Danforth announces intention to retire

William H. Danforth, chancellor of Washington University, has announced his intention to retire, effective June 30, 1995. He has asked the Board of Trustees to begin a nationwide search for his successor.

Danforth said although he is not looking forward to retiring, he believes the time is right. He said the reason for leaving is threefold.

"I will be 68 next month. That’s three years past the normal retirement age for administrators of universities. The second reason is that we have absolutely super people in leadership roles. I can’t think of a better group. One ought to make a change when good people are in key positions."

Danforth also pointed to Project 21, a University-wide planning effort under way. He expects that after its completion Project 21 will take five years to implement and said someone new should be brought in before the plan is put into final form. "If we don’t I’ll have to stay until age 75. That’s a little old to be chancellor."

"I’m in good health. I love my job. I’d like to stay forever, but forever is not possible for us humans," he said. "I’ll miss being chancellor."

Danforth became chancellor in 1971, succeeding the late Thomas H. Eliot. His nearly 23-year tenure is one of the longest among active educational leaders.

"The last two decades have been remarkably good to Washington University," said William M. Van Cleve, chairman of the Board of Trustees and chairman of the Bryan Cave law firm. "Bill and Ibby have worked tirelessly for the University, for its faculty, its students, and its alumni. St. Louis is fortunate to have here one of the world’s great teaching and research universities — one that has grown in stature and scope under his leadership. The hallmarks of the Danforth era are attracting and retaining outstanding people and managing our resources superbly."

"A great leader leaves people of institutions ready to carry on effectively. I think Bill Danforth has done that," Van Cleve later told the media at a March 5 press briefing announcing Danforth’s intention to retire. According to Trustee Vice Chairman Lee Liberman, "Ibby and Bill epitomize the ideal partnership. As a team, they have brought much to the University, and the impact she and he have had on all our constituencies and volunteers is immensurable."

"Their work has involved our family, who have been always under- standing and patient. No two people could be more fortunate with the greatest Board of Trustees that anyone could have."

"No two people could be more fortunate than Ibby and I to share in the life of Wash-ington University for so many years," Danforth said. "Our lives have been en- riched immeasureably by the idioms of students, the knowledge and wisdom of colleagues in the faculty, the vision and generosity of friends, the leadership of the Board of Trustees."

Foreign language departments help high school students explore cultures

More than 1,000 area high school students and their teachers will visit Washington University March 21-25 to attend a variety of Foreign Language Week (FLW) events, which aim to help the students to explore international cultures.

"We continue to do this activity each year because Foreign Language Week is one of the few ways the language departments reach out to the community on a regular basis," said Stamos Metzidakis, Ph.D., associate professor of French and director of the French Department.

Among the highlights of French Day, which is slated for March 22, is a student-produced play titled "La Cantatrice Chauve" (The Bald Soprano). The play, by French playwright Eugene Ionesco, is considered an example of the Theatre of the Absurd.

German Day will be held on March 24. The special language day at Washington began in 1976 when June Mueller, a former Washington student, received her doctorate from the University of Chicago, received a degree in German and began teaching at Washington.

"Since Foreign Language Week is one of the few ways our language departments reach out to the community on a regular basis," Mueller said, "we try to do everything we can to make it appealing to all ages and to attract people to the community on a regular basis;" Mueller added.

Among the activities that have been included in German Day are: a scavenger hunt, spelling bee, poster contest, skits featuring high school performers and declamation contests, during which students recite German poems. Approximately 1,000 students from 30 schools participated in German Day last year.

Spanish Day, which will be held on March 25, will include movies, a help desk with accompanying videos, Afro-Hispanic poetry and music as well as Spanish rock music, a dance exhibit and lessons, and lectures on Latin American and Near Eastern Languages and Literatures.

The Department of Asian and Near Eastern Languages and Literatures and the Department of Russian also are sponsoring activities, including films, a talent show, and a lecture and an informational table on the Middle East, with Arabic and Turkish food. All of the events sponsored by the department of Asian and Near Eastern Languages and Russian and are free and open to the public.

