DANFORTH GIRLS TO VISIT BARNES HOSPITAL

On Tuesday, July 26, a group of young ladies will spend the day at Barnes Hospital as a part of their two-week stay in St. Louis as the guests of the Danforth Foundation. This has been an annual occurrence since 1936.

In that year, the Danforth Foundation and the Ralston Purina Company of St. Louis first offered the Danforth Summer Fellowship to Home Economics seniors. The plan of the Danforth Fellowship is to bring together outstanding young women from leading state universities for a four weeks' program of study, research, leadership training, and fellowship. The program was designed to give young women on the brink of graduation an insight into the business world and help them to adjust themselves to their jobs after graduation. The four-week program includes a two-week camp experience in addition to the time spent in St. Louis.

Since 1936, the Fellowship has become widely recognized internationally. Mr. (Continued on page 4)

BARNES SCHOOL OF NURSING BEGINS OPERATION

The Barnes Hospital School of Nursing was formally opened July 1, 1955. Members of the faculty were introduced to the administrative and supervisory staff of the medical center at a meeting held on July 6, 1955, in Wohl Dining Room.

Miss Ann Campbell, Director of Nursing Service and Nursing Education, introduced the supervisors of nursing service, Dr. F. R. Bradley, Director of the medical center, his associates, Miss Lilly D. Hoekstra, Administrator of St. Louis Children's Hospital, Chaplain George Bowles, and Dr. James Nickel, student health physician.

Members of the faculty were introduced by Miss Elizabeth McIntosh, Associate Director of Nursing Education. Two members of the faculty will arrive later in the summer.

Some of the staff have been working in the nursing service in the various hospital areas for several months. Those who are (Continued on page 2)
DR. ROBERT GLASER NAMED ASSOCIATE DEAN

Dean Carl V. Moore has announced the promotion of Dr. Robert J. Glaser to Associate Dean of Washington University School of Medicine. Dr. Glaser, who has been Assistant Dean of the medical school, is also assistant professor of medicine and chief of the rheumatic fever clinic of Washington University Clinics.

Dr. Glaser was graduated from Harvard Medical School in 1943, and served his internship and residency at Barnes Hospital and Peter Bent Brigham Hospital in Boston.

MARY LEWIS AWARDED FULBRIGHT FELLOWSHIP

Miss Mary M. Lewis, Director of the Social Service Department in our medical center, has been granted a Fulbright fellowship to participate in the training of student social workers at the Institute of Almoners, London, England. The fellowship is for one year and Miss Lewis expects to sail from New York about August 31.

According to present plans, Miss Lewis will be attached to the staff of the Institute, but will work within one of the hospitals which takes almoner students for training, and will be in charge of a training unit of students. In addition, she will have sessions in consultation with members of the hospital staff who are supervising students to help them both with their own casework and with their supervision of students. She will also participate in conferences and seminars for groups of supervisors.

The chief aim of this plan is to improve the standard of social work in hospitals in England, and we are proud to know that Miss Lewis was invited by the Education (Continued on page 6)

BARNES SCHOOL OF NURSING BEGINS OPERATION

(Continued from page 1)

new to the medical center have had an opportunity to become familiar with the clinical facilities. At the present time the faculty is busily engaged in formulating plans for the educational program.

The Barnes Hospital School of Nursing became an accredited school when the State Board of Nurse Examiners held their annual meeting June 9 and 10, and approved the school and granted accreditation for a period of one year, from July 1, 1955, through June 30, 1956.
Introductions are in order for three members of our administrative staff. However, the medical center is not new to any of them, since all three are former members of the Washington University Class in Hospital Administration.

Mr. Jack Kindig, new assistant director, is a native of Alton, Illinois, and graduated from Shurtleff College there. He received his master's degree in Hospital Administration from Washington University in June of this year. Mr. Kindig served his residency at St. Louis County Hospital and prior to that was employed as office and credit manager at Alton Memorial Hospital. During World War II, Mr. Kindig served as an Ensign in the Naval Reserve, assigned to escort duty as a blimp pilot along the coast of Brazil. He is married and has two children.

