Volume 7, no. 1, e02231-15, 2016, <https://doi.org/10.1128/mBio.02231-15>. Upon reexamining the original sequencing data for MFM2.1, we have determined that Table 1 has an error. While 2% of reads did show the indicated tCa-to-tTa mutation at nucleotide 3288737 in the ROP17 gene, 42% of reads indicated a nonsense mutation (tCa to tGa) at this position, making the change in the amino acid sequence S151*. This does not change any of the biological conclusions of the paper.