"Many of our community members are interested in learning about the Middle East," said Melissa R. Schrader, department chair. "Our students have had the opportunity to study the area, and we realize that the community is interested as well."

The department is also sponsoring the Literature and Film Series, which will begin April 1 with a screening of "Bend it Like Beckham," an Indian film based on the true story of a girl growing up in London with the desire to play soccer. The series will continue April 8 with a screening of "The Kite Runner," which is based on the novel by Khaled Hosseini.

Women's Basketball

Last Week: NCAA Sectional — Washington 77, Aurora 68

This Week: NCAA Sectional, Friday and Saturday: 7 p.m. (EST) Friday: Washington University vs. Maryville (Ten.) men's basketball. Season Record: 23-3 (13-0 OUA champions)

Men and Women's Track and Field

Last Week at UAA Indoor Championships — Men: 7th of 7 teams

This Week: NCAA Division III Indoor Championships, Friday, March 11-12, Oshkosh, Wis.

Baseball

Last Week: Washington 10, Webster 0; Washington 6, Missouri-Rolla 5; Washington 8, Missouri-Rolla 4.

This Week: UAA Tournament, Covcook, Fla. — Thursday, March 11, 11 a.m. (EST) Friday, March 12, 11 a.m. (EST) Saturday, March 13, 11 a.m. (EST) Sunday, March 14, 11 a.m. (EST) Monday, March 15, 11 a.m. (EST) Season Record: 4-0

Authentic pow wow gives community chance to learn about Indian rituals

American Indian Awareness Week at Washington University Feb. 21-25 will conclude with the first authentic American Indian pow wow from 1 to 10 p.m. March 6 on Mudd Field. (In case of inclement weather, the event will be held in Francis Gymnasium.)

The pow wow will bring a festive conclusion to a week-long schedule that includes films, poetry readings, speeches and panel discussions on important historical, cultural and economic issues facing American Indians.

Sponsored by the Center for American Indian Studies at the George Washington School of Social Work, the activities are free and open to the public. Unless otherwise noted, all events will be held in the school’s Brown Hall Lounge. Continuing education credits are available for some sessions. For more information, call 935-4510.

Last year, the pow wow attracted more than 2,500 participants, including American Indian dance groups from across the Midwest. Dana Klar, J.D., center director, said the aim is to provide access to the arts.

"We were struck by how supportive the University community is," he said. "We wanted this to be a learning experience, to give undergraduates practice giving clinical studies graduate student."

"The arts and education Council (A.E.C.) of Greater St. Louis is "Steppin' Out" with its annual fund drive. This year's campaign theme, "Steppin' Out: Bringing Arts to Everyone," underscores the organization's mission to provide access to the arts.

The mission is accomplished by raising funds for more than 150 arts, cultural and educational organizations. Last year $2.3 million was raised.

The council does not receive government funding, but relies on individuals and companies for campaign support.

Chairman of the A.E.C. is Peter Edwardson, who said he believes participation by members of the University community is critical.

"The Arts and Education Council helps support and create the diversity and availability of cultural events on campus, which we feel is a community and institution of higher learning benefit from," he said.

Two students organize conference for psychology undergraduates

Two Washington University students have organized a psychology conference for undergraduates to present research papers. This is the University's first student-organized psychology conference.

The conference will be held from 8:15 a.m. to 5 p.m., March 26 in Eckel Hall. The keynote speaker is Robert M. Arkin, Ph.D., professor of social psychology and undergraduate dean of the College of Arts and Sciences at Ohio State University.

Senior psychology majors Tina Nguyen and Colanda Howard have worked since last spring to organize the event, which is co-sponsored by the University's Department of Psychology and the University's Psi Chi chapter, the honor society for psychology. Nguyen and Howard said they were inspired by a conference for students at the University of Chicago and Colanda Howard have worked since last spring to organize the event. They received guidance from Psi Chi faculty advisor, David Bahrke, Ph.D., associate professor; John A. Stern, Ph.D., professor of psychology; and Leonard Green, Ph.D., professor of psychology. Oai Chan, a sophomore architecture student, designed the conference brochure and program.

