

Supplementary Movies 1–12. pRF results on dynamic rotating cortical surfaces. Each movie shows group-average pRF model solutions (S184) on the inflated *fsaverage* surface. The format is the same as in Figure 4. There are a total of 2 hemispheres \times 6 maps (curvature, angle, eccentricity, zoomed eccentricity, pRF size, variance explained) = 12 movies. The movies are accessible at the OSF web site (<https://osf.io/bw9ec/>).
