Washington University Record

No. 7, Vol. 32

May 20, 1982

Banners representing the different divisions and schools add pageantry to the University's most important and ceremonious annual function.

Some 2,100 estimated to graduate Friday

An estimated 2,185 degrees will be conferred at WU's 121st commencement ceremony Friday, May 21.

Candidates for doctoral level degrees number 110 for the doctor of philosophy degree in the Graduate School of Arts and Sciences; 129 for the doctor of medicine degree; 17 for the doctor of science degree; 77 for the doctor of dental medicine degree, and 173 for the doctor of law degree. An approximate total of 1060 graduate and 1125 undergraduate degrees will be conferred at the exercises.

Also invited to participate in the ceremonies are graduates who received degrees during the past year. In August 1981, 105 undergraduate degrees and 219 graduate degrees were awarded; in December 1981, 156 undergraduate and 173 graduate degrees were awarded.

The academic procession will start at 8:30 a.m. into Brookings Quadrangle. In case of rain, the ceremony will begin at 10 a.m. at the Checkerdome.

Richard Coles, director of the WU Tyson Research Center, will serve as grand marshal at the ceremony. Jarvis Thurston, WU professor of English, will be the honorary grand marshal. Student marshals representing each school will accept symbolic diploma covers and hoods for their classes.

Chancellor William H. Danforth will confer eight honorary degrees. The commencement speaker, Andrew F. Brimmer, will receive an honorary Doc-

tor of Laws degree. Brimmer, a noted Washington, D.C. economist, will speak on "The Erosion of Equity in American Society."

The seven others receiving honorary degrees are: Sir Godfrey Hounsfield, a Nobel Prize winner; Lee Hunter, a St. Louis inventor who holds many patents for automotive equipment; Paul Oskar Kristeller, a world-famous renaissance scholar and educator; Rita Levi-Montalcini, a celebrated neurobiologist and WU professor emeritus of biology who now resides in Rome; Bill Mauldin, Pulitzer Prize-winning cartoonist; Morton D. May, St. Louis business executive, patron of the arts and life trustee of WU; and Arjay Miller, former president of Ford Motor Co. and Dean Emeritus of the Stanford University Graduate School of Business.

Paul A. Bohlmann, who will graduate summa cum laude with an AB, will be the student commencement speaker. The editor-in-chief of *Student Life*, the campus student newspaper, he will speak on the individual's responsibility toward the community.

Receptions with brunch for graduates, their families and friends will be held at the following locations:

Architecture, Givens Hall; College of Arts and Sciences, north side of Graham Chapel; Graduate School of Arts and Sciences, Ann Whitney Olin Wom-

en's Building; Business, Edison Theatre and Bowles Plaza;

Dental Medicine, Stouffer's Riverfront Towers; Engineering, Millstone Plaza between Bryan Hall and McMillen Laboratory; Fine Arts, Steinberg Auditorium; Health Administration and Planning Program, Program classrooms and lounge, also Cori Auditorium on Medical School campus;

Law, Graham Chapel and Mudd Informal Lounge; Medicine, Chase-Park Plaza Hotel; Program in Occupational Therapy, Umrath Hall Lounge; Program in Physical Therapy, Breckenridge Inn-Frontenac; Social Work, Brown Auditorium and Brown Lounge; University College, Southeast Terrace, Brookings Hall.

Three issues of the *WU Record* will be published over the summer, after this current issue. They will appear on June 3, July 1 and August 5. Calendar items must be submitted, at the latest, two weeks prior to the date of the issue in which the item is to appear; news items may be submitted 10 days in advance of this date. Send news items and queries to the editor and calendar items to the calendar editor, both at Box 1142.

Two WU faculty elected to science academy

Two WU School of Medicine researchers have been elected to the National Academy of Sciences, one of the highest honors that can be bestowed upon an American scientist or engineer.

Stuart Kornfeld and Donald C. Shreffler were two of 60 new members elected to the academy at the organization's annual meeting in "recognition of their distinguished and continuing achievements in original research."

Kornfeld, professor of medicine and biochemistry and co-director of the Division of Hematology-Oncology, was recognized for his research on the biochemistry of glycoproteins. His work has helped to reveal the structure of the carbohydrate units of these molecules and to define the steps involved in their biosynthesis. These carbohydrate units are of interest because they serve as specific recognition markers in a variety of biologic reactions.