Mr. Tasker Robinette, assistant administrative resident, hails from Cleveland, Ohio, and received his B.S. degree from Maryville College, Maryville, Tennessee. He received his M.H.A. degree from Washington University this year. Mr. Robinette served his residency at the Monmouth Memorial Hospital in Long Branch, New Jersey. Prior to entering the field of hospital administration, Mr. Robinette was a painting and decorating contractor. Both Mr. Kindig and Mr. Robinette are presently assigned to night duty.

The third new member of our administrative staff is Mr. Stephen Collins, administrative intern. He is a graduate of Baylor University and was a student last year in the Washington University Course in Hospital Administration. Mr. Collins, who was married on June 6, comes to us from Houston, Texas.

Although not new to Barnes, another member of the staff is Mr. Virgil Fittje who completed his administrative internship here last month, and is now an assistant administrative resident. He will remain until fall when he enters military service.

Back row, left to right: Gretchen Gearhart, Barbara Strange, Betty Ernst, Norma Jean Kitch, Helen Morrison, Elizabeth Jane Clark, Virginia O’Hare, Joan Neuman, Loretta Haefele, Dorothy Spencer, Peggy Liles, Dorothy Yamanouchi. Not shown in the picture are Viola Griep and Shirley Morlan.

DANFORTH GIRLS TO VISIT BARNES HOSPITAL

(Continued from page 1)

William H. Danforth, Chairman of the Board and Founder of the Ralston Purina Company and President and Founder of the Danforth Foundation, is tremendously interested in the activities of this group and gives considerable time to helping build the program.

First thing on the agenda for the day that the young women are to spend at Barnes is a talk by Dr. Frank Bradley, Director of the Barnes Medical Center, who will welcome the girls and speak on "The Barnes Hospital Group". This will be followed by a trip to one of the operating amphitheaters where they will view an operation. After leaving the operating floor they will go to the Clinics where each of them will have a chest film made. After a brief recess, Miss Henrietta Becker, Director of the Dietary Department, will speak to the group on the subject of "Hospital Dietetics", and will accompany them on a tour of various divisions of the Dietary Department. The afternoon program will include a tour of the Barnes Hospital group and the Washington University School of Medicine.
NEW DICTATING SYSTEM PROVES VALUABLE AID

Again Barnes Hospital steps ahead in the trial of new equipment by installing an entirely new and timesaving device known as a centralized recording of dictation system. The central recorder was installed here during the early part of 1955, and has proven to be a rapid and economical means for dictating correspondence and reports for the key personnel of our medical center.

The centralized recording system incorporates the use of the regular dial telephone set and can be used on any private branch exchange. The telephone dictating trunk at Barnes was the first such installation by Southwestern Bell Telephone Company and one of the first such in the country, although there have been a few experimental installations for some time.

The functioning of the centralized recorder reduces and in many cases eliminates the need for individual recorders, especially in the office where the volume of dictation is at a minimum. By dialing a certain number on the telephone, the person may begin dictating, or by dialing a different number he can hear a playback of his dictation. This is then typed by a member of the typing pool which does all of the typing of the recorded dictation.

This new system is an addition to the network dictation system which has been in use here for some time. The network dictation method consists of several dictating stations at various locations throughout the center connected to three central recorders. Anyone of the central recorders (Continued on page 6)

Shown below is the first class of student nurse aides who graduated on June 23, 1955. They are, from left to right: Mrs. June King, Instructor, James Ester Allen, Evelyn Bailey, Hortense Roberts, Betty Jo Moore, Lenora Wesley, Helen Kenley, Martha King, Lida Fuller, Evelyn Glasscock, Instructor, Thelma Cooke, Delores Williams, Vepplise Mack, Ethel Stephenson, and Mildred Sneed.
CHAPLAIN'S CORNER
by
George Bowles

There is one certain element in the make-
up of life that is often neglected, yet
most of us have had experiences that have
taught us that it can be very important.
This is the very simple matter of silence.
It can be the treasured possession of
every person, available and useful from
early childhood through each succeeding
stage of human development. Like so many
other things, we can possess it or pass it
by.

