Campus Y bazaar opens its doors Nov. 2

In addition to interesting merchandise, the bazaar will offer a treat that will serve coffees and teas from various parts of the world, as well as pastries and other light foods during bazaar hours. The bazaar is run by WU students, with proceeds going to the Campus YMCA-YWCA to help finance their service and educational projects. In addition, the bazaar serves as an educational experience for students.

Cochairing the bazaar committee are WU seniors Keith A. Slobodien and Richard J. Isaacson.

Billboards still clutter landscape despite federal law, Mandelker says

In the late 1920s, WU's YWCA initiated an annual one-day exhibition of articles from other lands to expose the campus community to something about foreign cultures. But exhibit viewers wanted to buy the products, and eventually the merchandise was put on sale. The program in international education became the International Bazaar, an event that continues to be held to this day.

For more than 50 years, the Campus Y's International Bazaar has offered unusual items from around the world, inviting St. Louisans to "shop abroad" for items from other lands to expose the campus community to something about the world.

One of the impressions left over from President Lyndon Johnson's Great Society was that billboards would fast become artifacts of our motoring past. Hadn't Congress, with the passage of the 1965 Highway Beautification Act, stamped "Post No Bills" on all the signs along our major highway systems? Apparently not. A drive along a major thoroughfare in most states today brings a traveler eyeball to billboard with "America First?"发生于任何时期在公路历史。所以发生了什么？发生了"见美国第一"的情况。

According to Daniel Mandelker, WU professor of law and a land-use expert, the Highway Beautification Act was underfunded, riddled with loopholes and "perverted" by amendments. Mandelker says that prohibited all signs within 660 feet of interstate and primary highways. The act was as good as dead.

If it passes," says Mandelker, "the program is as good as dead." Billboards, which had developed in the history of automobiles, had become artifacts of our motoring past. In the late 1960s, an environmental target because of their great numbers. The 1965 act contained one title that prohibited all signs within 600 feet of interstate and primary highways. The most important exception to this rule were all zoned and unzoned industrial and commercial areas. The states could lose federal highway aid if they had not...
A $12,000 first prize for approximately 12 months of travel abroad has been awarded to Zachery Davis by the National Institute for Architectural Education (NIAE). Davis entered the 1982 International Competition for the William Van Alen Architect Memorial summer, only a few months after earning a Fellowship as a graduate student in the Education (NIAE). Davis entered the five-week program. The group has been awarded to Zachery Davis by the AIA.

Davis also was made an honorary member of the Frederick Widman Prize for 1982. It is awarded to a member of the graduating class in recognition of his or her scholarly achievements, character, leadership, and professionalism.

Winning awards has become a Davis habit. A little over a year ago, the Prestressed Concrete Institute (PCI) awarded him its second prize of $500 and an plaque for his entry in the 1980-81 Architectural Prestressed Concrete Student Design Awards Program. Concurrently, PCI awarded the WU School of Architecture $200 in recognition of Davis's achievement.

Zachery Davis, with his design for a Japanese study center.

For the first time, Lever Brothers, the leading manufacturer of consumer products, is part of a wider move to expand the School of Engineering’s professional development programs, said engineering school dean James M. McElveen. The technical writing program is being marketed to a broader industrial audience, and additional on-site programs and new short-term seminars are being designed.

Raymond Hall, WU technical writing instructors. Individual conferences also have been held, providing more personal attention.

The program at Lever Brothers, a lead manufacturer of consumer products, is part of a wider move to expand the School of Engineering’s professional development programs, said engineering school dean James M. McElveen. The technical writing program is being marketed to a broader industrial audience, and additional on-site programs and new short-term seminars are being designed.

Robert Kennedy, president of Stanford University, will deliver the Fourth Annual Thomas S. Hall Lecture at 11 a.m. Wednesday, Nov. 3, in Edison Theatre. He will speak on “The Social Sponsorship of Innovation.”

Kennedy became President in 1980 after serving 20 years on its faculty. From 1977-79, Kennedy was commissioner of the Food and Drug Administration. He is coauthor, with W. H. Teller, of the book, The Biology of Organisms.

The lecture was established in honor of Thomas S. Hall, University Professor Emeritus of Biology and History of Science, with gifts from friends and colleagues. It provides a forum for outstanding scientists concerned with the interaction of science and society. Hall has been at WU for 36 years and served for 12 years as dean of the WU College of Liberal Arts (now Arts and Sciences) in the 1950s.

