

Supplementary Table 1: Outpatient hemodialysis facilities characteristics included in the study

	Facility A	Facility B	Facility C
Total number of HD patients	151	118	40
Number of enrolled HD patients at baseline	101	94	31
Total number of HCPs	34	33	12
Number of enrolled HCPs at baseline	20	12	7
Number of Pods	4	3	4
Total number of HD treatment chairs	32	24	16
Distance between chairs	>6 feet	4.8 feet for most chairs and 6 feet for few chairs	>6 feet

HD- Hemodialysis

HCPs- Healthcare Personnel

Supplementary Table 2: Distribution of HD patients with SARS-CoV-2 infection at baseline, three months and six months

<i>Baseline (N=227)</i>				
	SARS-CoV-2 PCR +	SARS-CoV-2 PCR -	No PCR test	Total
Serology test +	11	3	5	19
Serology test -	3	115	90	208
<i>3 months (N=187)* - excluding patients with + PCR or serology test at baseline</i>				
	SARS-CoV-2 PCR +	SARS-CoV-2 PCR -	No PCR test	Total
Serology test +	8	1	5	14
Serology test -	6	60	107	173
<i>6 months (N=153)** - excluding patients with + PCR or serology test at baseline or at 3 months</i>				
	SARS-CoV-2 PCR +	SARS-CoV-2 PCR -	No PCR test	Total
Serology test +	5	0	4	9
Serology test -	0	32	112	144

*18 patients lost to follow-up between baseline and 3 months

**14 patients dropped out between 3 months and 6 months

Supplementary Figure 1: Distribution of SARS-CoV-2 infected cases by hemodialysis facility, pod, and shift