A 1962 graduate of the School of Medicine, Kornfeld served his internship and residency at Barnes Hospital. He joined the WU faculty in 1966 as an instructor in medicine.

Kornfeld is a member of the American Society of Biological Chemistry, the American Society for Clinical Investigation and the American Society of Hematology. He is the author of 95 publications and is currently editor of the *Journal of Clinical Investigation*.

Kornfeld

Shreffler

Shreffler, James S. McDonnell Professor and head of the Department of Genetics, was acknowledged for his study of immunogenetics and biochemical genetics of the major histocompatibility gene complexes. Specifically, Shreffler is a specialist in the genetics of the immunologic system and in the genetic basis for molecules that cause organ and tissue transplant rejections.

He received his undergraduate and master's degrees from the University of Illinois in 1954 and 1958, respectively, and his PhD from the California Institute of Technology. Shreffler joined the WU faculty in 1975.

A member of the American Association of Immunologists, the Transplantation Society and the Genetics Society of America, Shreffler also serves on the editorial boards of the *Annual Review of Genetics and Human Immunology*. He has written 174 papers.

Eliot Society selects Lowry for annual award

Dr. Oliver H. Lowry, Distinguished Professor Emeritus of Pharmacology at the WU School of Medicine and an internationally respected scientist, received the William Greenleaf Eliot Society Award Thursday, May 13, for his service to the University.

George Kassabaum, president of the society and a member of the University's board of trustees, presented the award at the group's annual dinner meeting.

Named to the School of Medicine faculty in 1947 as chairman of the Department of Pharmacology, Dr. Lowry conducted research there in biochemistry that has made him one of the most cited authors in scientific literature. Concerned with deciphering the internal workings of life's basic unit — the cell — his research has expanded knowledge of several protein deficiencies among children and led to the development of tests for vitamin deficiencies that cause diseases like beriberi.

He is particularly known for his work with the microbalance, an instrument that he has refined over many years to the point that it now can measure portions of cells weighing less than one-millionth of a gram.

As his investigations of the structure of nerve cells unfolded, his work came to the attention of the international science community. In 1962, he received the

Oliver H. Lowry prestigious Borden Award. Selected by *Nature Magazine* as one of the world's most eminent scientists, he has also been honored with membership in the National Academy of Sciences, the American Academy of Arts and Sciences and the Royal Danish Academy of Science.

He was chairman of the Department of Pharmacology for nearly 30 years, and concurrently, from 1955 to 1958, dean of the School of Medicine.

Born in Chicago, Dr. Lowry earned his bachelor's degree from Northwestern University in 1932, and his medical and doctoral degrees from the University of Chicago.

Board of Trustees elects Hunter, Stiritz to membership

George H. Capps, chairman of the WU Board of Trustees, has announced the election of two prominent St. Louis business and civic leaders to the board. They are: Lee Hunter, chairman of the board and chief executive officer, Hunter Engineering Co., and William P. Stiritz, chairman of the board and chief executive officer, Ralston Purina Co.

Hunter, a native St. Louisan, founded Lee Hunter Jr. Manufacturing Co. in 1936, and a year later was elected president of the Hunter-Hartman Corp., followed by his election to the presidency of Hunter Engineering Co. in 1947. In 1955 he was elected chief executive officer. A well-known inventor, he holds many patents, including the first rapid battery charger and the first on-the-car mechanical wheel balance. Hunter attended Westminster College, Fulton, Mo., and WU and is a trustee for Westminster. He recently served on the Commission on the Future of Wash-

ington University Engineering Task Force. He is married and has two children.

Stiritz became associated with Ralston Purina Co. in 1964 and was elected president and director in January 1981, after serving as a group product manager, director of product management and a division vice president. He was subsequently elected chairman of the board and chief executive officer in January 1982. A native of Jasper, Ark., he received a BS in business from Northwestern University in 1958 and an MA in history from St. Louis University in 1968. He is married and has four children.

Capps said that the election of Stiritz and Hunter to the board "reflects the outstanding quality of our trustees. The University is extremely fortunate to have executives of their caliber and leadership from the St. Louis community."

Lee Hunter

William P. Stiritz

Danforth, Gass elected into Arts and Sciences Academy

WU's Chancellor William H. Danforth and William H. Gass, David May Distinguished University Professor in the Humanities, are among the 78 leading scholars, scientists, public figures and artists who were elected to membership in the American Academy of Arts and Sciences on Wednesday, March 12, at the Academy's 202nd annual meeting in Cambridge, Mass. In addition, the Academy elected 10 foreign honorary members.

