Stephen Jay Gould will open 1990-91 Assembly Series

Award-winning paleontologist and author Stephen Jay Gould will open the 1990-91 Assembly Series at 11 a.m. on Aug. 30 at the University Center. Gould, one of America's foremost paleontologists, has written many books on evolution and scientific history. The Alexander Agassiz Professor of Zoology at Harvard University, Gould is famed for his gift for making the general public's attention in the mid-1970s with his essays in Natural History magazine. In 1980 he received the National Magazine Award for Essays and Criticism for his column, "This View of Life," in Natural History. Gould received wider recognition when two collections of his essays were published: "The Panda's Thumb" in 1977 and "The Panda's Thumb" in 1980, for which he won the Phi Beta Kappa Book Award in Science.

Gould's lecture is co-sponsored by the Assembly Series, Congress of the South 40, Orientation Committee and Student Union. For more information on the lecture, call 889-4620.

Plant sale is set

More than 60 varieties of plants, ranging from African violets to hibiscus trees, will be sold during a giant plant sale from 10 a.m. to 4 p.m. Monday, Aug. 27, in the north lobby of plants for the Indian Nations. Prices for plants will range from $1.50 to $2.50.Hints on planting will also be available for sale.

The annual plant sale is sponsored by the University's Women's Society and the Women's Panhellenic Association. Proceeds will go to both the University's Women's Fund and to the Women's Panhellenic Association's educational fund.

For information, call 889-5105.

Revealing restoration

Carol Winter, a conservator at The Cleveland Museum of Art, restores a 14th-century B.C. mummy case that has been in the University's holdings since 1986. In the background, Bruce Chinn, director of the Cleveland Museum of Art, and Richard M. Levy, director of the Cleveland Museum of Art, examine the case. In exchange for the restoration work, the gallery will lend the case to the Cleveland Museum for a major exhibition. See story on page 2.

The relationship between universities and NASA is the worst since the agency formed

Scientists testify at congressional hearing

During the past 15 years, the longstanding partnership between NASA and universities has seriously eroded and the federal government has consistently underfunded the basic scientific research that keeps our nation technologically competitive. So testified Washington University's Martin H. Israel, Ph.D., and Robert M. Walker, Ph.D., before a field hearing of the U.S. House of Representatives' subcommittee on Science and Space Science and Applications.

The hearing, which concerned the future of America's space program, was held July 23 at the St. Louis Science Center. Dennis Wilt, Ph.D., president of the Science Center, also testified as part of a panel with Israel and Walker.

The hearing was organized by U.S. Rep. Jack Buechner (R-Missouri) to coincide with Spaceweek St. Louis, held annually to mark the anniversary of the Apollo 11 moon landing. Rep. Harold L. Volkmer (D-Missouri) chaired the session, which also included testimony from representatives of the private sector and the government, including James T. Rose, assistant administrator for NASA's Office of Commercial Programs.

Members of the House subcommittee said they were concerned with what they had learned from Israel and Walker's testimony, and promised to ask NASA for an explanation of some of the specific problems they cited.

Walker, McDonnell Professor of Physics and director of the McDonnell Center for the Space Sciences, told the committee that NASA's increasing bureaucracy is impeding basic scientific discipline than I am at this moment, and while I commend the agency for the advances of the last several years, I must also tell you, sadly and reluctantly, that from my viewpoint the relationship between universities and NASA is the worst since the agency was formed," Walker said. "University space scientists are facing a crisis which if not soon resolved will destroy the scientific base needed to fly future missions and to provide the young talent needed to keep our country in a pre-eminent position into the next century."

In his testimony, Israel, professor of physics and dean of the Faculty of Arts and Sciences, said that "government agencies are expecting universities to bear an increasing share of the support of basic research. We cannot expect the parents of our tuition-paying students to pay for the basic research needed by our entire nation," Israel, who has served on many NASA committees, further noted that "this nation needs a healthy university research base if we are to maintain our stature in a competitive technological world" and that "universities are the training ground for future space scientists."

Israel and Walker pointed out that NASA research and analysis (R&A) budgets — which provide basic funding for most university-based research groups — are not only failing to keep pace with inflation, but are frequently raided to make up for budget problems in NASA such as cost overruns of missions or broad American Indian center director named

A former legal assistant with the U.S. Indian Health Service has been named director of the new Center for American Indian Studies in Social Services at the University's social work school.

