting.

"Twins?" she asked.

Phyllis Kodner was overwhelmed and delighted. Her husband was in shock; then overwhelmed; then delighted!

As a family project, Karen (10) and Susan (7) were part of the happy anticipation. Mrs. Kodner was requested to stay off her feet as much as possible, so that both the young ladies of the family could be responsible enough to clear the dinner table, do the dishes, take out the trash, and take care of their beds daily. "This was part of their responsibility and pleasure in helping us prepare for the new little ones," Mrs. Kodner said. "Both their father and I are very proud of them for everything they have done to help us get ready."

Initially forty-six receivers and five talk-back transmitters are being purchased.

New Resident in Administration

Paul M. Ward was recently appointed administrative resident for 1967-68.

Mr. Ward was born in Amarillo, Texas, and attended Allen Academy in Bryan, Texas. He received both his Bachelor of Science and Master's Degree in Education from Sul Ross College, Alpine, Texas.

For 12 years Mr. Ward was a staff engineer for the Texas Fuel Oil Company of St. Louis. He has inaugurated a new billing system for the clinic and plans to streamline the filing system.

For Instant Communication

The 1440 computer at Jewish Hospital is a lot less complicated to a number of employees who recently completed a Computer Familiarization Course.

The 10-hour course, taught by Dr. Stanley Lang and Dr. Sam Frankel, was designed to acquaint interested Hospital personnel with the computer and its capabilities.

Dr. Frankel said, "Our ultimate goal is to achieve the highest possible efficiency with this valuable tool. I would say that the course was definitely a success. The personnel who took the course now know of the capabilities of the computer and of its availability to each department."

Each person taking the course wrote at least one program, key-punched his own cards, and ran the program through the computer.

In actual Hospital practice, the Electronic Data Processing Department will write the program and operate the computer. The employee will need only to devise a workable method for applying his problem to the computer.

The course was suggested by the Hospital data-processing committee which includes: Sam Frankel, Ph.D.; Irwin Allerheil; Stanley Lang, Ph.D.; Vernon Spradling; Noah Suman, M.D.; Mrs. Virginia Reisinger, R.N.; Mrs. Evelyn Whitlock; Phillip Bassin; Robert Goldstein, Ph.D.; and Herbert B. Zimmerman, M.D.

Stoving Named Clinic Manager

Mr. Clair L. Stoving has been named clinic manager of the Aaron Waldheim Memorial Clinics.

His job responsibility includes all the clinic divisions and the Hospital Emergency Rooms.

The Aaron Waldheim Memorial Clinics handled 20,502 visits in 1966. The clinic provides medical care for the medically indigent. The Emergency Rooms handled 16,900 cases last year.

Mr. Stoving comes to the Hospital with 21 years of supervisory experience with the Fuel Oil Company of St. Louis.

He has inaugurated a new billing system for the clinic and plans to streamline the filing system.

Mr. Stoving is married. He and his wife have five children: Marion, 25; Richard, 20; Russell, 15; Barbara, 19; and Teresa, 5.