Howard and Nguyen have met weekly with a student committee made up of Psi Chi members Ryan Miller, Lauren Rosenkoetter and Raina Winfrey. That committee helped plan and organize the conference. In addition, the students received guidance from aPsi Chi faculty advisor, David Bahrke, Ph.D., associate professor; John A. Stern, Ph.D., professor of psychology; and Leonard Green, Ph.D., professor of psychology. Oai Chan, a sophomore architecture student, designed the conference brochure and program.

Howard and Nguyen have noted each other for eight years. They met as sophomores at Pattonville High School in Mary- lund Heights.

Students interested in participating can pick up registration forms at 1050 or at the information desks in Mallinckrodt and Wolff Halls. The deadline for advance registration is March 10. Registration is $15. Participants also may register at the conference. The fee for on-site registration is $17.

For more information about the conference, call Howard at 935-1259 or contact Nguyen by electronic mail at (tina@wustl.edu)

Spring break

The Record will not be published during the week of spring break. The next issue of the Record is dated March 24, 1994.
Faculty members receive tenure

At the March 4 meeting of the Board of Trustees, the following faculty were promoted with tenure, granted tenure or appointed as associate professors.

Promotion with tenure

Richard A. Abrams to associate professor of psychology; James J. Beatty to associate professor of physics; Karen L. Brock to associate professor of computer science; Fiona B. Marshall to associate professor of architecture; Ronald P. Loui to associate professor of earth and planetary sciences.

Grantee of tenure

M. Bruce Breyer, Jr., as associate professor of earth and planetary sciences.

Medical Campus

Appointments with tenure

Daniel C. Bade as professor of medicine (March 4, 1994).

Mary Ann Krey named Woman of the Year

The St. Louis Variety Club recently named alumna Mary Ann Krey its Woman of the Year. Krey, a member of the Board of Trustees, was honored during the March 5 Dinner With The Stars, which was held in the St. Louis Hall of the Anheuser-Busch Amphitheater.

Mary Ann Krey is owner and chief executive officer of Krey Distributing Co., a beer wholesaler serving St. Charles and St. Louis counties. She is also the treasurer of the club's board of directors and has served on the allocations committees for two years.

Since 1971, nearly 60,000 degrees have been awarded by Washington University. The faculty have written thousands of scholarly and scientific papers that have led to advancements in medicine and the many other fields of study. His research focuses on studying the function of nuclear proteins in the development of the immune system.

Ph.D., assistant professor of computer science.

Karen L. Cochran, a member of the Board of Trustees, was honored during the March 3 Dinner With The Stars, which was held in the St. Louis Hall of the Anheuser-Busch Amphitheater.

Speaking of

Kevin D. Moeller, Ph.D., associate professor of chemistry, delivered a lecture on "Analytical and Environmental Toxicology: Useful For Synthesis?" at the St. Louis-Meyers-Siphocals, a meeting of the American Chemical Society in St. Louis, Mo.

National Needs for Biomedical and Behavioral Research Personnel

The meeting was held at Washington University in the Shriver Center.

On assignment

Ira J. Bish, Ph.D., director of the Center for the Deaf (CID), professor and chair of psychology in the Department of Speech and Hearing and the director in the Department of Psychology. As a faculty member for the Society of American Gastroenterology Endoscopic Surgeons' scientific assembly and symposium, he will be held at April 16-19 in Chicago.

F. Anthony McCarthy to associate professor of mathematics.

Joel A. Tubbs, M.D., associate professor of medicine in the Department of Medicine.

Yoel Sadovsky, M.D., associate professor of medicine in the Department of Medicine.

The faculty have written thousands of scholarly and scientific papers that have led to advancements in medicine and the many other fields of study. His research focuses on studying the function of nuclear proteins in the development of the immune system.

Ph.D., assistant professor of computer science.

Hilltop Campus

The following is a list of positions available within the Hilltop Campus and requires one to have a high level of proficiency in their work and ability to perform with minimal supervision, ability to learn quickly, and experience with use and management of desktop computers; knowledge of desktop data base technology in a client/server environment highly desired; familiarity with DOS, Macintosh systems; knowledge of Novell, AppleTalk, Windows and TCP/IP networking highly desired. Resume required.