Dana Wilson Klar's appointment, effective July 1, was announced by Shari K. Khinduka, Ph.D., dean of the George Warren Brown School of Social Work.

"Ms. Klar's admirable blend of educational background, personal commitment and enthusiasm will help us at the George Warren Brown School of Social Work develop a much-needed program for preparing future social work practitioners and leaders to serve the American Indian people of our nation," said Khinduka.

Establishment of the American Indian studies center was announced this past May. The center will make it possible for academically qualified Native Americans to receive advanced professional education in social work. Klar's responsibilities include recruiting qualified Native American students, teaching and advising, and conducting related research.

Klar, a graduate of the University's law and social work schools, had been supervisor of Human Resources at Southwestern Bell Publications in St. Louis since March 1989. Prior to her employment at Southwestern Bell, Klar worked in systems resource management for the Indian Health Service within the Department of Health and Human Services in Washington, D.C. While there, she analyzed Indian health laws from 1980 to the present in researching alternative health-care systems for the Indian Nations.

Klar received a bachelor's degree in 1986 from Louisiana State University in Baton Rouge, where she had a Governor's Commission on Indian Affairs grant from 1982-85. At Washington University, where she was enrolled in a dual degree program, she earned both a master's degree in professional social work and a law degree in May 1989. She was a U.S. Federal Indian Health Fellowship recipient from 1987-89.

The American Indian studies center was established through a gift from an anonymous St. Louis donor. The gift will provide six annual scholarships and stipends for Native American graduate students, plus funds for the center's yearly operation.
The mummy — Henut-wedjebu — is 3,000 years old, has been identified by scholars at the University of Missouri at Columbia. Only one of its kind in the Western hemisphere.

Cleveland Museum conservator Bruce Christman examines the gold on the mummy case’s left cheek, which will be regilded along with other face parts where the gold has been destroyed.

A 14th-century B.C. mummy case covered with gold, colored glass and pigments, which has been in the Gallery of Art collection since 1996, is getting a beauty treatment by conservators from The Cleveland Museum of Art.

Cleveland Museum conservator Bruce Christman and Carol Warner recently came to the University to restore the case, which was excavated near Thebes, Egypt. In exchange for the treatment, the gallery will lend it to the Cleveland Museum for a major exhibition that will be part of the museum’s 75th anniversary celebration.

Two trustees elected; others re-elected.

Two new members have been elected to the Board of Trustees: Thomas H. Jacobson, chairman of the board of directors and chief executive officer of Mercantile Bancorporation Inc. and Mercantile Bank of the West, and E. Whitacre Jr., chairman and chief executive officer of Southwestern Bell Corp.

The Board also announced the re-election of the following former trustees to four-year terms: B. A. Bridgewater Jr., chairman of the board, president and chief executive officer of Brown Group Inc.; Paul L. Miller Jr., president of P.I. Miller & Associates; and Harvey Salgmann, chairman of the board of INTERCO INCORPORATED.

Lee E. Hanson receives promotion.

Lee E. Hanson, director of development services, has been promoted to assistant vice president and director of development services, announced.

Hanson has been with the Cleveland Museum since 1979.

Thomas A. Harig named acting associate vice chancellor for business affairs.

Thomas A. Harig, director of purchasing and general services, has been named acting associate vice chancellor for business affairs, announced.

Harig will continue his duties as director of purchasing and general services. He succeeds Joe F. Evans, who retired June 30, after more than 30 years at the museum.

Harig began working at the University in 1961 in the procurement department. He left in 1968 to serve as vice president for administration at Lindenwood College. He returned to the University as director of procurement and contract administration, which has existed since 1982, and is now the general services department.

Harig has studied to be a board member of the Educational and Institutional Cooperative Service Inc., a not-for-profit cooperative buying organization made up of more than 2,220 universities, colleges, hospitals and health-care organizations throughout the United States.

Hanson earned his bachelor’s degree in political science in 1969 and a master’s in teaching in political science in 1979, both from Northwestern University. He also participated in the doctoral program in educational administration at Northwestern in 1972.

Hanson’s previous experience includes serving as an instructor for political science for the evening division at Kendall College in Evanston, Ill.