Also named to the internationally famous academy was Iris Murdoch,

Danforth

Gass

novelist and philosopher of the University of Oxford, who served as Visiting Professor at WU in the spring of 1972.

Other individuals named members were: Agnes de Mille, choreographer and author, New York, N.Y.; Russell Train, president of the World Wildlife Fund, Washington, D.C.; and Oswald Garrison Villard, Jr., professor of electrical engineering, Stanford University, Stanford, Calif.

Danforth and Gass join 12 other members of the WU community who have been elected previously. They are:

Carl F. Cori, Distinguished Service Professor Emeritus of Biological Chemistry; Hallowell Davis, professor emeritus of physiology, lecturer in physiology and otolaryngology in the Department of Speech and Hearing, and research professor emeritus of otolaryngology; Thomas H. Eliot, former chancellor and professor emeritus of political science; Viktor Hamburger, Edward Mallinckrodt distinguished University Professor Emeritus of Biology and research associate in biology; David M. Kipnis, August A. Busch, Jr. Professor and head of the Department of Medicine; Rita Levi-Montalcini, professor emeritus of biology; Oliver H. Lowry, Distinguished Professor Emeritus of Pharmacology; George E. Mylonas, professor emeritus in the humanities; Howard Nemerov, Edward Mallinckrodt Distinguished University Professor of English; William D. Phillips, Charles Allen Thomas Professor of Chemistry; Peter H. Raven, Englemann Professor of Botany; and Samuel I. Weissman, professor of chemistry.

Founded in 1780 by John Adams and other intellectual leaders prominent in laying the philosophical foundations of the new American nation, the Academy today is a national honorary society with active centers on the west coast and in the midwest in addition to its offices in Boston. Its membership of 2,300 includes representatives from the mathematical, physical and biological sciences, as well as law, administration, public affairs, theology, fine arts and the humanities.

Intensive study of transplant procedure funded

Clinical investigation, of a new procedure that appears to increase the success of kidney transplants has been funded by the National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases, National Institutes of Health.

Charles B. Anderson, professor of surgery at the School of Medicine, and head of the renal transplantation team at Barnes Hospital, received a five-year, \$608,000 grant to intensify testing of a procedure that has been under investigation since 1973.

The procedure involves treating renal patients with blood cells from the kidney donor and immunosuppressive medications for several months prior to transplant surgery. This treatment has increased the key, one-year survival rate from 60 percent to 90 percent of kidney transplant patients.

The WU transplant team, including Edward E. Etheredge, associate professor of surgery, and Gregorio A. Sicard, assistant professor of surgery, reported their recent results at the February 1982 meeting of the Society of University Surgeons in New York.

Washington University Record (USPS 600-430), Volume 7, Number 32, May 20, 1982. Published weekly during the school year, except school holidays, at the Office of News and Information, campus box 1142, Washington University, Lindell and Skinker, St. Louis, Mo. 63130. Second-Class Postage paid at St. Louis, Mo. Postmaster please forward change of address to Campus Box 1142. Washington University, St. Louis, Mo. 63130.

Breaking taboos in sex education

Being a published author can be a plus for any career, but for **Meenakshi Rao** it is only a small part of her future in family therapy and sex education. Rao, a native of India, will receive her master's degree in social work this Friday.

Four years ago, while Rao was working in India as a sub-editor for a design magazine, *Inside/Outside*, she was commissioned to write six articles on sexuality for *Youth Times*, a national magazine for teenagers owned by the Times of India. The articles proved to be so popular that, after completing another six articles, Rao was asked to write an advice column every two weeks.

"I'm not an expert on sexuality," Rao said, "but as a writer I know where to find the answers."

Her columns have been collected into a book, *Sexuality: A Guide For Young People*, to be published this spring by the India Book House. The book is the first of its kind in India offering straight talk to teenagers about sex. Discussion on the subject has been limited previously to marriage manuals or to books imported from the U.S.

"It's a very radical subject to write about in India," Rao noted, "especially for teenagers. There are a lot of taboos. Even doctors in India have very little training in sexuality. It was hard to find consultants."

Born in Calcutta and raised in the south of India, Rao first came to the United States in 1974 to get her bachelor's degree in English at Wesleyan University in Connecticut. She returned to Bombay for two years, during which time she wrote the articles, and then came back to get her master's degree in social work from WU.