This is the season of the year in which we
find added opportunities to discover the
meaning of silence. Young people leave
the rush of the city and attend a camp
with others of like age to take part in
activities of common interest, and in the
atmosphere of a beautiful lake or a stal-
wart mountain find peace that comes from
silence of the night or a beautiful sunset.
Busy adults seek the same results in turn-
ing from the pressure of daily responsi-
bilities to a running stream or a wooded
paradise. Those who do not have such op-
portunities have the same needs and can
meet them in some ways that open to all of
us. Many who can pay the price that is
required to go to the greatest beauty
spots of nature never discover a place for
silence in their lives, and many who find
it impossible to escape the necessity of
noisy labor can discover it in a city park.

It has been in the inspiring atmosphere of
silence that the greatest inventors have
planned, the greatest scientists have
thought, and the greatest poets have writ-
ten. Whatever the place might be that
we fill in life, it should inspire us
to know that silence often speaks a mes-
gage that we should hear.

NEW DICTATING SYSTEM PROVES VALUABLE AID
(Continued from page 5)

ers is available to each of the dictation
instruments. This system has been used
chiefly for those functions where dicta-
tion is done in a relatively large volume
at one time and from a location which is
principally for that purpose. An example
is the installation of dictation booths
for the medical staff.

The newer dictating system could present a
telephone traffic problem in the office
with only one telephone since the dictat-
ing would prevent incoming calls. However,
the savings on individual dictating sets
should be sufficient to provide additional
stations to these offices. Another nota-
able saving created by the new system is
the elimination of a trained stenographer
in the offices which have a low volume of
dictation. The dictation can now be done
by telephone and the stenographer could
then be replaced with a receptionist or a
clerk-typist.

Although the new centralized recording of
dictation system has been in effect here
for only a relatively short period of time,
it has already proven its value in conser-
vation of time and personnel.

MARY LEWIS AWARDED FELLOWSHIP
(Continued from page 2)

Committee of the Institute of Almoners to
fulfill this assignment.

Miss Lewis came to our medical center in
1946, and in June of 1952, was named
Director of Social Service. During World
War II, she served with the American Red
Cross and saw overseas duty in England and
France.
Shown at the left are the centralized recorders located in the Medical Record Department, which were mentioned in the preceding article.

Shown above are eight student anesthetists who completed their training and received certificates on June 17, 1955. They are from left to right: Wanda Schlup, Rosemary Pruitt, Norman Hampton, Helen Eberly, Billie Dodd, Bernard Boyer, Doris Tolar, and Bernice Bell.
MARY SMITH, LINEN ROOM SUPERVISOR, RETIRES

On June 30, 1955, Mary E. Smith retired from her position of Supervisor of the Barnes Linen Room.

In April of this year Miss Smith celebrated her twenty-fifth anniversary at Barnes, having begun work here on April 18, 1930.

Before leaving, Miss Smith was honored at a farewell party given by her employees in the Linen Room. Miss Smith’s future plans consist mainly of relaxing and enjoying her newly-acquired home in Vinita Park.

A brewery truck and a horse collided near an ant pile. An ant took a few sips of the spilled beer, grabbed the horse by the tail, and shouted, “Come on, big boy, we are going home.”

**BARNES HOSPITAL**
600 South Kingshighway
St. Louis 10, Missouri

Hubby wandered in at 3:00 a.m. after a glorious evening. In a few minutes a series of unearthly squawks howled out from the radio.

Wifie looked into the room and discovered him twisting the dial back and forth frantically. “For Heaven’s sake! What in the world are you trying to do?” She exclaimed.

“G’way! G’way; Don’t bother me,” he yelled “Somebody’s locked in the safe and I’ve forgotten the combinashun!”

“Why, I’ve been pumping the music for this church 43 years,” the old pipe organ pumper told the new minister. “Never found a piece yet I couldn’t pump either. But, last Easter, I pumped one the organist couldn’t play.”

“That’s the cat’s pajamas,” remarked Mr. Henpeck, as he picked up his wife’s sleeping togs.