The Board of Trustees also has re-elected the following former trustees, who, after a mandatory one-year hiatus, are eligible for additional terms: David C. Farrell, chairman, and chief executive officer of The May Department Stores Co.; Richard F. Ford, managing general partner of Gateway Associates L.P.; and Louis S. Sachs, chairman and chief executive officer of Sachs Electric Co. They are elected to four-year terms.

In addition, the University’s Board also announced the appointment of two emeritus trustees: Ellic H. Stein, chairman emeritus of Stifel Financial Corp., and William K. Yao, founder of William Yao & Associates Inc., Consulting Engineers.

Lee E. Hanson

Lee E. Hanson, director of development services, has been promoted to assistant vice president and director of development services, announced. He is also an active member of both the University Risk Management and Insurance Association and the National Association of Educational Buyers. He is former chairman of the Washington University United Way campaign.

Lee E. Hanson earned his bachelor’s degree in political science in 1969 and a master’s in teaching in political science in 1979, both from Northwestern University. He also participated in the doctoral program in educational administration at Northwestern.

Lee E. Hanson
Journal of Nagel professor

William C. Jones, J.S.D., professor of law, has been appointed the Charles Nagel Professor of International and Comparative Law at the University of Chicago, according to Doney D. Ellis Jr., J.D., dean of the School of Law.

Jones' appointment recognizes his contributions to the law school and to legal scholarship. "His substantial scholarly contributions to our understanding of Chinese law have attracted national recognition," Jones, a Chinese law expert, has been a member of the law faculty since 1995. From 1982-84 he served as a Fulbright Lecturer at Wuhan University in the People's Republic of China.

Carl Rhodes appointed associate dean

Carl D. Rhodes Jr., Ph.D., has been named associate dean for humanities studies at the School of Medicine and associate dean in the Graduate School of Arts and Sciences.

The appointments, effective July 1, were announced by Burton E. Sobel, M.D., vice chancellor for medical affairs and dean of the School of Medicine, and Edward N. Wilson, Ph.D., dean of the Graduate School of Arts and Sciences.

"Carl Rhodes is a truly outstanding administrator of graduate programs in the sciences," Peck said. "His unique talents will have a strong, positive impact on all phases of our University." Rhodes will be a chief administrative officer for the six interdepartmental Ph.D. programs in the Division of Biology and Medical Sciences. As such he will plan curricula, coordinate recruitment and have direct responsibility for the division's programs.

Rhodes' responsibilities in the Graduate School of Arts and Sciences, Rhodes will be involved in recruiting students for mathematics and the laboratory sciences, including chemistry, earth and planetary sciences and physics.

Rhodes has also received two faculty appointments: research professor in biochemistry and molecular biophysics at the School of Medicine and adjunct professor of biology.

Glenda Wiman is named assistant dean

Glenda K. Wiman has been named assistant dean for special programs at the School of Medicine.

The appointment, effective July 1, was announced by William A. Peck, M.D., vice chancellor for medical affairs and School of Medicine dean.

"Glenda Wiman is a distinguished leader in academic medicine with a broad array of skills. She has been involved with student affairs for over 15 years, starting as a staff writer for Outlook magazine. She served as coordinator of news and information for 15 years, starting as a staff writer for Outlook magazine. She served as coordinator of news and information for three years and was named director of corporate communications in 1981. Wiman received her bachelor's degree in English and communications from Northwestern University in 1987.

**CALENDAR**

**LECTURES**

Aug. 2-30

Friday, Aug. 3

1 p.m., Departmental and Molecular Biophysics and Division of Hematology and Oncology Seminar, Factor VII Genes: Synonyms? How Are They Involved in Frey's Cutaneous Experiment?" Len Petersen, Novo-Nordisk, Copenhagen. Room 961 Clinical Sciences Research Bldg. Washington University.

**WEDNESDAY, AUG. 29**

**THURSDAY, AUG. 30**

Noon, Dept. of Transplant Surgery Seminar, "Cytoprotective Drug Development in the Regulator at the Late Pro-Effector Stages." Brian Mandl, associate professor, surgery, microbiology and immunology, Medical College of Wisconsin, 800 S. Michigan Ave. Room 756 Clinical Sciences Research Bldg.