"I chose social work because I

Meenakshi Rao

wanted to learn more about relationships and families and what part sexuality plays in these relationships," Rao said. "My main interest now is in family therapy, but I have continued to learn about sex education."

Rao says she will continue to write, but as a social worker, not as a journalist.

As a student at WU, Rao worked as a staff member at Reproductive Health Services in St. Louis, where she counseled clients with problem pregnancies. Later, she worked at a residential treatment center where she helped adolescents with various behavior problems. There she developed two workshops for staff members, training them to educate their clients on sexuality.

Although she has no definite plans for the distant future, Rao will spend the next year working in Syracuse, N.Y., to gain more experience in family therapy.

they live almost as feudal tenants. There is much social injustice. To me, this is the reason behind all the violence."

Navarro, a founder of the El Salvadorian Human Rights Commission, believes that, in time, his country will adapt to a more democratic form of government. He says that it must change. "These technical solutions we are working on can only be beneficial if the political and economic system allows it," he stated. "Otherwise, it's just a lot of nonsense."

Students share Olin prize

Ellen Pint and Eric Larson, both graduating seniors majoring in economics, shared the \$100 for the Olin Prize this year.

The award is given to the most outstanding graduating senior in economics.

Pint will attend the University of Oxford next year, as a Rhodes Scholar and Larson, a winner of a National Science Foundation Fellowship, will attend M.I.T.

Campus Notes

Avner Cohen, visiting assistant professor of philosophy, has been awarded a National Endowment for the Humanities summer fellowship. Cohen will use the grant to convert his dissertation into a book titled *Doubt, Anxiety and Salvation — The Study of Metaphysical and Psychological Themes in the History of Scepticism*.

Barbara Luck, a graduate student in political science, was invited to present a paper to the National Conference of Black Political Scientists last month in New Orleans. Her work was titled "Supreme Court Policymaking and Public Opinion: Busing and Implications for the Black Community."

William H. Gass, David May Distinguished University Professor in the Humanities, delivered the commencement address at George Washington University's Columbian College of Arts and Sciences (Washington, D.C.) on Sunday, May 9. His topic was "On Reading To One's Self." Gass received the honorary degree of Doctor of Humane Letters at the afternoon graduation exercises.

Recent paintings by **Hylarie McMahon**, associate professor in WU's School of Fine Arts, are on view at the Timothy Burns Gallery, 393 N. Euclid Ave., through June 6. The exhibition contains 10 new pieces on painted fabric from a series called "Canopy of Heaven." Gallery hours are noon to 6 p.m., Tuesday through Sunday, and until 9 p.m., on Wednesday and by appointment.

A neighboring institution of higher education, the University of Missouri, St. Louis (UMSL), awarded **Howard Nemerov**, WU Edward Mallinckrodt Distinguished University Professor of English, an Honorary Doctor of Humane Letters degree on Sunday afternoon, May 16, at ceremonies on its Normandy, Mo., campus. Previously, he has received honorary degrees from Lawrence, Tufts and Washington and Lee universities. University of Missouri President James C. Olson conferred the degree.

Lawrence F. O'Neill, administrator

Leo Kelly, longtime WU baseball coach, dies

Leo H. Kelly, head baseball coach at WU, died May 14 at Barnes Hospital after suffering from leukemia for one year.

Kelly, 51, was a native of Brookfield, Ind. He graduated from Hanover College in 1952 with a BS in physical education and received his master's degree from Indiana University in 1955.

Kelly joined the WU athletic staff in 1968 as head baseball coach and assistant football coach. He became assistant athletic director in 1973, a position he held as well as assistant football coach. Prior to joining the Bears' staff,

of physical facilities, has been elected president of the St. Louis chapter of the Missouri Society of Professional Engineers. He will be installed May 27. O'Neill has been a member of the St. Louis chapter since 1965 and a member of the national organization since 1962. The St. Louis chapter has about 900 members.

Norris K. Smith, professor of art and archaeology, has been awarded the 1982 Dean's Award of University College for outstanding service and teaching. In giving Smith the award at the Alpha Sigma Lambda banquet on May 1, Dean Robert C. Williams cited Smith's contributions as a "thoughtful, vociferous, and nagging critic of our technocratic times." A member of the Faculty of Arts and Sciences, Smith has taught part-time adult students in University College courses since 1956.

