

S2 Table. HLA-*DRB115:01 haplotypes in African Americans**

<i>DRB1</i> – <i>DQB1</i> Haplotype	Case (n)	Control (n)	
EUR <i>DRB1</i> *15:01 – <i>DQB1</i> *06:02	99	142	241
EUR <i>DRB1</i> *15:01– <i>DQB1</i> *X	30	49	79
	129	191	320

Two-by-two table of counts of *DRB1**15:01–*DQB1* haplotypes where *DRB1**15:01 is European and the identity of the *DQB1* allele on the haplotype is summarized. All HLA alleles had allele frequency greater than 0.005, and only *DRB1**15:01 alleles that were completely European were considered. *DQB1**X denotes any *DQB1* allele that is not *DQB1**06:02, and that there is no restriction on the ancestry of the *DQB1* allele. Note: *DQB1* alleles did not pass imputation quality cutoff of $r^2 = 0.80$ (see text for details).
