

Evaluation of a Chemoresponse Assay as a Marker To assess association of clinical outcome with assay result

[Rutherford T, *et al* (2013) A prospective study evaluating the clinical relevance of a chemoresponse assay for treatment of patients with persistent or recurrent ovarian cancer. *Gynecol Oncol* 131: 362-367]

Evaluation of a Chemoresponse Assay as a Predictive Marker To assess whether the association of outcome with assay result was specific for the administered therapy [*current manuscript*]