Jarvis A. Thurston, who has been teaching English for 30 years and is preparing now to retire, was honored at a party in Hurst Lounge, Duncker Hall, recently. Dan Shea, chairman of the Department of English, and Naomi Lebowitz, professor of English, spoke of Thurston's distinguished career at WU. Director of the graduate Writers' Program and coeditor for many years with his wife, the noted poet Mona Van Duyn, of *Perspective*, a literary magazine, Thurston received a surprise issue of this now moribund publication. Complete with an introduction by Lebowitz, this issue comprises essays and stories by Howard Nemerov, Constance Urdang, Donald Finkel, Stanley Elkin, and others.

Thurston also received a painting by Joan Elkin depicting him and others gathered at the home of Eli and Lee Robins of WU's Department of Psychiatry. The painting will hang in Hurst Lounge.

John F. Zipp, assistant professor of sociology, attended the annual meeting of the Southern Sociological Society April 14-17 in Memphis, Tenn. He presented a paper entitled "A Multi-Dimensional Analysis of Political-Economic Attitudes in the U.S."

Navarro— continued from p. 6

He plans to complete his doctoral thesis this year, expanding his research to determine how a Third World nation might rely entirely on renewable resources for energy, including solar and wind power, hydropower (rivers), biomass (plants), and pedal power (bicycles). As director of the Salvadorian Center for Appropriate Technology, he recently attended a conference on this subject in Senegal, Africa. Approximately 30 countries sent representatives to create an organization for exchanging information. "We believe that a lot can be learned in a south to south (hemisphere) exchange," he explained.

Impressed with North America's high level of technology and industrialization, Navarro is surprised at most citizens' lack of political awareness and knowledge about life in the rest of the world. For upper-middle class families like his, economic conditions are not so different than in the U.S.. There are cars, food and parties enough, he said. "For the majority of the people, though, life is very difficult. Most quit school by age 10," he reported. "In rural areas,

Kelly was assistant football coach, tennis coach and a counselor in the Dean's Office at Rose-Hulman Institute. From 1955 to 1963, he was head football and baseball coach and assistant basketball coach at his alma mater, Hanover.

John Schael, director of sports and recreation at WU, said, "Leo Kelly was an excellent coach and loyal colleague, and devoted family man. He was an inspiration to our entire staff and we will miss him."

Kelly is survived by his wife and two daughters.

The funeral was held May 17.

Calendar

Thursday, May 20

7:30 a.m. The Ogura Lectureship Inaugural Address of the Department of Otolaryngology, "Baffling Diagnostic and Therapeutic Modalities in My Practice of Head and Neck Surgery," Max L. Som, chief of head and neck surgery, Beth Israel Hosp. and Professor Emeritus of Otolaryngology, Mount Sinai School of Medicine, New York. East Pavilion Aud., Barnes Hosp. Plaza.

11 a.m. Phi Beta Kappa Initiation Ceremony, with speaker Florence E. Moog, WU Rebstock Professor of Biology. Steinberg Hall Aud.

2:30 p.m. Eliot Honors Convocation, "The Solomon Window," Norris K. Smith, WU prof. of art and archaeology. Graham Chapel.

4 p.m. Chancellor's Reception for seniors, parents, guests, faculty and administrators following Eliot Honors Convocation. Bowles Plaza, Mallinckrodt Center.

8 p.m. Individual Recognition Ceremony for Graduates of the College of Arts and Sciences. Brookings Quadrangle. Reception to follow in Bowles Plaza.

8 p.m. Individual Recognition Ceremony for Graduates of the School of Engineering and Applied Science. Edison Theatre. Reception to follow in Bowles Plaza.

10 p.m. Senior Bash and Band Party. Francis Field.

Friday, May 21

7:30 a.m. Champagne Toast for Seniors. Bowles Plaza.

8:30 a.m. WU 121st Commencement Exercises. Brookings Quadrangle. Receptions to follow exercises. In the event of rain, commencement will be held in the Checkerdome at 10 a.m.

9 a.m. The 27th George H. Bishop Lecture in Experimental Neurology and Neuroscience Symposium, "Muscle and Joint Sense in Man and Animals," Moore Aud., 660 S. Euclid.

Noon. University College 50th Anniversary Open House for graduates, parents, guests, alumni, faculty and administrators. Room 20, January Hall.

4 p.m. The 14th Everts A. Graham Visiting Professor of Surgery Lecture, "Body Fuels in Acute Illness," John A. Collins, prof. and chairman, dept. of surgery, Stanford U. East Pavilion Aud., Barnes Hosp. Plaza.