Donald Kennedy
Campus Notes

Harold J. Brandon, affiliate professor of mechanical engineering, was the recipient of the 1982 Presidential Award from the Master Brewers Association of the Americas, presented in Toronto, on Sept. 21. The award recognizes the greatest contribution to the brewery packaging field. This year’s award to Brandon was based on two technical papers he published in 1981 titled, “Fluid Flow Analysis of Beer Filling Valves,” and “State-of-the-Art Methodology for the Evaluation of Pasteurizer Heating and Cooling Processes.”

Alice Hanson Jones, professor emeritus of economics, was installed as president of the Economic History Association at its annual three-day meeting in Baltimore Sept. 23-25. Jones chaired the program committee that selected the meeting’s general theme, “Measurement of Levels of Living” in any country in any century. Participants from the United States, Australia, Canada, Europe and Israel attended meetings, receptions at local universities and an exhibit on “Levels of Living: 20th-Century Baltimore” at the library of the University of Maryland-Baltimore County.

Robert A. Rouse, associate director, Center for the Study of Data Processing, appeared as guest speaker at the October meeting of the St. Louis Chapter of the Association for Systems Management, a national organization for data processing professionals. In a talk titled “The Future of Computing and the Systems Professional,” Rouse voiced the need for current academic and professional development strategies to undergo fundamental change in order to meet future information demands.

Harold W. Shipton, professor of electrical engineering and chairman of WU’s Biomedical Engineering Program, has been appointed chairman of the Committee on Instrumentation Standards of the International Federation of Societies for Electroencephalography and Clinical Neurophysiology.

Ronald A. Feldman, professor of social work, spoke on “International Development and the Prevention of Mental Illness” at a three-day Inter-University Consortium on International Social Development in Brighton, England, in August. Feldman will attend a conference of the American Society of Criminology on Nov. 6 in Toronto, where he will speak on his latest research on anti-social children. His book, St. Louis Community: The Effective Treatment of Anti-Social Youth, details the treatment of more than 1,000 anti-social St. Louis children by integrating them with pro-social children. It was published in October by Prentice-Hall.

Wayne T. Hanebrink, associate dean, College of Arts and Sciences, participated in a panel discussion on “Special Concerns for Multiversities” at the October meeting of the Academic Advising Association of the International House. The telephone number is 889-5958.

Social Science Council, AAUW grants available

The Social Science Research Council and the American Association of University Women Educational Foundation will award a number of fellowships and grants for the 1982-83 academic year in various fields. The Social Science Research Council awards fellowships mostly for doctoral and post-doctoral work, while the AAUW Educational Foundation funds women with postdoctoral, dissertation and selected professions fellowships.

For more information, interested persons should contact the Office of International Studies, Room 201, Stix International House. The telephone number is 889-5958.

Western, primitive healing arts compared by Harvard anthropologist

Richard Katz, professor of anthropology at Harvard University’s School of Education, will speak on the role of healers and the training of medical practitioners in different societies at 3:30 p.m. Thursday, Oct. 28, 101 Lopata Hall.

Katz’s lecture, which is free and open to the public, is titled “The Training of Healers Among the Kung Bushman, Fiji Islanders and Western Societies: A Cross-Cultural Perspective.” The lecture is part of the Anthropology Lecture Series on Health and Anthropology.

Katz has conducted fieldwork among the Kung bushmen of the Kalahari, a desert region in southern Africa, and the Fiji Islanders. In his recent book, Boiling Energy, Katz describes and analyses traditional healing dances of the Kalahari King.

Katz shows that the dance, in addition to being a technique for treating the sick, “serves as a way of expressing the religious sentiments of the group and of maintaining cohesiveness in the Kung community.”

Sellers added that all societies diagnose illness, develop healing methods and recognize medical specialists, but in different ways. Katz uses anthropological methods of cross-cultural comparison to contrast Western medical systems with those of other cultures.

Lectures

Thursday, Oct. 28
8:15 p.m. WU Chapter of AIBSEC Seminar, "The Overseas Chinese Businessman." Edison Theatre. Admission: $3. $10 for the WU community. For more information, call 899-6540.

1:00 p.m. Black Arts and Sciences Festival Seminars, lectures and topics to be announced. Third floor, Woman's Building.

1:30 p.m. George Warren Brown School of Social Work Colloquium, "Formulation of Client Problems in Weight Treatment Plans," Emilia Frecone, WU assist. prof. of social work, and Aaron Rosen, WU prof. of social work and psychology. Brown Hall Lounge.