**MUSIC**

Monday, Aug. 13

Monday, Aug. 27

9 a.m., Payroll Office Workshop, "Direct Deposit Service for Employees," by William S. Beggs, WU payroll manager. Room 215 McDonnell Medical Sciences Bldg. on Medical School Campus. (Also 10 a.m. Aug. 21, Room 118 Brown Hall on Hilltop Campus.) For more info., call 726-4387.

**MISCELLANY**

Monday, Aug. 13

9 a.m. Payroll Office Workshop, "Payment and Taxation of Alien Employees," by William S. Beggs, WU payroll manager. Room 215 Rebuck Hall. (Also 9 a.m. Aug. 14 in Cori Auditorium, McDonnell Medical Sciences Bldg. on Medical School Campus.) For more info., call 726-4387.

Monday, Aug. 20

1:30 p.m. Payroll Office Presentation on Direct Deposit Service for Employees, by William S. Beggs, WU payroll manager. Cori Auditorium, McDonnell Medical Sciences Bldg. (Also 10 a.m. Aug. 21 Room 118 Brown Hall, Hilltop Campus.) For more info., call 726-4387.

Monday, Aug. 27

10 a.m.-4 p.m., Women's Society and Women's Panhellenic Association Plant Sale, North Field, Wilder. Proceeds go to the Women's Society Scholarship and to the Washington University Educational Association educational fund. For more info., call 889-5105.

**CALENDAR**

**HEARING — continued from p. 1**

budget cuts imposed on the agency. Also, unlike during the Apollo days, NASA no longer provides universities with funding for research facilities and provides instead only levels of support for new equipment, technical support staffs and faculty salaries.

"While taking up a relatively small part of the overall NASA budget, R&A programs are responsible, direct or indirectly, for a large fraction of the scientific results of the space program," Israel said. "University scientists find themselves spending more and more time seeking a multitude of smaller research grants in order to sustain their research capability, rather than devoting time to research." Walker testified that the McDonnell Center has not been reaped for money it advanced NASA for work on initiatives such as the Long Duration Exposure Facility, the space station and the planned Space Station Freedom. Including Walker, who has been named investigator for one of the first experiments selected to fly on Freedom, 10 McDonnell Center faculty members are involved in space program projects, including the Magellan Mission to Venus, the Mars Observer and the space station.

Walker decried the deteriorating condition of many NASA-supported laboratories in the United States. He noted that unlike many other labs, the McDonnell Center has state-of-the-art facilities, thanks to generous private donors and a supportive and far-sighted administration. These facilities have helped the center achieve worldwide recognition for its groundbreaking work in the microanalysis of extraterrestrial materials, including lunar samples, interstellar dust and meteorites.

"The current attitude within the agency is a very far cry from the can-do philosophy that characterized NASA in the Apollo days," said Walker, who has worked on NASA missions, including Apollo 16 and 17, for more than 25 years. "Walker and Israel called on NASA to deposit an employee's net pay into either a checking or savings account at most banks, credit unions and savings and loans, locally or across the nation. William S. Beggs, payroll manager, will conduct presentations this month on both campuses. These presentations will provide additional information and enrollment opportunities for this service.

These sessions are scheduled for 1:30 p.m. Aug. 20 at Cori Auditorium at the medical school, and 10 a.m. Aug. 21 in Room 118 of Brown Hall. Employees who want to enroll during these sessions should bring an original check marked "void." Employees who cannot attend a session but who would like an enrollment form or more information may call Carol Brown at 726-4387.

**Workshop on non-resident tax laws set**

A workshop on "Payment and Taxation of Alien Employees" will be held on both the Hilltop and Medical School campuses. The Hilltop session will be at 9 a.m. Aug. 13 in Room 215 in Rebuck Hall, the medical school session will be at 9 a.m. Aug. 14 in Room 215 in the McDonnell Medical Sciences Building. University Payroll Manager William S. Beggs will present this two-workshop session.

The workshop, free and open to all interested faculty and staff, will help answer questions about the new U.S. non-resident tax laws. Non-resident employees as well as the University administrators who must deal with the requirements for these employees will benefit from this workshop.

Workshop speakers are Kathy Steiner, director of the International Office; Monica A. Plummer, supervisor in the Disbursements Office; and Maryanne Schrader of the Internal Revenue Service.

For more information, call 726-4387. If you cannot attend but would like to receive workshop materials, call Nila Mehta at the same number after Aug. 15.