Saturday, May 22

9 a.m. The 14th Everts A. Graham Visiting Professor of Surgery Lecture, "The Operative Staging of Cancer in the Breast," John A. Collins, prof. and chairman, dept. of surgery, Stanford U. East Pavilion Aud., Barnes Hosp. Plaza.

Tuesday, May 25

4 p.m. Department of Anatomy and Neurobiology Lecture, "Sympathetic Chromaffin and Mast Cells as Targets of NGF," Rita Levi-Montalcini, Laboratory of Cell Biology, Rome, Italy, and WU prof. emeritus of biology. Moore Aud., 660 S. Euclid.

Wednesday, May 26

4 p.m. Department of Microbiology and Immunology Research Seminar, "Threonine Deaminase: The Role of This *ilv*-Pathway Allosteric Enzyme in Controlled Expression of the *ilv* Operons: *valS*, *ileS* and *leuS* in *Escherichia coli*," Luther S. Williams, WU prof. of biology. 509 McDonnell Medical Sciences Bldg., 4570 McKinley.

Friday, June 4

Noon. The 11th Annual Thomas H. Burford Lecture in Thoracic Surgery, "Surgical Management of Left to Right Shunts in Infancy," Harvey W. Bender, chairman, dept. of cardiac and thoracic surgery, Vanderbilt U. School of Medicine, Nashville, Tenn. Clopton Aud., 4950 Audubon.

Exhibitions

"Core Show," a collection of drawings and designs by WU School of Fine Arts freshmen and sophomores. Bixby Hall Gallery. 10 a.m.-4 p.m. weekdays; 1-5 p.m. weekends. May 21-August 31.

The academic year 1981-82 will be one to remember in WU's history. On October 7 the campus was struck with a series of still unsolved fires that damaged McMillan, Prince and (below) January halls. The vacant Sigma Alpha Epsilon fraternity house suffered extensive damage on Oct. 24, again, as a result of arson. By January, things cooled down when the biggest snowstorm to hit St. Louis in 70 years (left) covered the campus with 15 to 20 inches of snow, closing WU for two days. By February 22, the snows had cleared, making way for the WU celebration of George Washington's birthday and the founding of the University.

"Fools Are My Theme, Let Satire Be My Song," a collection of classical satire from Aesop and Aristophanes to Mark Twain and Kurt Vonnegut. Includes a manuscript letter written by Mark Twain and a rare edition of Voltaire's *Candide*. Special Collections, fifth floor, Olin Library. 8:30 a.m.-5 p.m. weekdays. Through Aug. 31.

"School of Fine Arts Undergraduate Exhibition," a collection of works by WU School of Fine Arts juniors and seniors in diverse media. Upper Gallery, WU Gallery of Art, Steinberg Hall. 10 a.m.-5 p.m. weekdays; 1-5 p.m. weekends. May 16-23.

"Early, Old Master and Contemporary Printmaking Techniques," a comparative survey of printmaking techniques organized by the WU art history museum class. Print Gallery, WU Gallery of Art, Steinberg Hall. 10 a.m.-5 p.m. weekdays; 1-5 p.m. weekends. May 16-23.

Performing Arts

Saturday, June 5

8 p.m. Edison Theatre Presents The New England Dinosaur, a 10-member dance company from Boston. Edison Theatre. Tickets are \$6 general admission; \$4.50 for WU faculty, staff and area students, and \$3 for WU students. Tickets available at Edison Theatre box office, 889-6543.

Calendar Deadline

The deadline to submit items for the June calendar of the *WU Record* is May 20. Items must be typed and state time, date, place, nature of event, sponsor and admission cost. Incomplete items will not be printed. If available, include speaker name and identification and the title of the event. Those submitting items, please note name and telephone number. Address items to Susan Kesling, calendar editor, Box 1142.

Music

Saturday, May 22

7 p.m. Woodwind Quintet Recital with Cathy Woelbling, WU secretary for the Consortium for the Graduate Study of Management, oboe; Gary Mermel, WU medical school student, horn; Nan Nolting, computer programmer for Monsanto Co., bassoon; Mitch Blatt, WU medical school student, clarinet; Susan Wells-Souza, music instructor, CASA, piano; and Kathy Warner, private music instructor, flute. Performing works by Barrows, Milhaud, Mozart and Deslandres. Fine Arts Bldg., Fontbonne College, 6800 Wydown Blvd. No charge.