Programmer/Analyst III
940107. Computing and Communications. Requirements: Bachelor's degree; experience in programming; experience in the use of tools and equipment; ability to work with minimal supervision; ability to learn quickly; knowledge of the principles of algorithm design; experience with use and management of desktop computers; knowledge of desktop data base technology in a client/server environment highly desired; familiarity with DOS, Macintosh systems; knowledge of Novell, AppleTalk, Windows and TCP/IP networking highly desired. Resume required.

Secretary/Receptionist
940157. Computing and Communications Research Center. Requirements: Some college, typing 50 wpm with accuracy. Duties: Maintain calendars, schedules and files; make travel arrangements; type reports, correspondence, classwork; assist in fiscal activities of center; assist in annual report preparation; assist in coordination of events; assist in computer center technical center report distribution; coordinate mailings of networking and communications program; assist in departmental accounting procedures; maintain office supplies. Clerical tests required.

Librarian (Technical Assistant)
940165. Computing and Communications Research Center. Requirements: Some college, typing 50 wpm with accuracy. Duties: Maintain calendars, schedules and files; make travel arrangements; type reports, correspondence, classwork; assist in fiscal activities of center; assist in annual report preparation; assist in coordination of events; assist in computer center technical center report distribution; coordinate mailings of networking and communications program; assist in departmental accounting procedures; maintain office supplies. Clerical tests required.

Librarian (Technical Assistant)
940163. Computing and Communications Research Center. Requirements: Two years of college-level study or equivalent experience; knowledge of accounting through experience on course work; experience with Washington University's Data Information System preferred; ability to work with details in an organized way; valid driver's license; ability to obtain chauffeur's license; physical stamina; ability to work with computer heavy equip- ment, supply items and filled mail sacks; and to make delivery trips in bad weather. Previous mail handling and/ or shipping experience helpful. Clerical tests required.

Dental Radiologist
940184. Campus Stores. Requirements: Two years of college or secretarial/business school training; well orga- nized; ability to work in a fast-paced environment; ability to plan and coordi- nate work flow from multiple sources; excellent oral and written communication; typing 50 wpm with accuracy. Clerical tests required.

Receptionist
940193. Health Service. Requirements: High school graduate; pleasant, ener- getic, customer oriented; ability to work with others; experience in a fast-paced environment; ability to plan and coordi- nate work flow from multiple sources; excellent oral and written communication; typing 50 wpm with accuracy. Clerical tests required.

Secretary II
940195. Health Service. Requirements: High school graduate; pleasant, ener- getic, customer oriented; ability to work with others; experience in a fast-paced environment; ability to plan and coordi- nate work flow from multiple sources; excellent oral and written communication; typing 50 wpm with accuracy. Clerical tests required.

Statistical Data Analyst
940592. R. Psychology. Requirements: Bachelor's degree in math, computer science, data processing or related field; one to two years of related experience; knowledge of WordPerfect, spreadsheets, LANS, DOS and UNIX; ability to use PC, graphics packages for produc- tion of presentation-quality graphics and familiarity with large data base manage- ment.

Medical Campus

The following is a partial list of positions available within the Medical Campus and requires one to have a high level of proficiency in their work and ability to perform with minimal supervision, ability to learn quickly, and experience with use and management of desktop computers; knowledge of desktop data base technology in a client/server environment highly desired; familiarity with DOS, Macintosh systems; knowledge of Novell, AppleTalk, Windows and TCP/IP networking highly desired. Resume required.

Clinical Physician, Part-time
University Health Service. Washington University is seeking a physician with strong clinical skills, broad patient base; and experience in the issues of ado- lescents healthcare. Special consideration will be given to candidates with an orientation toward health promotion and education. Qualifications include three years of clinical practice beyond medical residency; board certification in family practice, internist; experience in college health or community medicine; experience in the use of WordPerfect; typing 50 wpm.