2:30 p.m. CSAB Public Choice Workshop, "Why So Much Stupidity," Peter Aranson, Law and Economic Research, Steinberg.

4 p.m. Department of Physics Colloquium, "Galaxies, Clusters and Invisible Man," Edward S. Ulrich, Dept. of Physics, Cornell U. 240 Crou.

4:30 p.m. Department of Philosophy, "The Role of Matter in Jewish Aristotelian Philosophy," Man Sai Baba, Erlendur Haraldsson, prof. of philosophy. 472 McDonnell Medical Sciences Bldg., 4565 McKinley.

Friday, Oct. 29

1 p.m. History of Medicine Club Lecture, "Doctors — Physician, Physicist, or Physician?" Thomas S. Hall, WU prof. emeritus of biology and history of science, Medical Lib. Annex. 615 Taylor Ave.

4:30 p.m. School of Fine Arts Dorothy Dushkin Lecture, "Visual Communication: A Perceptual Mode of Inquiry," Eric J. Turgel, grad. assist., Dept. of Mechanical and Industrial Engineering, U. of Ill. Urbana. 100 Cupples II.

4:30 p.m. Department of Philosophy Lecture, "Are They Right of the Game?" Paul A. Booth, prof. of philosophy. UH by Huret Lounge, Duncaker Hall.

Saturday, Oct. 30
8 p.m. Beaux Arts Costume Ball, sponsored by the WU School of Fine Arts. Refreshments will be served. Costumes should be worn. Tickets $5 at the door. Duncaker Hall Gallery. For details, call 899-6540.

Sunday, Oct. 31
4 p.m. Black Arts and Sciences Festival Max Smith Blous Collection Opening Lecture, "Understanding in Black Memorabilia." Jesse Carey Smith, brand illustrator. Fek U. Human Lounge. Duncaker Hall (the Blous collection will be on display through Nov. 9) level three, Olin Library.

Monday, Nov. 1
2:30 p.m. Department of Chemical Engineering Colloquium, "Coevolution of Small Drops of Bubbles in Phase Interfaces," John C. Ginzburg, assoc. prof. of chemical engineering, Northwestern U., 100 Cupples II.

Tuesday, Nov. 2

Wednesday, Nov. 3

4 p.m. History of Medicine Club Lecture, "Doctors — Physician, Physicist, or Physician?" Thomas S. Hall, WU prof. emeritus of biology and history of science, Medical Lib. Annex. 615 Taylor Ave.

4:30 p.m. School of Fine Arts Dorothy Dushkin Lecture, "Visual Communication: A Perceptual Mode of Inquiry," Eric J. Turgel, grad. assist., Dept. of Mechanical and Industrial Engineering, U. of Ill. Urbana. 100 Cupples II.

4:30 p.m. Department of Philosophy Lecture, "Are They Right of the Game?" Paul A. Booth, prof. of philosophy. UH by Huret Lounge, Duncaker Hall.

Thursday, Nov. 4

2:15 p.m. Department of Mechanical Engineering Colloquium, "A State Variable Model for Fugacity," Eric J. Turgel, grad. assist., Dept. of Mechanical and Industrial Engineering, U. of Ill. Urbana. 100 Cupples II.

4:30 p.m. Department of Philosophy Lecture, "Are They Right of the Game?" Paul A. Booth, prof. of philosophy. UH by Huret Lounge, Duncaker Hall.

Friday, Nov. 5
6 p.m. WU Student Center Hour, "Watching the Fox Theatre," Mary Strauss, who restored the Fox Theatre in St. Louis. Sponsored by the WU Department of Pathology. 104 Lopata.

Sports

Saturday, Oct. 30
1 p.m. WU Cheerleading, WU vs. Fontbonne College. Women's Bldg.

Sunday, Oct. 31
7:30 p.m. Soccer, WU vs. Quincy College. Francis Field.

Saturday, Nov. 6
1 p.m. Women's Volleyball, WU vs. Stephens College. Women's Bldg.

8:30 p.m. Football, WU vs. Williams College. Francis Field.

Calendar Deadline

The deadline to submit items for the Nov.-20 calendar of the WU Record is Oct. 26. Items must be typed and state time, date, place, nature of event, sponsor and admission cost. Incomplete items will not be printed. If available, include speaker name and identification and the title of the event. Those submitting items, please include your name and telephone number. Address items to King McElroy, calendar editor, Box 8.
